## Chapters

• <b>Chapter 1: INTRODUCTION</b> -----	<b>1-8</b>
1.1 Background-----	1
1.2 Department of Health Services (DoHS)-----	2
1.3 Source of information-----	5
1.4 Structure of the Report-----	5
• <b>Chapter 2: CHILD HEALTH</b> -----	<b>9-68</b>
2.1 Immunization-----	9
2.2 Nutrition-----	26
2.3 CB-IMCI and Newborn Care-----	50
• <b>Chapter 3: FAMILY HEALTH</b> -----	<b>71-108</b>
3.1 Family Planning-----	71
3.2 Safe Motherhood and Newborn Health-----	80
3.3 Female Community Health Volunteer (FCHV)-----	91
3.4 Primary Health Care Outreach (PHC/ORC)-----	95
3.5 Demography and Reproductive Health Research-----	98
3.6 Adolescent Sexual and Reproductive Health-----	103
• <b>Chapter 4: DISEASE CONTROL</b> -----	<b>111-190</b>
4.1 Malaria-----	111
4.2 Kala-azar-----	118
4.3 Lymphatic Filariasis (LF)-----	123
4.4 Dengue-----	127
4.5 Zoonoses-----	130
4.6 Epidemiology and Disease Outbreak Management-----	133
4.7 Disaster Management-----	135
4.8 Surveillance and Research-----	140
4.9 Tuberculosis-----	144
4.10 Leprosy-----	156
4.11 HIV/AIDS and STI-----	174
4.12 Eye Care-----	186
• <b>Chapter 5: CURATIVE SERVICES (Inpatients/OPD services)</b> -----	<b>191-204</b>
• <b>Chapter 6: SUPPORTING PROGRAMS</b> -----	<b>207-262</b>
6.1 Health Training-----	207
6.2 Health Education, Information and Communication-----	216
6.3 Logistic Management-----	223
6.4 Public Health Laboratory Services-----	235
6.5 Personnel Administration Management-----	239
6.6 Financial Management-----	243
6.7 Management-----	250
6.8 Primary Health Care Revitalization-----	257
• <b>Chapter 7: MONITORING AND EVALUATION</b> -----	<b>263-276</b>
• <b>Chapter 8: OTHER DEPARTMENT</b> -----	<b>279-290</b>
8.1 Drug Administration-----	279
8.2 Ayurveda-----	284
8.3 Homeopathic-----	289
• <b>Chapter 9: DEVELOPMENT PARTNERS</b> -----	<b>293-302</b>
<b>ANNEXES</b>	
• Annex 1: Activities carried out in FY 2071/72 by programs-----	305
• Annex 2: Target for 2072/73 by programs-----	319
• Annex 3: Health Services (Estimated Target Population, Raw/Analyzed data sheets)-----	331

## ACRONYMS

ACT	Artemisinin-based Combination Therapy
AEFI	Adverse Events Following Immunization
AES	Acute Encephalitis Syndrome
AFP	Acute Flaccid Paralysis
AI	Avian Influenza
AIDS	Acquired Immuno-deficiency Syndrome
AMR	Anti Microbial Resistant
AMTSL	Active Management of Third Stage of Labor
AR	Anti-Retroviral Therapy
BMI	Body Mass Index
BPCR	Birth Preparedness and Complication Readiness
CB-IMCI	Community Based Integrated Management of Childhood Illness
CB-NCP	Community Based Newborn Care Program
CMAM	Community-based Management of Acute Malnutrition
DOTS	Directly Observed Treatment Short Course
DSS	Dengue Shock Syndrome
DST	Drug Susceptibility Testing
EQA	External Quality Assurance
GFATM	Global Fund against AIDS, TB and Malaria
HPAI	Highly Pathogenic Avian Influenza
IDA	Iron Deficiency Anaemia
IDD	Iodine Deficiency Disorder
IDU	Injecting Drug Users
IFA	Iron and Folic Acid
IMAM	Integrated Management of Acute Malnutrition
IMNMP	Intensification of Maternal and Neonatal Micronutrient Program
IPD	Immunization Preventable Diseases
IRS	Indoor Residual Spraying
JE	Japanese Encephalitis
LF	Lymphatic Filariasis
LLIN	Long-lasting Insecticide Treated bed Net
MARP	Most At Risk Population
MCV	Measles Containing Vaccine
MDVP	Multi Dose Vial Policy
MIYCN	Maternal, Infant and Young Child Nutrition
MMNP	Multiple Micronutrient Powder
NEQAS	National External Quality Assurance Scheme
NHP	National Health Policy
NHSP	Nepal Health Sector Program
NHTS	National Health Training Strategy
NIC	National Influenza Centre
NISN	National Influenza Surveillance Network
NML	National Medicines Laboratory
NMR	Neonatal Mortality Rate
NNSC	National Nutrition Steering Committee

NQC	National Quality Control Centre
NTAG-M	National Technical Advisory Group for Malaria
OPV	Oral Polio Vaccine
ORS	Oral Rehydration Solution
ORT	Oral Rehydration Therapy
OTP	Out-patient Therapeutic Program
PAL	Practical Approach to Lung
PEM	Protein-Energy Malnutrition
PEP	Post Exposure Prophylaxis
PHC/ORC	Primary Health Care Outreach Clinics
PHCRD	Primary Health Care Revitalization
PLAMAHS	Planning and Management of Assets in Health Care System
PLHA	People Living with HIV/AIDS
PLHIV	People Living with HIV
PMTCT	Prevention of Mother-to-Child Transmission
PPH	Post-partum Haemorrhage
PPM	Public Private Mix
PR	Prevalence Rate
PSBI	Possible Severe Bacterial Infection
PWID	People Who Inject Drugs
RBM	Roll Back Malaria
REACH	Reaching to End Child Hunger and Malnutrition
REC	Reaching Every Child
RED	Reaching Every District
RHCC	Reproductive Health Coordination Committee
SAM	Severe Acute Malnutrition
SAS	Safe Abortion Services
SLTHP	Second Long Term Health Plan
SMART	Standardized Methodology of Nutrition Assessment during Relief and Transition
SOP	Standard Operating Procedures
STI	Sexually Transmitted Infection
SUN	Scaling-Up Nutrition
Td	Tetanus diphtheria
TTI	Transfusion Transmissible Infection
VAD	Vitamin Deficiency Disorder
VAS	Vitamin A Supplementation
VBD	Vector-Borne Diseases
VCT	Voluntary Counseling and Test
VPD	Vaccine Preventable Diseases
VSC	Voluntary Surgical Contraception
WASH	Water, Sanitation and Hygiene

## MESSAGE

Nepal has made a remarkable progress in improving health outcomes of the people of Nepal over the last two decades. There have been notable improvements in life-expectancy at birth; marked reductions in the maternal mortality rate and under-five mortality rate; and good progress towards prevention and control of communicable and non-communicable diseases. Nepal has succeeded in achieving 'polio-free' status. These achievements in the health sector would not have been possible without the continuous support from various agencies and stakeholders, government and non-government agencies, development partners, civil society and media. The policies and strategies formulated by the Ministry of Health have been instrumental in achieving these outcomes. Ministry of Health is committed to achieving 'Universal Health Coverage' by providing quality health services to all the citizens in line with the aspirations of the Constitution of Nepal 2015, Nepal Health Policy 2014 and Nepal Health Sector Strategy 2015-20. I believe on effective implementation of the Nepal Health Sector Strategy 2015-20 will ensure access to free basic health care services with quality, while encouraging meaningful contribution from the other sectors and making the health service delivery more transparent and accountable.

In the year 2015, Nepal was shaken by an earthquake which claimed more than 8,000 lives including 18 health workers and volunteers, injuring over 22,000 people and damaging a large number of health facilities across the country. Despite this aftermath, the health sector performed well not only in responding to the devastating earthquake but also in recovery of the health services at the community level immediately after the earthquake. The lessons learnt from this response will help the Ministry and its stakeholders in better preparation and management of any possible disasters in the future.

I am pleased to introduce this Annual Report of Department of Health Services for fiscal year 2071/72, which is a comprehensive document based on the outcome of the performance review conducted against the set targets at district, regional and national levels. It provides detailed and updated information with regard to resources, services provided, analytical trends and disease patterns in the country.

I am hopeful that, the 21<sup>st</sup> Annual Report of Department of Health Services will be helpful for managers, planners, decision makers, evaluators, researchers and any other stakeholders in analysing the situation and making evidence based decisions for further improvement in the health sector.

I would like to extend my sincere thanks to the Department of Health Services and all those who were involved in preparation of this report. I also offer my thanks to the external development partners for their continuous support.

Ramjanam Chaudhary  
Minister for Health

## MESSAGE

Government of Nepal, Ministry of Health (MoH) is committed to deliver highest possible quality of health care to the people. The Ministry is committed to translate the aspirations of the Nepal Health Policy 2014 and the Nepal Health Sector Strategy 2015-20, in achieving the "Universal Health Coverage" into practice in collaboration with public, private and development partners. I am pleased to note that several outstanding achievements have been made in the health sector in the last decade. The health outcomes achieved so far are the results of joint efforts of the Ministry, the development partners and health sector stakeholders.

It gives me immense pleasure to note that the health sector has performed well not only in responding to the devastating earthquake 2015 but also in recovery of the health services at the community level immediately after the earthquake. The lessons learnt from this response will help the Ministry and its stakeholders in better preparation and management of disasters.

This report is a comprehensive document based on the performance reviews at various levels, which provides detailed and updated information with regards to resources, services provided, analytical trends and disease patterns in the country. The demand for this document both within Nepal and elsewhere proves its real significance.

I am hopeful that, this 21<sup>st</sup> Annual Report of Department of Health Services will be helpful for policy makers, managers, decision makers, evaluators, researchers and students. I hope this document will be very helpful for further improvement of health services in Nepal.

I would like to extend my sincere thanks to the Department of Health Services and all those who contributed in preparation of this report. I would also like to thank our external development partners for their continuous support.

## PREFACE

It is a matter of great pleasure for me to have the Annual Report of the Department of Health Services for the year 2071/72 (2014/2015) at anticipated time. This report is being published regularly since the last twenty-one years. It is a comprehensive report covering all major activities and achievements of Department of the Health Services along with other departments within the ministry. It also includes the contributions of external development partners, non-governmental organizations and private sector. This report has indicated progress in many areas of health service delivery during the last fiscal year, the year in which the whole country was shaken by a devastating earthquake claiming more than 8,000 lives including 18 health workers and volunteers, injuring over 22,000 people and damaging a large number of health facilities. The status and progress explained in this report are the achievements accomplished in such a devastating situation. I strongly feel that additional efforts are needed to maintain the quality in health service delivery and to ensure equity. I would like to thank all those who contributed to the health sector in performing so good at this difficult time.

This report serves as commendable tool to decide on replicating the good aspects of the program and also learn lessons from less successful ones. I appreciate the hard work done by Department of Health Services, Regional Health Directorates, District Health Offices/District Public Health Offices, Hospitals and all health personnel including Female Community Health Volunteers (FCHVs) working at various levels of health system for achieving these outcomes. They deserve heartfelt thanks for improving health status of the Nepalese citizens.

Finally, I extend my sincere thanks and congratulations to the Director General of the Department of Health Services, Director of Management Division and his team especially HMIS Section team and all Divisional/Centre Directors and other concerned personnel who contributed to this report.

## FOREWORD

This is the 21<sup>st</sup> edition in the uninterrupted series of Annual Reports published by the Department of Health Services, Ministry of Health. This annual report is one of the outcomes of the annual performance review workshops conducted at various levels. It reflects the performances of all major programs and activities implemented by various health institutions at all levels from community to centre. The report covers major health issues, challenges and way forward to improve the health service delivery.

The facts and figures presented in the report are based on the information generated by Health Management Information System (HMIS) and other sources in the health sector. This report provides comprehensive information regarding health policies, strategies, plan activities, service coverage and achievements made in the last three years, as well as program issue that emerged during the fiscal year 2071/72. This report also covers the progress of activities carried out by other departments under Ministry of Health and External Development Partners (EDPs) during the reference years.

I am pleased to state that most of the activities planned by different Divisions/Centres have been carried out successfully, even in the year when the country was hit by a devastating earthquake. This achievement would not have been possible without the commitment and dedication of the staff of the Department of Health Services working in the difficult and remote areas. However, more collaborative efforts are required to deliver quality health care services meeting the aspiration of the people as envisaged by Nepal Health Sector Program.

I would like to extend my sincere appreciation to all Female Community Health Volunteers, all categories of health workers working in the health facilities for their untiring efforts in providing health services at the community level. I would also like to thank the Regional Health Directors, Directors of Division and Centres, Chief of Sections for their meticulous support to the district teams to execute their activities. My appreciation also goes to all the External Development Partners, INGOs, NGOs and Private health sector for contributing significantly to improve health status of people at all corners of the country.

I wish to place on record my appreciation and grateful thanks to all the officials of the Department of Health Services for their support and coordination. Finally, I would like to thank the Director of the Management Division and in particular the staff of the HMIS Section for the valuable service rendered in preparation and publication of this report.

## Acknowledgement

It is my pleasure to offer 21<sup>st</sup> Annual Report, of the Department of Health Services (DoHS) for the fiscal year 2071/72 (2014/2015). This report is also a reflection of annual performance review workshops conducted at various levels of health service delivery. It is a compilation of major activities carried by the health institutions at all levels. The data presented in this report is based on the information submitted by the institutions to the Health Management Information System (HMIS) and others sources.

The report includes information about health care services and activities of public and private institutions providing health care to the nepalese people. It also highlights the trend and patterns in service coverage and continuum of care. Furthermore, it also informs us about the program target and achievement with respect to budget allocation and expenditure. The report not only identifies pertinent issues, problems and constraints but also suggests actions to be taken to address these issues in order to improve the services in the day to come. This imperative publication provides detailed statistical analysis of health program against its target and indicators.

I express my sincere gratitude to the Hon'ble Minister for Health Mr. Ramjanam Chaudhari and Hon'ble State Minister for Health Mr. Md. Mustak Alam for their commendable messages and direction. I am also thankful to the Secretary for Health Mr. Shanta Bahadur Shrestha for providing a meaningful preface about the report. Dr. Pushpa Chaudhary, Director General of the Department of Health Services deserves special thanks for her thoughtful guidance.

I also extend my thanks to the Directors of the different Divisions, Centers and Section Chiefs for providing analytical reports. My colleague in the Management Division Mr. Mukti Nath Khanal, Chief of HMIS Section and his team members Mr. Deepak Dahal, Mr. Diwakar Sapkota, Mr. Binod Poudel, Mr. Gunja Bahadur G.C, Mr. Girish Jha, Mr. Navaraj Bhatta, Mr. Gopal Adhikari, Mr. Puspa Lal Shrestha, and Mr. Durga Nath Khanal deserve special appreciation for their hard work and effort to bring out this report. I feel indebted to all those who worked restlessly for recording, reporting, compiling, processing and analyzing service delivery and progress reports timely without which this report publication would not have been possible.

I take this opportunity to offer my sincere appreciation to EDPs, INGOs and NGOs who have joined us in service delivery programs and submitting their brief annual activity progress report.

Finally, I hope that this report will be of great help in strengthening the health services in Nepal. I also hope that it will provide valid a information to all those who work for uplifting the health status of all citizens, particularly the poor and vulnerable group of the nepalese society.

Dr. Bhim Acharya  
Director

May, 2016

# National Health Policy- 2071

## 1. Background

The relationship between health of general population and overall development of country is intertwined. Progresses made in the health sector are considered the main indicators of development. Despite poverty and conflict in past decades, Nepal has achieved remarkable success in the health sector.

In the context of health as a fundamental right of the people established by Nepal's constitution, it is the responsibility of the nation to maintain the achievement made in controlling communicable diseases, to reduce infant and maternal mortality rate to the desired level, to control the ever increasing prevalence of non-communicable diseases and timely management of unpredictable health disasters, and to provide quality health services to senior citizens, physically and mentally impaired people, single women especially poor and marginalized and vulnerable communities.

This national health policy 2071, a complete revision of the national health policy 2048, has been introduced to promote, preserve, improve and rehabilitate the health of the people by preserving the earlier achievement, appropriately addressing the existing and newly emerging challenges and by optimally mobilizing all necessary resources through a publicly accountable efficient management.

## 2. Past Attempts

In Nepal, only limited people had access to ayurvedic and modern health care services at Singhadarbar Vaidyakhana established nearly 300 years ago, and Bir Hospital established in 1947; most ordinary people had to rely on traditional healers such as dhamijhakri, jharphuke, guvaju etc.

After the introduction of the periodic developmental plan in the country from B.S. 2013, a planned development process began also in the health sector. In this process the first 15 year long-term health plan and the second 20 year long-term health plan were introduced in B.S.2032 and 2054 respectively.

People actively and remarkably participated in health programs such as Smallpox Eradication, Malaria Control, Tuberculosis Control, Polio Eradication, Filariasis Elimination, Leprosy Elimination, as well as regular administration of vitamin 'A' to the children. Female Community Health Volunteer program started from B.S. 2045 in Nepal has been a model program for the whole world. Meanwhile, a policy for integrating vertical health programs from the perspective of cost effectiveness and ease of implementation was adopted and the integration of malaria, leprosy, tuberculosis, smallpox, and family planning / maternal child health programs was completed by B.S. 2047.

After the opening for private-sector investment in the health sector through the enactment of The National Health Policy 2048, Institutes for the study of health sciences as well as private health facilities were established in massive scale. The involvement of private sector in health has been mainly in curative services, production of medicines and equipment, and they are concentrated in urban areas. At the same time, Nepal Health Sector Program-1 (2060-2065) and Nepal Health Sector Program-2 (2066-2071) have been formulated and implemented in order to enhance the effectiveness of the investment of Government, Non-Government and Donor agencies.

## 3. Current Situation

Due to concerted efforts of past sixty years, significant achievements have been made in the health sector. Network of health facilities providing primary health care services have been accessible to all people. Though concentrated in urban centers and confined to curative services only, the participation of private sector has been increased. Human resources required for almost all levels of

health care are being produced within the country. Country is increasingly becoming capable to producing high and medium level human resources. About four dozens of pharmaceutical companies currently operating in the country have developed the capacity of producing 40 percent of medicine required by the country.

Likewise, though the services are not widely available, a number of specialized care facilities relating to eye, cancer, heart, kidney, neurology, orthopedic, and plastic surgery have been established under Government and Non-Government sector. Diagnostic centers and lab services have been strengthened and expanded. The major health problems of past decades that have been Malaria, Tuberculosis, Diarrhea, respiratory diseases, Typhoid, Chickenpox, Whooping Cough, Diphtheria, Tetanus, Filariasis, Kala Ajar, Trachoma, HIV, are in control and burden of these diseases are in descending trend. Smallpox has been eradicated and polio is down to zero in Nepal. Leprosy is in state of elimination. Maternal and neonatal tetanus has been eliminated and trachoma is in process of elimination. Campaign for control of filarial disease is ongoing.

Various regulatory bodies (Medical Council, Nursing Council, Pharmacy Council, Health Council, Ayurvedic Council, National Health Research Council) responsible for ensuring quality of production of human resource for health, health care, drug supply and researches, several institutions have been established and are operational.

Collaboration and partnership with health related international organizations, donor communities, and countries have been developed. Health awareness in general public has been increased. Considerable development in education, communication, agriculture, and food supply has contributed to the development of health.

As the result of above efforts, remarkable progress has been made in the health sector which is justified by the indicators in table below. Indicator	Decade of B.S. 2007 (A.D. 1950)	B.S. 2048 (A.D. 1991)	B.S. 2068 (A.D. 2011)	Source
a) Infant mortality rate (per thousand live births)	200	107	46	Nepal Health and Demographic Survey, 2011
b) Maternal mortality rate (Per 100,000 live births)	1800	850	170	Millennium Development Goal Progress Report, 2011
c) Average life expectancy (year)	32	53	68.8 (A.D. 2011)	Nepal Human Development Index Report, 2014
d) Under 5 children mortality (per thousand)	280	197	54	Nepal Health and Demographic Survey, 2011
e) Total fertility rate	7	5.8	2.6	Nepal Health and Demographic Survey, 2011
f) Fully immunized children (Percentage)	70	88/87		Nepal Health and Demographic Survey, 2011

#### 4. Issues and Challenges

In spite of considerable achievement in the health sector and country progressing towards positive direction, there are still many problems and challenges that need to be addressed. Some major problems and challenges are as follows:

**Major Issues:**

- Citizens of all localities, levels, classes, groups and communities do not have yet easy and affordable access to health care as aspired by the constitution.
- Despite the continuous effort of the state, about a half of under 5 children and women of reproductive age are undernourished whereas the problem of obesity is growing among urban population.
- Health problems created by the situations like climate change, raising food insecurity and natural disasters are on the rise.
- Prevalence of cancer, hypertension, diabetes, and illnesses related to heart, kidneys, liver, lungs, along with other non communicable diseases like mental illnesses, dental problems are on the rise. Likewise, deaths due to road and injuries are increasing day after day.
- State has not been able to provide adequate priority on primary health care programs in urban areas, health of senior citizens, mental disorders, genetic and congenital diseases, environmental health, occupational hazard, sexual and reproductive health of adolescents and health promotion on school-age children, etc.
- Access to quality medicine for people, right use of medicine, production and distribution of essential drugs and medical equipments within the country are not effective and people oriented.
- Laboratory services and medical equipments are not yet up to the quality standard.
- The issues such as complexities seen in rational production of various skilled health professionals that take social responsibility, brain drain of health professionals, transfer of health and other personnel, continuous presence of health personnel in health facilities, security of health personnel, etc., have not yet been addressed in a planned way.
- Not been able to mobilize private-sector investment in health for the benefit of the people and divert their investment to appropriate areas.
- Not been able to effectively regulate health sector according to law and rules. There is a lack of sufficient harmony between the organizations producing health personnel and the organizations utilizing them.

**Major Challenges:**

- There is a need for appropriate implementation of a two way referral system in order to improve the quality standard of health care services.
- There is a need for immediate management of highly infectious diseases (like Bird-flu) or potential new diseases, controlling of epidemic, emergency preparedness for minimizing human casualty due to earthquake and other natural disasters and retrofitting of hospitals and other health institutions.
- In order to reduce new born, child and maternal mortality rate, there is a need for maximizing the effectiveness of controlling Diarrhea, acute respiratory infection, Malaria, Kala Azar, Encephalitis, Filariasis, Dengue, Tuberculosis, Leprosy, HIV, and other diseases that can be prevented through immunization.
- It has been difficult to control the spread of human and animal related diseases due to the open border with neighboring countries.

- There is a need for creating opportunities by strengthening health institutions down to the grass root level and establishment of a social health insurance system so that health services, health education and information are equally available for all citizens.
- There is a need for increasing state's investment to the health sector in proportion to population growth.
- There is a need for urgently addressing regional disparity in health indicators.
- There is a need for implementing health-related acts, rules, policies, strategies and action plan in a comprehensive and integrated manner. Likewise, country is committed to the international treaties and agreements, and therefore, it should continue actively participating for their successful implementation.
- The nation being a party to a convention on the Rights of Persons with Disabilities, it needs to increase investment for providing all necessary health services to the people with blindness, visual impairment, hearing impairment, mental impairment, and physical impairment.
- There is a need for empowering local government and holding them accountable for health services along with improving people participation in rural health programs.

## 5. Need for new policy, guiding principles and vision

As the existing health policy 2048 is insufficient to ensure citizen's right to quality health care through appropriate response to the above problems and challenges, this new national health policy had to be promulgated. While preparing this policy, a few guiding principles were formulated and based on those guiding principles, policies, and strategies have been proposed. The National Health Policy 2071 will be implemented based on the guiding principles presented below:

- As a fundamental right of citizens, provision for obtaining quality health care will be ensured.
- Right to information related to the health services provisioned for citizens will be ensured.
- In order to ensure the health services provisioned by the state is accessible to poor, marginalized, and vulnerable communities; based on equality and social justice, programs will be designed and implemented accordingly.
- People will be participated in every kind and level of health services.
- Policies and programs related to health promotion, protection, improvement, and rehabilitation will be gradually incorporated into state's other policies.
- Participation of private sector will be promoted ensuring citizen's easy access to quality health services at fair price.
- Resources obtained from internal and external agencies will be mobilized for effective implementation of this policy and the programs formulated under this policy.
- All health services, provided by government or organized differently through a network of government and private sector, will be regulated.
- Flow of health services will be made fully accountable.

This policy has been deemed necessary for successful implementation of the above guiding principles.

### 5.1 Vision

All Nepalese citizens would be able to live productive and quality life; being physically, mentally, socially, and emotionally healthy.

## **5.2 Mission**

Ensure the fundamental right of citizens to remain healthy through a strategic collaboration among service provider, beneficiaries, and stakeholders and optimum utilization of available resources.

## **5.3 Goal**

To ensure health for all citizens as a fundamental human right by increasing access to quality health services through a provision of just and accountable health system.

## **5.4 Objectives**

1. To make available free the basic health services that existed as citizen's fundamental right.
2. To establish an effective and accountable health system with required medicines, equipments, technologies and qualified health professional for easy access to acquire quality health services by each citizen.
3. To promote people's participation in extending health services. For this, promote ownership of the private and cooperative sector by augmenting and managing their involvement.

## **6. Policies**

1. To make available in an effective manner the quality health services, established as a fundamental right, ensuring easy access within the reach of all citizens (universal health coverage) and provision of basic health services at free of cost.
2. To plan produce, acquire, develop, and utilize necessary human resources to make health services affordable and effective.
3. To develop the ayurvedic medicine system through the systematic management and utilization of available herbs in the country as well as safeguarding and systematic development of other existing complementary medicine systems.
4. To aim at becoming self-sufficient in quality medicine and medical equipment through effortless and effective importation and utilization with emphasis on internal production.
5. To utilize in policy formulation, program planning, medical and treatment system, the proven behaviors or practices obtained from researchers by enhancing the quality of research to international standard.
6. To promote public health by giving high priority to education, information, and communication programs for transforming into practice the access to information and messages about health as a right to information.
7. To reduce prevalence of malnutrition through promotion and usage of quality healthy foods.
8. To ensure availability of quality health services through competent and accountable mechanism and system for coordination, monitoring and regulation.
9. To ensure professional and quality service standard by making health related professional councils capable, professional, and accountable.
10. To mainstreaming health in every policy of state by reinforcing collaboration with health-related various stakeholders.
11. To ensure the right of citizens to live in healthy environment through effective control of environmental pollution for protection and promotion of health.

12. To maintain good governance in the health sector through necessary policy, structure and management for delivery of quality health services.
13. To promote public and private sectors partnership for systematic and quality development of health sector.
14. To increase the investment in the health sector by state to ensure quality and accessible health services and to provide financial security to citizens for medical cost and as well as effectively utilize and manage financial resources obtained from private and non government sector.

## 7. Strategies

1. **Following strategies (related to policy 1) will be adopted to make available in an effective manner the quality health services, established as a fundamental right, ensuring easy access within the reach of all citizens (universal health coverage) and provision of basic health services at free of cost.**
  - 1.1. Basic health service will be provided at free of cost by making acts relating to basic health service.
  - 1.2. As Nepal is the signatory of international convention on Rights of Persons with Disabilities, all necessary health services needed for people who are blinds, visually impaired, hearing impaired as well as mentally, cognitively and physically disabled will be included in urgent health service category.
  - 1.3. National health guidelines and protocols will be prepared and implemented to ensure all citizens have received standard quality health care by reforming basic health program of state for fulfilling basic health needs of citizens.
  - 1.4. Impartial service will be delivered on the basis of equality by strengthening programs delivering health services in rural areas as well as including marginalized groups in urban areas.
  - 1.5. Quality health treatment care of national standard will be catered by keeping priority on preventive and promotive service and by using proper medicine and technology.
  - 1.6. Nepal will be developed as regional hub for health tourism and medical science studies by confirming areas delivering highly specialized and international standard services and developing those areas.
  - 1.7. Integrated program of health service, care and support will be formulated and implemented according to the need of senior citizens.
  - 1.8. Current situation of managing infectious diseases will be modified and implemented under periodic plan on timely basis with essential additional immunization service. Respective services are implemented effectively on the basis of policies related to prevention and control of non communicable diseases, prevention and treatment of accidents and injury, and mental health.
  - 1.9. Affordable health services will be made available all over the country through telemedicine (ehealth).
  - 1.10. Arrangement of a doctor and a nurse along with other health technicians will be made available in every VDC and one nurse midwife in every ward according to population. Necessary number of health promotion and monitoring officer will be mobilized in every constituency to monitor quality of health service and make promotive health service available widely in local level.

- 1.11. Laboratory and x-ray service will be expanded respectively in VDC level health institutions.
- 1.12. Blood transfusion service will be made systematic in coordination with non-government sector by regulating through government sector.
- 1.13. Institutions providing specialized and highly specialized service will be established and expanded gradually for providing services accessible to the residents of all regions in country. Intensive care facility with specialists will be expanded to district level hospitals gradually on the basis of criteria. Effective two-way communication system will be arranged between health institutions at community level to highly specialized service providers to make treatment service systematic.
- 1.14. Arrangements will be made to provide pharmacy service owned itself by hospital and to distribute medicines to patients through qualified pharmacy personnel.
- 1.15. Periodic health related programs and action plans will be implemented by stating target based on important health and development indicators such as maternal mortality rate, infant mortality rate, under-five child mortality rate, average age. Reports from health institutions will be made more scientific, timely, reliable and periodic.
- 1.16. Primary Health care service will be decentralized gradually by making local government authorized and accountable for health services by increasing technical capability of local government.
- 1.17. Arrangement will be made to contact ambulance service using one symbol number throughout the country. Arrangement of service with essential medicines, oxygen, and skilled health personnel will be ensured in ambulance. Air ambulance service will be operated by making certain criteria for providing medical care by rescuing those in crisis.
- 1.18. Network of health personnel capable of making first aid treatment with essential drugs and equipment will be arranged within the distance of one hour maximum in major highways for treating injured people quickly.
- 1.19. At least one-village-one-health-institution will be established in the distance of 30 minutes maximum on the basis of geographical location and population ratio. Programs in periodic plans will be included to establish one primary health care center in every 20 thousand population and one 25-bed-hospital for every one hundred thousand population. Likewise one primary health care center will be established in every industrial area.
- 1.20. Mental health care service from the level of community to hospitals providing specialized service will be implemented gradually by including in periodic plan.
- 1.21. Family planning including sexual and reproductive health will be included as integrated form of service. Concept of Youth and adolescent friendly health service will be incorporated in all organizations delivering health services. Reproductive health act will be introduced.
- 1.22. Integrated child health program managing diseases relating to child will be implemented continuously through strengthening on timely basis.
- 1.23. Flow of health service related to oral, eye and ear care will be actively implemented throughout the country.
- 1.24. Establishment of referral hospitals on various subjects of medicines including dental and ear, nose, throat will be done.

- 
- 1.25. Development of international standard referral laboratory will be done by increasing capacity of national public health laboratory and national drug laboratory.
  - 1.26. Country being signatory to International treaty, agreements and commitments including treaty related to controlling tobacco will be implemented actively.
- 2. Following strategies (related to policy 2) will be adopted to plan, produce, acquire, develop, and utilize necessary human resources to make health services affordable and effective.**
- 2.1 Master plan will be implemented for managing and developing human resources in health sector along with projection of necessary workforce required within and outside the country. Expenditure in human resources will be considered an investment.
  - 2.2 Minimum integrated national curriculum will be implemented to produce human resources of various kinds at various levels in health sector having appropriate skills and knowledge capable of taking social responsibility according to national need. Educational institutions operating under private and government investment will be supported and regulated by creating high level mechanism with authority for monitoring educational institutions and quality of human resources produced there.
  - 2.3 Active and continuous presence of human resource in health sector will be ensured by creating an environment to make them work compulsorily in assigned duty. Special facility and opportunity will be created for health workers and their dependent families working in remote areas.
  - 2.4 Quality health services will be ensured by creating new positions of human resources by having skills mixed on the basis of population.
  - 2.5 Arrangement of one doctor along with 23 health workers will be ensured for every 10 thousand population gradually. Special arrangement will be made for remote and mountainous areas.
  - 2.6 Arrangements for encouragement of health workers including doctor will be done for enhancing their capacity by creating opportunity of higher education, in-service training, and participating them in research and study.
  - 2.7 Regional and zonal hospitals are included in specialization course provided by government academy.
  - 2.8 Brain drain of human resources is discouraged by taking effective measures such as career development and various kinds of financial and non-financial incentives to stop currently visible brain drain and to create conducive working environment.
  - 2.9 Skilled human resource will be produced for safe motherhood by initiating midwifery education. Opportunity of midwifery education will be provided for enhancing capacity of working nurses.
  - 2.10 Transparent and scientific rotation transfer system will be developed and implemented to systematize transfer of health workers and staffs.
  - 2.11 Policy will be adopted for utilizing skilled private sector workers into government service according to need. Likewise arrangement will be made for utilizing health workers produced in private sectors into governmental entities according to need.
  - 2.12 Study, research and training center of international standard will be set up by utilizing outstanding achievements obtained in Nepal's health sector.

- 2.13 Capacity of female community health volunteers will be developed with necessary incentives to improve their quality of services.
- 3 Following strategies (related to policy 3) will be adopted to develop the ayurvedic medicine system through the systematic management and utilization of available herbs in the country as well as safeguarding and systematic development of other existing complementary medicine systems.**
- 3.1 Ayurveda will be developed gradually. Development and reformation will be done by assessing quality of service in this area from research. Long term plan will be developed and implemented for the safeguard, development, and expansion of homeopathy, unani (Greek), and other complimentary medicine system.
- 3.2 Development and expansion of appropriate structure will be done gradually for implementation of ayurveda system effectively.
- 3.3 Emphasis is given for production and commercialization by ensuring quality of herbal medicine produced by government and private ayurveda medicine manufacturer with special plan and programs for the safeguard and proper use of locally available herbs.
- 3.4 Study and research of ayurveda, and development of skilled human resources related to research will be operated as a priority program by arranging and developing appropriate human resources for national ayurveda research and training center.
- 3.5** Special focus will be given to enhance the quality of ayurveda health service by regulating inappropriate activities in the name of ayurveda and herbs.
- 4. Following strategies (related to policy 4) will be adopted to aim at becoming self-sufficient in quality medicine and medical equipment through effortless and effective importation and utilization with emphasis on internal production.**
- 4.1 Country will be made self sufficient in production of medicine. Arrangement will be made for production and supply of all essential medicines.
- 4.2 Supplied to private and government sector, manufactured either within country or imported, system will be developed according to the criteria for ensuring quality of medicines, medical tools, equipments, and items used in laboratory.
- 4.3 Special arrangement will be done for controlling misuse of freely distributed drugs and will increase gradually the types and numbers of freely distributed essential drugs from every health institutions.
- 4.4** Making estimates, purchases, and distribution of drugs more effective and making current arrangement of purchase and supply system strong, procedural reform including participation of skilled pharmacist will be done in this process.
- 5. Following strategies (related to policy 5) will be adopted to utilize in policy formulation, program planning, medical and treatment system, the proven behaviors or practices obtained from researchers by enhancing the quality of research to international standard.**
- 5.1 Current organizational, institutional and procedural state of affair of Nepal health research council will be improved timely to increase quality of health research to international standard. Special programs will be launched to enhance the capacity of council for the promotion and facilitation of health research.
- 5.2 Health research will be regulated for providing new findings and suggestions for promoting, safeguarding, improving and rehabilitating health of citizens and

arrangement will be made for using suggestions from research more effectively in policy making, planning and implementation.

- 5.3 Report and conclusion obtained from research will be made further accessible to all.
- 5.4 Encouragement will be done to include health in research of other sectors.
- 5.5 Health researcher and scientist will be encouraged to do research in various subjects of health and environment will be created to respect their expertise.
- 5.6 Network of national and international organizations related to study and research will be established.
- 5.7 Universities related to health and governmental and nongovernmental educational institutions will be encouraged and facilitated to participate in research.
- 5.8 Special priority will be given for scientific exploration and research of herbs available in country.

**6. Following strategies (related to policy 6) will be adopted to promote public health by giving high priority to education, information, and communication programs for transforming into practice the access to information and messages about health as a right to information.**

- 6.1 National health information system will be developed to provide information of works done in health sector in simple and easy manner to the access of all citizens.
- 6.2 Wide use of health education information and communication will be put in high priority to promote health by increasing awareness of individual or community, to control diseases, to obtain health gain in time and to change behavior.
- 6.3 Advertisement and promotion of items having adverse effect on health of citizens such as tobacco, substance with tobacco, alcohol, and other alcoholic beverages will be banned. Likewise any kind of medium of communication that affects the sexual life of citizens directly or indirectly will be banned.
- 6.4 Governmental and nongovernmental sectors will be mobilized to disseminate user friendly and acceptable information in local languages that are informative, promotive and able to raise awareness among public.
- 6.5 All citizens will be encouraged to obtain health information using all medium of communication including electronic in optimum manner.
- 6.6 School health program that is recognized as effective and capable of providing high return will be implemented in all schools of country in coordination with ministry of education. For this, action plan with detail working procedure will be developed for all programs ongoing currently in schools by unifying them and health programs will be carried out by arranging one health worker at least in secondary school.
- 6.7 Arrangement will be done to provide all kinds of information of health service particularly related to the treatment of patient for establishing a right to information to the respective consumer.

**7. Following strategies (related to policy 7) will be adopted to reduce prevalence of malnutrition through promotion and usage of quality healthy foods.**

- 7.1 Necessary arrangement will be made to free from the condition of malnutrition in the long run by emphasizing promotion, production, and usage of food items available and could be produced locally through the means of educational program in nutrition based in community.

- 7.2 Current multi-sector policy and programs related to nutrition including food security will be implemented with high priority by updating them to improve the situation of malnutrition.
  - 7.3 Regular feedback will be given to agriculture development and other ministries to increase the self sufficiency in food as there is direct relationship between food security and nutrition, under the community health program backyard garden will be promoted with the involvement of local body, and daily consumption of green vegetable and fruits will be increased up to 400 grams.
  - 7.4 Necessary act, procedure, and human resources will be arranged to discourage the usage of processed and readymade food (junk food) that damage the body, alcohol and beverages, and to monitor the quality of food distributed and sold from hotels and restaurants.
  - 7.5 Coordinate with respective stakeholders will be done to eliminate chemical substances and poisons used in food and meat items which have adverse effect on human health.
  - 7.6 Appropriate life style will be promoted to control food related diseases and overweight.
  - 7.7 Arrangement will be made to bring within legal domain to control food adulteration that has adverse effect on health.
8. **Following strategies (related to policy 8) will be adopted to ensure availability of quality health services through competent and accountable mechanism and system for coordination, monitoring and regulation.**
- 8.1 Receipt of quality health services will be ensured provided by government and private sectors by arranging legal institution for regulating all health services.
  - 8.2 Current legal arrangement will be amended to regulate drugs used in modern, ayurveda, and alternative method of treatment used in human and animals to make it more effective. Arrangement of drug inspectors in right numbers will be placed in every district by restructuring department of drug administration.
  - 8.3 National directives and protocols will be prepared for ensuring receipt of quality health services. Arrangement will be made to implement protocols according to the local need of hospitals for treating diseases.
  - 8.4 Regular monitoring and regulation will be done to ensure delivery of high quality health service to citizens with criteria to keep the quality of human resources providing services, technologies used, medicines, equipments including supplies.
  - 8.5 Laboratory/blood transfusion centers along with services provided by such laboratory/centers will be regulated for standardization according to criteria. Arrangement of legal provision will be made for laboratories to function only after the accreditation.
  - 8.6 Provision of punishment and penalty will be done on regular basis by monitoring and evaluating health services provided by government and non-government sector in any geographical region of the country.
  - 8.7 Necessary organizational structure will be arranged to listen grievances and complaints of patients or health service user for providing legal remedy. Consultation will be provisioned for using technology to the availability in the process of treatment.
  - 8.8 Necessary strategy will be adopted to make investment of private sector to the benefit of public by legal arrangement and to increase investment in appropriate place.

- 
- 8.9 Legal arrangement will be made under the Infectious disease act 2020 to compulsorily inform the designated entity in specified time for the diseases likely to become pandemic. Infectious disease act, 2020 will be amended.
- 8.10 Arrangement will be made for mentioning generic name of medicine by doctor to be understandable clearly by all.
- 9. Following strategies (related to policy 9) will be adopted to ensure professional and quality service standard by making health related professional councils capable, professional, and accountable.**
- 9.1 Work of various established councils will be made effective, transparent and accountable to ensure the quality of varieties of education related to health and health services provided.
- 9.2 Current act and rules will be implemented through amendment to bring uniformity on the services provided by health institutions and councils.
- 9.3 Health institutions and councils will be strengthened more through legal and physical means.
- 9.4** Collaboration will be promoted with professional association /organizations established in private and non government sector to deliver health services and doing study and research.
- 10. Following strategies (related to policy 10) will be adopted to mainstreaming health in every policy of state by reinforcing collaboration with health-related various stakeholders.**
- 10.1 Current multilateral cooperation will be made stronger by accepting health as a main agenda of development. Issues of health will be included in all associated acts.
- 10.2 Action plans will be implemented in coordination with multi sector as various aspects such as safe drinking water, hygiene, energy, food security, climate, environment, education, accommodation, road including physical development impact the receipt of health services.
- 10.3 Sustaining the progress made in millennium development goal set for 2015 by Nepal, goal set thereafter will be addressed effectively.
- 10.4 Coordination with all the stakeholder entities will be done for making multi sectoral action plan by utilizing national network and mechanism and opportunities for addressing negative effect on health due to climate change for overall management.
- 10.5 Proper arrangement will be done for effective coordination and collaboration with stakeholders entities for managing diseases communicated through animals and insects.
- 11. Following strategies (related to policy 11) will be adopted to ensure the right of citizens to live in healthy environment through effective control of environmental pollution for protection and promotion of health.**
- 11.1 Collaboration for leadership will be taken for regulation by developing mechanism for controlling adverse effect of environmental pollution and climate change for health safeguarding and promotion.
- 11.2 Effective arrangement will be done for managing waste generated from the entities providing health services in scientific manner. Current legal system for managing waste will be implemented strictly.

- 11.3 Act will be implemented to manage radioactive materials used in health sector according to national and international standards.

**12. Following strategies (related to policy 12) will be adopted to maintain good governance in the health sector through necessary policy, structure and management for delivery of quality health services.**

- 12.1 Changes will be made to acts and rules according to need after reviewing them to make health services in operation more effective and trustworthy. Integrated public health service act will be implemented by integrating health related acts and rules according to need by timely revising them.
- 12.2 System of result oriented utilization and management will be adopted for effectively mobilizing foreign aid in health sector by integrating all partner entities.
- 12.3 All physical infrastructure constructed will be made friendly to disable people, children, and will be made earthquake resistant. Infrastructures that are being used currently but at risks will be strengthened using available technology to make earthquake resistant. To provide service to all physical infrastructures additional necessary infrastructure like store etc will be added and systematized.
- 12.4 Health institutions are constructed according to the prevailing building standard on the basis of physical location and population.
- 12.5 Modern information technology will be used at maximum for health management.
- 12.6 Multi-sectoral action plan will prepared and implemented to address emergency health issues instantly arising from natural disaster and other causes.
- 12.7 Individuals having social prestige and respect, and individuals regarding health service as charity, professionals, and local community will be involved in forming development committees of various hospitals and operations and management committees of health institutions. Community involvement is encouraged in management of health service, easy access and continuation.
- 12.8 Act will be implemented for management and regulation of hospital management committee including other committees.
- 12.9 Good governance action plan will be prepared and implemented for ensuring qualitative service by incorporating government, private, community and cooperative in health service delivery. Local cooperatives having many consumers will be participated in management of local level health institutions by developing criteria for delivering health service.
- 12.10 Health good-governance action plan will be prepared and implemented for making health service delivery transparent, responsive and publicly accountable.
- 12.11 Action of withdrawing tissues or blood related substance, or transplanting or action of human organ transplanting will be systematized by law.
- 12.12 Action of organ donation will be eased by defining brain dead in scientific and professional manner, in relation to selecting appropriate organ recipient with the goal of providing organs for transplanting will be systematized by law.

12.13 Arrangement will be made to have only one official professional trade union in relation to current situation of many trade unions present in one health institution.

12.14 Infertility is systematized by the law of surrogacy.

**13. Following strategies (related to policy 13) will be adopted to promote public and private sectors partnership for systematic and quality development of health sector.**

13.1 Public and private partnership will be developed complimenting each other to promote further the concept of public and private partnership.

13.2 Arrangement of legal system will be made to encourage and manage the concept of cooperative needed for health sector.

13.3 Grant will be providing to health institutions in nongovernmental sector by making clear criteria.

**14. Following strategies (related to policy 14) will be adopted to increase the investment in the health sector by state to ensure quality and accessible health services and to provide financial security to citizens for medical cost and as well as effectively utilize and manage financial resources obtained from private and non government sector.**

14.1 Arrangement will be done for allocating budget on the basis of population by determining per capita investment in health sector by acknowledging spending made in health is not expenditure but an investment. Per capita investment will be increased gradually.

14.2 As current personal expenditure of individual is 55 percent of gross expenditure made in health, such percentage will be reduced gradually.

14.3 Amount appropriated for health sector will be distributed equitably by making criteria.

14.4 Nationwide insurance plan will be rolled out by making law and directives for ensuring delivery of affordable health service by making financial management sustainable. Arrangement will be made to provide discount for Incapable and financially poor.

14.5 Vaccine fund set up with the aim of preventing fund scarcity will be systematized through law to conduct immunization program without interruption.

14.6 Action will be encouraged to find or help others to find new ways to manage finance of health sector. Other funds of health sector will be made systematic and effective.

14.7 Arrangement will be made to use local level program and fund for health service and infrastructures.

14.8 Production and sales and distribution of substance with tobacco and other substance harmful to health will be discouraged with high taxes. Sources of fund obtained this way are spent in health service.

**15. Miscellaneous**

15.1 Current sectoral policy and newly made such policies will be helpful and complementary to implement provisions contained in this national policy.

15.2 Partnership and collaboration will be done with private, commercial groups, cooperatives, communities and development partner organizations and not for profit service providers with the aim of providing quality, sufficient, relevant, timely service of appropriate kind.

## **8. Structural arrangements**

For effective implementation of this policy, departments, divisions, branches, subdivision etc of current organizational structure from center to rural level along with additional regulating bodies, and employee positions according to these levels will be added or reduced according to need under the ministry of health and population by taking care of state restructuring.

## **9. Financial resources**

Government sources, foreign loans and assistance, and investments of private sector in this sector in totality will be the sources of implementation of this national health policy.

## **10. Monitoring and evaluation**

1. Responsive and effective mechanism will be arranged to monitor and evaluate health programs at every level regularly. For this, effective monitoring and evaluation system will be developed by taking into account of the result based monitoring and evaluation model formulated and practiced by national planning commission as well as monitoring and evaluation system implemented by the ministry of local development.
2. Health management information system will be amended timely and will be upgraded to complete computerized system.

## **11. Risks**

1. In the absence of overall resource mobilization strategy in health sector, chances of difficulty in resource mobilization will be present.
2. Health policy may need to be readjusted by segregating programs to be included in the domain of center and federation after the country is transformed into the federal structure.

## **12. Revocation**

National health policy 2048 has been revoked.

# Executive Summary

## A. INTRODUCTION

The Annual Report of the Department of Health Services (DoHS) for fiscal year 2071/72 (2014/2015) is the 21<sup>st</sup> consecutive report of its kind. The report focuses on the objectives, targets, strategies adopted by the programs and analyses the achievements of the major activities and attempts to highlight trends in the service coverage over the preceding three fiscal years. This report also identifies issues, problems, constraints and suggests actions to be taken by the related health institutions for further improvements. The executive summary highlights the key issues and observations emerging from the analysis of each program. Detail program information is available in specific reports following this summary.

The information and statistics used in this report are based on the data collected by the Health Management Information System (HMIS) under the Department of Health Services (DoHS) from health institutions including Public/Private Hospitals, Primary Health Care Centres (PHCC), Health Posts (HP), Primary Health Care/outreach Clinics (PHC/ORC), Expanded Programme of Immunisation (EPI) clinics, Female Community Health Volunteers (FCHV) NGO/INGOs and Private Health Institutions in fiscal year 2071/72 across the country through the HMIS system.

## B. CHILD HEALTH IMMUNIZATION

National immunization program is the priority 1 (P1) program. Since the inception of immunization program to the date it has been an established and successfully public health intervention. Nepal is one of the countries recognized for the well-functioning immunization system. The accessibility of immunization has reached to the 97% population and serves equally, successfully to the poor and rich, also does not discriminate child's sex. New antigen PCV and MRS has introduced during this fiscal year. Nepal has declared 6 fully immunized districts and directed to achieve fully immunized country by 2017. The contribution of immunization in achieving the MDG 4 goal is immense. Nepal has achieved polio free status in 27th March 2014, sustained maternal and neonatal tetanus elimination since 2005, and Japanese encephalitis is in control status and conducting measles case based surveillance to meet the target of elimination by 2019.

The national coverage of BCG is the highest of all antigens indicates that almost 94% mother have access in immunization services, while DPT-HepB-Hib and OPV- 3 coverage are more than 90%. The measles/rubella vaccine coverage is 85% and Td2 and Td2+ coverage is 52%. The JE coverage (32 districts) is 53%.

### NUTRITION

The national nutrition programme is priority programme of Government of Nepal to achieve nutritional well-being of all people to maintain a healthy life to contribute in the socio-economic development of the country, through improved nutrition programme implementation in collaboration with relevant sectors. Commitment at high level for nutrition in the country has shown an increased interest to improve the nutritional status of women and children focusing on first 1,000 days.

In fiscal year 2071/72, average number of growth monitoring visits of 0 to 24 months children is 2.5 which is lower compared to last fiscal year 2070/71. The proportion of underweight children aged 0-24 months is 3.3 which is increased by 1.5 percent compared to fiscal year 2070/71. Reporting of exclusive breast feeding up to 6 months among 0 to 12 months is only 28.5 percent. Similarly, only 27.5 percent of children aged 6-8 months were received solid foods. In 11 IMAM districts have admitted 4,680 severely acute malnourished children at out patient's therapeutic program and discharged 5,483 children. Among them, 74 percent children have recovered and defaulter rate is 15 percent and death rate is 1 percent. In fiscal year 2071/70, 2188 children were provided nutritional

care through 16 Nutrition Rehabilitation Homes and got recovered 2126 children. Coverage of Vitamin A supplementation to 6-59 months age children is 85 percent which is 14 percent higher compared to fiscal year 2070/71. The coverage of 1st time iron and Folic Acid distribution for pregnant women is 84 percent.

### **COMMUNITY BASED INTEGRATED MANAGEMENT OF CHILDHOOD ILLNESS (CB-IMCI) AND NEWBORN CARE (CB-NCP)**

CB-IMNCI is an integrated package of child-survival interventions and addresses mainly three age groups e.g. newborn of age 0-28 days and 29-59 days infant for the problems like birth asphyxia, bacterial infection, jaundice, hypothermia, low birth weight, counseling of breastfeeding etc. Among the age group of 2 months to 59 months children, it addresses major childhood killer diseases like Pneumonia, Diarrhoea, Malaria, Measles and Malnutrition in a holistic way.

In FY 2071/72, a total of 32,109 (0-28 days) infants were treated at health facilities and PHC/ORC clinics. Out of the total 5,171 cases were treated for the infection (PSBI). In FY 2070/71 FCHV checked 20,565 cases, out of which 11,041 sick babies referred to health facilities after giving cotrim. Similarly, a total of 47,179 cases of 29-59 days infants were treated at health facilities and PHC/ORC clinics. Out of the total 3,915 cases were treated for infection (PSBI). FCHVs checked 50,284 cases, out of which 27,685 sick babies referred to health facilities after giving cotrim.

In FY 2071/72, a total of 1,413,111 diarrhoeal cases were reported. The reported number of new diarrhoeal cases has slightly decreased in FY 2071/72 compared to FY 2069/70 and FY 2070/71. At the national level, percentage of severe dehydration has decreased to 0.2 in FY 2071/72 compared to FY 2069/70 and FY 2070/71. Similarly, the national incidence of diarrhoea per 1,000 under-five years' children has considerably decreased to 501/1,000 under 5 year children in FY 2071/72 from 528/1,000 in 2069/70 and 629/1,000 in 2070/71.

Regarding to ARI Cases, in FY 2071/72, a total of 2,208,221 ARI cases has been reported. At the national level, reported ARI cases per 1,000 under-five population has decreased to 783 in FY 2071/72 compared to FY 2069/70 and 2070/71. Percentage of severe pneumonia remained constant in FY 2071/72 at National level (0.4%) compared to FY 2069/70 and FY 2070/71.

## **C. FAMILY HEALTH**

### **FAMILY PLANNING**

In order to provide the reproductive population with options to limit or space births, various modern contraceptive methods are made available under the national health services delivery system. Family planning services are provided through different health institutions at various levels through static clinics as well as mobile outreach services. The Contraceptive Prevalence Rate (CPR) is one of the main indicators for monitoring and evaluating the National Family Planning Program. The contraceptive prevalence rate (CPR) for modern family planning method is 43% at national level in fiscal year 2071/72. There is wide variation in CPR at the regional level in the reporting year.

### **SAFE MOTHERHOOD**

In the fiscal year 2071/72 national level ANC first visit as percentage of expected pregnancy has increased to 96 percent. Similarly Institutional delivery at national-level has been increased to 57 percent in FY 2071/72 as compare to 50% of the FY 2070/71 level. However, percentage of mothers who received first postnatal care at the health facility among expected live births has been decreased to 48 percent in the reporting year.. In fiscal year 2071/72, among 78,611 total service users in 2071/72, 50% received medical abortion (MA). About 15.3% of the safe abortion clients in FY 2071/72 were adolescents (aged < 20) and more than a half (59.6%) of the safe abortion clients received post-abortion family planning service. Share of long term family planning among post-

abortion family planning users was 19.2%. Out of all abortion service users, 10% of medical abortion service users and 13% of surgical abortion service users received LARC methods.

#### **FEMALE COMMUNITY HEALTH VOLUNTEERS**

The major role of the Female Community Health Volunteers (FCHVs) is promotion of safe motherhood, child health, family planning, and other community based health services to promote health and healthy behavior of mothers and community people with support from health workers and health facilities. At present there are 51,470 FCHVs (47,328 FCHVs at rural/VDC level and 4,142 at urban/municipality level) actively working all over the country. FCHVs contributed significantly in the distribution of oral contraceptive Pills, Condoms and Oral Rehydration Solution (ORS) packets and counseling and referring to mothers in the health facilities for the service utilization.

FCHVs have contributed in distribution of 866,881 cycle oral pills and 1,411,438 ORS packets at the national level. Furthermore, FCHVs distributed a total of 10,512,449 packets of condoms in the FY 2071/72. Service statistics also shows that more than one half of the diarrhoea and ARI cases were treated by FCHVs.

#### **PRIMARY HEALTH CARE OUTREACH CLINICS**

Based on the local needs PHC/ORCs are conducted every month at fixed locations of the VDC on specific dates and time. The clinics are conducted within half an hour's walking distance for the population residing in that area. Primary health care outreach clinics (PHC/ORC) extend basic health care services to the community level.

About 50,000 PHC/ORCs were expected to be conducted every year. However, only 47,397 (95 percent) clinics were conducted in the reporting year. On an average, 20 clients were served per clinic during the fiscal year 2071/72 which has been decreased by 2 percent compared to the previous fiscal year 2070/71.

#### **ADOLESCENT SEXUAL AND REPRODUCTIVE HEALTH**

National ASRH program is being gradually scaled up and met the NHSP II target of making 1,000 public health facilities adolescent-friendly by 2015. However, all public health facilities have been providing regular services to all including adolescents before equipping them to become AFS.

#### **DEMOGRAPHY AND REPRODUCTIVE HEALTH RESEARCH**

Planning, monitoring and evaluation of reproductive health (RH) activities are the key functions of Program, Budget and Demography Section. This section conducts periodic and *ad hoc* studies and also coordinates reproductive health related research and studies carried out by other organisations in Nepal. Major activities such as (a) Annual program and Budget (b) Target population setting, monitoring and research/study (c) Guideline/ documents development and (d) other major Family Health related studies were conducted in the fiscal year 2071/72. Implementation of Maternal and Perinatal Death Surveillance and Response (MPDSR) in 5 districts (Okhaldhunga, Dhading, Kaski, Banke & Kailali), Birth defect surveillance in selected referral hospitals and ongoing support for hospital-based Maternal and Perinatal Death Review (MPDR) were major initiatives done through the section during FY 2071/72.

### **D. DISEASE CONTROL**

#### **MALARIA**

Nepal has surpassed the Millennium Development Goal #6 by reducing malaria morbidity and mortality rates by more than 50% in 2010 as compared to 2000. Therefore, Government of Nepal has set a vision of Malaria free Nepal in 2025.

Confirmed cases dropped from 2092 in FY 2069/70 to 1,352 in 2071/72. The proportion of *P. falciparum* infections has sharply increased and reached 20.26% in reporting year. There is a decreasing trend of confirmed case, case severity with sustaining zero death due to scaling up access

to RDT and ACT to public health facilities, high coverage of LLINs in endemic districts and increased socio-economic status of community people. There is rapid decreasing trend of indigenous *PF*, whereas slow decreasing trend of indigenous *Plasmodium vivax* cases indicates that *P. vivax* may remain a challenge for malaria elimination in Nepal.

#### **KALA-AZAR**

Kala-azar is a major public health problem in 12 districts in Eastern and Central Tarai. The trend of KA cases has been decreasing significantly for the last several years. In the fiscal year 2071/72, a total of 220 cases were reported, of which all are native cases. Among 220 native cases, 148 cases reported from 12 programme districts and remaining 72 were reported from other non-program districts. Incidence of Kala-azar at national as well as district level is less than 1/10,000 population. At district level incidence per 10,000 in areas at risk populations ranged from 0.47 in Morang to 0.01 in Bara reflecting the incidence of 0.25 per 10,000 in 12 programme districts (excluding foreign cases).

#### **LYMPHATIC FILARIASIS**

Lymphatic Filariasis (LF) is a public health problem in Nepal. All endemic districts will complete the recommended six rounds of MDA by 2018. The LF elimination programme has also indirectly contributed to strengthening of health system through trainings and capacity building activities. AS done in 21 districts has revealed that the prevalence of LF infection has significantly reduced and contributed in preventing disabilities and sufferings due to LF. Over the period of last 12 years, more than 90 million populations at risk have been treated with MDA medicines. In this fiscal year, 15,981,384 people living in 41 districts were targeted for MDA, of which 11,117,624 (69.6%) were treated.

#### **DENGUE**

Dengue, a mosquito-borne disease emerged in Nepal in the form of Dengue Fever (DF), Dengue Hemorrhagic Fever (DHF) and Dengue Shock Syndrome (DSS). The earliest cases were detected as early as 2005. In the fiscal year 2071/72 total number of dengue case reported from 12 districts were 302. Among them, 119 cases were reported from Chitwan and 114 cases from Parsa district where outbreak was recorded. Remaining 69 cases were reported from Jhapa, Rupandehi, Kathmandu, Nawalparasi, Kailali, Kanchanpur, Makawanpur, Doti, Dadeldhura and Bhaktapur.

#### **ZOONOSES**

Nepal has dual burden of disease and zoonotic diseases of epidemic, endemic and pandemic potentials are major public health concerns. Globally more than 300 Zoonotic diseases are identified among which about 60 have been identified in Nepal as emerging and re-emerging diseases. The six zoonoses like Taeniosis/cysticercosis /Neurocysticercosis, Leptospirosis, Hydatidosis, Brucellosis; Toxoplasmosis and Avian Influenza has been identified as Priorities Zoonotic Diseases in Nepal which epidemic potentials. Annually about 15,000 to 18,000 cases of snake bites occur in Nepal. Though only 10% of bites are venomous.

#### **DISASTER MANAGEMENT**

This collaborative programme between MoH/DoHS/EDCD and WHO-EHA has been committed to enhancing health sector emergency preparedness, disaster response and epidemiology and outbreak management capabilities in close coordination & collaboration with key players in the country. To fulfill of its objectives such activities (a) Expediting the process of health sector contingency planning (b) Providing training to the health workers in emergency preparedness and disaster response and (c) Strengthening the mechanism for multi-sectoral coordination and collaboration in relation to health sector disaster management has been carried out in the fiscal year 2071/72.

#### **SURVEILLANCE AND RESEARCH**

Disease surveillance and research is an integral part of Epidemiology and Disease Control Division. This section came into existence in August 12, 2013 (Shrawan 28, 2070 BS). The mission of the

communicable diseases Surveillance program is to protect and improve the health of Nepalese citizens by tracking and responding to the occurrence of disease in the population across the country. Surveillance of reportable diseases is responsible for collecting, analyzing, interpreting, and reporting information for infectious diseases. Maintains a high level of data accuracy and quality, monitors disease trends for early detection and prompt response in case of any outbreak. It also assists in the development of public health policies, programme planning and implementation related to communicable diseases.

### **TUBERCULOSIS**

Tuberculosis (TB) is still a major public health problem in Nepal. In 2014/15, total of 34,121 cases of TB were registered. Among them, 54.1% were pulmonary bacteriological confirmed (PBC). Most cases were reported among the middle-aged group with the highest among 15-24 year of age (20%). The childhood TB (new and relapse) was 7%. The Case Notification Rate (CNR) all forms was 123 per 100,000 population. Whereas in eco-terrain, CNRs were highest in Terai zones followed by hill then mountain zones with rates of 139, 112 and 69 per 100,000 populations respectively.

The overall treatment success rates (all forms) nationally of drug susceptible TB was 91.5%. The treatment success rates of Pulmonary Bacteriological Confirmed (PBC) were 90% compared to 72% in retreatment cases (lost to follow up+ failure), 93.6% in new Pulmonary Clinically Diagnosed (PCD) and 93.01% Extra Pulmonary cases. Failure rate in new PBC was 1.3% compared to 2.06% in retreatment cases, 0.23% in new PCD cases and 0.28% in EP cases. TB program in Nepal was able to save 32,973 lives this year nationally, but still 978 deaths were reported among general TB cases

### **LEPROSY**

During the reporting year 2071/72, a total number of 3053 new leprosy cases were detected and were put under multi drug therapy (Multi Drug Therapy). 2461 cases were under treatment and receiving MDT at the end of the fiscal year. This year reported the registered prevalence rate of 0.89/10,000 populations at national level which is well below the cut-off point of <1 /10,000 population the standard set by WHO. 135(4.42%) new leprosy cases of Grade 2 Disability (G2D), 236 new leprosy child cases, 1100 new leprosy female cases were recorded during the reporting year.

Leprosy Post Exposure Prophylaxis (LPEP) which aims to test the feasibility and effectiveness of a single dose rifampicin (SDR). SDR is given to contacts of newly diagnosed leprosy patients to decrease their risk of developing leprosy. LPEP programme had been implemented in Morang, Jhapa and Parsa districts and planned to be extended in Dhanusa, Kapilvastu and other districts in the years to come.

### **HIV/AIDS AND STI**

Making up 5% of the total estimated population of 39,249, there are about 1,968 children aged up to 14 years are living with HIV in Nepal in 2014, while the adults aged 15 years and above account for 95%. There are 8,413 infections estimated among population aged 50 years and above (21.4%). By sex, males account for two-thirds (64.8%) of the infections and the remaining more than one-third (35.2%) of infections are in females, out of which around 82% are in the reproductive age group of 15-49 years. The male to female sex ratio of total infection came down from 2.15 of 2006 to 0.54 for the year 2014.

## **E. SUPPORTING PROGRAMMES**

### **HEALTH TRAINING**

The National Health Training Centre (NHTC) operationalises its training activities in line with National Training Strategy. In-service training is delivered through a network of National Health Training Programmes which provide technical as well as managerial training at all levels. There are five regional training centre, one sub-regional, 75 district training units. In addition ,there are twenty one SBA, two ASBA, fifteen Family planning, seven safe abortion, eleven mid level practicum, four USG,

two OTTM, six anaesthesia assistant, two paediatric training sites under NHTC. A training working group (TWG) comprising various supporting partners was formed under leadership of NHTC with the purpose of ensuring the efficient running of national health training programs, maintaining the quality of the training and improving the coordination of all training provided under NHTC. NHTC is the apex body for the development of human resources for the health sector.

### **HEALTH EDUCATION, INFORMATION AND COMMUNICATION**

The National Health Education, Information and Communication Center (NHEICC) was established in 1993 with the main responsibility of planning, implementation, monitoring and evaluation of health promotion, education and communication program for all health services and programs within the Ministry of Health (MoH). It is also responsible for demand creation on health care services and played significance roles as a backbone for all health programs under the MoH.

The physical and financial achievement was 68.9 percentages and 57.7 percentages during the FY 2070/71 and 85.5 percentages and 78.7 percentages achievement was in 2071/72 respectively. Similarly, the physical and financial achievement on Health Tax funds- Tobacco control activities was 81.4 percentages and 71.6 percentages in FY 2070/71 and 96.1 percentages and 74.7 percentages in FY 2071/72 respectively.

### **LOGISTICS MANAGEMENT**

The main role of Logistics Management Division is to support in delivering quality health care services providing by program divisions and centers through logistics supply of essential equipments, vaccines, family planning commodities and free health drugs to all regional /district stores and health facilities. The major function of LMD is to forecast, quantify, procure, store and distribute health commodities, equipments, instruments and repairing & maintaining of the bio-medical equipments/instruments and transportation vehicles. The quarterly LMIS and monthly Web-based LMIS have facilitated evidence based logistics decision making and initiatives in annual logistics planning, quarterly national pipeline review meetings, the consensus forecasting of health commodities and the implementation of the pull system. LMD implemented Web-based LMIS up to the HFs level in three districts: Jumla, Arghakhanchi and Bardiya to make real time inventory management system gives real-time information of stock status of health commodities at service delivery site.

LMD carried out Regional Logistics Review Meeting in all regions of the country to address the problems and issues faced by the districts in supply chain management of health commodities in the region and district. LMD has initiated supply chain intervention by empowering private partners through PPP model to handle overall supply chain management below district level in two districts: Kapilvastu and Udayapur. To avoid delay and constraints in procurement and supply chain, procurement reform committee is working on procurement reform and restructuring of Logistics Management Division including district store.

### **HEALTH LABORATORY SERVICES**

National Public Health Laboratory (NPHL) has been designated as nodal institute for Policy, guidelines and over all frameworks for capacity building & development in laboratory sector. Attention will be given to strengthen laboratory procedure and communication between national, regional and district levels and strengthening the systems ensuring the availability of essential equipment and logistics. It also gives commitment to new recruitment of staff as well as training of existing staff.

At present there are central hospital based laboratories-8, Regional hospital based laboratory-3, sub regional hospital based laboratory-3, Zonal hospital based laboratories-10, District hospital based laboratories-62, and District level Hospital Based-16 and PHCC based level laboratories-204. In the private sector there are above 1,500 laboratories. All these laboratories require significant

strengthening with respect to quality assurance, human resource recruitment, competency, development of service range and physical infrastructure.

### **PERSONNEL ADMINISTRATIVE MANAGEMENT**

The Personnel Administration Section is responsible for managing Nepal's health workforce to deliver quality health services. This section manages the posting, transfer, upgrades and disciplinary action to health workers. Ministry of Health (MoH) has a total 30,703 employees of them 24,403 are technical personnel and 6,300 are administrative staff. Department of Health Services (DoHS) has a total 23,886 work force including all five development region's health facilities and of them 196 post (technical and administrative) for all divisions and sections under the DoHS.

### **FINANCIAL MANAGEMENT**

An effective financial support system is imperative for efficient management of health services. Preparation of the annual budget, timely disbursement of funds, accounting, reporting, and auditing are the main financial management functions that are necessary to support the implementation of health programs. The Finance Section of the DoHS is the focal point for financial management for all programs under the DoHS.

Out of total National Budget of Rs. 618,100,000,000 a sum of Rs. 33,517,102,000 (5.42%) was allocated for the health sector during the fiscal year 2071/72. Of the total health sector budget, Rs. 23,472,963,597 (70.03 %) was allocated for the execution of programs under the Department of Health Services Network.

### **PRIMARY HEALTH CARE REVITALIZATION**

The Primary Health Care Revitalization Division (PHCRD) aims to revitalize primary health care in Nepal by addressing emerging health challenges. More than two third of the population of Nepal used public health services in 2071/72. Among Seventy Eight Percent of registered morbidity cases Ninety-two percent of the population used free out-patient (OPD) health care services.

Key achievements in 2071/72 are free health care services in all districts, Increment of Budget of Drug and Number of Essential Free Drug list into 70, social audit of health institution in 45 districts (752 HFs), regular reporting of urban health center in HMIS, support for 100 Community Health Unit (CHU) and 128 Urban Health Centre.

### **MANAGEMENT**

More activities are assigned as directed by NHSP, Policies and Plans that include: information management, planning, coordination, supervision, monitoring and evaluation of the health programs. This division is also responsible for monitoring the delivery of quality health services through all types of health institutions. Furthermore, it monitors the building construction and maintenance of public health institutions and provides supports for maintenance of medical equipment, Mental Health, Oral Health, Health Care Waste Management (HCWM), Health Facility Up-grading/renewals, Nursing program and treatment facilities to impoverished Nepalese Citizens from the listed diseases such as Kidney (Dialysis, Transplant & Post Renal Treatment) Cancer, Heart, Head/Spinal injuries, Alzaimers/Parkinsons and Sickle Cell Anaemia from listed hospitals.

As in the previous year Health Management Information System (HMIS) Section continued to provide feedback of information on the activities undertaken by the districts to all Divisions/Centers of the DoHS, Regional Directorates, and the 75 District Health/Public Health Offices. Annual Performance Review workshops were conducted in all Districts, Regions and National level. Several trainings were conducted in programme management to improve the skills of health workers. The annual targeted activities of fiscal year 2071/72 under this division were almost achieved.

# Health Service Coverage Fact Sheet

Fiscal Year 2069/70 - 2071/72 (2012/2013 - 2014/2015)

PROGRAM INDICATORS	2069/70 (2012/13)	2070/71 (2013/14)	2071/72 (2014/15)
<b>REPORTING STATUS</b>			
% of Public Hospital reporting to HMIS	83	81	92
% of Primary Health Care Center reporting to HMIS	95	100	99
% of health post reporting to HMIS	98	100	99
% of PHC-ORC clinics reporting to HMIS	87	85	81
% of EPI clinics reporting to HMIS	94	91	92
% of Female Community Health Volunteers (FCHVs) reporting to HMIS	88	89	87
% of Private health facilities reporting to HMIS	71	70	68
<b>IMMUNIZATION</b>			
% of children under one year immunized with BCG	99	99	94
% of children under one year immunized with DPT-HepB-Hib3	93	92	91
% of children under one year immunized with OPV 3	93	92	90
% of one-year-old children immunized against Measles/Rubella (90)*	88	88	85
% of children 12-23 months immunized- Japanese Encephalitis	47	43	53
% of children under one year fully immunized as per NIP schedule			73
% of planned immunization clinics conducted			92
<b>NUTRITION</b>			
% of children aged 0-12 months registered for growth monitoring			97
Average number of visits among children aged 0-24 months registered for growth monitoring			2.5
% of children aged 0- 6 months registered for growth monitoring, exclusively breastfed for the first six months			29
% of children aged 6–8 months registered for growth monitoring received solid, semi-solid or soft foods			28
% of children aged 6-23 months, who received 1st dose of Baal Vita (MNP) in 15 program districts			79
<b>ACUTE RESPIRATORY INFECTION (ARI)</b>			
Incidence of acute respiratory infection (ARI) per 1,000 children under five years (new visits)	918	951	765
Incidence of pneumonia among children under five years (per 1,000)			188
% of children under five years with ARI suffering pneumonia			25
% of children under five years with pneumonia counseled for home care management (facility level)			35
% of children under five years with pneumonia counseled for home care management (outreach level)			9
% of children under five years with pneumonia counseled for home care management (community level)			56
<b>DIARRHEA</b>			
Incidence of diarrhea per 1,000 under five years children (new cases)	578	629	502
% of children under five years with diarrhea suffering from dehydration (facility, outreach & community level)			21
% of children under five years with diarrhea suffering from dysentery (blood in stool)			12
% of children under 5 with diarrhea treated with Zinc and ORS (40)*	97	98	93
% of children under five years with diarrhoea treated with IV fluid			0.64
<b>SAFE MOTHERHOOD</b>			

<b>PROGRAM INDICATORS</b>	<b>2069/70 (2012/13)</b>	<b>2070/71 (2013/14)</b>	<b>2071/72 (2014/15)</b>
% of pregnant women who received Td 2 & 2+			52
% of pregnant women attending first ANC visit	89	86	96
% of pregnant women attending four ANC visits (80)*	55	59	52
% of pregnant women receiving IFA tablets or syrup during their last pregnancy (90)*	75	72	52
% of postpartum mothers who received Vitamin A supplements	57	53	49
% of institutional deliveries (40)*	45	50	52
% of deliveries conducted by a skilled birth attendant (60)*	45	50	51
% of postpartum women received PNC checkup within 24 hours			48
% of women who had three PNC check-ups as per protocol			20
<b>FAMILY PLANNING</b>			
Contraceptive prevalence rate (CPR) ( <i>unadjusted</i> ) (67)*	45	45	43
CPR Method Mix – Condom	3.6	3.7	3.5
CPR Method Mix - Pills	3.3	3.1	3.0
CPR Method Mix - Depo	8.0	7.6	6.9
CPR Method Mix - IUCD	2.1	2.5	2.6
CPR Method Mix - Implant	2.2	2.4	2.8
CPR Method Mix - Sterilization	26.2	25.7	23.8
<b>FEMALE COMMUNITY HEALTH VOLUNTEERS (FCHV)</b>			
Total number of FCHVs (53,514)*	50,007	51,470	51,470
% of pills distributed by FCHVs among total distribution	51	53	54
% of diarrheal cases treated with ORS and Zinc by FCHVs among diarrhea cases in children under five years	62	64	64
% of ARI cases managed by FCHVs among ARI cases in children under five years	57	58	57
<b>MALARIA / KALA-AZAR</b>			
Annual blood slide examination rate (ABER) per 100	0.67	0.94	0.75
Annual parasite incidence (API) per 1,000 population at risk*	0.11	0.12	0.10
Clinical malaria cases	49,550	26,526	20,861
Incidence of Kala-azar per 10,000 population at risk	0.27	0.34	0.25
<b>TUBERCULOSIS</b>			
TB case finding rate (85)* / Case Notification Rate	78	83	83 / 123
Treatment success rate (90)*	90	90	91.5
Sputum conversion rate	90	90	89
<b>LEPROSY</b>			
New case detection rate (NCDR) per 100,000 population	11.9	11.8	11.0
Prevalence rate (PR) per 10,000*	0.82	0.83	0.89
<b>HIV/AIDS AND STI</b>			
Cumulative HIV reported cases	22,994	25,222	26,702
<b>CURATIVE SERVICES</b>			
% of population utilizing outpatient (OPD) services*	88	79	73
Average length of stay	3.2	3.3	3.0

Note: \*These indicators are from NHSP-2, Results Framework; and the figures in parenthesis indicate target for 2015.

# INTRODUCTION

## 1.1 BACKGROUND

This is the Annual Report of Department of Health Services (DoHS) for the fiscal year 2071/72 (2014/2015), and it is the 21<sup>st</sup> consecutive report of its kind. This report analyses the performance and achievements of Department of Health Services in the fiscal year 2071/72. This document not only focuses on the performance of the fiscal year 2071/72 but covers the following areas, which will be the basis for the analysis for actions to be taken to improve performance for the next year.

- Programme specific policy statements, including goals, objectives, strategies major activities and achievement,
- Programme specific indicators for the monitoring & evaluation of programme performance on a regular basis, and
- Problems/Issues/constraints and recommendation for actions to be taken in order to improve performance and target for the next fiscal year.

Furthermore, this report also provides information on contributions from other departments, partners and stakeholders, contemporary issues in the health sector as well as progress status of major programs implemented through DoHS, RHDs, D/PHOs and health institutions under DoHS.

Preparation of this report followed the Regional Annual Performance Review Workshops conducted in all five development regions which culminated in the National Annual Performance Review Workshop. These review Workshops were attended by the Regional Directorates, Divisions / Centers and Section of DoHS, Central hospitals, and representatives from External Development Partners (EDPs) and NGOs/INGOs at each level.

During the workshop, policy statements of each program were reviewed in the light of the present context and analysed to an extent. The data generated from the HMIS On-line system in the form of raw numbers, were carefully and critically analysed utilising the selected indicators along with data available from other sources. These data were interpreted during the presentations and discussions.

The National Annual Performance Review Workshop achieved the following objectives:

- Review the status of achievement against the target with respect to budget released and expenditure.
- Analysed the service coverage, continuity and quality.
- Assess the implementation status of recommendations made during previous National Annual Performance Review Meeting (2070/71).
- Identified problems, constraints and management issues in implementing the health programs
- Recommend specific strategies and action plan to address the health issues.
- Generate specific strategies for low coverage region and districts to boost-up coverage.
- Interaction between RHDs / Department of Health Services / Hospitals / Mainistry of Health and Partners.

The outcome of this workshop can be seen in the program specific chapters of this Annual Report. Detailed district-specific raw and analysed data by programme are available in Annex.

Ministry of Health has been delivering promotional, preventive, diagnostic, curative, and palliative health care services and other health system related functions such as policy and planning, human resource development and mobilisation, financing and financial management, and monitoring and evaluation. It has six Divisions: (1) Administration Division, (2) Curative Services Division, (3) Policy, Planning and International Cooperation Division, (4) Public Health Administration and Monitoring and Evaluation Division, (5) Population Division, and (6) Human Resources and Financial Management Division.

There are five Centres with a degree of autonomy in personnel and financial management (1) National Tuberculosis Centre (NTC), (2) National Health Training Centre (NHTC), (3) National Public Health Laboratory (NPHL), (4) National Centre for AIDS and STD Control (NCASC) and (5) National Health Education, Information and Communication Centre (NHEICC). The NHTC coordinates all training programs of the respective Divisions and implements training by sharing common inputs and reducing the travelling time of care providers. Similarly, all IEC/BCC-related activities are coordinated by NHEICC. These centres support the delivery of EHCS and work in close coordination with the respective Divisions. In addition to these, there are five professional councils to provide accreditation to health-related schools/training centres and to regulate care providers such as: (i) Nepal Medical Council (ii) Nepal Health Research Council (iii) Health Professional Council (iv) Ayurveda Council, and (v) Nursing Council.

There are three Departments under the MoH: Department of Health Services (DoHS), Department of Ayurveda (DoA) and Department of Drug Administration (DDA). The DoHS and other departments are responsible for formulating programs as per policy and plans, implementation, use of financial resources and accountability, and monitoring and evaluation. DDA is the regulatory authority for assuring the quality and regulating the import, export, production, sale and distribution of drugs. Department of Ayurveda offer Ayurvedic care to the people and also implement health promotional activities.

## 1.2 DEPARTMENT OF HEALTH SERVICES (DoHS)

Department of Health Services (DoHS) is responsible for delivering preventive, promotive, diagnostic and curative health services throughout Nepal. Director General (DG) is the organisational head of the DoHS. The current organizational structure of the DoHS includes six Divisions: (1) Management Division with infrastructure, budget & planning, monitoring and supervision (M&E) quality of care, management information system, information technology (IT), nursing services, oral and mental health, PAM activities, and free medication & treatment for very severe disease to impoverished Nepalese citizens. (2) Child Health Division covering EPI, Nutrition and CB-IMCI and Newborn care. (3) Family Health Division with the responsibility of reproductive health care, including safe motherhood and neonatal health, family planning and Female Community Health Volunteers (FCHVs). (4) Logistics Management Division covers procurement, supplies and management of logistics, equipment and services required by DoHS and below level (5) Epidemiology and Disease Control Division with the responsibility of controlling epidemics, pandemic and endemic diseases as well as treatment of animal bites. (6) Primary Health Care Revitalization Division with the responsibility of carrying out activities for primary health care as shown in Figure 1.1.

Major functions of DoHS include:

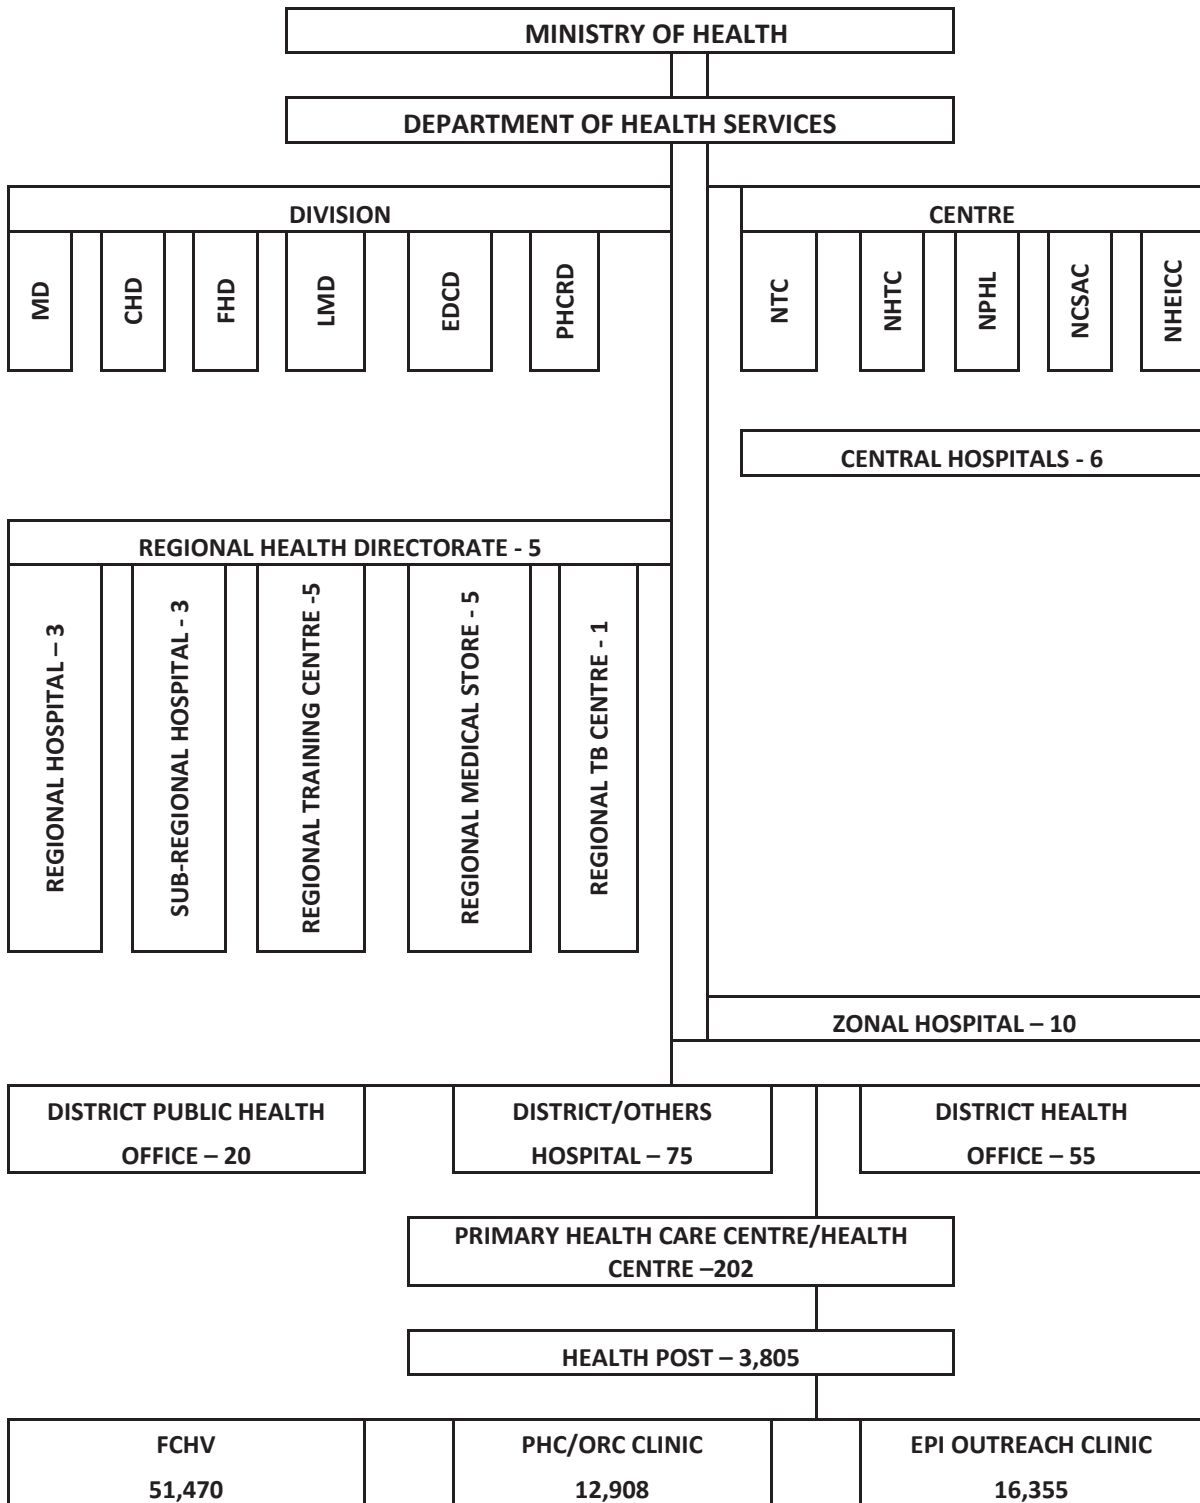

- Provide GoN with necessary technical advice in formulating health related policies, develop and expand health institutions established in line with these policies;
- Determine requirement of human resource for health institutions and develop such human resource by preparing short and long term plans;
- Manage procurement and supply of drugs, equipment, instruments and other logistics at regional, district and below levels;
- Co-ordinate the activities and mobilize resources in the implementation of approved programs;
- Manage the immediate solution of problems arising from natural disasters and epidemics;
- Establish relationships with foreign countries and international institutions with the objective of enhancing effectiveness and developing health services and assist the Ministry of Health and Population in receiving and mobilizing foreign resources by clearly identifying the area of cooperation;
- Create a conducive atmosphere to encourage the private sector, non-governmental organizations and foreign institutions to participate in health services, maintain relation and coordination, control quality of health services by regular supervision and monitoring;
- Manage free medication & treatment for very severe disease: Cancer, Heart, Alzaimers, Parkinsons, Head injuries, Spinal injuries, Renal failure (Kidney Disease) and Sickle-cell Anemia to impoverished Nepalise citizens.
- Manage information systems regarding health facilities, health services, logistics, training and finance to support planning, monitoring, and evaluation of health programs,
- Systematically maintain data, statements and information regarding health services, update and publish them as required;
- Financial management of DoHS, RHDs, D/PHOs and settlement of irregularities.

At the regional level there are five Regional Health Directorates (RHDs) providing technical backstopping as well as program monitoring to the districts. The RHDs are directly under the MoH. There are regional, sub-regional and zonal hospitals, which have been given decentralised authority through the formation of Hospital Development Boards. In addition, there are training centres, laboratories, TB centres (in some regions) and medical stores at the regional level.

At the district level, the structure varies between districts managed by the District Health Office (DHO) and District Public Health Office (DPHO). The DPHOs and DHOs are responsible for implementing essential health care services (EHCS) and monitor activities and outputs of District Hospitals, Primary Health Care Centres (PHCCs) and Health Posts (HPs). The public service delivery outlets in the country include HPs, PHCC/HC, district/other hospitals, zonal hospitals, sub-regional hospitals, regional hospitals, and central level hospitals.

A Health Post is the first institutional contact point for basic health services and it's monitor the activities of FCHVs as well as community-based activities by PHC outreach clinics and EPI clinics. In addition, HP also functions as the referral centre of FCHVs as well as a venue for community based activities such as PHC/ORC and EPI clinics. Each level above the HP is a referral point in a network from to Primary Health Care Centre (PHCC), on to district, zonal sub-regional and regional hospitals, and finally to tertiary level hospitals. This referral hierarchy has been designed to ensure that the majority of population receive public health and minor treatment in places accessible to them and at a price they can afford. Inversely, the system works as a supporting mechanism for lower levels by providing logistical, financial, monitory supervisory and technical support from the centre to the periphery.

### **1.3 SOURCES OF INFORMATION**

Sources of health sector information in Nepal include management information systems (MIS), disease surveillance, vital registration, census, sentinel reporting, surveys, rapid assessments, and research. The MIS within the health sector include the Health Management Information System (HMIS); Logistics Management Information System (LMIS); Financial Management Information System (FMIS); Health Infrastructure Information System (HIIS); Planning and Management of Assets in Health Care System (PLAMAHS); Human Resource Information System (HuRIS); Training Information Management System (TIMS); Ayurveda Reporting System (ARS); and Drug Information Network (DIN).

### **1.4 STRUCTURE OF THE REPORT**

This report has nine chapters. Chapter one briefly presented the background to the practice of annual report preparation, organogram of the DoHS, and sources of information in health sector in Nepal. Chapter two to six cover the different programs within the DoHS; Chapter seven presents the Monitoring and Evaluation (M&E) program of health sector, Chapter eight presents programs of other departments (Drug Administration (DDA), Ayurveda DoA) and Homeopathic within the Ministry of Health; and Chapter nine presents a brief summary of development partners contributing to health sector in Nepal.

Annex one presents the target vs. achievement of the major activities carried out in the last fiscal year 2071/72 by different programs; Annex two shows the program targets for next fiscal year 2072/73; and Annex three provides the raw and analyzed data by health indicators of different programmes disaggregated data by ecological, development regions and districts.

## 2.1 National Immunization Programme

### 1 BACKGROUND

National Immunization Programme (NIP) is the priority 1 (P1) program of Nepal. National Immunization Program then known as “Expanded Program on Immunization” launched in 2034 BS, has been a successful public health intervention. It has met several milestones during the past decades. More than 97% population has the access of immunization service delivery outlet. National immunization program provides equitable services to the geographically, economically hard to reach, marginalized community. Currently; there are 11 antigens *in national* immunization schedule (*IPV& PCV added in RI*). The comprehensive multiyear plan (cMYPoA for 2011-16) with costing for activities for each year is in place. NIP contribution in reduction of under 5 mortality related with MDG 4 goal is immense.

Nepal is polio free since 2010. Nepal was awarded as polio free country on 27th March 2014. The country has been able to sustain maternal and neonatal tetanus elimination status since 2005. The burden of Japanese encephalitis and measles/ rubella disease has been successfully reduced. Measles elimination and control of rubella /congenital rubella syndrome by 2019 has received high level commitment. Several rounds of measles supplementary immunization activities have been completed and measles case based surveillance has been initiated to meet the target of elimination.

Child Health Division, identifies, implement and monitors the annual activities targeted to eradicate, eliminate and control of vaccine preventable diseases. The division also ensures the adequacy of vaccine and cold chain. Logistic management division involves in supply chain management and NHEICC supports in advocacy and IEC material production for immunization. The Regional Health Directorate (RHD) monitors immunization the districts level activities and reports to CHD. District Public Health offices which are the implementers of immunization through the health facilities, located in each VDC and municipalities, in close coordination of local government and civic society.

Immunization services are delivered through static immunization clinics in the health facilities, outreach sessions (established at different locations of VDC, allocated in consensus of local leaders, stakeholders and health facilities staffs) are the main outlets of immunization service delivery. Mobile clinics designed especially for geographically remote districts where regular services can't be delivered due to rain and snow provide immunization services in appropriate months. The session's sites are identified for the better access of population and are usually 3-5 in a VDC but may be more in municipalities. Almost 16,000 immunization sessions are held in each month and 1, 92,000 sessions per annum nationwide. In addition immunization services are delivered through different Private health facilities or Hospitals, NGO/INGO clinics and medical colleges.

At the end of immunization sessions, the health facilities generate data on usage rate of vaccine (total vaccine doses given to the target population) expressed as coverage. Once the eligible population enrolled for vaccination are encouraged, counselled to complete the scheduled doses and those drops the doses are tracked for the completion of missing dose. Vaccine wastage rate is for each antigen. Multi dose vial policy is in practice in almost all fixed sessions and few outreach sessions to reduce the vaccine wastage. HMIS section of Management Division in DoHS collects

reports monthly, analyses against the indicators set for and sends to immunization section of CHD for review and feed back to the districts. Child Health Division also receives VPD surveillance data through HMIS and WHO/IPD. WHO/IPD through its extensive reporting networks in all districts collects data on Acute Flaccid Paralysis, Measles like illnesses, Maternal and Neonatal Tetanus and Acute Encephalitis Syndrome. Field offices of WHO/IPD located in 11 places collect information on weekly basis and verify the information physically on regular basis.

## 2. GUIDING DOCUMENTS OF NATIONAL IMMUNIZATION PROGRAM

### 2.1 Nepal Health Sector Support Program- II (NHSP IP II):

NHSP-2 focuses on increasing access and utilisation of essential health care services, especially to reduce disparities between the wealthier and the poor, vulnerable and marginalised populations. It has given high priority for immunization programme.

### 2.2 Comprehensive Multi Years Plan of Action (2011- 2016)

The comprehensive multi-year plan (cMYPoA) is a five years plan (2011-16) of national immunization programme has clearly mentions the immunization goal, objectives, strategies and activities. The reflected activities are time framed by its cost. Review of cMYPoA activities is done annually to align the government annual priority. The cMYPoA has been aligned with various policy documents on national immunization programs, the Millennium Development Goals (MDGs), Global Immunization Vision and Strategy (GIVS) and World Health Assembly (WHAs) resolutions and lastly vaccine action plan.

#### The Goal, Objectives and milestones of cMYPoA (2011-2016) are as follows:

**2.2.1 GOAL:** To reduce child mortality, morbidity and disability associated with vaccine preventable diseases.

#### 2.2.2 Objectives and strategies

**Objective 1:** Achieve and maintain at least 90% vaccination coverage for all antigens at national and district level by 2016

##### **Key strategies:**

- Increase access and utilization to vaccination by implementing RED strategies in every district
- Enhance human resources capacity for immunization management
- Strengthen immunization monitoring system at all levels
- Strengthen communication, social mobilization, and advocacy activities
- Strengthen immunization services in the municipalities

**Objective 2:** Ensure access to vaccines of assured quality and with appropriate waste management

##### **Key strategies:**

- Strengthen the vaccine management system at all levels

**Objective 3:** Achieve and maintain polio free status**Key strategies:**

- Achieve and maintain high immunity levels against Polio by strengthening routine immunization and conducting high quality national polio immunization campaigns.
- Respond adequately and timely to outbreak of poliomyelitis with appropriate vaccine
- Achieve and maintain certification standard AFP surveillance

**Objective 4:** Maintain maternal and neonatal tetanus elimination status**Key strategies:**

- Achieve and maintain at least >80% TT2+ coverage for pregnant women in every districts
- Conduct Td follow up campaigns in high risk districts
- Expand school based immunization program
- Continue surveillance of NT

**Objective 5:** Initiate measles elimination**Key strategies:**

- Achieve and sustain high population immunity to reduce measles incidence to elimination level
- Investigate all suspected measles like outbreaks with program response
- Use platform of measles elimination for Rubella / CRS control
- Continue case-based measles surveillance

**Objective 6:** Accelerate control of vaccine-preventable diseases through introduction of new and underused vaccines**Key strategies:**

- Introduction of new and under-used vaccines (rubella, pneumococcal, typhoid, rota) based on disease burden and financial sustainability

**Objective 7:** Strengthen and expand VPD surveillance**Key strategies:**

- Expand VPD surveillance to include vaccine preventable diseases of public health concern.
- Strengthen and expand laboratory support for surveillance.

**Objective 8:** Continue to expand immunization beyond infancy**Key strategies:**

- Consider for booster dose of currently used antigen based on evidence and protection of adult from potential VPDs.

**Table 1: Milestones of NIP 2011-2016 are as follows**

Objectives	2011/12	2012/13	2013/14	2014/15	2015/16	
1. Achieve and maintain at least 90% vaccination coverage for all antigens at national & district level by 2016	Achieve and sustain 90% DPT3 coverage in 35 districts and all antigens in 20 districts	Achieve and sustain 90% DPT3 coverage in 50 districts and all antigens in 30 districts	Achieve and sustain 90% DPT3 coverage in 60 districts and all antigens in 50 districts	Achieve and sustain 90% DPT3 coverage in 75 districts and all antigens in 65 districts	Sustain 90% DPT3 coverage in 75 districts and achieve 90% coverage for all antigens in 75 districts	
2. Ensure access to vaccine of assured quality and with appropriate waste disposal	At least 20 district with AEFI monthly zero reporting	At least 60 districts with AEFI monthly zero reporting	All 75 districts with AEFI monthly zero reporting	-	-	
3. Achieve and maintain polio free status	Zero cases of WPV	Zero cases of WPV	Zero cases of WPV	Eradication of poliomyelitis		
4. Maintain maternal and neonatal tetanus elimination status	Conduct Td campaign in 10 high risk districts	Conduct Td campaign in 10 high risk districts	Conduct Td campaign in 10 high risk districts	Conduct Td campaign in 10 high risk districts	-	
5. Initiate measles elimination status by 2016	1..Achieve and sustain at least 95% MCV-1 coverage in 35 districts	1..Achieve and sustain at least 95% MCV-1 coverage in 50 districts	1..Achieve and sustain at least 95% MCV-1 coverage in 60 districts	1..Achieve and sustain at least 95% MCV-1 coverage in 70 districts	1.Achieve and sustain 95% MCV-1 coverage in 75 districts	
					2. Achieve and maintain elimination standard surveillance performance indicator	
					3.Achieve a measles incidence of less than one confirmed case per million population per year	
6. Expand VPD surveillance with possibility of integration	Continue penumo and rota sentinel sites, initiate typhoid & cholera sentinel surveillance	Continue penumo, typhoid, cholera and rota sentinel sites, initiate CRS surveillance, conduct HepBsero survey	Continue penumo, typhoid, cholera, rota & CRS sentinel surveillance	Continue penumo, typhoid, cholera, rota & CRS sentinel surveillance	Continue penumo, typhoid, cholera, rota & CRS sentinel surveillance	
7. Accelerate control of vaccine-preventable diseases through introduction of new and underused vaccines	-	Introduce rubella vaccine into RI	Introduce pneumococcal vaccine into RI, Consider HepB birth dose	-	Introduce Rota vaccine into RI	
8. Continue to expand immunization beyond infancy	Expand school based Td vaccination in 2 additional districts with school health program, Expand Td vaccination to grade 1 & 8 students	Expand school based Td vaccination in 2 additional districts,	Expand school based Td vaccination in 2 additional districts	Expand school based Td vaccination in 3 additional districts	Expand school based Td vaccination in 4 districts	

**3. TARGET POPULATION**

- 3.1 Under 1 year children for BCG, DPT-HepB-Hib, OPV, IPV, PCV and Measles/ Rubella vaccine.
- 3.2 Twelve months children for JE and 15 months children for MRSD
- 3.3 Pregnant women for Tetanus Toxoid containing (Td) vaccine.

#### 4. NATIONAL IMMUNIZATION SCHEDULE.

**TABLE 2: National Immunization Schedule**

SN	Type of Vaccine	Number of Doses	Recommended Age
1	BCG	1	At birth or on first contact with health institution
2	OPV	3	6, 10, and 14 weeks of age
3	DPT - Hep B-Hib	3	6, 10, and 14 weeks of age
4	IPV	1	14 week of age
5	PCV	3	6,10 weeks and 9 month of age
6	Measles- Rubella	2	MR1 at 9 months and 2 at 15 months of age
7	Td	2	Pregnant women (2 doses of Td)
8	JE	1	12 months of age

#### 5. ANALYSIS OF ACHIEVEMENTS BY MAJOR ACTIVITIES

##### 5.1 Major activities carried out in FY 2071/72

- 5.1.1 Procurement of cold chain equipment
- 5.1.2 Training to new health workers (GoN 200, Private /NGO 100)
- 5.1.3 Establishment of training centres and capacity development on immunization and vaccine safety 36 health workers as trainers.
- 5.1.4 Training to RHD focal point /DHO/DPHO/EPIO/CCO on new vaccines for 75 districts
- 5.1.5 Resource mobilization in immunization in 12 districts through appreciative Inquiry approach for the VDC secretaries, Local Development Officers and health facility in charges.
- 5.1.6 Data Quality Self-Assessment in 15 districts
- 5.1.7 Immunization expenditure analysis in 7 districts
- 5.1.8 Orientation on the process of achieving Full Immunization Declaration VDC/municipality and Districts to LDO/DHO and EPI Supervisors in 20 districts
- 5.1.9 Production, printing of guideline and IEC materials on pneumococcal conjugate vaccine(PCV)
- 5.1.10 AEFI cases' investigation and management
- 5.1.11 Procurement and supply of Freeze tag (30 days logger) in 75 district
- 5.1.12 Establishment of Immunization trust fund
- 5.1.13 Sub national Immunization polio campaigns in 27 high risk districts
- 5.1.14 Piloting of Electronic Immunization Registration System(EIRS) in 2 districts
- 5.1.15 Advocacy/ IEC/BBC/documentation and operational studies in immunization

**5.1.2 TARGET vs. ACHIEVEMENT, FY 2071/72****5.1.2.1 Immunization coverage by antigens doses FY 2071/72**

Immunization coverage of different antigens during the FY 2071/72 is analysed as given below.

**TABLE 3: Immunization coverage by antigens doses FY 2071/72**

SN	Antigens	Target population	Targets	Achievement	% Achieved
1	BCG	under 1 year	608,802	571,420	93.86
2	DPT-Hep B Hib 1	under 1 year	608,802	570,453	93.70
3	DPT-Hep B Hib 2	under 1 year	608,802	555,333	91.22
4	DPT-Hep B Hib 3	under 1 year	608,802	552,289	90.71
5	Polio1	under 1 year	608,802	569,585	93.55
6	Polio2	under 1 year	608,802	555,866	91.30
7	Polio3	under 1 year	608,802	550,434	90.41
8	IPV	under 1 year	608,802	359,604	59.07
9	PCV1*	under 1 year	87,660	95,352	108.77
10	PCV2*	under 1 year	87,660	65,469	74.69
11	PCV3*	under 1 year	87,660	32,891	37.52
12	Measles/Rubella	under 1 year	608,802	5173,49	84.97
13	JE	12 months	407,303	302,291	74.42
14	Td 2 & Td2 +	Pregnant women	724,839	522,200	72.04

Source: HMIS/MD and EPI/CHD, DoHS

\*PCV introduced in phased manner

The above table 3 shows the national coverage of BCG is highest of all antigens indicates that almost 94% have access on immunization services. The coverage of 1st, 2nd and 3rd dose of DPT-HepB-Hib and OPV are more than 90% while the coverage of Measles-Rubella is 85%. Pneumonia Conjugate Vaccine (PCV) & Inactivated Poliovirus Vaccine (IPV) has incorporated in national immunization scheduled program since FY 2071/72 and introduced in phased manner in January 2071 BS) only in WDR districts and IPV in September (Ashoj 2071 BS) in all districts at once. Thus, the coverage of PCV has been analysed against the target population of 6 months of WDR and of 3 months for EDR. The PCV1 coverage is higher than 2<sup>nd</sup> and 3<sup>rd</sup> dose, reflects that all children eligible to get vaccine at the age of 6 weeks, 10 weeks as well as 9 months were vaccinated during the launch. The JE coverage (31 districts) is 74%. The Td2+ coverage (Td2 and Td2+) coverage is 72%.

The immunization coverage for last three years of different antigens at national level is presented in figure 1. It shows that, coverage of BCG, DPT-HepB-Hib3, OPV3, MR1 and JE is in decreasing trend by 2-3% except in BCG for 5%. Coverage of IPV which was introduced in September 2015 at the age of 14 weeks (with 3<sup>rd</sup> dose of DPT-HepB-Hib and OPV) does not match with DPT-HepB-Hib3 because it was not used for 12 months (Government fiscal year does not correspond to English calendar year). Regarding the PCV which was introduced in January 2015 in phased manner the graph shown is analysed against total target population and the coverage seen apparently low.

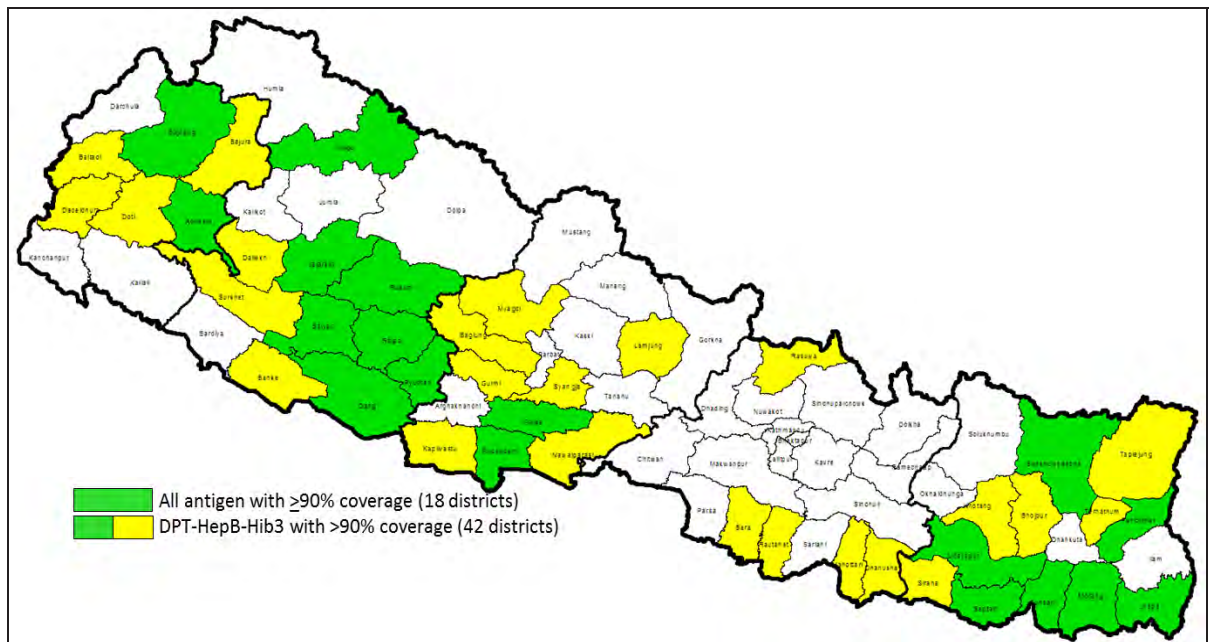

5.1.2.2 TREND OF NATIONAL IMMUNIZATION COVERAGE (FY 2069/70 -2071/72)

5.1.3 EQUITY IN IMMUNIZATION COVERAGE:

The milestones to achieve 90% coverage for all antigens by 2015 in 65 districts and DPT-HepB-Hib3 in 75% to address equity in immunization have yet not met.

Figure 2: District with > 90% for all antigens and DPT-HepB-Hib3

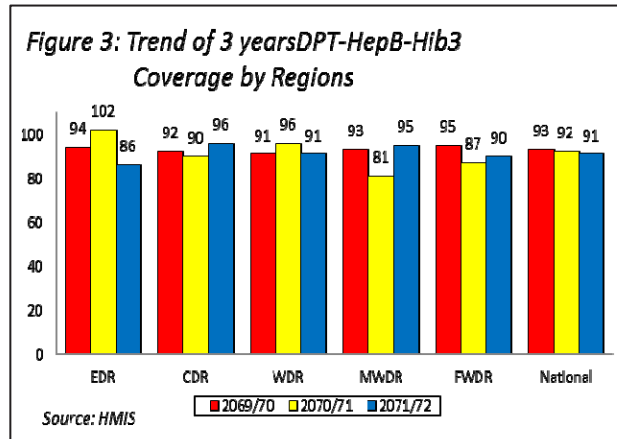

The coverage of DPT-HepB-Hib3 is more than 90% in 42 districts and for all antigens in 18 districts. The decreased number of districts achieving 90% coverage for DPT-HepB-Hib3 and all antigens is linked to denominators of HMIS i.e. the projected VS actual denominators varies district to districts but the administrative and survey coverage (MICS 2014) are almost same. Full immunization

DoHS, Annual Report 2071/72 (2014/2015)

declaration of VDCs/municipality and districts initiatives (where line list of children of 12-23 months and less than 1 is created) will be only solution and will also give true picture of equity.

Figure 3: Region wise DPT-HepB-Hib3 coverage has decreased in EDR and WDR by 16 and 5% respectively. The coverage of DPT-HepB-Hib3 coverage in CDR, MWDR and FWDR has increased by 6, 14 and 3% respectively. The data quality self-assessment as well as capacity built-up in vaccine and cold chain safety training which also includes recording and reporting has helped in improved data quality. Thus these administrative and coverage data does not fluctuates much.

#### 5.1.4 ACCESS AND UTILIZATION OF IMMUNIZATION SERVICE:

Table 4: Districts Categorized based on the 80% coverage of DPT-HepB-Hib1 (Access) and drop out less than 10% of DPT-HepB-Hib1 VS DPT-HepB-Hib3 (Utilization) 2071/72

Category 1 (less Problem) Low Drop-Out (<10%) High Coverage (≥80%)	Category 2 (Problem) High Drop-out (≥10%) High Coverage (≥80%)	Category 3 (Problem) Low Drop-out(<10%) Low Coverage(<80%)	Category 4 (Problem) High Drop-out (≥10%) Low Coverage (<80%)
Taplejung, Panchthar, Ilam, Jhapa, Morang, Sunsari, Djamlita, Terhathum, Sankhuwasabha, Bhojpur, Okhaldhunga, Khotang, Udayapur, Saptari, Dhanusha, Mahottari, Sindhuli, Kavre, Nuwakot, Rasuwa, Dhading, Makwanpur, Bara, ParsamChitwan, Gorkha, Lamjung, Tanahu, Syangja, Kaski, Myagdi, Parbat, Baglung, Gulmi, Palpa, Nawalparasi, Rupandehi, Kapilbastu, Arghakhanchi, Pyuthan, Rolpa, Rukum, Salyan, Dang, Banke, Bardiya, Surkhet, Dailekh, Jajarkot, Jumla, Kalikot, Mugu, Humla, Bajura, Bajhang, Achham, Doti, Kailali, Kanchanpur, Dadeldhura, Baitadi, Darchula	Siraha, Sarlahi, Rautahat	Solukhumbu, Ramechhap, Dolkha, Sindhupalchowk, Lalitpur, Bhaktapur, Kathmandu, Manang, Mustang, Dolpa	
(62 Districts)	(3 districts)	(10 districts)	(0 districts)

Table 4 shows 62 districts falls in Category-1, 3 districts in Category -2, 10 districts in Category -3 and there is no districts in Category - 4 in 2071/72.

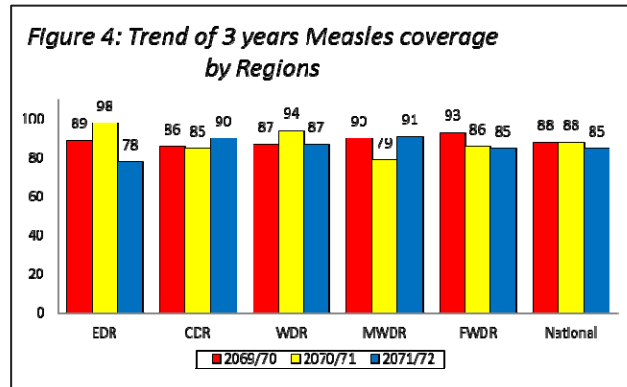

The access and utilization of immunization services which is analysed in table 4 shows that Siraha, sarlahi, Rautahat (CAT 2) has the problem of dropout i.e. Children those receiving DPT-HepB-Hib1, more than 10% of them did not complete DPT-HepB-Hib3 dose. In the same way, Solukhumbu, Ramechhap, Dolakha, Sindhupalchowk, Lalitpur, Bhaktapur, Kathmandu, Manang, Mustang, Dolpa (CAT 4) districts have the accessibility problem though they have good utilization of immunization services.

**5.1.5 NUMBER OF UN-IMMUNIZED CHILDREN IN FISCAL YEAR 2071/72:**

In FY 2071/72 the total un-immunized children against DPT-HepB-Hib3 are 56,513.0 i.e. has increased compare to 52,060 in FY 2070/71.

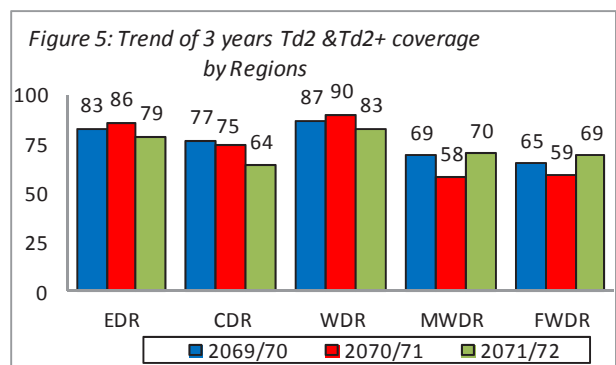

**5.1.6 MEASLES-RUBELLA COVERAGE:**

The national measles- Rubella1 coverage is 85 % for in current fiscal year2071/72, whereas in the last 2 fiscal years (Figure 4) the MCV1 coverage was 88%. The highest coverage (91%) in MWDR in FY 2071/72and the lowest (78. %) is in EDR.

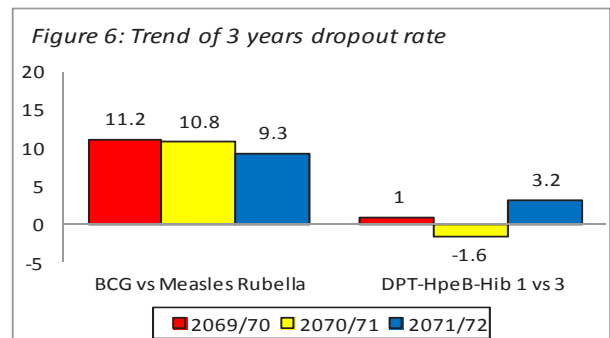

**5.1.7 Td2 and Td2+ COVERAGE:**

Figure 5 shows the coverage of Td2+ (Tetanus Toxoid and low dose of diphtheria) containing vaccine coverage in pregnant women has increased in MWDR and FWDR by 12% and 10% but has decreased in EDR, CDR and WDR by 7 %, 11% and 7% respectively. The coverage of Td2 and Td2+ is less than 80% for years and has significantly reduced in CDR.

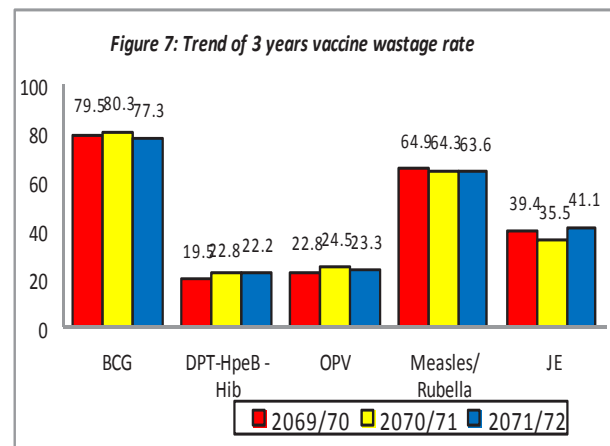

**5.1.8 DROP-OUT RATES:**

Figure 6: The dropout rate for BCG VS MR is close to 9% and has decreased from previous years. Dropout rate of DPT-HepB-Hib 1 VS 3 is 3.2% which indicates the better utilization of immunization services.

**5.1.9 VACCINE WASTAGE RATE:**

Figure 7: The wastage rate of DPT-HepB-Hib and OPV are 22% and 23% respectively, and is decreasing in trend compare to previous years and is higher than accepted wastage rate because there are remote areas where multi dose vial policy cannot be practiced. The wastage rate of BCG, MR and JE (non MDVP vaccine) is high because the sessions size are small but the presentation of BCG and MR vial is big. In case of high wastage rate of JE vaccine, it is discarded within 1 hour of dilution.

**6. SUPPLEMENTARY IMMUNIZATION ACTIVITIES**

**6.1 NATIONAL IMMUNIZATION DAYS FOR POLIO ERADICATION:**

**Figure 8: Coverage of National Immunization campaign for Polio 1997 to 2014**

Figure 8 shows, Polio (NID) campaign coverage from 1997/1998 to 2013/2014 in number and percentage of children immunized in each round. The NID coverage in both round (each year) remained about 90% .

**6.2. SUB NATIONAL IMMUNIZATION DAY (SNID):**

There are 27 Polio high risk districts and out of that SNID was held in 22 earth quake affected districts with only OPV in the FY 2071/72.

Program	Date	Target Population	Achievements	% Coverage	Districts Covered
SNID	6-Jun-15	2,427,411	2,210,771	91.08	22 Districts

**6.3. FULLY IMMUNIZED DISTRICT DECLARATION:**

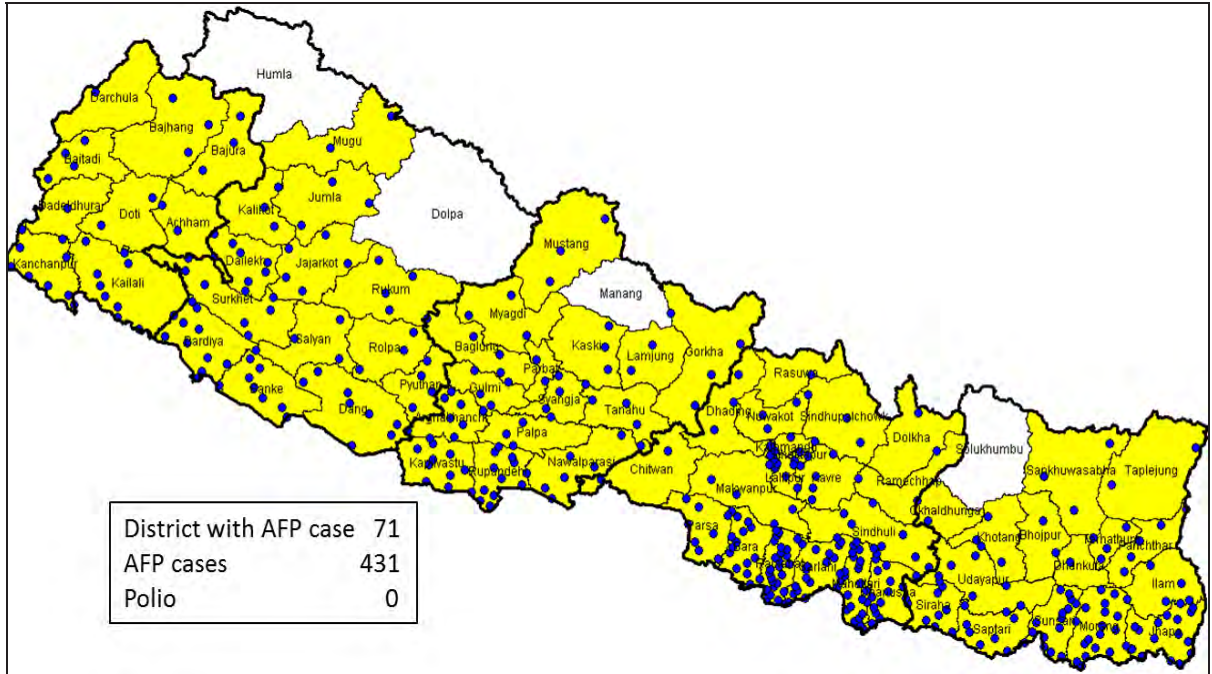

Full immunization VDC/Municipality and Districts declaration by 2017 is the new and innovative approach to address reaching every children as well as equity issues which had been indicated in survey. In 2015 total 8 districts, 700 VDCs and 5 municipalities were declared fully immunized.

**7. VACCINE PREVENTABLE DISEASE SURVEILLANCE**

**7.1 ACUTE FLACCID PARALYSIS SURVEILLANCE:**

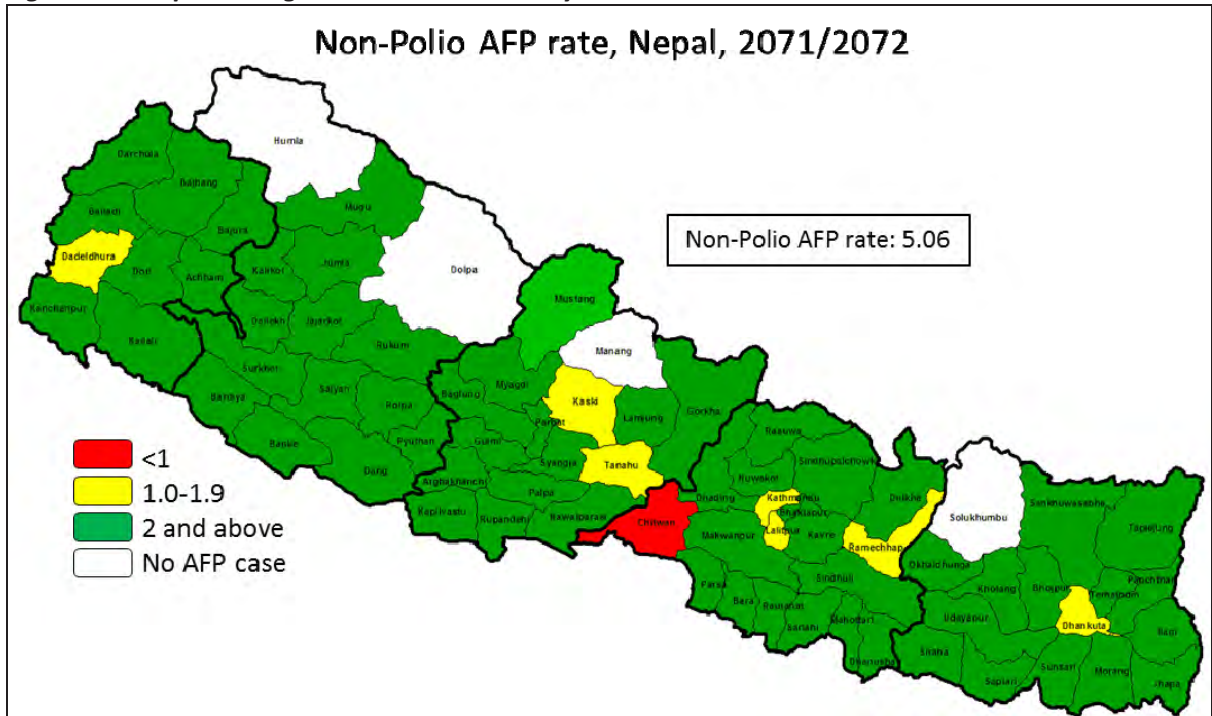

Acute flaccid paralysis surveillance network has been expanded throughout the country and includes all hospital (public, private, medical colleges), selected PHC, HP feasible for VPD surveillance, totalling 735 zero reporting sites and 79 active surveillance sites.

**Figure 9: Map showing reported Acute Flaccid Paralysis (AFP) in FY 2071/72**

AFP cases have been reported from 71/75 districts in 2071/72. Total 431 AFP cases have been reported during the period. Four sparsely populated districts have not reported AFP cases. (There should be 50,000 below 15 yrs population for 1 AFP).

**Figure 10: Map showing Non-Polio AFP Rate by districts**

The non AFP rate is the most sensitive indicators of AFP surveillance (polio eradication initiatives) and map shows that most of the districts have achieved certification level non AFP rate.

**7.2 MEASLES LIKE ILLNESS SURVEILLANCE:**

**Figure 12: line diagram showing Confirmed Measles & Rubella Cases, Nepal 2003-2014**

Figure 12 shows laboratory confirmed measles, rubella cases from 2003 to 2014. Successful completion of catch-up (2004/05), Follow up measles campaigns (2008) and catch up campaign of measles rubella (2011/12) have remarkably reduced measles and rubella cases by 2013/14. The incidence rate of measles and rubella remained 0.26/1,000,000 and 0.06/100,000 respectively in FY 2070/2071.

**7.3. ACUTE ENCEPHALITIS SYNDROME SURVEILLANCE:**

AES surveillance is done through the same AFP surveillance network and the JE cases have reduced dramatically in the JE endemic districts after the mass campaign which was initiated in 2006 and completed in 2011 covering 31 districts.

**Figure 13: Trend of reported AES and Lab confirmed JE cases**

Figure 13 shows the trend of reported AES and laboratory JE cases since 2004 to 2015. Above figure shows that the JE cases have reduced and has been detected mostly in early July and decrease by September.

**Figure 14: map showing reported AES and laboratory confirmed JE cases by districts in FY 2071/2072**

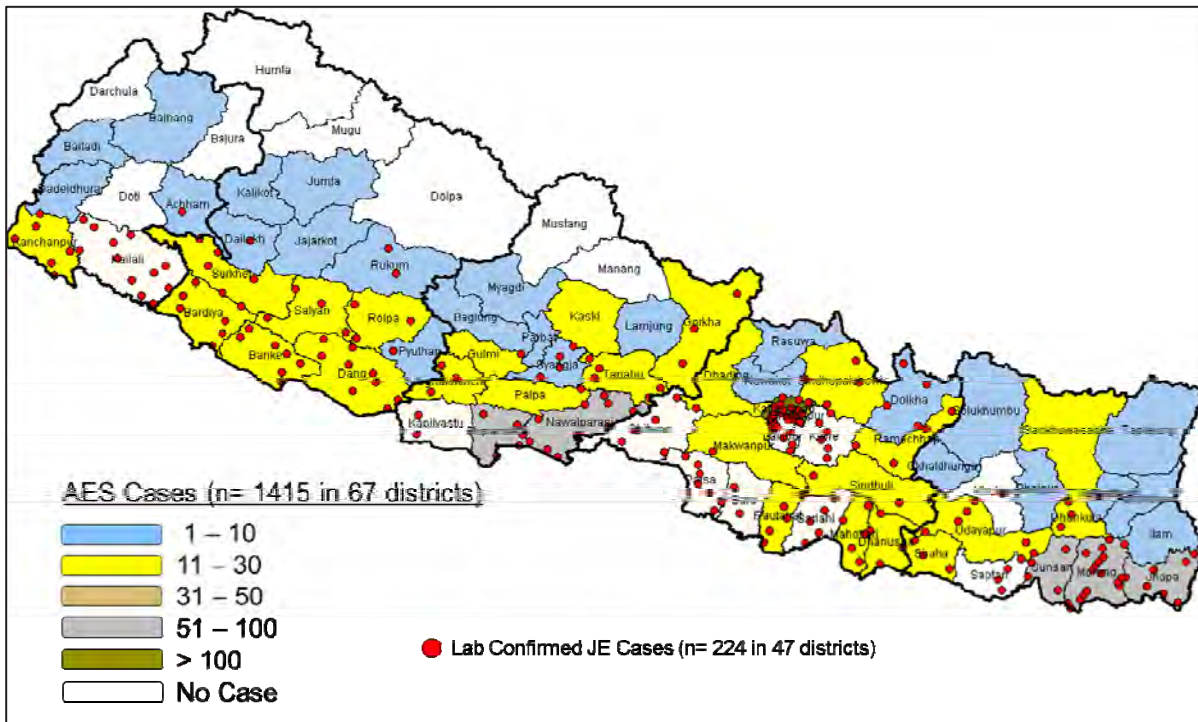

Figure 14 shows that 71 districts have reported AES cases and only 35 districts have 159 laboratory JE cases.

**7.4. NEONATAL TETANUS SURVEILLANCE:**

**Figure 15: Neonatal tetanus cases**

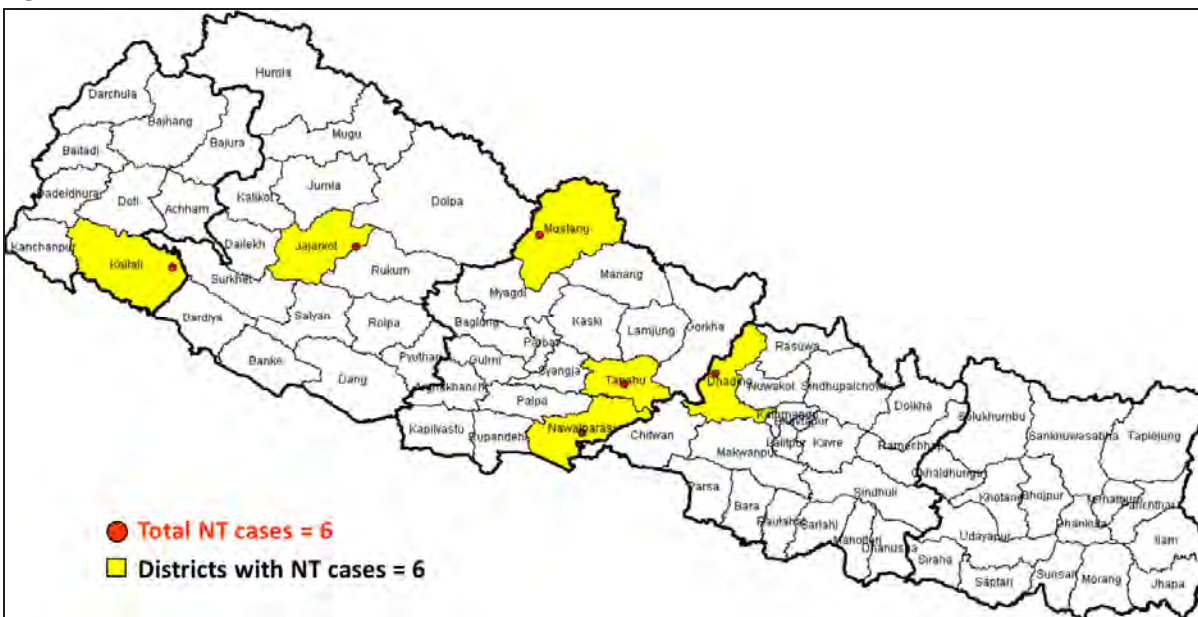

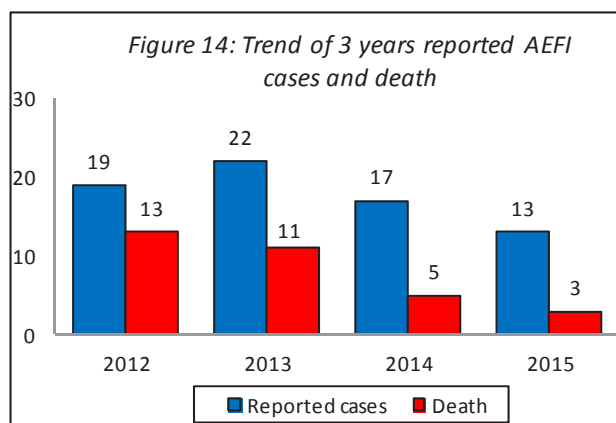

Figure 15 shows neonatal tetanus cases distribution by the districts. Total of 6 NT cases were reported from 6 districts in 2071/72. Nepal has sustained MNT elimination status validated in 2005 (less than 1 case per 1000 live births).

## 8. ADVERSE EVENTS FOLLOWING IMMUNIZATION

Surveillance of Adverse Events Following Immunization (AEFI) is in place throughout the country since 2004. In 2015/16 total 13 AEFI cases were reported from 14 districts compare to 22 AEFI cases from 12 districts in previous year. 3 deaths occurred during 2015. All the cases were fully investigated and causality association was done by the central AEFI committee members.

## 9. PROBLEMS/CONSTRAINTS AND ACTIONS TO BE TAKEN

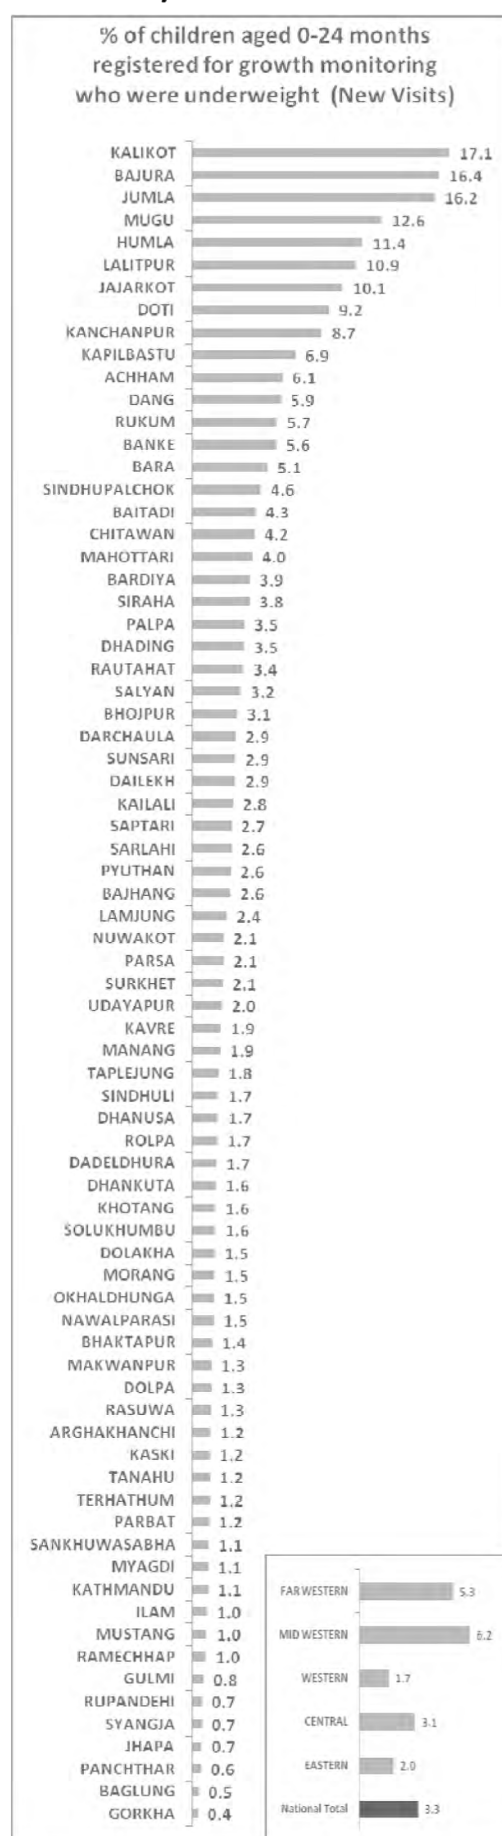

Regional performance review meeting in 2015/16 identified the following problems and constraints and recommended action to be taken at different levels of immunization delivery system.

Problems/Constraints	Action to be taken	Responsibility
Inadequate HRH and ill-defined JD of AHW& ANM	<ul style="list-style-type: none"> <li>Provision for alternative vaccinators for the vacant posts</li> <li>Incorporate responsibility of delivering immunization service in Job Description of all HA, SAHW, AHW/ANM to conduct immunization sessions</li> </ul>	MoH/DoHS/DHO
Ill-defined provision of field allowance for Vaccinators	<ul style="list-style-type: none"> <li>Provision of field allowance whoever performs immunization sessions</li> </ul>	MOF/MoH/DoHS/CHD
Poor quality immunization data: Under and over reporting	<ul style="list-style-type: none"> <li>Supportive supervision of Immunization as per HMIS.</li> <li>Strengthen supportive supervision at all levels</li> <li>Quarterly review of performance of data at HF/DHO level as -HMIS31, HMIS 5.</li> <li>Provision of DQSA to the RHDS and districts</li> </ul>	HF/DHO/RHD/CHD/HMIS
Poor Inventory keeping and distribution system	<ul style="list-style-type: none"> <li>Update inventory of cold chain equipment with their cold chain capacity and vaccine, syringes, diluents etc. and use of stock control register. Maintain maximum and minimum stock level. Always make vaccine requisition by deducting the stock at hand from maximum stock level of vaccine/syringes/diluents</li> </ul>	RMS/District Cold Store
In effective immunization month celebration	<ul style="list-style-type: none"> <li>Utilize immunization month as an opportunity to intensify routine immunization activities especially all</li> </ul>	Districts

Child Health: Immunization

Problems/Constraints	Action to be taken	Responsibility
	<p>sessions be held, reallocate inappropriate session site at appropriate place. Guideline of immunization is followed and plan of activities and achievements be reviewed.</p> <ul style="list-style-type: none"> <li>• Give more emphasis to reach the unreached based on prioritization. Increase the access in Cat 3 and 4 VDCs/municipalities and reduce the dropout rate in Cat 2 VDCs</li> <li>• Report the immunization month's achievement separately to see the additionally of immunization performance of immunization month</li> </ul>	
<p>Poor Cold Chain and Vaccine management</p>	<ul style="list-style-type: none"> <li>• Effective implementation of EVM training at all level</li> <li>• Supervisors checks the proper vaccine storage</li> <li>• Strengthen bundling</li> </ul>	<p>LMD/CHD/NHTC/DHO</p>

## Growth Monitoring Status in FY 2071/72

## 2.2 NUTRITION

### 2.2.1 Background

Nutrition interventions have been proved as one of the most cost effective investments for overall socio-economic development by enhancing human capital through improved productivity of the population. Hence, nutritional well-being of the population is crucial for accelerated attainment of many of the Sustainable Development Goals. In an alignment with several international and national declarations and National Health Policies including International Conference on Nutrition, Government of Nepal is committed to its citizens for adequate food, health and nutrition to maintain their nutritional well-being. The Constitution has also ensured the right to food, health and nutrition to all citizens in Nepal. Failing to ensure protection of the population from the hunger and under-nutrition often results in the vicious cycle of malnutrition and infections leading to poor cognitive and intellectual development adversely affecting which, in turn, lead to less productivity leading to compromised socio-economic development. When combined with household food insecurity, frequent illness and infections, inadequate dietary intake, poor hygiene, care and practices, the cycle of intergenerational malnutrition comes into existence and continues.

#### 2.2.1.1 Current Developments and Focus in Nutrition

Nutrition has become a development agenda globally recognizing a need of multisectoral efforts to enhance the nutritional well-being of the population. In the years 2000s, several global movements advocated prioritization of nutrition for development through increased resources and building partnership for nutrition. Scaling-Up-Nutrition (SUN) is one of them calling for greater 'multi-sectoral' action for improved nutrition during the first critical 1000 days of life. Nepal Government, being an early member of SUN has demonstrated a high commitment in nutrition with an adaptation of Multi Sector Nutrition Plan (MSNP) in 2012 based on the recommendations by multisectoral Nutrition Assessment and Gap Analysis (NAGA). MSNP envisions leading the country on the path towards significantly reduction of chronic nutrition that it will no longer remain an impending factor for enhancing human capital and for overall socio-economic development. Recently, in an alignment of International Conference on Nutrition-2 (ICN-2), UN General Assembly has declared the period of 2016-2025 as the Decade of Action on Nutrition. Nepal as highly committed for nutrition will also need to focus on prioritized actions for nutrition to achieve the goal as envisioned by MSNP.

#### 2.2.1.2 Summary of Policy Initiatives

National Nutrition Policies and Strategies was formulated and approved in 2004 providing policy guidance to address all forms of malnutrition among the population Nepal including under nutrition and over nutrition. This policy document provides the strategic and programmatic directions within the health sector. The MSNP provides broader policy framework within and beyond health sector with a Food and Nutrition Security Secretariat under National Planning Commission that coordinate with all sectoral ministries for its implementation. National Health Policy- 2071 has also made important

directions towards nutritional well-being via utilization and promotion of quality and nutritious foods generated from community level to fight against malnutrition. To support the health sector for multi-sectoral coordination providing technical support in nutrition program development, Nutrition Technical Committee has been established in Child Health Division in 2011 under Department of Health Services.

Aligning with the MSNP and current global initiatives, Department of Health Services, Child Health Division has developed different strategies and plan of actions for maternal infant and young child nutrition with technical support of Nutrition Technical Committee (NuTEC). Moreover, as recommended by NAGA and guided by MSNP, Ministry of Health has conducted an Organization and Management Survey for the establishment of National Nutrition Center for effective implementation of MSNP under health sector.

### **2.2.2 Problem of Malnutrition in Nepal**

The prevailing high rate of child under nutrition in the country is one of the major nutritional problems despite a steady decline in past several years. Alike maternal malnutrition is also prevailing with 18.2 percent prevalence of chronic energy deficiency and increasing trend of overweight. Although Nepal's effort in micronutrient supplementation including National Vitamin A Program has been globally recognized as one of the successful public health interventions, nutritional anemia is still a serious public health issue among women and children. Anemia prevalence among the women of reproductive age and pregnant women is 35 and 48 percent respectively which is still. It is even higher among the children aged 6-59 months with 46 percent with the highest among the children aged 6-23 months at around 69 percent (NDHS, 2011).

### **2.2.3 Efforts to Address Under-nutrition in Nepal**

In an effort of addressing existing problems in nutrition, Ministry of Health has been implementing several nutrition intervention programs since more than last two decades. Aligning with the global developments and movements in nutrition, Ministry of Health has been adopting new initiatives in nutrition programs including evidence-based interventions and strategies. Initiated with Growth Monitoring Program and Breastfeeding Promotion through health facilities during early years, Ministry has then adopted community-based approach via micronutrient supplementation program in later years. Food-based approach with improved dietary behaviors among the nutritionally vulnerable population including hard-to-reach group has been the recent focus of national nutrition programs along the already existing programs. With that view, Child Health Division, Nutrition Section has been implementing programmes:

#### **A. Nationwide Programmes:**

- Growth Monitoring and counseling
- Prevention and control of Iron Deficiency Anemia (IDA)
- Prevention, Control and Treatment of Vitamin A deficiency (VAD)
- Prevention of Iodine Deficiency Disorders (IDD)
- Control of Parasitic Infestation by deworming
- Flour fortification via large roller mills

## **B. Scale-up Programmes**

Maternal, Infant, and Young Children Nutrition (MIYCN) Program

- Integrated Management of Acute Malnutrition (IMAM)
- Micronutrient Powder (MNP) distribution linked with IYCF
- School Health and Nutrition Program
- Vitamin A Supplementation to address the low coverage in 6-11 months
- Multi-sectoral Nutrition Plan (MSNP)

### **2.2.4 National Nutrition Programme**

#### **Goal**

The goal of National Nutrition Programme is to achieve nutritional well-being of all people to maintain a healthy life to contribute in the socio-economic development of the country, through improved nutrition programme implementation in collaboration with relevant sectors.

#### **General Objective**

The general objective of the National Nutrition Programme is to enhance nutritional well-being, reduce child and maternal mortality and to contribute for equitable human development.

#### **Specific Objectives:**

- To reduce protein-energy malnutrition in children under 5 years of age and women of reproductive age
- To improve the maternal nutrition
- To reduce the prevalence of anemia among adolescent girls, women and children
- To virtually eliminate iodine deficiency disorders and vitamin A deficiency and sustain the elimination
- To reduce the infestation of intestinal worms among children and pregnant women
- To reduce the prevalence of low birth weight
- To improve household food security to ensure that all people can have adequate access, availability and utilization of food needed for healthy life
- To promote the practice of good dietary habits to improve the nutritional status of all people
- To prevent and control infectious diseases to improve nutritional status and reduce child mortality
- To control the incidence of life-style related diseases (coronary artery disease, hypertension, tobacco and smoke related diseases, cancer, diabetes, dyslipidemia, etc.)
- To improve health and nutritional status of school children
- To reduce the critical risk of malnutrition and life during exceptionally difficult circumstances
- To strengthen the system for analyzing, monitoring and evaluating the nutrition situation
- To align the health sector programmes on nutrition with Multi-Sectoral Nutrition Initiative

## 2.2.5 Targets

### a. Sustainable Development Goal

#### **Goal 2. End hunger, achieve food security and improved nutrition and promote sustainable agriculture**

- By 2030, end hunger and ensure access by all people, in particular the poor and people in vulnerable situations, including infants, to safe, nutritious and sufficient food all year round
- By 2030, end all forms of malnutrition, including achieving, by 2025, the internationally agreed targets on stunting and wasting in children under 5 years of age, and address the nutritional needs of adolescent girls, pregnant and lactating women and older persons
- By 2030, double the agricultural productivity and incomes of small-scale food producers, in particular women, indigenous peoples, family farmers, pastoralists and fishers, including through secure and equal access to land, other productive resources and inputs, knowledge, financial services, markets and opportunities for value addition and non-farm employment

### b. Global Nutrition Target by 2025- WHO

- Reduction of the global number of children under five who are stunted by 40 percent
- Reduction of anaemia in women of reproductive age by 50 percent
- Reduction of low birth weight by 30 percent
- No increase in childhood overweight
- Increase the rate of exclusive breastfeeding in the first six months up to at least 50 percent
- Reduce and maintain childhood wasting to less than 5 percent

### c. National Nutritional Status and Target

Indicators	Status (%)				Target (%)
	NDHS 2001	NDHS 2006	NDHS 2011	NMICS 2014	MDG 2015
Stunting among U5 children	57	49	41	37	28
Wasting among U5 children	11	13	11	11	5
Underweight among U5 children	43	39	29	30	27
Anemia among U5 children	-	48	46	-	<40
Anemia among children under 6-23 months	-	78	69	-	-
BMI (<18.5kg/m <sup>2</sup> ) among women	26	24	18	-	
Anemia among pregnant women	-	42	48	-	<40

## 2.2.6 Programme Strategies

### Overall Strategy

- Promotion of food based-approach
- Food fortification
- Supplementation of foods
- Promotion of Public Health Measures

### Specific Strategy

#### Control of Protein Energy Malnutrition (PEM)

- Promotion of early initiation of breast feeding within one hour of birth, avoidance of pre-lacteal feeding
- Promotion of exclusive breastfeeding for the first 6 months and timely introduction of complementary food
- Ensure continuation of breast feeding for at least 2 years and introduction of appropriate (quantity and quality) complementary feeding after 6 months.
- Strengthen the capacity of health workers/ medical professionals for nutrition/breast feeding management and counselling
- Improve skills and knowledge regarding growth monitoring and nutrition counseling among health workers
- Strengthen the system of growth monitoring and its supervision/monitoring
- Promote the use of appropriate and adequate locally available complementary foods like Jaulo and Sarbottam Pitho
- Create awareness regarding the importance of appropriate and adequate nutrition for children, pregnant and lactating mothers
- Strengthen the ability of health personnel in dietary and clinical management of severely malnourished children
- Distribute fortified foods to pregnant, lactating women and children aged 6 to 23 months in food deficient areas
- Improve maternal and adolescent nutrition and low birth weight through improved maternal nutrition practices.
- Create awareness of the importance of additional dietary intake during pregnancy and lactation
- Strengthen the activities of nutrition education and Counseling

#### Control of Iron Deficiency Anaemia (IDA)

- Advocacy to promote dietary diversities among policy makers
- Iron Folic Acid supplementation for pregnant and post-partum mothers.
- Iron fortification of wheat flour at roller mills.
- Intermittent Iron Folic Acid supplementation for adolescent girls
- Multiple-micronutrient supplementation for the children aged 6-23 months.

- Nutrition education to create awareness on importance of iron in nutrition, promote consumption of iron rich foods and promote dietary diversities in daily diet.
- Parasitic infestation control among nutritionally vulnerable groups through deworming among pregnant women and children aged 12-23 months.

### **Control of Iodine Deficiency Disorders**

- Strengthen the implementation of Iodized Salt Act, 2055 for regulation and monitoring of iodized salt trade to ensure that all edible salt is iodized
- Universal salt iodization
- Social marketing of government certified two-child-logo adequately iodized salt.
- Ensure systematic monitoring of iodized salt distribution
- Increase the accessibility and market share of iodized packet salt with 'two-child' logo
- Create awareness about the importance of use of iodized salt for the control of IDD through social marketing campaign

### **Control of Vitamin A Deficiency (VAD)**

- Biannual supplementation of high dose vitamin A capsule to the children aged 6-59 months.
- Post-partum vitamin A supplementation within 42 days of delivery.
- Strengthen implementation of Vitamin A treatment protocol for severe malnutrition, persistent diarrhea, measles, Xerophthalmia
- Nutrition education to promote dietary diversification, consumption of vitamin A rich food
- Ensure availability of VA capsules at health facilities
- Increase awareness of importance of VA capsules supplementation
- Bi-annual distribution of vitamin A capsule to children between 6 and 59 months through FCHVs
- Advocate for increased home production, consumption and preservation of Vitamin A rich foods at the community level
- Strengthen the usage of Vitamin A Treatment protocol
- Promote the consumption of VA rich foods and balanced diet through nutrition education
- Supplementation of Vitamin A capsule (200,000 IU) to postpartum mothers through healthcare facilities and community volunteers

### **Low Birth Weight**

- Reduce maternal malnutrition (PEM, VAD, IDD, IDA)
- Reduce workload of pregnant women
- Increase awareness of risks of smoking and alcohol to LBW
- Increase awareness of risks of early pregnancy to infant and maternal health
- Promotion of activities for nutrition monitoring /counseling at antenatal clinics

### **Household Food Security**

- Promote kitchen garden and agricultural skills

- 
- Promote raising of poultry, fish and livestock for household consumption
  - Advocate among community people as to how to store and preserve their foods at home
  - Improve technical knowledge of food processing and preservation
  - Promote activities of women's groups which are interested in income generation

### **Improved dietary practices**

- Conduct a study to clarify the problems of culturally-related dietary habits
- Promote nutrition education activities and advocate for good diets and dietary habits
- Develop and strengthen programs that focus on behavior change as the means of improving dietary habits
- Strengthen the activities of nutrition education/advocacy which seek to eliminate the food taboos affecting nutritional status
- Promote the program of household food security

### **Infectious Disease Prevention and Control**

- Promote knowledge, attitudes and practices which will prevent infectious diseases
- Ensure access to appropriate health services
- Improve nutritional status to raise resistance against infectious disease
- Improve safe water supply, sanitation and housing
- Improve food hygiene practices

### **School Health and Nutrition Program**

- Build capacity of the policy and working level Stakeholders
- Biannual distribution of de-worming tablets to school children from grade 1 to 10
- Celebration of SHN week in the month of June to raise awareness on malnutrition focusing at the community level through the medium of school children and health workers
- Distribution of First Aid kit box to the public schools
- Enhance knowledge, skills, and learning ability
- Introduce child to child and child-to-parent approaches

### **Integrated Management of Acute Malnutrition**

- Capacity building of all levels of health workers for the management of acute malnutrition through regular health services and of other community workers for the screening and referral of the cases for their management
- Effective establishment and implementation of 4 key structures of IMAM programme: Community mobilization, Inpatient therapeutic care, Outpatient therapeutic care and management of MAM
- Effective implementation of IMAM programme based on 4 principles: Maximum coverage & access, Timeliness of service, Appropriate care, and Care as long as it is needed
- Integration of the management of acute malnutrition across the sectors to ensure that the treatment is linked to support for continued rehabilitation of cases and to wider malnutrition prevention programme and services

- Support and promote IYCF, WASH, ECD, social protection and child health & care along with the management of acute malnutrition
- Advocate IMAM programme as the bridge between emergency and development programme: Disaster Risk Reduction
- Supportive supervision and monitoring of IMAM programme activities for better result
- Harmonize both community as well facility based management of acute malnutrition
- Strengthen coordination and functional capacity of Nutrition Rehabilitation Homes

### Nutrition in Emergencies

- Develop adequate capacity and predictable leadership in the nutrition sector for managing humanitarian response
- Formulate an emergency nutrition in emergency preparedness, nutrition in emergency response, including contingency plans and DRR, for the nutrition sector
- Establish and strengthen stronger partnerships and coordination mechanisms between government, UN and non-UN agencies (I/NGOs, donors and non-state sector)
- Response during emergencies through the activated nutrition cluster

### Life Style Related Diseases

- Create awareness among adults about the importance of maintaining good food habits
- Develop capacity for counseling at health facilities
- Create awareness about the importance for adolescents and adults to control smoking and body weight
- Create awareness to increase physical activity and improve stress management techniques

## 2.2.7 Major Achievements

### 2.2.7.1 Growth Monitoring and Promotion

Growth monitoring of children less than 2 years of age is one of the key strategy of Government of Nepal for prevention and control of protein energy malnutrition. It is recognized as an effective means of evaluating a child's growth pattern, providing a critical opportunity for taking the preventive or curative actions needed. Currently, health workers of all public health facilities monitor the growth of children once a month by taking their weight in 75 districts. Based on the WHO new growth standard, MoH has developed and used a new growth monitoring card.

Figure 2.2.7.1 shows the percent of newborns with low birth weight (<2.5 kg) of fiscal year 2071/ 72. There is no significantly a difference of low birth weight among regions. By regions, 11 percent off

newborns were reported low birth weight from mid western region which is the highest compared to other regions. There is 9 percent of newborns with low birth weight in national level.

Figure 2.2.7.2 shows the average number of growth monitoring visits of last three fiscal years. Looking at regional level, there is 2.9 average number of growth monitoring visits in eastern and far western region which is higher as compared to others regions in fiscal year 2071/72. In all regions, it is decreasing trend compared to fiscal year 2070/71. At the national level, there is only 2.5 visits for growth monitoring. This reflects that proper counselling to mothers or care takers by health workers is necessary to increase the growth monitoring visits of children.

Figure 2.2.7.3 shows percent of children aged 0 to 12 months registered for growth monitoring from FY 2069/70 to 2071/72. In FY 2071/72, the registration of growth monitoring is slightly decreased in eastern, center and western regions compared to fiscal year 2070/71. In western region, 120 percent children were registered for growth monitoring which is the highest compared to others regions in FY 2071/72. In center region, there is only 79 percent of children were registered for growth monitoring which is the lowest as compared to other regions. At national level, 97 percent of that aged group was registered for growth monitoring in this fiscal year which is 9 percent low compared to FY 2070/71.

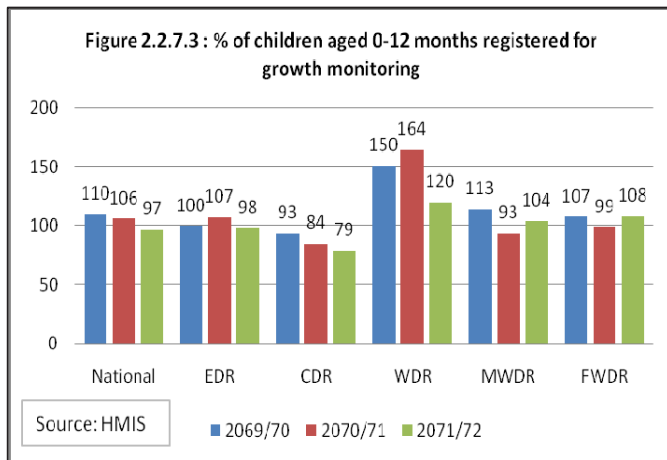

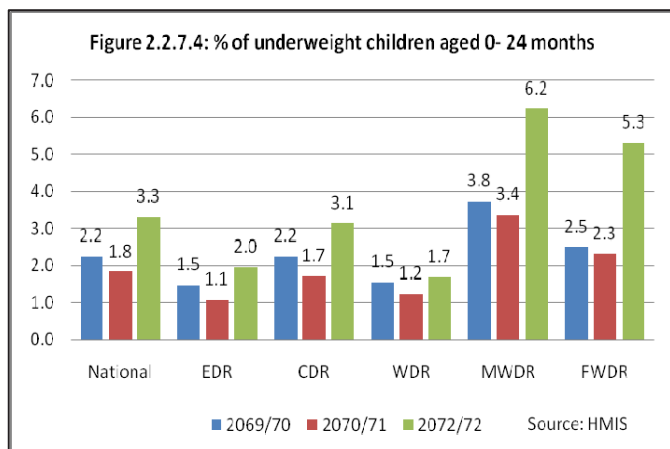

Figure 2.2.7.4 shows that 3.3 percent of underweight children 0- 24 months were reported at national level which is 1.5 percent higher in FY 2071/ 72 compared to FY 2070/71 among new growth monitored. By regions, there is slightly increased of underweight children in all regions in this fiscal year. Highest cases of underweight children were reported from mid western region in all three fiscal years.

### 2.2.7.2 Infant and Young Child Feeding (IYCF)

Appropriate feeding practice is essential for enhancement of nutrition, survival, growth and development of infants and young children. This feeding practice, collectively is known as IYCF practices, includes exclusive breastfeeding for 6 months and nutritionally adequate and complementary feeding starting from the age of 6 months with continued breastfeeding up to 2 years of age or beyond. Improving care and practices related to infant and young child feeding (IYCF) is a key priority strategy of MoH. IYCF programme has been scaled -up in 60 districts and has planned to cover throughout the country by next year; however, effective counseling and monitoring mechanism is an essential to improve its' status.

Figure 2.2.7.5 shows that the percent of children aged 0-6 months who were exclusively breastfed for the first six months, who registered for growth monitoring in fiscal year 2071/72. There is huge difference of exclusively breast feeding status by regions. About 57 percent children were exclusively breastfed for the six months in far western and mid western regions which is the highest compared to others regions. In center region, only 10.7 percent children were exclusively breastfed for the first six months. At national level, exclusive breast feeding is only 28.5 percent which is very low as compared to NDHS 2011 (70 percent).

Figure 2.2.7.6 shows that 58.1 percent of children aged 6-8 months among children age 6-11 months received complementary foods, who were registered for growth monitoring in far western region which is the highest as compared to other regions. In center region, only 9.9 percent children of that age group received complementary food. Looking at national level, only 27.5 percent of children of that age group received complementary food which is very low as compared to NDHS 2011 (70 percent). It reflects that timely introduction of complementary food is very poor in our community. Therefore, need to provide appropriate counselling to mothers or care takers to improve the feeding practices and nutritional status of infants and young children.

### 2.2.7.3 Integrated Management of Acute Malnutrition

Integrated Management of Acute Malnutrition (IMAM) Programme (previously CMAM-Community based Management of Acute Malnutrition) manages acute malnutrition in children age 0-59 months through inpatient and outpatient services at the facility and community level. This program has been implementing in 11 districts (Achham, Kanchanpur, Bardiya, Jajarkot, Jumla, Mugu, Kapilbastu, Sarlahi, Dhanusa, Saptari and Okhaldhunga) and in the plan of scale up in more districts. Along with the MIYCN promotion and support, it aims to integrate the programme across the sectors (Health, ECD, WASH, Social protection) to ensure that the treatment is linked to support for continued rehabilitation of cases and to wider malnutrition prevention programme and services. The programme also acts as a bridge between emergency and development. i.e. more DRR (Disaster Risk Reduction). The main goal of this program is to prevent mortality and morbidity due to acute malnutrition among 0-59 months children at the facility and community level.

In this Fiscal year 2071/72, 11 IMAM districts have admitted 4680 severely acute malnourished children at out patient's therapeutic program and discharged 5483 children. Among them 74 percent children have recovered and similarly, defaulter rate is 15 percent and death rate is 1 percent which if we compare with SPHERE standard (recovery rate >75percent, defaulter rate <15percent and death rate <10percent) program is just near to achieve the sphere standard. But yes, if we go individual district in some districts (Mugu, Sarlahi and Kapilbastu) we should have to focus and give attention to improve program performance. The details performance of individual district has given below.

**Table 2.2.7.1: District wise IMAM Performance**

SN	Districts	Total Admission	Total Discharge	Total Recover	Recovery rate	Total Death	Death rate	Total Defaulter	Defaulter rate
1	OKHALDHUNGA	52	63	45	71	0	0.00	7	11
2	SAPTARI	801	1493	1293	87	0	0.00	115	8
3	DHANUSA	0	0	0	0	0	0.00	0	0
4	SARLAHI	246	288	180	63	0	0.00	77	27
5	KAPILBASTU	1090	1014	691	68	0	0.00	252	25
6	BARDIYA	561	628	595	95	0	0.00	10	2
7	JAJARKOT	164	140	99	71	1	0.71	21	15
8	JUMLA	215	292	214	73	11	3.77	38	13
9	MUGU	303	298	152	51	0	0.00	84	28
10	ACHHAM	441	528	388	73	2	0.38	59	11
11	KANCHANPUR	807	739	626	85	2	0.27	44	6
<b>Total</b>		<b>4680</b>	<b>5483</b>	<b>4283</b>		<b>16</b>		<b>707</b>	
<b>Total Achievement in %</b>					<b>74</b>		<b>1</b>		<b>15</b>
<b>Sphere standard</b>					<b>&gt;75 %</b>		<b>&lt;10 %</b>		<b>&lt;15 %</b>

Source: HMIS

In some district, number of discharged children seemed higher than admission. It's normal in IMAM program because children may come as carry over from next fiscal year. In Saptari district, number of

discharged children is comparatively very high (1493) than total admission (801). It shows that 692 SAM cases were carried over from previous fiscal year.

#### 2.2.7.4 Nutrition Rehabilitation Home (NRH)

The first Nutrition Rehabilitation Home was established in 1998 in Kathmandu and now there are 18 NRHs in Nepal located in different Regional/Sub regional, Zonal and districts hospital. The aim if NRHs is to reduce the child mortality rate caused by malnutrition in Nepal and it has two specific objective as well; to restore health of severely malnourished children and educate the guardian, and most often mothers on nutrition and family health. The total capacity of 16 NRHs is 181 beds. With an average of 30 children staying days and a 90 percent occupancy target, these NRHs have a capacity to serve 1981 malnourished children per year.

**Table 2.2.7.2: Admission and discharge status of NRH**

SN	NRHs	Achievement	
		Admission	Discharge
1	NRH-Ktm	259	253
2	NRH-Janakpur	164	163
3	NRH-Rajbiraj	147	146
4	NRH-Bharatpur	147	141
5	NRH-Dailekh	46	44
6	NRH-Baglung	151	155
7	NRH-Dang	152	150
8	NRH-Butwal	108	105
9	Nepalgunj	133	131
10	Bhadrapur	92	87
11	Biratnagar	83	79
12	Birgunj	155	148
13	Kanchanpur	139	134
14	Dhangadi	159	153
15	Pokhara	108	99
16	Surkhet	145	138
	<b>Total</b>	<b>2188</b>	<b>2126</b>

*Source: Annual report 2014-2015, Nepal Youth Foundation*

This fiscal year 2071/72, total 2188 children were provided nutritional care through NRH and got recovered 2126. Similarly, all the care takers were provided counselling on food, nutrition, health hygiene, and sanitation. The sessions were made live by food demonstrations and practical sessions.

### 2.2.7.5 Prevention and Control of Iron Deficiency Anemia

Ministry of Health has been supplementing Iron and Folic Acid (IFA) to pregnant and post-partum women through Primary Health Care Services since 1998 to address high maternal anemia prevalence under policy of Iron Folic Acid Supplementation (60 mg elemental iron+400 microgram folic acid) to the pregnant women for 225 days from the second trimester. Initially, the supplementation was provided to the pregnant women from the health facilities. In 2003, Intensification of Maternal and Neonatal Micronutrient Program (IMNMP) was initiated to improve coverage and compliance of IFA supplementation via bringing the service closer to beneficiaries through increasing access to IFA tablets. In this program, the IFA supplementation was distributed from the Female Community Health Volunteers at ward level. This program was implemented in phase-wise manner covering all 75 districts by the year 2014. The intensification program has helped to improve the coverage of maternal IFA supplementation program; however the compliance of taking 180 tablets during pregnancy and taking 45 tablets for post-partum period is still an issue. The coverage of 1st time IFA distribution is consistently high with over 80 percent, but the continuation till 180 days and till 45 days of delivery needs to be improved.

Figure 2.2.7.7 shows the overall trend of supplementation of IFA tablets of last three fiscal years at national level. The coverage of IFA supplementation with 1<sup>st</sup> time distribution is consistent over 80 percents in the last three years. Yet, the distribution for 180 days and 45 days post-partum is low compared to the 1<sup>st</sup> time distribution.

By regions, the trend follows the same pattern as for the national coverage as shown in figures 2.2.7.8 and 2.2.7.9. The coverage for the 1<sup>st</sup> time distribution is maintained at around 80 percents for the last three years, while the

coverage for 180 days distribution is low nationally and by regions. Nevertheless, coverage by individual regions varies with the Central Region with the lowest coverage for both 1<sup>st</sup> time distribution and the distribution for 180 days as well. There is no great difference in 1<sup>st</sup> time distribution and distribution for 180 days in other regions except in Mid-Western region. In the Mid-Western region, the coverage of 1<sup>st</sup> time IFA distribution has increased to 105 percent in FY 2071/072 from 77 percent in FY 2070/071

### **2.2.7.6 Integrated Infant and Young Child Feeding- Micro-Nutrient Powder (IYCF-MNP) Community Promotion Program**

Considering the critically high levels of anemia together with other micronutrient deficiencies, situation analysis and strategic review was done in 2003 which highlighted the severity and implication of the high prevalence of anemia in young children and lack of any effective intervention in place to address the problem and warranted urgency to address the problem. The National Nutrition Policy and Strategy 2004 and Anemia Plan of Action 2005 was endorsed. The NDHS 2006 revealed that the anemia situation among 6-23 months children to be 78% with poor IYCF practices. Food based approaches are the best and sustainable approach to improve the situation; however, the feeding of infants and young children was far from optimal. The need for innovative approaches to address anemia in young children and other vulnerable groups was underscored and the Plan of Action endorsed Sprinkles as key intervention to address anemia in young children. Later in 2007, National Nutrition priority workshop was held at Kathmandu which endorsed piloting of sprinkles supplementation as preventive measure. The Lancet 2008 further recommended the IYCF-MNP interventions as one of the effective and cost efficient intervention. In 2008, feasibility study was initiated in 2 districts to design large scale pilot programme. Later in June 2009, MoH piloted the home fortification of complementary food with MNPs among the children aged 6-23 months in 6 districts (Parsa, Makawanpur, Gorkha, Plapa, Rupandehi, Rasuwa) integrating with the Community Infant and Young Child Feeding Program. After the successful completion of the pilot program, MoH expanded this program in additional 9 districts (Sankhuwasabha, Morang, Sunsari, Kapilbastu, Dang, Rukum, Bardiya, Dadeldhura and Achham) in 2012; this program is currently implemented in 15 districts of Nepal.

Promotion of MNP is linked with improved complementary feeding; while introducing MNPs mothers and caregivers are also counseled to timely introduce complementary foods at the age of six months, for age appropriate feeding frequency, improving dietary quality of complementary foods by making nutrient and calorie dense (e.g. by adding milk, oil, ghee, peanuts etc.) as well as hand washing with soap before feeding. Furthermore, mothers/caregivers are trained to prepare “Poshilo Jaulo” (pulses, rice and green vegetables cooked in oil) and “Lito” (mixture of blended and roasted cereal and legume flours).

The feasibility study carried out in 2 districts involved formative and ethnographic research to identify existing feeding practices and potential barriers that might hinder acceptance of MNP, branding of the product, and development of a behavior change communication strategy, etc. As part of the study, FCHVs were trained to counsel mothers on IYCF and care issues as well as to distribute MNP in eight VDCs of two districts. Evaluation was conducted to gather information on coverage, acceptability, compliance in utilization, including any constraints and logistical issues related to delivery of the intervention. The feasibility study has shown a strong community acceptance with a very high coverage and compliance on the use of MNP. With promising impact studies globally, the IYCF-MNP was initiated in Nepal and the piloting in 6 districts was designed to study the operational efficacy and effectiveness in terms of coverage, compliance and mode of distribution. The coverage survey of the pilot study shows coverage ranging from 53% to 83% and compliance ranging from 40% to 56%. The linking of IYCF

with MNPs has contributed to significant improvement in IYCF practices as revealed by the process monitoring and coverage surveys. Table 2.2.7.3 shows that 78.8 percent of children aged 6 to 23 months were taken first dose of Multiple Micronutrient Power (MNP-Baal Vita) from 15 programme districts, whereas only 4.6 percent were taken third dose of MNP of that age group in fiscal year 2071/72. Proper counselling and follow up is essential to improve its compliance.

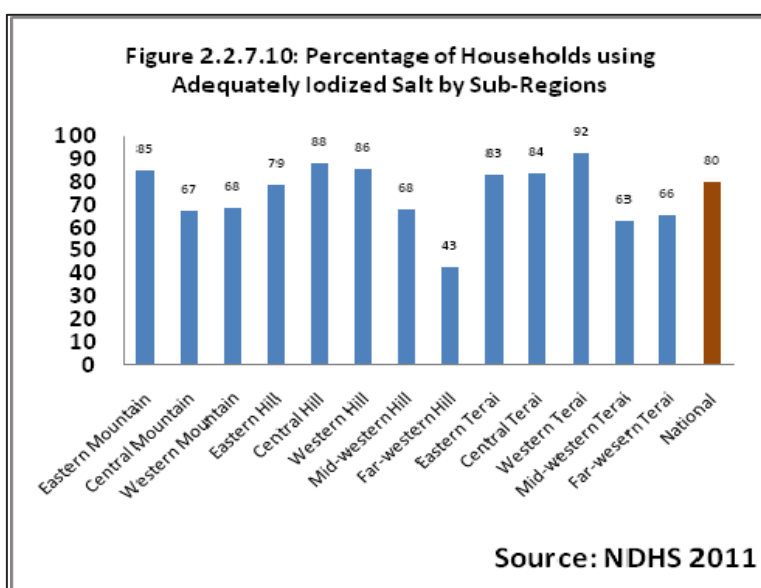

**Table 2.2.7.3: Micronutrient Powder (MNP- Baal Vita) distribution status**

SN	District	Target Popn.	First Time						Third Time		1st dose (%)	3rd dose (%)

### 2.2.7.7 Prevention and Control of Iodine Deficiency Disorder

Ministry of Health adopted a policy to fortify all edible salt in 1973 to eliminate Iodine Deficiency Disorders (IDD) among the population. Universal Salt Iodization (USI) is the only strategy under this policy to address IDD in the country. Under this policy, Salt Trading Corporation is responsible for iodine fortification of all edible salt and their distribution throughout the country, while Ministry of Health is responsible

for the promotion of adequately iodized salt and its social marketing to increase consumption of optimum iodized salt at the household level. Government uses Two-Child-Logo (TCL) to certify the adequately iodized salt and Department of Health Services has been implementing Social Marketing Campaign of this certified iodized salt to create awareness on use of adequately iodized salt household level. The HMIS has yet not incorporated any indicators in regards to use of TCL adequately iodized salt. However, other national surveys have reported the coverage of adequately iodized salt at household showing that in the last thirteen years, the percent of the households using the adequately iodized salt has increased from 55 percent in 1998 (Nepal National Micronutrient Status Survey, 1998) to 80 percent in 2011 (Nepal Demographic Health Survey, 2011).

Although the national coverage on use of adequately iodized salt has reached to 80 percents in the year 2011, there are great sub-regional variations on it (fig. 2.2.7.10). Western Terai region has the highest coverage at 92 percents and the Far-Western region has the lowest coverage at 43 percents. To address this problem, Child Health Division has planned to implement Iodized Salt Social Marketing Campaign (ISMAC) Program in the region with lowest coverage. This program is being piloted in 2 districts of the region, namely Dadeldhura and Baitadi as intervention domain with Achham and Doti as comparison districts for the intervention.

A baseline-survey of ISMAC program was carried out in this FY, which shows (fig. 2.2.7.11) that half of the households in intervention domain (Dadeldhura and Baitadi) use adequately iodized salt. In the comparison domain (Achham and Doti), 42 percent households use adequately iodized salt. Among all the salts used, 50 percent in intervention domain and 37 percent in comparison domain use government certified TCL adequately iodized salt (fig. 2.2.7.12).

As usual in previous fiscal years, Iodine Month was celebrated in February month of International Calendar in all 75 districts to raise awareness on use of TCL adequately iodized salt for the optimum iodine intake to combat iodine deficiency disorders.

### 2.2.7.8 Control of Vitamin A Deficiency Disorders

Government has initiated National Vitamin A Program (NVAP) in 1993 to improve vitamin A status of the children aged 6-59 months and reduce child mortality. This program has been recognized as a global success story of public health interventions with consistent coverage over 85 percents. With 8 districts in its first phase, the program was scaled up nationwide by the year 2002. FCHVs, the frontline community health volunteers supplement the capsules to the target children twice a year (in Baisakh and Kartik) through a national campaign. The trend in the coverage of Vitamin A supplementation to the children aged 6-59 months is demonstrated below.

As shown in the figure 2.2.7.13, the national coverage of vitamin A supplementation has decreased from 91 percent in FY 2069/70 to 71 percent in Fy 2070/071. However, it has increased to 85 percent in FY 2071/072. By regions as well, the trend follows the same pattern except in Central Region, where the trend is decreasing despite of having consistent higher coverage over 80 percents.

Age-wise coverage of the program is illustrated in the figure 2.2.7.14. At the national level, the coverage among the children aged 6-11 months is high (104 percent) compared to that among the children aged 12-59 months (82 percent). Similar pattern is reported in all regions. However, the differences in the coverage by age-groups vary in the regions. The Central Region shows the greater difference with 126 percent among the children aged 6-11 months and 77 percent among the children aged 12-59 months. The difference in the coverage by age-group is lowest in the Western Development Region. In this region, the coverage among the 6-11 months old children is 85 percent and that among 12-59 months old children is 82 percent.

### 2.2.7.9 School Health and Nutrition Programme

School Health and Nutrition Strategy (SHNS) was developed in 2006 by the Ministry of Health (MoH) and Ministry of Education (MoE) reflecting the need to address the high burden of diseases in school age children. In 2008, a five year Joint Action Plan (JAP) was endorsed by both ministries in order to effectively implement the minimum package of school health and nutrition based under the four strategic objectives of the SHN strategy which are as follows:

- 1) Improve use of SHN services by school children
- 2) Improve healthful school environment

- 3) Improve health and nutrition behaviour and habits
- 4) Improve and strengthen community support system and policy environment

Improved use of school-based health and nutrition services, better and improved access to safe water and sanitation and skills-based health education, community support and policy environment, are the core elements of the School Health and Nutrition programme.

The Government of Nepal implemented a pilot SHN project in primary schools based on the Joint Action Plan (JAP) in Sindhupalchowk and Syangja districts for four years from 2008 to 2012. On the basis of findings, SHN programme was scaled up into 54 districts and has planned to cover all districts by F/Y 2075. New Joint Action Plan (JAP) 2071/072 to 2075/76 was endorsed from Ministry of Health and Ministry of Education which recommends of the following minimum package of SHN programme to improve the health and nutrition status of school children:

- 1) Annual Health Screening
- 2) Bi-annual Supplementation of De-worming Tablets to School Children (Grade 1-10)
- 3) Provision of First Aid Kit Box and its refilling mechanism in all primary public schools
- 4) Iron-folate Supplementation to adolescent School Children (Grade 6-10)
- 5) Provision of hand washing facility with soap
- 6) Toilets in each school
- 7) Use of new attendance register in all schools
- 8) Strengthen SMC for SHN related activities
- 9) Child Club mobilization

#### **2.2.7.10 Nutrition in Emergency (NiE)**

The earthquake on 25 April 2015 and the subsequent aftershock on 12<sup>th</sup> May 2015 have had a devastating impact in Nepal affecting 35 of the country's 75 districts. Among these, 14 districts were identified as most affected districts. Nutrition Cluster under NEOC did response having developed 5 building blocks to make nutrition intervention more systematic. These 5 building blocks are based on UNICEF, WFP joint statement for emergency nutrition response:

- Promotion, protection and support for Breast feeding 0-23 months aged children
- Promotion of complementary feeding for 6-23 months aged children
- Management of moderate acute malnutrition through supplementary feeding programme for 6-59 months aged children
- Management of severe acute malnutrition programme through therapeutic feeding programme for 6-59 months aged children
- Micro-nutrient for children and women such as; MNP and Vitamin A for the children age 6-59 months, IFA for pregnant and postnatal women.

The total achievement of emergency nutrition response in the 14 Earth quake affected districts is as follows:

**Table 2.2.7.4: Achievement of Emergency Nutrition response in 14 Earth quake affected districts**

SN	Intervention Areas	Total Targeted Population	Total Achievements	
			# of Beneficiary Reached	Percent of the Reached
1	Mothers/caretakers of children age 0-23 months received counselling on breast feeding and risks of artificial feeding	225,708	152,697	68
2	Mothers/caretakers of children age 6-23 months received counselling on complementary feeding	167,757	137,719	82
3	Children age 6-59 months screened using MUAC	476,842	373,546	78
4	Children age 6-59 months with moderate acute malnutrition who are identified through screening	2,500	1,564	63
5	Children age 6-59 months with severe acute malnutrition who are admitted to therapeutic care	2,500	1,328	53
6	Blanket Supplementary Feeding Program to the children aged 6-23 months	46,484	26,160	56
7	Children age 6-59 months who received multiple micronutrient powders ( Baal Vita)	451,512	326,091	72
8	Children age 6-59 months who received Vitamin A capsules	476,842	365,871	77
9	Children age 12-59 months who received deworming tablets	418,544	385,972	92
10	Pregnant & lactating women who received IFA tablets	252,043	173,998	69

Source: Nutrition Cluster report 2071/72

Now the nutrition cluster already shifted in the recovery phase which also depends on the 5 building blocks and implementing accordingly.

Similarly, nutrition in emergency training and contingency preparation workshop organized focusing to flood prone districts where 18 flood prone district's DHO, Nutrition Focal Persons were participated. All the districts have prepared contingency plan.

### **2.2.7.11 Mother and Child Health and Nutrition Programme**

Nepal has been providing food assistance to Pregnant and Lactating Mothers (PLM) and children aged 6 to 23 months through the Mother and Child Health and Nutrition Care (MCHN) activity of the Country Programme (CP) since 2001 in alignment with the Government's long term and interim strategic plan under the nutrition and safer motherhood programme of the MoH. Under the MCHN Programme, a monthly take home ration of fortified supplementary food is provided along with health services, growth monitoring and counseling from government and community health staff in 6 programme districts; Humla, Jumla, Dolpa, Kalikot, Mugu and Solukhumbu.

### **2.2.7.12 New Projects on Nutrition Programme**

#### **a. Suaahara: An Integrated Nutrition Program**

Suaahara, a five year project (August 2011 – August 2016) USAID-funded integrated nutrition program aims to improve the nutritional status of women and children in 41 Districts of Nepal influencing behavior of individuals and community through community-based behavior change programming with a focus on reaching the most disadvantaged groups (DAG).

The Suaahara project focuses on four primary results:

1. Household health and nutrition behaviors improved
2. Women and children increase their use of quality nutrition and health services
3. Women and their families increase their consumption of diverse and nutritious food
4. Coordination on nutrition between government and other sectors is strengthened

Additionally, Suaahara engages in 4 cross-cutting themes: gender and social inclusion (GESI), social and behavior change communication (SBCC), social mobilization and governance, and monitoring and evaluation.

During the period July 2014 to June 31, 2015, Suaahara efforts focused on coordinating with government bodies, particularly the Child Health Division (CHD) to execute the integrated nutrition program in the project districts using multiple entry points to reinforce health and nutrition behaviors of 1,000 days mothers and their family members. Suaahara also concentrated on rolling out its activities in its 16 expansion districts; Kanchanpur, Kailali, Bardiya, Banke, Surkhet, Dailekh, Jajarkot Dang, Rolpa, Puythan, Rukum, Salyan, Gulmi, Arghakhachi, Kapilbastu & Palpa.

**Key Achievement during July 2014 – June 2015**

- 627,655 women and family members reached through 31,070 food demonstrations sessions
- 99,847 women and family members reached through ward level interactions
- 69,358 home visits conducted to 1000-day households with 19,525 in DAG Households
- 14,9370 thousand days' women and their family members reached directly in different nutrition related days celebration
- 12,062 frontline workers ( health & non health personnel) including FCHVs trained in MIYCN
- 52 VDCs declared ODF making a total of 106 VDC
- 18,882 participants participated in 673 community level interaction events to increase the PHC/ORC services
- 2,604 persons trained as Village Model Farmers ( VMF) and 1,080 VMF provided start up materials to establish model HFP at community level based on need and action plan
- 21,857 mothers (1000-day and FCHVs) and 1,552 male members provided HFP basic training
- 530 VDCs and 11 municipalities committed a total of NPR56,133,589 VDC block grant budget on integrated nutrition promotion related activities in the fiscal year 2071/72 BS
- 33,206 mothers and caregivers, and 83,580 children reached during child nutrition week in earthquake affected districts

**b. Agriculture and Food Security Project**

The Agriculture and Food Security Project (AFSP) is a five years project which is designed to comprehensively address food and nutrition security issues in the most effective way possible. It is implemented through the collaboration of Ministry of Agriculture development and Ministry of Health in 19 hill and mountain districts of the far and mid-western regions (Darchula, Baitadi, Bajhang, Bajura, Doti, Achham, Dadeldhura, Salyan, Pyuthan, Rolpa, Rukum, Surkhet, Dailekh, Jajarkot, Humla, Jumla, Mugu, Dolpa and Kalikot).

The objective of AFSP is to:

- To enhance household food security through increased agricultural productivity, household incomes and improved nutritional practices.
- Food security will be realized through increased food availability, made possible by increasing productivity of agriculture, both crop and livestock. Nutrition security will be realized through improved dietary intake, made possible by promotion of diversified diets, and improved feeding and caring practices for pregnant and nursing women and children up to 2 years of age

**Major expected output for health sector**

- Number of pregnant and/or nursing mothers and children (6-24 months) with improve dietary intake will have been increased by 15% and 30% respectively.
- 45,000 households with Pregnant and lactating mothers will have been received project-supported Behavior Change Communication (BCC).
- 54,000 children will have been received appropriate Infant and Young Child Feeding (IYCF) practices.

**C. Golden 1000 days Project**

Golden 1000 days Project is implemented by Ministry of Federal Affair and Local Development in 15 districts of eastern and central region of Nepal to improve attitudes and practices to enhance nutritional outcomes among pregnant women and children under age of 2 in 15 districts. It is five years project funded by World Bank

**d. SABAL Project**

SABAL project is implemented in six districts (Makawanpur, Okhaldhunga, Khotang, Udayapur, Ramechhap and Sindhuli) of eastern and central regions of Nepal to improve health and nutrition. It is funded by USAID.

**2.2.7.14 Issues, challenges and Recommendations****Table 2.2.7.5: Issues and Recommendations**

Issues/Problems/Constraints	Recommendation	Responsibility
Institutional strengthening for nutrition and capacity building of health workers at all levels	Development of basic nutrition training package and capacity building of health workers at all levels	DoHS/CHD, NHTC
Slow scale up of evidence based and cost effective interventions of IYCF, IMAM, IYCF-MNP, SHNP due to resource gap	Increase resources to fulfill gap and gradual expansion	DoHS/CHD
Changing the behavior of the people to promote consumption of local indigenous food, diet diversity and nutrition-rich food	Focus on BCC for local food based approach	DoHS/CHD
Number of staff for nutrition under DoHS is very limited and no designated personnel for nutrition at region and district level	Establishment of National Nutrition Centre	MoH/ DoHS/CHD
Quality of nutrition data: under reporting and over reporting	<ul style="list-style-type: none"> <li>• Regular supportive supervision and monitoring at all levels</li> <li>• Regular feedback mechanism</li> <li>• District level               <ul style="list-style-type: none"> <li>– Periodically review of reported data with local health facilities</li> <li>– Increase supervision in the health facilities where under and over reporting has been a problem</li> </ul> </li> </ul>	Health facility / District / RHD and CHD/HMIS

Issues/Problems/Constraints	Recommendation	Responsibility
	<ul style="list-style-type: none"> <li>• Central level               <ul style="list-style-type: none"> <li>– Provision of DQSA to the RHDS and districts</li> <li>– Regular feedback mechanism</li> </ul> </li> </ul>	
Delay procurement of nutrition commodities	Timely procurement	CHD /LMD

#### 2.2.7.15: New initiatives in nutrition programme:

- National Micronutrient Status Survey on going
- Implementation of MIYCN action plan
- Implementation of basic package of SHN as designed in new JAP and updated guideline
- Adolescent Iron and Folic Acid (IFA) supplementation
- Revision/Updating of National Nutrition Policy and Strategy in line with Health Policy 2071, NHSS and MSNP
- Establishment of National Nutrition Centre (NNC)

# CB-IMCI 2071/72 (2014/2015)

## Proportion of Severe Dehydration among Total New Cases

## Proportion of Severe Pneumonia among Total New Cases

Source: HMIS

## 2.3 COMMUNITY BASED INTEGRATED MANAGEMENT OF NEONATAL AND CHILDHOOD ILLNESSES (CB-IMNCI)

### 2.3.1 Background

#### **CB-IMCI, CB-NCP and CB-IMNCI: a chronological development**

In Nepal, Child survival intervention began when Control of Diarrheal Disease (CDD) Program was initiated in 1983. Likewise, Acute Respiratory Infection (ARI) Control Program was initiated in 1987. To maximize the ARI related services at the household level, referral model and treatment model at community level was piloted. An evaluation of this intervention in 1997 revealed that treatment model was more effective and popular in the community than referral model. In 1997/98, ARI intervention was combined with CDD and named as CBAC program, after one year later, two more components, nutrition and immunization, were also incorporated in the CBAC program. IMCI was piloted in Mahottari district and was extended to the community level as well. Finally government has decided to merge the CBAC into IMCI in 1999 and named as Community Based Integrated Management of Childhood Illness (CB-IMCI). CB-IMCI included the major childhood killer diseases like pneumonia, diarrhoea, malaria, measles, and malnutrition. The strategies adopted in IMCI were improving knowledge and case management skills of health service providers, overall health systems strengthening and improving community and household level care practices. After piloting of low osmolar ORS and Zinc supplementation, incorporated in CB-IMCI program in 2005. Nationwide implementation of CB-IMCI was completed in 2009 and revised in 2012 incorporating important new interventions.

Up to the 2005, Nepal had made huge progress in reduction of under-five and infant mortality but the reduction of neonatal mortality was observed very sluggish because country had not implemented targeted interventions for newborns. Nepal state of world report had showed that major causes of mortality were infections, asphyxia, low birth weight and hypothermia. Government of Nepal formulated the National Neonatal Health Strategy 2004 based on this 'Community Based New Born Care Program (CB-NCP)' was designed in 2007, and piloting started in 2009. CB-NCP had incorporated seven strategic interventions as behavior change communication, promotion of institutional delivery, postnatal care, management of neonatal sepsis, care of low birth weight newborns, prevention and management of hypothermia and recognition and resuscitation of birth asphyxia. In September 2011 Ministry of Health (MoH) decided to implement the Chlorhexidine (CHX) Digluconate (7.1% w/v) aiming to prevent umbilical infection of newborn. Government had decided to scale up the CB-NCP and simultaneously, program was evaluated in 10 piloted districts. Up to 2014, CB-NCP was implemented in 41 districts covering 70% population.

Impact evaluation of CB-IMCI and CB-NCP focusing on neonatal mortality and under five mortality reductions has not been documented in Nepal. But, due to CB-IMCI program strategy, the prevalence of pneumonia and diarrhea has reduced significantly over the last decades. The care seeking practices and household level practices have been improved. CB-IMCI program has become the one of the role community based program in Nepal. Other interventions which has high contribution in reduction of post-neonatal child mortality reduction bi-annual supplementation of Vitamin A program, expanded program on immunization. On the other hand, essential newborn care practices

were improved in CB-NCP implemented districts.

In both of the programs (CB-IMCI and CB-NCP), FCHVs were considered as front line health services providers but quality and coverage of service is very low. For instance, only 1.5% of total sepsis cases are seen by FCHVs, and only 33% of FCHVs can use thermometer correctly (Assessment report-2014). According to NDHS 2011, only 3% of under five children sought services from FCHVs, and none of ARI cases are sought to FCHVs. About 86% of mother directly goes to trained health workers during neonatal sepsis treatment. Important learning in CB-NCP implementation was very low (7% within two days of home delivery) PNC home visit. Low PNC home visits by FCHVs even incentive provided. Also met need of asphyxia management (1.5%) by paramedics and ANMs working in non-birthing centers, were used these skills very rarely.

CB-NCP and CB-IMCI have similarities in interventions, program management, service delivery and target beneficiaries. Both programs had duplicated interventions like management of neonatal sepsis, promotion of essential newborn care practices, infection prevention, and management of low birth weight. Although, FCHVs are doing very good distribution and promotion of healthy behaviors but poorly performing in service delivery. Moreover, they were overburdened with workloads and massive resource was used in fragmented manner in the same purpose. Also, inequity in quality service delivery and utilization is being major challenges in newborn and child health programming. Health governance issue is also affecting to better functioning of the health system. Considering the management and maintenance challenges in CB-NCP and IMCI program MoH had decided to merge the both of the program in to CB-IMNCI.

#### District coverage of CB-IMCI program (1997-2014)

S. No.	Fiscal Year	Districts	No. of Districts
1.	2054/55	Mahottari	1
3.	2056/57	Nawalparasi, Bardiya, and Kanchanpur	3

**CB-IMNCI**

On 2071/6/28 (October 14, 2015) MOH had decided to integrate the CB-IMCI and CB-NCP into CB-IMNCI. It is implemented in 30 districts in FY 2071/72. It is comprised of the child-survival interventions including essential newborn care and newborn complications such as birth asphyxia, neonatal sepsis, jaundice, hypothermia, low birth weight and preterm conditions, counseling of breastfeeding. The role of FCHVs is to identify and refer for the sick young infants and under-five children. Among the age group of 2 to 59 months children, it addresses major childhood killer diseases like pneumonia, diarrhea, malaria, measles and malnutrition in a holistic way.

In CB-IMNCI program FCHVs are expected to do counselling in different conditions of maternal, newborn and child health and dispensing of essential commodities which do not require assessment and diagnostic skills like distribution of iron, zinc, ORS, chlorhexidine and referral in case of any danger signs appear. And health workers will counsel, and provide the health service like management of non-breathing cases, kangaroo mother care and management of neonatal sepsis and common childhood illness. Also program has provisioned the post-natal visits by trained health workers through primary health care outreach clinic. For treatment of neonatal sepsis, treatment regimen will be the oral amoxicillin and injection gentamycin. Institutionalization and accreditation

of training has been started. Program has envisioned that CHD role will be the quality assurance and monitoring of the CB-IMNCI program and NHTC will be the lead agency for training. NHTC will produce the master's trainers and district will be fully responsible for program implementation. Now CB-IMNCI program will not be limited to completing training and will be implemented and strengthened to make it one of the successful programs. The process of rapid need assessment which will be helpful for contextual planning and customization of the implementation approach in the districts.

The core objectives of the CB-IMNCI programme is to reduce the morbidity, mortality and disability among new borns, infants and children aged under five and to improve the nutritional status of children.

Source: CHD

**Vision**

Contribute to survival, healthy growth and development of under five years children of Nepal.

**Goals**

Improve newborn and child survival and healthy growth and development.

**Targets**

- To reduce under-five mortality from the current rate of 38/1,000 and IMR 33/1000 live births to 32/10000 live births
- To reduce neonatal mortality from the current rate of 23/1,000 live births (NMICS) to 16/1000 live births

## **Objectives**

- To reduce neonatal morbidity and mortality by promoting essential newborn care services.
- To reduce neonatal morbidity and mortality by managing major causes of illness
- To reduce morbidity and mortality by managing major causes of illness among under 5 years children

## **Strategies**

- Rapid expansion, phase wise implementation and onsite coaching
- Carry-out context-specific decentralized planning and phase wise implementation of CB-IMNCI interventions with additional focus on underserved children (urban slums, marginalized, disadvantaged groups and hard to reach areas).
- Strengthen the provision and quality integrated neonatal and child health services at the community and health facility levels
- Strengthen management of logistics supply
- Improve collaboration with public and private sectors (state and non- state) for standardized newborn and child health services
- Research and innovation for program improvement
- Strengthen home and community based practices and promote community participation

## **Major strategic interventions included in of CB-IMNCI Program**

### ***Newborn Specific Interventions***

- Promotion of birth preparedness plan
- Promotion of essential newborn care practices and postnatal care to mothers and newborns
- Identification and management of non-breathing babies at birth
- Identification and management of preterm and low birth weight babies
- Management of sepsis among young infants (0-59 days) including diarrhea

### ***Child Specific Interventions***

- Case management of children aged between 2-59 months from 5 major childhood killer diseases (pneumonia, diarrhoea, malnutrition, measles and malaria)

### ***Cross Cutting Interventions***

- Behavior change communications for healthy pregnancy, safe delivery, healthy newborn and U5 children
- Improved knowledge related to Essential Newborn Care, Nutrition and care of sick children
- Timely referral of sick children
- Improved interpersonal communication skills of HWs and FCHVs
- Achieve high effective coverage of interventions

## **2.3.2 Major Activities**

Major activities carried out in FY 2071/72 include the following:

- CB-IMNCI Training (ToT, District Planning, HF and FCHV Level Training) and onsite coaching in 8 districts (Nuwakot, Nawalparasi, Mugu, Kalikot, Jajarkot, Rukum, Surkhet and Dadeldhura).
- Review reflection and planning workshop was organized to finalize the current modality with the direction of Chief specialists, Director General, involvement of MoH, Policy, Planning and

International Co-ordination Divisions, Curative Division, different divisions of DoHS, regional directors, district chief, focal persons and professional organizations and all the partners.

- CHX intervention in seven districts (Panchthar, Rasuwa completed), Okhaldhunga, Kalikot, Dhading, Mugu, Gorkha (Started)
- Workshop on CB-IMNCI package development
- CB-IMNCI ToT (5 batches) by GoN and with support of UNICEF, WHO, H4L
- Progress analysis and improvement of CB-IMNCI program at 87 disadvantaged VDCs in Health for Life project (H4L) districts: ward and caste wise data recorded on IMCI-OPD register were analyzed for improvement of CB-IMNCI program
- ToT on CB-IMNCI Package by GoN and partners.
- Community care of preterm and low birth weight babies born at home using foot length card– 2 districts (Nuwakot and Rasuwa)
- Supervision and Monitoring of the program in CB-IMNCI program implemented districts
- IMNCI handbook and *Bal swasthya Manjari* are our publication to support this program effectively from different sector.

### 2.3.3 Analysis of Achievement

Since FY 2064/65, CB-IMCI services data (as received from Health Facilities, VHWS/MCHWs and FCHVs) has been incorporated into HMIS. Therefore, from FY 2064/65 onwards, service provided at community level (VHW/MCHW and FCHVs) is considered as community level data whereas total service provided from Health Facility level in addition with community level constitutes the national aggregated data for this program.

CB-IMNCI programme has been initiated from FY 2071/72. From FY 2071/72 Health Facility Level and Primary Health Care and Out Reach Clinics (PHC/ORC) data has been incorporated into HMIS. Consequently, the role of FCHV at community level has been redefined for counseling parts for newborn care. Obviously, the treatment protocol also has been changed and role of FCHVs at the community level has been assigned as health promoters/counselors rather than health service providers.

#### 1. Management of newborns aged 0-28 days

The status of the 0-28 day cases registered at health facilities PHC/ORC and FCHV in FY 2071/72 has been presented in Table 2.3.1.

**Table 2.3.1 Classification and Treatment of 0-28 day Newborn Cases by region in FY 2071/72**

Indicators	EDR	CDR	WDR	MWDR	FWDR	National	%
Total 0-28 day Newborn Cases (HF+PHC/ORC)	6,801	7,196	4,339	8,536	5,237	32,109	
Possible Severe Bacterial Infection (PSBI)	903	829	447	1,923	1069	5,171	16.10%

Deaths	243	295	179	419	466	1,602	7.79

Source: HMIS

In FY 2071/72, a total of 32,109 newborns cases were registered and treated at health facilities and PHC/ORC. Out of total registered cases 5,171 (16.10%) were classified and treated as Possible Severe Bacterial Infection (PSBI).

At the regional level, MWDR have treated highest percentage of PSBI cases (22.53%), followed by FWDR (20.40%), EDR (13.30%), CDR (11.50%), and WDR (10.30%). See figure 2.3.1.

Among the total registered 2-28 days new born cases at national level, LBI 15,320 (47.71%), Hypothermia 566 (1.76%), Jaundice 2,183 (6.80%), Low weight or Breast Feeding Problem 1,729 (5.38%) were classified and treated. Out of the total cases 13,693 (42.66%) were treated by cotrim pediatric tablet. Total 1,866 (5.81%) cases were referred and 222 (0.69%) were reported as death at HF.

The Table 2.3.1 also shows that 20,565 sick babies were checked by FCHVs. Out of the total cases 11,041 (53.69%) were treated by Cotrim. and referred to HFs and 1,602 (7.79%) cases were reported dead by FCHVs at their community.

## 2. Management of 29-59 days Newborn Cases

The status of the 29-59 day cases registered at health facilities PHC/ORC and FCHV from FY 2069/70 to FY 2071/72 has been presented in Table below (Table 2.3.2)

**Table 2.3.2. Classification and Treatment of <2 months (29-59 days) Infants Cases by region from FY 2069/70 to 2071/72 and sick baby treated by FCHV in FY 2071/72.**

Source: HMIS

In FY 2071/72, a total of 47,179 infants of 29-59 days cases were treated at health facilities and PHC/ORC clinics which is slightly low in comparison to FY 2069/70 and 2070/71 (Table 2.3.2). The table also shows that there has been significant decrease in the number of cases treated for PSBI (3,915 cases) in FY 2071/72. Whereas cases treated for LBI has slightly increased at national level in

FY 2071/72 compared to FY 2069/70 and FY 2071/72. Treatment for jaundice has decreased more than 50 percent in FY 2071/72 compared to FY 2069/70 and 2070/71. Treatment of Hypothermia cases has slightly increased in FY 2071/72 than that of previous fiscal years. Treatment and referral of babies with low weight and feeding problems has decreased significantly in FY 2071/72 compared to FY 2069/70 and FY 2070/71. Reported deaths are in decreasing trend over since FY 2069/70.

The Table 2.3.2 also shows that 50,284 sick babies were checked by FCHVs. Out of the total cases 27,685 (55.06%) were treated by cotrim. and referred to HFs. Reported number of deaths in community is slightly increased in FY 2071/72 in comparison of previous Fiscal Year.

### 3. Diarrhoea

CB-IMNCI program has imparted positive impact on the skills and knowledge of health workers, enabling them for better identification, classification and treatment of diarrhoeal diseases. Health workers classify the three categories of dehydration of all the diarrheal cases as 'No Dehydration', 'Some Dehydration', and 'Severe Dehydration' as per the treatment protocol of CB-IMNCI.

The reported number of total new diarrhoeal cases (health facility, PHC/ORC Clinics and FCHVs) and classification of dehydration by region over the last three years have been presented in Table 2.3.3. In FY 2071/72, a total of 1,413,111 diarrhoeal cases were reported. The reported number of new diarrhoeal cases has slightly decreased in FY 2071/72 compared to FY 2069/70 and FY 2070/71.

At the national level, percentage of severe dehydration has decreased to 0.2 in FY 2071/72 compared to FY 2069/70 and FY 2070/71. Amongst the regions it continued to constant at 0.2 in EDR over last three years. Compared to FY 2070/71, very nominal increase is seen in MWDR but remained constant in WDR and decreased in CDR and FWDR in FY 2071/72.

Note: \*Case reported from health facility and community; Source: HMIS

The national incidence of diarrhoea per 1,000 under-five years' children has considerably decreased to 501/1,000 under 5 years children in FY 2071/72 from 528/1,000 in 2069/70 and

629/1,000 in 2070/71 (Table 2.3.4). The incidence of diarrhoea has decreased in all regions compared to previous fiscal years. The highest incidence of diarrhoea occurred at FWDR (873/1,000 under five children) followed by MWDR (693), EDR (481), WDR (414) and CDR (377).

Diarrhoeal deaths has slightly increased in FY 2071/72 at national level as well as in all the regions except in WDR as compared to FY 2070/71. Consequently, Diarrhoea case fatality rate also has increased. It has increased in EDR followed by MWDR, CDR, FWDR but remained low in WDR, compared to FY 2070/71.

The treatments of diarrhoea by ORS and Zinc and IV fluid have been presented in Table 2.3.5. In FY 2071/72, the proportion of diarrhoeal cases treated by ORS and Zinc at national level has been slightly decreased to 93.1 percent compared to FY 2069/70 and FY 2070/71 but it remained more than 90 percent. Further, the proportion of case treated by IV Fluid has slightly increased to 0.6 percent in FY 2070/71 from 0.5 percent of FY 2070/71. Significantly, treatment of diarrhoea with ORS and Zinc is near to 90 percent. This can be attributed to the effect of CB-IMNCI program.

Out of the total 1,413,111 diarrhoeal cases, 25.88 percent were treated at HFs, 8.32 percent were treated at PHC/ORC clinics and 65.81 percent cases were treated by FCHVs (Figure 2.3.1).

#### 4. Acute Respiratory Infection

In FY 2071/72, a total of 2,208,221 ARI cases have been reported (Table 2.3.6). The reported number of New ARI cases significantly decreased in FY 2071/72 compared to FY 2069/70 and FY 2070/71.

**Table 2.3.6: Total ARI New Cases, by Region, from FY 2069/70 to 2071/72**

Note: \*Cases reported from health facility and community; Source: HMIS

At the national level, reported ARI cases per 1,000 under-five population has also decreased to 783 in FY 2071/72 compared to FY 2069/70 and 2070/71 (Table 2.3.6). Reported incidence of ARI has decreased in all regions during FY 2071/72 with sharp decline in EDR, WDR and CDR as compared to previous FY 2070/71. The highest rate of new ARI cases per thousand U5 children occurred in FWDR (1,219) followed by MWDR (1,005), EDR (889), WDR (693) and CDR (555) in FY 2071/72.

**Figure 2.3.4: Percentage of Severe Pneumonia among New ARI Cases (<5 Children) FY 2069/70 to 2071/72**

Percentage of severe pneumonia remained constant in FY 2071/72 at National level (0.4%) compared to FY 2069/70 and FY 2070/71 (Figure 2.3.4). At the regional level also it remained constant in CDR (0.4) and WDR (0.2) and MWDR (0.5), but it slightly decreased in FWDR (0.4) compared to previous fiscal years. Severe Pneumonia has been slightly increased in EDR (0.4) in 2071/72 compared previous fiscal years. The low prevalence of severe pneumonia can be attributable to the early detection and proper management of ARI cases by health workers, and FCHVs in CB-IMNCI districts. In FY 2071/72, out of the total 2,208,221 New ARI cases registered, 581,929 cases were treated for pneumonia (Pneumonia + Severe Pneumonia), which accounted for 26.4 percent at National level. It has slightly increased in FY 2071/72 compared to FY 2070/71 and remained still low from that of FY 2069/70. On the other hand, the incidence of pneumonia (Pneumonia and Severe Pneumonia) has been increased in FY 2071/72 compared to previous years. The incidence of pneumonia per 1,000 under 5 years' children is 264 in FY 2071/72 at national level.

Source: HMIS

The reported total ARI related deaths increased to 337 in the FY 2071/72. It was 168 in FY 2070/71 but remained low 1,793 of FY 2069/70. Consequently, the ARI case fatality rate among under-five children also increased to 0.15 in FY 2071/72 but remained low than of FY 2069/70. In FY 2069/70 it was 0.63 and 0.06 in FY 2070/71. Amongst the regions ARI case fatality slightly increased in EDR (0.42) and CDR (0.06), but decreasing tendency is seen in WDR (0.03), MWDR (0.09) and FWDR(0.08) comparing to FY 2070/71.

Treatment of ARI at home has decreased to 54.6 percent in FY 2071/72 in comparison with FY 2069/70 and 2070/71. Treatment by cotrimoxazole has slightly increased to 33.6 percent in FY 2071/72 compared to FY 2069/70 and 2070/71. Furthermore, treatment of ARI by other antibiotics has also slightly increased to 11.8 percent in FY 2071/72 which is highest percentile of previous FY 2069/70 and FY 2070/71 (Table 2.3.7).

Source: HMIS

In FY 2071/72 a total of 2,208,221 New ARI Cases among 'under-five children' were treated in FY 2071/72. Out of the total ARI cases, 34.28% were treated at HFs, 8.61% cases were treated at PHC/ORC clinics and 57.11% were treated by FCHVs.

## 5. Other common childhood illnesses

**Table 2.3.9 Classification and treated cases under CB-IMNCI Protocol**

Regions	Dysentery	Malaria		Very Severe Febrile disease	Measles	Ear infection	Other fever	Severe malnutrition	Anaemia	Other
		Falciparum	Non-falciparum							
Eastern	10461	99	1,994	1,586	306	24,315	34,942	849	1,072	75,241
Central	18356	304	3,225	1,316	432	32,052	48,095	1,404	2,176	91,580

Mid-western	14481	42	632	1,038	187	18,751	34,487	2,487	1,441	65,480
Far-western	12047	42	445	1,044	174	12,250	37,166	1,975	1,615	51,515
<b>Total</b>	<b>66892</b>	<b>537</b>	<b>6,615</b>	<b>6,224</b>	<b>1,179</b>	<b>104,172</b>	<b>192,948</b>	<b>7,887</b>	<b>7,361</b>	<b>353,421</b>

CB-IMNCI Programme also focuses on identifying malaria, malnutrition, measles, and other common illnesses among children. The interventions to address malnutrition among children are being led by Nutrition Section and interventions to address measles and other vaccine preventable diseases are being led by EPI Section within Child Health Division. Malaria is led by the EDCC. IMNCI Section would actively collaborate with EPI and Nutrition Sections for the reduction of Malnutrition and Measles and other common childhood diseases through generating evidences relating to changing pattern of childhood disease epidemiology and strengthening the integrated approach to childhood disease prevention.

In the course of <5 children case assessing at health facilities and PHC/ORC clinics under the CB-IMNCI Protocol, health workers identified 66,892 Dysentery, 537 Malaria Falciparum, 6,615 Non-Falciparum Malaria, 6,224 Very Severe Febrile disease, 1,179 Measles, 104,172 Ear Infection, 192,948 Other Fever, 7,887 Severe Malnutrition, 7,361 Anaemia and 353,421 Other diseases.

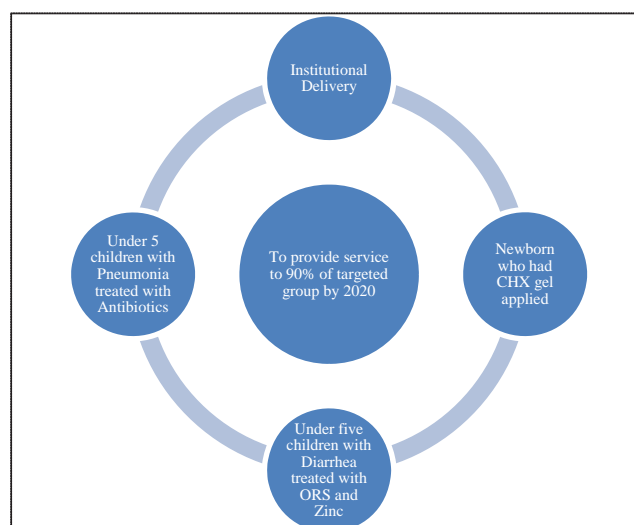

## 6. Key CB-IMNCI Program Monitoring Indicators:

CB-IMNCI program has identified 6 major indicators to monitor the program that is listed below:

1. % of Institutional delivery
2. % of newborn who had chlorhexidine gel applied immediately after birth (within one hour)
3. % of infants (0-2 months) with PSBI receiving complete dose of Gentamycin
4. % of under 5 children with pneumonia who received antibiotics
5. % of under 5 children with diarrhea treated with ORS and Zinc
6. Stock out of the 5 key CB-IMNCI commodities in a facility (ORS, Zinc, Amoxicillin/Cotrim, CHX)

**Vision 90 by 20:-** CB-IMNCI program has a vision to provide targeted service to 90% of the target population by 2020 that is shown in the diagram below.

All program monitoring indicators except 1 and 6 numbers are presented in the table below 2.3.10. District wise institutional delivery is presented in Safe Motherhood program section. It is expected that if health facility delivery is high, program envisioned that there would be good essential newborn care and immediate management of complications like birth asphyxia. Another important indicator, stock out of the 5 key CB-IMNCI commodities, ORS, Zinc, Amoxicillin/Cotrim, Gentamycin and CHX) in a facility. This information can be obtained from LMIS report.

CHX program has been fully implemented (upto community level) in 45 districts. Likewise, in four districts it has been implemented only upto the health facility level. In addition, along with CB-IMNCI program, CHX program is just initiated in 12 districts. In FY 2071/72, HMIS data shows that CHX coverage in national level among the program implemented districts is 75.16% with highest coverage in Rupandehi and lowest coverage in Surkhet as the training for HWs was done in the last month of this FY 2071/72.

Compliance of Injection Gentamycin at national level for PSBI cases among under two months child is 67.24%. Due to the data quality issue, few districts have more than 100% gentamycin compliance. As a result of mixing of antibiotic treatment other than pneumonia cases in HMIS data, percentage of U-5 children with pneumonia treated with antibiotics is 189.23%. As per CB-IMNCI protocol, all diarrheal cases should be treated with ORS and Zinc. Based on HMIS data, U5 children suffering from diarrhea treated with ORS and Zinc at National level is 93.08% and is higher than target in vision 90 by 20 however, 13 districts have lower than 90% coverage. Like the data error in Gentamycin compliance, some districts have reported that ORS and Zinc treatment is higher than the diarrheal cases i.e. ORS and Zinc treatment is more than 100%. To improve the data quality of CB-IMNCI program, IMNCI section has started to provide feedbacks on reported data to all districts through HMIS section.

# FAMILY HEALTH

## 3.1 FAMILY PLANNING

### 3.1.1 Background

The Government of Nepal commits to equitable access to voluntary Family Planning (FP) services based on informed choice for all individuals and couples, in particular the poor, vulnerable and marginalized groups.

The main aim of the National Family Planning Program is to ensure that individuals and couples are able to fulfill their reproductive needs by using appropriate family planning methods based on informed choice. Family planning can reduce unmet need for contraceptives and unintended pregnancy which ultimately helps to improve maternal and child health, empowers women by allowing them to invest more in their children and earn wages outside the home. In addition, it also helps communities and country to boost economic growth by expanding healthy and skillful labor force and allowing them to invest more money in school, health care and infrastructure development. Overall, National Family Planning Program helps to improve the quality of life of people and develop a nation.

Family planning is one of the priority programs of Government of Nepal, Ministry of Health. It is also considered as a component of reproductive health package and essential health care services of Nepal Health Sector Program II (2010-2015), National Family Planning Costed Implementation Plan 2015-2021, Nepal Health Sector Strategy 2015-2020 (NHSS) and the Government of Nepal's commitments to FP2020. In Nepal, family planning information and services are being provided through government, social marketing, non-governmental organizations and private sectors. In government health system, currently, temporary family planning methods (male condoms, oral pills and injectable) are provided on a regular basis through health posts, sub health posts, PHC Outreach clinics. Female Community Health Volunteers are providing information to community people, and distribute condom and resupply of pills. Long acting reversible contraceptive (LARC) services such as IUCD and Implants are available only at limited number of Primary Health Care Centers and health posts where trained health care providers are available. Sterilization services are provided at static sites or through scheduled "seasonal" or mobile outreach services. Almost all district FP MCH clinics are providing all types of temporary FP methods regularly.

#### **Objective:**

GoN strives to improve the health status of all people, regardless of their sex, caste and ethnicity, or socioeconomic status.

Overall objective of the FP program is to improved health status of all people through accountable and equitable health service delivery system through informed choice to access and use voluntary FP (through increased and equitable access to quality FP information and services).

## Specific Objectives:

- To increase access to and utilization of quality FP services which are safe, effective and acceptable to individuals and couples. Special focus is given to increasing access to services in places where the rural, poor, Dalit, other marginalized people and those with high unmet need live.
- To create an enabling environment for increasing access to quality family planning services to men and women.
- To increase demand of family planning services by implementing various behavior change communication activities.

## Policies and Strategies:

- Enabling Environment:
  - Strengthen enabling environment for family planning
  - Establish family planning as reproductive rights of females and males.
- Demand Generation: Increase health care seeking behavior among population with high unmet need for modern contraception.
- Service Delivery:
  - Enhance FP service delivery including commodities to respond to the needs of marginalized, rural residents, migrants, adolescents and other special groups.
  - Increase availability of broader range of modern contraceptives and improved method mix.
  - Effective integration of family planning services with other health services.
  - Strengthen effective procurement and logistics management system to ensure regular availability of family planning commodities.
  - Promote family planning services delivery through government, private, non-governmental organization and social marketing approaches.
- Capacity Building: Strengthen capacity of service providers to expand FP service delivery network.
- Research and Innovation: Strengthen evidence base for effective programme implementation through research and innovations.

### 3.1.2 Major Activities

In order to provide the reproductive population with options to limit or space births, various modern contraceptive methods are made available under the national health services delivery system. Family planning services are provided through different health institutions at various levels through static clinics as well as mobile outreach services. The major activities implemented during fiscal year 2071/72 are described briefly in following sections.

#### 1. Voluntary Surgical Contraception (VSC)

VSC services include vasectomy and minilap including postpartum tubal ligation. At least one type of VSC service was made available in all districts except Manang, Sankhuwasabha, Dhankuta, Ilam and Panchthar through health institution or at camp setting. VSC mobile outreach program was conducted in 70 districts in fiscal year 2071/72.

## 2. Spacing Methods

Spacing methods such as Depo-Provera (injectable), oral pills and condoms were made available up to the community level. Distribution of oral pills and condoms were done through FCHVs at the ward level. In addition, implant and IUCD services were offered through selected HPs, PHCCs and hospitals. Spacing methods were also made available through private practitioners, contraceptive retail sales outlets, pharmacies, and other NGOs and INGOs.

## 3. FP Counseling

Counseling is an important activity for assisting clients to make an informed choice for appropriate family planning method. Family planning counseling services were provided to potential clients by front-line FP providers.

## 4. Referral

Referral is one of the main approaches for increasing access to family planning services. At community level, condoms and pills were re-supplied, through a network of FCHVs, while requests for other family planning services were referred to the PHC Outreach clinics, HPs or to mobile camps. Health facilities referred the clients to other appropriate health institutions or mobile camps for those FP services which were not available in their own institution.

### 3.1.3 Achievement

#### 1. Current Users

Overall achievement of FP current users at national level has slightly declined from 91.3 percent in FY 2070/71 to 91.08 percent in FY 2071/72 as compared to projected number of users. However, there was slight variation in achievement across the development regions. The achievement in FWDR and MWDR was highest whereas it is lower in other regions i.e. in Central and western region (Table 3.1.1). Comparative achievement in current users compared to projected number is almost static during last three program years. Percentage of Family Planning current users is in decreasing trend in last three years from 93.8 percent in FY 2069/70 to 91.3 percent in FY 2070/71 to 91.1 percent in FY 2071/72 (Table 3.1.1).

**Table 3.1.1: Trend in family planning current users (all modern methods)**

Region	Fiscal Years								
	2069/70			2070/71			2071/72		
	Projected	Achievement	%	Projected	Achievement	%	Projected	Achievement	%
EDR	671,500	624,657	93.0	699,000	628,053	89.9	691,000	630,808	91.3
CDR	1,062,000	972,244	91.5	1,101,500	959,435	87.1	1,081,000	953,850	88.2
WDR	387,500	359,964	92.9	418,000	374,405	89.6	426,000	372,647	87.5
MWDR	307,500	306,865	99.8	332,000	332,683	100.2	356,000	342,963	96.3
FWDR	196,500	197,970	100.7	204,500	219,432	107.3	221,000	227,112	103.
<b>National</b>	<b>2,625,000</b>	<b>2,461,739</b>	<b>93.8</b>	<b>2,755,000</b>	<b>2,514,044</b>	<b>91.3</b>	<b>2,775,000</b>	<b>2,527,380</b>	<b>91.1</b>

## 2. New Acceptors in Voluntary Surgical Contraception (VSC)

National achievement for VSC new acceptor was 61.5 percent in FY 2071/72, which has reduced from 67.6 percent in FY 2070/71. There was marked difference in the achievement of VSC services throughout the country. Percentage of VSC new acceptors against projected number is highest (81.7%) in FWDR while it is lowest in CDR (45.9%) in the current FY 2071/72 (Table 3.1.2).

Proportion of minilap new acceptors against projected VSC numbers has decreased from 70.5 percent in FY 2069/70 to 53.1% in FY 2070/71 to and 45.8% in FY 2071/72. Similarly, proportion of vasectomy new acceptors against projected VSC numbers has decreased from 20.5% in FY 2069/70 to 14.5% in FY 2070/71 and slightly increased to 15.7% in FY 2071/72.

Overall enrollment of new VSC users in absolute number is declining from FY 2069/70 to FY 2071/72 at National level. There were a total of 46,415 new VSC users in FY 2069/70 which declined subsequently to 30,728 users in FY 2071/72 (Table 3.1.2). Decline in total VSC users was noticed in all five regions. Projected numbers of VSC was decreased from 58,000 in FY 2070/71 to 50,000 in FY 2071/72.

New VSC acceptors by procedure i.e. male and female declined in FY 2071/72 compared to the previous years. There is a slight increase in male new VSC acceptor in CDR (2,849 in FY 2070/71 to 2,921 in FY 2071/72) and WDR (1,234 in FY 2070/71 to 1,499 in FY 2071/72).

Overall performance in total VSC users compared to projected number was not up to the expected level. National achievement is in declining trend. The total VSC achievement in FY 2070/71 was 39,213 in number, which declined to 30,728 in FY 2071/72 (Table 3.1.2).

**Table 3.1.2: Trend of VSC new acceptors by procedure and region FY 2069/70 to 2071/72**

Procedure	Year	Region					National total VSC	Procedure as a % of projected VSC
		EDR	CDR	WDR	MWDR	FWDR

	2070/71	9,523	14,853	5,012	4,846	4,979	39,213	67.6
	2071/72	8,936	9,615	4,736	4,090	3,351	30,728	61.5
Procedure as a % of projected total VSC 2071/72		67.7%	45.9%	77.0%	73.0%	81.7%	61.5%	

## 3. New Acceptors of Spacing Methods

New acceptors are defined as the number of MWRA who adopted any FP method for the first time in their life. A total of 623,857 new users were recruited in FY 2070/71 which increased to 668,777 in

FY 2071/72 (Table 3.1.3). Districts reported that the high spousal separation among the MWRA due to out-migration of their male counterpart in search of employment opportunity has made low demand for temporary FP methods particularly in rural areas of Nepal.

Out of five temporary FP methods supplied by public health system, there has been a slight decline in use of IUCD whereas users of all four methods Condom, Depo, Pills, and implant has increased. Number of implant users has significantly increased from (37,823 in FY 2070/71 to 61,343 in FY 2071/72) (Table 3.1.3) showing increasing popularity and acceptance of implant services by Nepalese women.

Regional variations have been noticed in new IUCD users. The number of new IUCD users declined in CDR and WDR. While the number of new IUCD users significantly increased in EDR, MWDR and FWDR. Similarly, new implant users has increased in all five regions in FY 2071/72 when compared to previous years. Number of implant users increased by more than twice in WDR in 2071/72 compared to 2070/71. New condom users decreased in EDR, CDR and MWDR. New pills users decreased in EDR, WDR and FWDR. New Depo users increased in all five regions except in MWDR.

**Table 3.1.3: Trend in Number of New Acceptors of Spacing Methods by Region FY 2069/70 to 2071/72**

Method	Year	Region					National
		EDR	CDR	WDR	MWDR	FWDR	
Pills	2069/70	25,289	32,959	21,414	19,914	13,060	112,636
	2070/71	25,372	29,083	23,482	18,897	13,462	<b>110,297</b>
	2071/72	24,047	32,414	23,219	19,197	13,000	<b>111,877</b>
Depo	2069/70	53,152	78,267	37,108	44,324	27,434	240,285
	2070/71	54,359	68,082	38,769	46,876	27,465	<b>235,551</b>
	2071/72	62,188	75,791	42,678	45,376	29,276	<b>255,309</b>

	2070/71	6,147	15,297	6,170	4,285	3,243	<b>35,142</b>
	2071/72	6,211	11,322	5,107	5,320	4,469	<b>32,429</b>
Implant	2069/70	6,354	15,441	4,134	6,041	3,714	35,684
	2070/71	6,479	13,594	4,517	8,341	4,892	<b>37,823</b>
	2071/72	9,811	21,764	11,050	11,934	6,784	<b>61,343</b>
Condoms	2069/70	34,439	55,678	39,595	38,513	28,867	197,092
	2070/71	34,250	50,784	38,973	45,517	35,484	<b>205,044</b>
	2071/72	33,523	46,585	41,612	45,036	41,063	<b>207,819</b>
Total	2069/70	124,740	196,156	107,024	113,833	75,209	616,962
	2070/71	126,607	176,840	111,912	123,916	84,546	<b>623,857</b>
	2071/72	135,780	187,876	123,666	126,863	94,592	<b>668,777</b>

Note: New acceptors of condom are estimated by dividing total condoms distributed by 150.

Out of the total 668,777 new acceptors in spacing methods in FY 2071/72, the percentage share of new acceptors by method type shows a dominance of injectable constituting 38.2%, followed by condom 31.1%, oral pills 16.7%, implant 9.2% and IUCD 4.9% (Fig 3.1.1). New acceptors of all spacing methods constitute 11.3% of MWRA (data not shown).

**Fig 3.1.1 FP spacing method mix (new acceptors) FY 2071/72**

#### 4. Family Planning Current Users and Contraceptive Prevalence Rate (CPR)

The trend (in number) of current users has increased during FY 2071/72 compared to previous years (Table 3.1.4). Total number of current users was 2,461,700, 2,514,044 and 2,527,380 in FY 2069/070, 2070/2071 and 2071/72 respectively. The number of current users has slightly declined in CDR and WDR while the number of current users in EDR, MWDR and FWDR has increased. While the total number of current FP users has increased in National level, there has been a decrease in number of current users of permanent methods (VSC). Among total current users, the proportion of users of spacing methods is in increasing trend while the proportion of permanent method users is decreasing.

**Table 3.1.4: Trend in current users in spacing and limiting methods by region, FY 2069/70 to 2071/72**

Method	Year	Development Region					National Total	Share of methods as % of total users
		EDR	CDR	WDR	MWDR	FWDR		
Spacing methods	2069/70	266,501	348,461	153,480	167,782	100,016	1,036,240	42.1
	2070/71	266,176	33,7009	165,479	197,272	112,029	1,078,001	42.9
	2071/72	274,084	342,184	169,123	203,744	126,737	1,115,872	44.2
Permanent methods	2069/70	358,156	623,783	206,484	139,083	97,954	1,425,460	57.9
	2070/71	361,877	622,426	208,926	135,411	107,403	1,436,043	57.1
	2071/72	356,724	611,666	203,524	139,219	100,375	1,411,508	55.8
Total users	2069/70	624,657	972,244	359,964	306,865	197,970	2,461,700	
	2070/71	528,053	954,774	374,030	332,683	216,555	2,514,044	
	2071/72	630,808	953,850	372,647	342,963	227,112	2,527,380	

The Contraceptive Prevalence Rate (CPR) is one of the main indicators for monitoring and evaluating the National Family Planning Program. The number of current users in permanent method to calculate the CPR is adjusted based on the age exit and the mortality of males and females in the reproductive age group every year.

CPR for modern family planning method, as shown in Figure 3.1.2 is computed based on service data reported to HMIS. HMIS do not capture all private sector service data. The Figure 3.1.2 also indicates that CPR of modern method over the three fiscal year period is fluctuating. One of the reasons for such decrease in CPR for modern methods could be high spousal separation due to migration for employment reason. Couples who are not living together for long duration are less likely to use family planning methods as they usually have infrequent sex and hence do not have an immediate need. These data indicate that more efforts are needed if the program has to increase the share of spacing methods especially LARCs in the contraceptive method mix.

There is wide variation in CPR at the regional level. CPR has been decreased in all 5 regions. National level CPR has also decreased from 45 in FY 2070/71 to 43 in FY 2071/72. It is the highest in EDR (49%) and the lowest in WDR (33%) (Figure 3.1.2).

CPR by district reveals a distinct pattern (Fig 3.1.3). A total of 5 districts namely Morang, Saptari, Siraha, Parsa and Mustang have CPR greater than or equal to 60%. Eleven districts including Dhanusa, Mahotari, Sarlahi, Kavre, Rasuwa, Makwanpur, Manang, Palpa, Dang, Bardia and Surkhet have CPR in between 50-60%. These districts can achieve more if programs are intensified. Fourteen districts: Ilam, Jhapa, Sunsari, Dhankuta, Sindhupalchok, Lalitpur, Dhading, Rautahat, Bara, Chitawan, Banke, Jumla, Kailali and Kanchanpur have CPR level between 40-49%. More than one-third districts (28 districts) have CPR between 30-40%, while 17 districts have substantially low CPR-below 30%. Thus the FP program needs more attention in districts with low and moderate level of CPR.

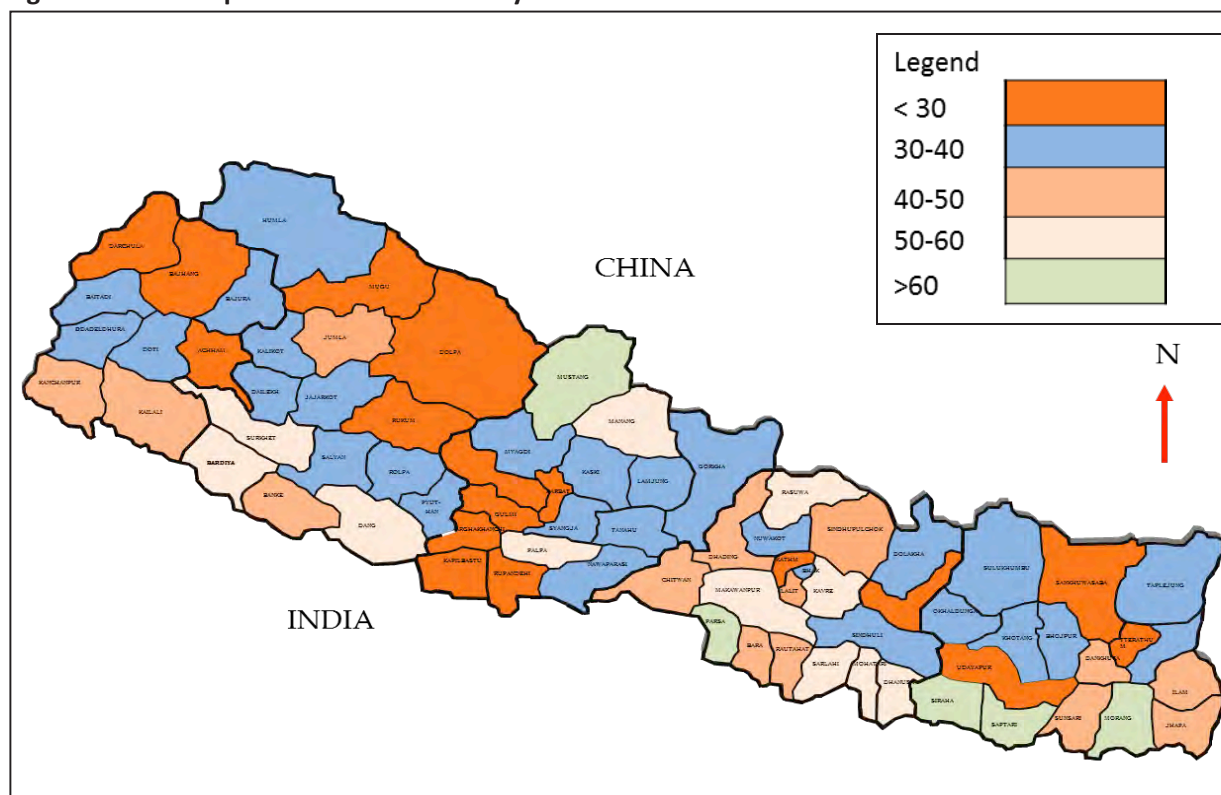

**Fig3. 1.3 Contraceptive Prevalence Rate by Districts****5. Availability of LARCs services in public health facilities**

Table 3.1.5 shows proportion of health facilities offering long acting reversible contraceptive methods by type of health facilities. In fiscal year 2071/72, only 9% of SHPs (n=191), 22% of HPs (n=363), 65% of PHCCs (n=132) and 62% of district hospitals (n=32) provided both implant and IUCDs indicating a substantial need for expanding LARCs services in all tiers of health facilities. Service tracking survey conducted in 2013 showed that 18% HPs provided all 5 temporary FP methods.

**Table 3. 1.5 Availability of LARCs services by type of Health Facility**

Service availability	SHPs		HPs		PHCCs		District Hospitals	
	n	%	n	%	n	%	n	%
HFs Providing Implant (%)	542	25%	699	42%	160	79%	36	69%
HFs Providing IUCD service (%)	297	14%	493	30%	147	73%	33	63%
HFs Providing Both Implant and IUCD (%)	191	9%	363	22%	132	65%	32	62%
<b>Total</b>	<b>2139</b>		<b>1666</b>		<b>202</b>		<b>52</b>	

**Issues / constraints**

<b>Issues / constraints</b>	<b>Recommendation</b>	<b>Responsibility</b>
<ul style="list-style-type: none"> <li>• Low or stagnant CPR</li> <li>• High unmet need</li> <li>• High discontinuation</li> <li>• Underutilized LARCs</li> <li>• Stock out and inadequate FP commodities and equipment</li> <li>• Inadequate trained HR in LAPM and supervision and follow up of trained HR</li> </ul>	Improve FP education, information and services for adolescents	FHD/CHD
	Conduct and follow up of FP micro- planning in low CPR areas and districts	FHD/DHO
	Expand comprehensive VSC approach (VSC+) of service delivery	FHD/DHO
	Strengthening FP services in Urban health	FHD/PHC/RD
	FP integration with EPI clinic, postpartum and post abortion services	FHD/CHD
	Strengthen Satellite clinics for long acting reversible contraceptive (LARC) methods	FHD/DPHO
	Systematic forecasting and annual procurement of FP commodities	FHD/LMD
	Regular need assessment and supply of FP implant, IUCD insertion/removal sets	FHD/LMD/DHO
	Ensure training are based on local need	FHD/NHTC/RHTC/DHO
	Strengthen/expand capacity of FP training sites	
	Regular follow up and supervision/onsite coaching of trained HR is needed.	
	Strengthening FP services in Private hospital	FHD/MD/RHD
Knowledge update to FCHVs on LARC	FHD/DPHO	
Misuse of abortion services	Focus on awareness raising campaign and activities for the rational use of abortion services	FHD/DPHO

## 3.2 SAFE MOTHERHOOD AND NEWBORN HEALTH

### 3.2.1 Background

The goal of the National Safe Motherhood Program is to reduce maternal and neonatal morbidity and mortality and to improve the maternal and neonatal health through preventive and promotive activities as well as by addressing avoidable factors that cause death during pregnancy, childbirth and postpartum period. Evidences suggest that three delays are important factors behind the maternal and new born morbidity and mortality outcome in Nepal's context:

- (i) Delay in seeking care,
- (ii) Delay in reaching care, and
- (iii) Delay in receiving care.

To reduce the risks during pregnancy and childbirth and address factors associated with mortality and morbidity three major strategies have been adopted in Nepal:

- Promoting birth preparedness and complication readiness including awareness raising and improving the availability of funds, transport and blood supplies.
- Aama Suraksha Program to promote antenatal checkups and institutional delivery
- Expansion of 24-hour emergency obstetric care services (basic and comprehensive) at selected public health facilities in every district.

Since its initiation in 1997, the Safe Motherhood Program has made significant progress. Service coverage has grown along with the development of policies, programs and protocols. The policy on skilled birth attendants endorsed in 2006 by MoH specifically highlights the importance of skilled birth attendance at every birth and embodies the Government's commitment to train and deploy doctors and nurses/ANMs with the required skills across the country. Similarly, endorsement of revised National Blood Transfusion Policy 2006 was also a significant step towards ensuring the availability of safe blood supplies in the event of an emergency.

In order to ensure focused and coordinated efforts the National Safe Motherhood Plan (2006-2017) has been revised, with wide participation of partners. The revised plan has recognized the importance of addressing neonatal health as an integral part of safe motherhood program. NHSP 2 committed to achieve a number of maternal and new born health indicators in line with MDG goals and targets.

#### Strategies

Following strategies have been adopted to achieve the goals of safe motherhood program:

1. Promoting inter-sectoral coordination and collaboration at central, regional, districts and community levels to ensure the commitment and action for the promotion of safe motherhood with especial focus on poor and excluded groups.
2. Strengthening and expanding delivery by skilled birth attendant, basic and comprehensive obstetric care services at all levels. Interventions include:
  - Developing the infrastructure for delivery and emergency obstetric care.
  - Standardizing basic maternity care and emergency obstetric care at appropriate levels of the healthcare system;
  - Strengthening human resource management; DGO, ASBA, SBA, Anesthesia Assistant training and deployment
  - Establishing functional referral system: Airlifting for emergency referral from remote areas, provision of stretchers in wards, emergency referral funds in remote districts. Strengthening community-based awareness on birth preparedness and complication readiness through FCHVs, increasing access of all relevant maternal health information and service.

3. Supporting activities that raise the status of women in society;
4. Promoting research on safe motherhood to contribute to improved planning, higher quality services, and more cost-effective interventions.

### 3.2.2 Major Activities

#### 1. Birth Preparedness Package and MNH Activities at Community Level

Family Health Division (FHD) continues support for expansion and maintenance of MNH activities at community level which included Birth Preparedness Package (*Jeevan Suraksha* Flip Chart and *Jeevan Suraksha* Card) and *Matri Suraksha Chakki* (Misoprostol) distribution for prevention of PPH at home delivery.

This activity promotes

- birth preparedness and complication readiness (preparedness of money, health facilities for the delivery, transport and blood donors).
- key ANC/PNC services (Iron, TT, Albendazole, etc), self-care (food, rest, no smoking and no drinking alcohol, including pregnancy and post-partum period), essential new born care, identification and prompt care seeking for danger signs during pregnancy, delivery, post-partum and newborn period.

In FY 2066/67, GoN approved PPH education and *Matri Suraksha Chakki (MSC)* distribution through FCHVs with the objective of preventing PPH at home delivery. Three misoprostol tablets (600 mcg) are given to pregnant mother during 8<sup>th</sup> month of pregnancy and are instructed to take those three tablets immediately after the delivery of baby before placenta is expelled, if delivery occurs at home. If women get delivered in health facilities they have to return those given tablets to health facilities. Altogether 42 districts have been currently implementing the program by 2071/72. Family Health Division has budgeted to scale up this program in 4 districts in 2072/73.

#### 2. Rural Ultra Sound Program

The objective of rural ultra sound program is timely identification of pregnant women with risks of obstetric complication and refer them to the CEON centers for the appropriate complication management. A trained nurse (SBA) with skill on use of portable ultrasound machine for antenatal scan provides service at defined rural PHCC/HP sites on a regular basis. If any abnormality is detected such as abnormal lie and presentation, pregnant women are referred to a facility where appropriate services are available. This program is being implemented in 10 remote districts of Nepal namely Mugu, Dhading, Darchula, Rukum, Solukhumbu, Bajhang, Achham, Dhankuta, Humla, and Baitadi. Altogether 20 SBAs from various districts received 3 weeks long training on ultrasound use to perform antenatal ultrasonography in FY 2071/72.

#### 3. Reproductive Health Morbidity Prevention and management Program:

FHD is currently implementing various reproductive health (RH) morbidity prevention and management activities such as management of pelvic organ prolapse (POP), cervical cancer screening and Cryotherapy, and obstetric fistula screening and management.

- a) **Management of Pelvic Organ Prolapse:** Pelvic Organ Prolapse is one of the most common reproductive health morbidities in Nepal contributing for high DALYs and social consequences. Multi parity, maternal malnutrition, too frequent pregnancies, and heavy work after delivery are risk factors for POP. The root causes identified include Gender inequity, low women status, poverty etc. Every year government has allocated funds for management of POP including free screening, the silicon ring pessary, and Kegell's exercise training at district level, and free surgical services at designated hospitals. Since the beginning of free surgical care of POP in 2066/67

more than 41,500 women received surgery for repair of POP. In 2071/72 more than 37,000 women received screening. Among them the prevalence of 1<sup>st</sup> degree POP was 8%, second degree was 6% and 3<sup>rd</sup> degree was 8%. More than 1000 women received surgical treatment and 4800 women received management using ring pessary in 2071/72.

b) **Cervical cancer screening and prevention training:** Cervical cancer is the most common cancer among women in Nepal. It accounts for 21.4% of all the cancer among women of 34-64 years age group. A national guideline on cervical cancer screening and prevention was developed in the year 2010 which aimed to screen at least 50% women of 30-60 years of age and reduce mortality due to cervical cancer by 10% with recommended screening among this group every 5 years.

The cervical cancer screening is done by visual inspection of cervix using acetic acid by trained nurses and doctors. If any signs of pre-cancerous lesion seen, women are referred for a Cryotherapy, using compressed carbon dioxide to cure the lesion. This approach is considered cost-effective as it detects early lesion, management at early stage by Cryotherapy will prevent progression to cervical cancer, and the cost for scale up is low. Family health division has planned to scale up this very cost-effective approach to all 75 services. To date, 162 nurses/doctors are trained to provide screening services and 14 centers have Cryotherapy services.

(c) **Obstetric Fistula management:** Obstetric Fistula affects women from poorer communities and significantly impairs the quality of life of women suffering this condition by social stigmatization making women's life harder in family and society besides her physical suffering. Government of Nepal has allocated funds for the free screening of obstetric fistula currently being integrated with POP screening and surgical services at BPKIHS (Dharan), Kathmandu Model Hospital (Kathmandu), and Mid-Western regional hospital (Surkhet).

#### 4. Human Resource

A significant share of family health division's budget has been allocated for the recruitment of ANMs in short term contract to ensure the 24 hour birthing services at PHCC/HP levels. FHD has also provided fund at local level to recruit human resource mix needed to provide surgical management for obstetric complications at district hospitals.

FHD has been coordinating with National Health Training Center (NHTC) and National Academy for Medical Sciences (NAMS) for pre-service and in-service training of health workers. NHTC provides training on SBA, ASBA, OT management, Family Planning training including Implants and IUCD, and antenatal USG. More than 7100 SBAs and 140 ASBAs have already been trained since SBA training began. In 2071/72, five anesthesia assistant (AA) and 6 DGO graduated from NAMS and are deployed at CEONC sites. Proper placement of trained staff such as SBA, AA has been a continuous challenge for the system. Placement of SBAs at training sites for 2 weeks to refresh their knowledge and skills and improve their confidence in managing complicated delivery was tested in three districts (Dang, Rupandehi and Dailek).

#### 5. Expansion and quality improvement of services delivery sites

FHD continues to expand 24/7 service delivery sites like birthing centers, BEONC and CEONC sites at existing PHCC/HP and hospitals. Expansion of service sites is possible mostly due to provision of fund to contract short-term staff locally. By the end of FY 2071/72 CEONC services were established in 67 districts, however only 56 districts were able to provide services on a regular basis. A total of 1621 BC and 166 BEONC sites are functioning by the end of 2071/72. Expansion and quality improvement of MNH service delivery at remote areas is being tested in Taplejung district. FHD is also testing on-site coaching of MNH service providers in 10 districts for improving continuity of services and the quality of care.

Since 2060/70, FHD also provided fund to 14 referral hospitals to expand beds for maternity wards, recruit nurses and doctors including OBGYN and anesthetist in order to cope with current overcrowding at maternity wards and developing long-term strategies to overcome this problem. Overcrowding at these hospitals has resulted in poor quality of care.

### **5. Emergency Referral Fund**

It is estimated that 15 percent of the pregnant women will develop complication during pregnancy and child birth, and 5 to 15 percent of them need CS for delivery (WHO, 2009) to avoid deaths or long-term morbidity. In case of difficult geographical terrain and unavailable CEONC services, it is very important to refer these women to appropriate centers. To address this issue FHD has allocated emergency referral fund to facilitate referral services in sixteen districts in last fiscal year namely Bhojpur, Taplejung, Khotang, Rasuwa, Manang, Mustang, Dolpa, Humla, Jajarkot, Mugu, Rolpa, Rukum, Bajura, Darchula, Ramechhap, and Teharhum. A total of two hundred thousand rupees has been allocated as seed money for each district to be managed by a locally formed committee as per the operational guidelines. The main objective of this program is to support emergency referral transport to women from poor, Dalit, Janjati, geographically disadvantaged, socially and economically disadvantaged communities who need emergency Caesarean section or complication management during pregnancy and child birth. Fund is also provided at regional directorate level to provide airlift to women where motorable service is not available or for situation requiring immediate transfer of patient. FHD is testing the feasibility of implementing national MNH referral guidelines at districts level with the support of GIZ in two districts (Achham and Jumla).

### **7. Safe Abortion Services**

According to global and national evidence, women face unwanted pregnancy due to various reasons including the limited access to family planning information and services. Such women if do not get access to safe abortion services in timely manner are at high risk of developing complications due to unsafe abortion or in worst case scenario suicide due to social pressure. Thus, there is a necessity to make this service available, accessible and affordable to all women with unwanted pregnancies. FHD has defined four key components of comprehensive abortion care (CAC) and they are; i) pre & post counseling on abortion methods and as well on contraceptive methods, ii) termination of pregnancy as per national protocol iii) diagnosis and treatment of existing RTIs and iv) provide contraceptive methods as per informed choice and follow up for post abortion complication management.

CAC (MVA and MA) services has been expanded to all 75 districts hospital and to over 50% of PHCCs. Additionally, 2<sup>nd</sup> trimester abortion services are available in 22 hospitals where CEONC Service is also available and Medical abortion services being expanded at health post with additional training to SBA. By 2071/72, Medical abortion service has been expanded to 39 districts with the support from various partners. Beginning from FY 2070/71 as per NHSP-IP 2 direction, safe abortion program has been given priority to ensure the availability of five modern contraceptive methods in all SAS sites.

### **8. Obstetric First Aid orientation:**

Since 2070/71, FHD started orientation of paramedics on first aid management of obstetric complications in order to improve immediate management of women with obstetric complications at health facilities without BC and also enable them to support the SBA/ANM in times of emergency, starting from two districts. In 2071/72, training of trainers was conducted for trainers from 19 districts.

### **9. NyanoJhola Program:**

The NyanoJhola Program was launched with the objective of protecting new born from hypothermia and infection as well to increase the utilization of peripheral health facilities (birthing centers) in FY 2069/70. A set of clothes (two sets of bhoto, daura, napkin, cap, and one set of wrapper, mat for baby and gown for mother) for new born and mother is provided if the women gave birth at birthing centers or district hospitals. The program is being implemented in all 75 districts of Nepal.

## 10. Aama Program:

The revised Aama guideline has been implemented since the start of FY 2069/70. The *Aama* guideline specifies the services to be funded, the tariffs for reimbursement and the system for claiming and reporting on free deliveries each month. After revision, *Aama* program has four components: (1) the Safe Delivery Incentive Program (SDIP), a cash incentive scheme, which was initiated in July 2005, (2) free institutional delivery care, which was launched in mid-January 2009, (3) incentive to health worker for home delivery and (4) incentive to women for 4ANC visits. The Aama program provisions are:

- Incentives to women on institutional delivery: A cash payment is made to women immediately following institutional delivery: NRs. 1,500 in mountain, NRs. 1,000 in hill and NRs. 500 in Teraidistricts.
- Free institutional delivery services: A payment to the health facility for the provision of free delivery care. For a normal delivery health facilities with less than 25 beds receive NRs. 1,000; health facilities with 25 or more beds receive NRs. 1,500.
- For complicated deliveries health facilities receive NRs. 3,000; for C-Sections (surgery) NRs. 7,000. Ten complications i.e. APH requiring blood transfusion, PPH requiring blood transfusion or MRP or exploration, severe pre-eclampsia, eclampsia, MRP for retained placenta, puerperal sepsis, instrumental delivery, multiple delivery, Anti-D administration for RH negative, and management of abortion complications requiring blood transfusion and admission longer than 24 hours with IV antibiotics for sepsis are included as complicated deliveries. Laparotomy for perforation due to abortion has also been added to the criteria for surgery (receiving 7000 NRs) along with C/S, laparotomy for ectopic pregnancy and ruptured uterus.
- Incentive to women for 4ANC visits: A cash payment of NRs. 400 is made to women on completion of four ANC visits at the 4, 6, 8 and 9 months of pregnancy and institutional delivery.
- Incentives to health workers for home deliveries: A cash payment of NRs. 100 is made to health worker for home deliveries. Copies of birth registration or death certificate need to be produced to claim incentive for home deliveries.

A significant increase has been observed in the number of facilities providing delivery service and number of institutional delivery after the launch of Aama program. At the end of fiscal year, Aama program was implemented in 64 non-state health facilities. FHDs' Aama administrative record shows that 87 health facilities functioning at the level of providing CEONC service, 161 health facilities functioning at the level of providing BEONC service, 1621 health facilities functioning at the level of birthing centers are currently providing Aama Surakshya Program (These numbers need confirmation).

### 3.2.3 Achievement

#### 1. Antenatal Care

WHO recommends minimum four antenatal check-ups at a regular interval to all pregnant women - first at 4<sup>th</sup> month, second at 6<sup>th</sup> month, third at 8<sup>th</sup> month and fourth at 9<sup>th</sup> month of pregnancy. During these visits she will receive the following services on top of the general health check-up:

- Monitor blood pressure, weight and fetal heart rate;
- Provide information, education and communication (IEC) and behavior change communication (BCC) on care during pregnancy, childbirth, early new born care and family planning;
- Provide information on danger signs during pregnancy, childbirth and post-partum period, and timely referral to the appropriate health facilities using birth preparedness and complication readiness (BPCR) for both normal and obstetric emergencies (plan of delivery by skilled birth attendants, money, transportation and blood);
- Early detection and management of complications during pregnancy; and

- Provision of tetanus toxoid and Diphtheria (Td) immunization, iron folic acid tablets and deworming tablets to all pregnant women and malaria prophylaxis where necessary.

Service statistics of the last three years shows that the national average of first ANC visit as percentage of expected pregnancy has increased from 86 to 96 percent in 2071/7072.

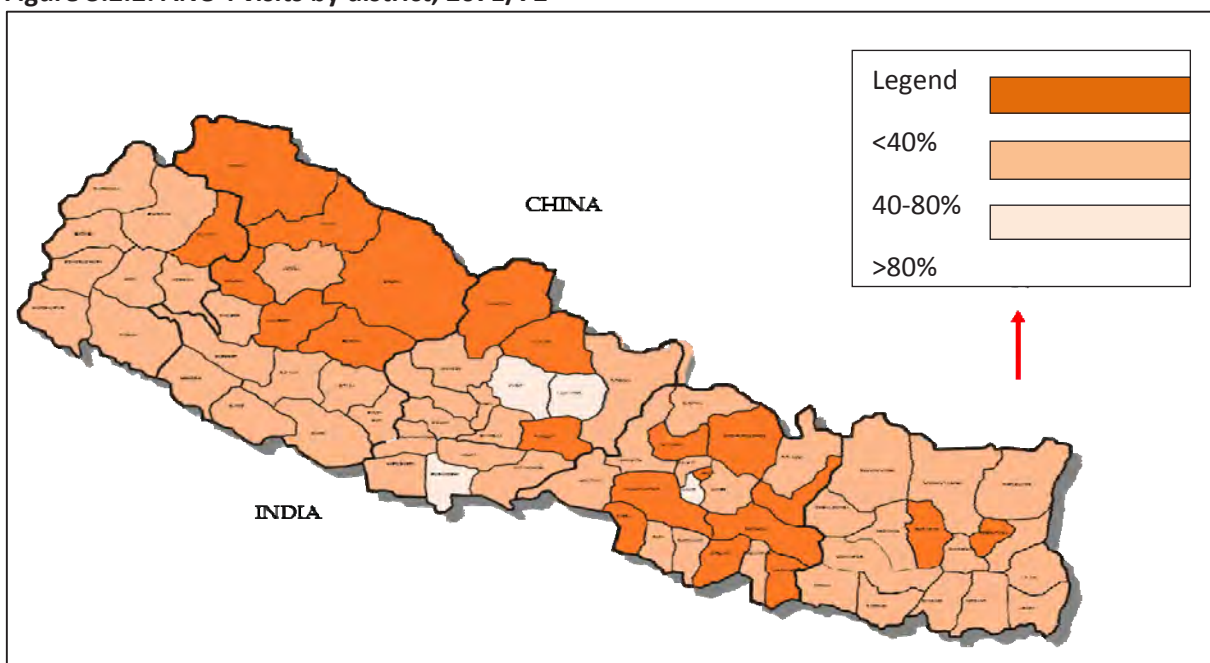

**Fig 3.2.1: 4<sup>th</sup> ANC visit (as per protocol) as a percentage of First ANC**

Mothers are encouraged to make at least four antenatal check-ups and monitoring system is in place to track the timing of ANC visits as per the ANC protocol since 2066/67. Figure 3.2.1 shows the proportion of pregnant women attending at least 4 ANC visits as per protocol among women who had first antenatal visits has declined in 2071/72 in comparison to previous years in all regions. Performance on ANC four visits, one of the quality indicators, shows the need to focus on the quality of ANC consultation process as it is expected that a satisfied and well informed pregnant women will complete the recommended four visits.

Figure 3.2.2 shows district level performance on coverage of 4 ANC according to protocol among expected pregnant women. As shown in the figure, only 4 districts have 4 ANC coverage of above 80 percent and a total of 50 districts have a 4 ANC coverage between 40 to 80 percent, while a total of 21 districts have 4 ANC coverage of below 40 percent.

**Figure 3.2.2: ANC 4 visits by district, 2071/72**

### Delivery Care

Delivery care services include:

- Skilled birth attendants at deliveries (either home-based or facility-based);
- Early detection of complicated cases and management or referral, after providing obstetric first aid, to appropriate health facility where 24 hours emergency obstetric services are available;
- Registration of births and maternal and neonatal deaths.

Although women are encouraged to deliver at the health facility, home delivery using Emergency Obstetric Care Kit (EmOC kit), and obstetric first aid at home if complications occur is also considered as important component of delivery care in settings where institutional delivery service is not available.

Nepal had committed in achieving 60 percent deliveries by SBA by 2015 (2071/72) in line with MDG target. Deliveries attended by skilled birth attendant have been in increasing trend over the last three years with seven percent increase in 2071/72 at national average. Significant increment in SBA delivery was noted in all regions except in EDR. Under-reporting could be the cause of decline in EDR where many private hospitals are in operation.

Nepal aims to achieve institutional delivery at 60% by 2015 (NHSP2, 2010-2015). Institutional delivery as percentage of expected live births increased from 45 to 57 percent over the last three years, with notable seven percent increment from last fiscal year. MWDR and FWR have achieved more than the national target of 60% institutional delivery.

Fig 3.2.5 shows that 21 districts have already achieved the 2015 target of 60 percent institutional delivery, while 33 districts achieved less than 40% institutional deliveries.(note: institutional and SBA delivery data from BPKIHS and TUTH is based on their presentations at national annual review and data from Janakpur and Narayani sub-regional hospitals are from Aama reporting. Therefore the figures presented above do not match with HMIS raw and analyzed data, as the delivery information from few government and non-government hospitals are not included in HMIS report).

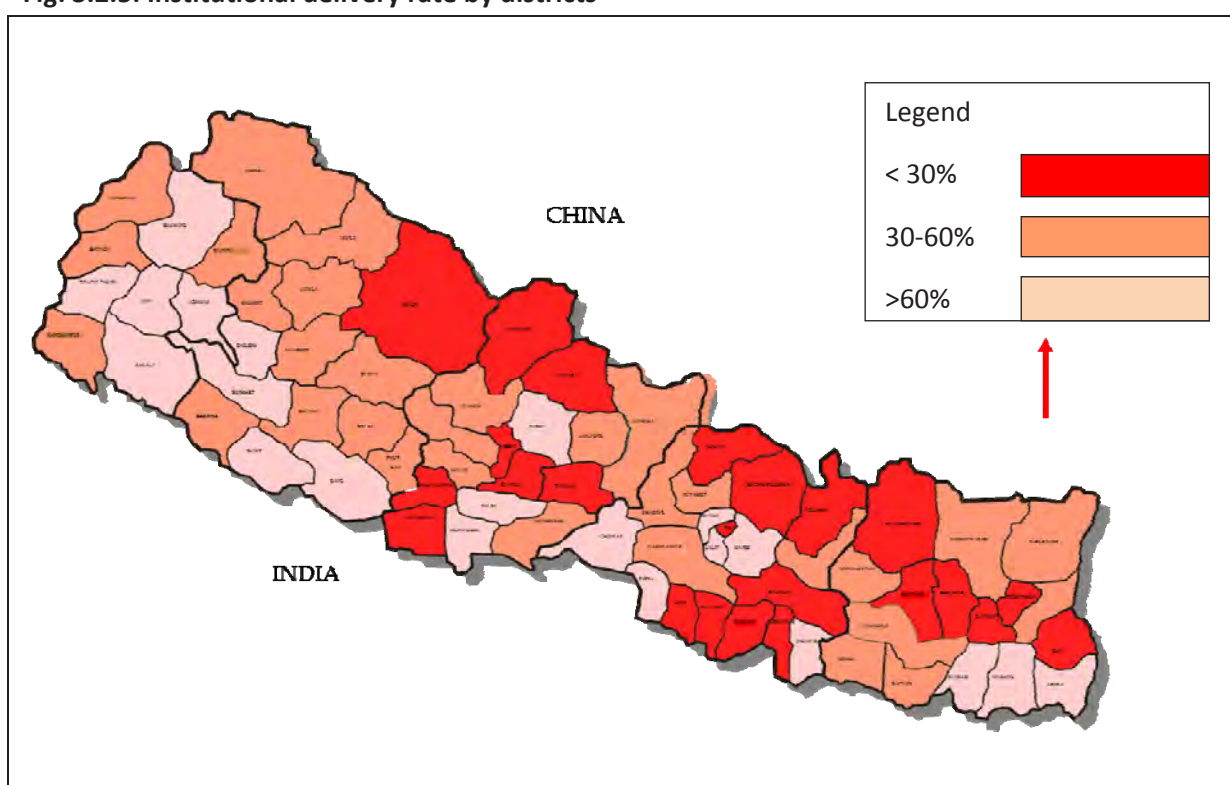

Proportion of institutional deliveries taking place at birthing centers (HP) increased from 27% of all institutional deliveries in 2070/71 to 29% in 2071/72. This increase is not significant when number of BC at HP levels is compared over years (Table 3.2.3).Share of district hospitals and BEONC centers is 20%, while that of referral and teaching hospitals is 34% and private hospitals is 17% of total institutional deliveries.

<b>Institutional and SBA deliveries from Nepal Multiple Indicator Cluster Survey 2014</b>	
<b>Indicators</b>	<b>Finding</b>
Skilled birth attendant at delivery	55.6%
Institutional deliveries	55.2%

**Table 3.2.3: Status of BC/BEONC/CEONC expansion**

Region	District	2070/71				2071/72			
		BC	BEONC	CEONC*	Total	BC	BEONC	CEONC*	Total
Eastern	16	277	41	16	330	281	31	16	332
Central	19	349	51	16	432	366	41	17	431
Western	16	261	43	12	316	278	40	13	334
Mid-western	15	342	43	12	389	399	28	13	444
Far Western	9	227	28	8	259	297	26	9	334
<b>Total</b>	<b>75</b>	<b>1456</b>	<b>206</b>	<b>64</b>	<b>1726</b>	<b>1621</b>	<b>166</b>	<b>67</b>	<b>1875</b>

\*number of districts with CEONC service established in the district

**Fig: 3.2.5: Institutional delivery rate by districts**

## 2. Postnatal Care

Postnatal care services include:

- Three postnatal check-up: first within 24 hours of delivery, second on the third day and third on seventh day after delivery;
- Identification and management of complications of both mother and newborn during postnatal period and referral to appropriate health facility as and when needed;
- Promotion of exclusive breastfeeding;
- Personal hygiene and nutrition education, post-natal vitamin A and iron supplementation for the mother;
- Immunization of newborns; and
- Post-natal family planning counseling and services.

Percentage of mothers who received first postnatal care at the health facility among expected live births has decreased in last fiscal year. Institutional delivery was 57%, nationally whereas PNC within 24 hours was lower at 48%, this could be due to the lack of proper recording and reporting of information. The figure has shown the decline in PNC in EDR, CDR and WDR whereas significant increment in MWDR and FWR corresponding with high institutional deliveries in these districts.

With the introduction of the revised HMIS, monitoring of three PNC visits according to national protocol was introduced in 2071/72. Mothers attending three PNC visits as per the national protocol was not satisfactory in all regions. Cultural and geographical factors affecting movement of post-natal mother could be the reasons for this low coverage while perceived low importance of care during post-partum period could also play an important role. In Nepal, there is a need of a strategy that promotes access to and use of post-natal service especially in geographically challenging districts and is culturally sensitive.

### 3. Newborn Care

Newborn care includes;

- delivery by skilled birth attendant both at home and health facility with immediate newborn care (warmth, cleanliness, immediate breast feeding, cord care, eye care and immunization) for all new born and resuscitation to new born with asphyxia;
- health education and behavior change communication on early newborn care at home;
- identification of neonatal danger signs and timely referral to the appropriate health facility; and
- Community based newborn care program which is reported in Chapter 2, Child Health.

### 4. Emergency Obstetric Care

Basic emergency obstetric care (BEONC) covers management of pregnancy complications by assisted vaginal delivery (vacuum or forceps), manual removal of placenta, removal of retained products of abortion (manual vacuum aspiration), and administration of parental drugs (for postpartum hemorrhage, infection and pre-eclampsia/eclampsia), resuscitation of newborn and referral. Comprehensive emergency obstetric care (CEONC) includes surgery (caesarean section), anesthesia and

blood transfusion along with BEONC functions. Safe blood transfusion is an essential part of CEONC and free blood transfusion was provided from 2069/70.

Proportion of Caesarean section among expected live births has gradually increased at national average is 8.7% with one percent increment in 2071/72 compared to previous year. At population level 5-15% of Caesarean section among all live births is accepted as minimum and maximum standard by the WHO. While EDR, CDR and WDR are within the accepted range, MWDR and FWDR are still lag behind the national average and at below the accepted minimum level. Proportion of CS among total expected births in mountain districts is still very low at 1%, although it has increased compared to previous years.

	2069/70	2070/71	2071/72
Mountain districts	0.4	0.7	1.0
Hill districts	6.3	8.3	9.3
Terai districts	7.1	8.0	9.8
Nepal	6.3	7.6	8.7

EmOC met need slightly decreased to 25.6% from 28.9% in last fiscal year based on Aama monitoring report (table: 3.2.4). All women who needed obstetric complication should receive EmOC services; therefore the aim is to attain 100%. The proportion of major direct obstetric complications throughout pregnancy, childbirth and immediate post-partum period is estimated to be 15% of expected births (WHO).

**Table 3.2.4: Met need for EOC based on Aama reporting\***

Fiscal year	Total expected live births	15 % of expected live births requiring EOC	Number of obstetric complications managed	Met need for EOC services
2069/70	662,446	99,367	28,717	28.9
2070/71	662,285	99,343	28,495	28.7
2071/72	614,666	92,200	23,611	25.6

\*Previous years reporting were based on HMIS data

## 5. Safe abortion

Since the implementation of safe abortion services in 2060/61, a total of 819,690 women received safe abortion services from certified service sites. Utilization of safe abortion services has been plateaued in the last four years. Among 78,611 total service users in 2071/72, 50% received medical abortion, 15.3% are adolescents (aged < 20), 59.6% received family planning service. Share of long term family planning among post-abortion family planning users is 19.2%. Out of all abortion service users, 10% of medical abortion service users and 13% of surgical abortion service users received LARC methods.

### 3.2.5 Problems and Recommendations

**Table 3.13: Problems/constraints and actions to be taken**

Issues/Constraints	Recommendations	Responsibility
Referral mechanism to be established	<ul style="list-style-type: none"> <li>▪ Pilot recommendations from referral guideline and implement accordingly</li> </ul>	FHD
Quality service from maternity care at hospitals and birthing centre <ul style="list-style-type: none"> <li>• 24/7 availability of services</li> <li>• Skills and knowledge of staff</li> <li>• Enabling environment and motivation</li> <li>• Overcrowding at referral hospitals</li> <li>•</li> </ul>	<ul style="list-style-type: none"> <li>▪ Continue need based temporary hiring.</li> <li>▪ Introduce quality improvement process in all maternity care services</li> <li>▪ Quality monitoring and mentoring of providers.</li> <li>▪ Monitoring process indicator for quality service at maternity care</li> <li>▪ Upgrading strategically located birthing centers to provide comprehensive quality primary health care services</li> </ul>	MoH/DoHS  FHD (QoC)  FHD  FHD, DHO/DPHO FHD/DoHS

## 3.3 FCHV PROGRAM

### 3.3.1 Background

Recognizing the importance of women's participation in promoting health of the people, GoN initiated the Female Community Health Volunteer (FCHV) Program in FY 2045/46 (1988/1989) in 27 districts and expanded to all 75 districts of the country in a phased manner. Initially, the approach was to select one FCHV per ward regardless of the population size. Later in 2050 (1993/94) population based approach was introduced in selected (28) districts. All together there are 51,470 FCHVs in the country (47,328 FCHVs at rural/VDC level and 4,142 at urban/municipality level).

FCHVs are selected by members of Mothers' Group for Health (MG-H) with the help of local health facility staff. They are provided 18 days basic training in two phases (9+9 days) on selected primary health care components. After completion of basic training, FCHVs are provided with a certificate and medicine kit box consisting of necessary drugs and supplies free of cost. They are also provided with manuals, flip chart, ward register, IEC materials, FCHV bag, signboard and identity card. Family Planning devices (pills and condoms only to FCHVs) Iron tablets, Vitamin A, and ORS are supplied regularly through local health facility.

The major role of the FCHV is to advocate healthy behaviors of mothers and community people to promote safe motherhood, child health, family planning, and other community based health promotion and service delivery. FCHVs distribute condoms and pills, ORS packets and vitamin A capsules, treat pneumonia cases and refer and serious cases to health institution along with motivation and education to community people. Similarly, they also distribute iron tablets to pregnant women.

Various policies, strategies and guidelines have been developed to strengthen the FCHV program. Numerous factors influence the program including national health sector reform, decentralization and handing over of health facilities to VDCs, experience gained from program implementation, and the recognition to FCHVs in reduction of maternal and child mortality and general fertility through continuous implementation of community-based health programs in Nepal.

The FCHV program strategy has been revised in 2067 (2010) which gave strategic directions and critical approaches to ensure a strengthened national program for consistency and continuous support to each FCHV.

Government of Nepal (GoN) is committed to increase the moral & participation of FCHV in community health development. In fiscal year 2064/65 MoH established FCHVs fund by providing cash support of Rs. 50,000 to each VDC. The mobilization of this fund for income generation activities is expected to benefit the FCHVs and the community at large.

#### Goal

The goal of FCHV program is to support national goal of health through involvement of community in public health activities. This includes imparting knowledge and skills for empowerment of women, increasing awareness on health related issues and involvement of local institutions in promoting health care.

## Objective

FCHV program has the following objectives:

- To prepare a pool of self-motivated volunteers as a focal person to bridge health programs with community
- To prepare a pool of volunteers to provide community based health services
- To activate women to tackle common health problems by imparting relevant knowledge and skills
- To increase the community participation in improving health
- To develop FCHV as a motivator for health
- To increase utilization of health care services through demand creation

### 3.3.2 Major Activities

Major activities carried out during the FY 2071/72 include the following:

- Dress allowances to FCHV
- Bi-Annual FCHV Review meeting
- FCHV Day celebration
- FCHV Database update
- Farewell of Long acting FCHV
- Additional budget (Rs. 10,000) in FCHV Fund
- Training, orientation and mobilization of FCHV for various national programs implemented

### 3.3.3 Achievement

There are altogether 51, 470 FCHVs serving people of Nepal out of which 47,328 are in rural areas and 4,142 in urban health centers. However, the reports were received only from 49,451 FCHVs. Therefore, analysis for this report has been based from 49,451 FCHVs and presented here accordingly. According to current program guideline Urban FCHVs are mobilized through municipalities, while the rural FCHVs are mobilized by concerned HPs or PHCCs. Table 3.3.1 presents the trend of various services provided by FCHVs during FY2069/70 to FY2071/72, which suggests that the service provided by FCHVs (Pills, Condom and ORS distribution) has slightly decreased in FY2071/72 than in FY 2070/71. The number of mothers participating in the Health Mother's Group Meeting has been increased.

Table 3.3.1. Trend of services provided by FCHVs

Services	2069/70	2070/71	2071/72
Pills distribution (cycles)	9,00,424	9,13,530	8,66,881
Condom distribution (pieces)	98,65,035	1,45,06,525	1,05,12,449
ORS distribution (packets)	16,48,343	17,02,330	14,11,438
Iron tablets distribution*	2,47,02,035	2,32,87,380	9,32,945
Health Mother's Group meeting	4,33,503	4,18,936	7,02,823

Source: HMIS

\*Iron tablets district distribution: 2069/70 and 2070/71 data is on Iron tablets; 2071/72 data is on number of persons provided Iron tablets.

Source: HMIS

Summary of service provided by FCHVs has also shown in Figure 3.3.1 for selected services over the last three fiscal years. The figure also indicates that participants of health mother's group meeting are in increasing trend over the last three fiscal years. Similarly, distribution of oral contraceptive Pills, Condoms, and ORS have been declined in FY2071/72 in comparison to the last FY 2070/71.

### 3.3.4 Provided support in home delivery cases

FCHV had also provided support in home delivery. Their supports were mainly focused on initiating skin to skin contact after birth, ensure uptake of misoprostol, and application of chlorhexidine in cord after delivery. Contribution of FCHV in home delivery has been shown in Table 3.2.

Table 3.3.2. Support provided by FCHV in home delivery

Region	Ensure Misoprostol Taken (Tablet)	Skin to Skin contact after birth	Chlorhexidine applied in Cord
Eastern	31,979	25,659	20,343
Central	55,523	55,713	45,672
Western	14,292	18,882	14,560
Mid-Western	9,995	16,496	13,135
Far-Western	5,688	13,644	10,968
<b>National</b>	<b>1,17,477</b>	<b>1,30,394</b>	<b>1,04,678</b>

Source: HMIS

Table 3.3.2 shows that FCHV have been active to increase best practices including Skin to skin contact after birth, Chlorhexidine application in umbilical cord and ensuring uptake of misoprostol after delivery for PPH prevention at community in FY 2071/72.

### 3.3.5 Involvement in CBIMCI Program

In addition to the maternal and newborn health care shown above, FCHVs have been proactively counseling and referring mother and children to the health facilities for various services which are shown in Table 3.3.3.

Table 3.3.3. CBIMCI service provided by FCHVs at the community level

Services	2069/70	2070/71	2071/72
Cotrim treatment (cases)	3,17,804	3,02,876	2,77,095
ORS & Zinc Treatment (pieces)	10,36,651	10,88,979	8,52,928
Total Diarrhoea cases reported by FCHV	12,28,204	11,36,165	9,31,376
Treated with ORS & Zinc	10,36,651	10,88,979	853,924

Source: HMIS

The Table 3.3.3 indicates that the CBIMCI service provided by FCHV at the community has slightly declined in FY 2071/72 compared to FY 2070/71. For example In FY 2071-72, a total of 743349 children were treated by Cotrim, among of them FCHV served 2,77,095 children. That means contribution of FCHV in treatment of children by Cotrim was 37.27% of total children treated. Besides that FCHVs had supported for polio immunization to children below 5 years during NID; community based management and treatment of ARI and CDD; community based nutrition programs and other public health activities including control of neglected tropical diseases.

#### Issues / constraints

Issues / constraints	Recommendations	Responsibility
Increased demand of FCHVS	Address the issue at policy level	MoH
FCHVs are inactive	Capacity build up, need motivation	FHD/CHD/DHO
Increased work load	Minimize work load	FHD/CHD/DHO
Illiterate FCHVs	Knowledge update to FCHVs	FHD/DHO
Uninterested in farewell	Rethink on farewell package	FHD/DHO
Low utilization of FCHV fund	Strictly implement guideline	FHD/DHO

## 3.4 PRIMARY HEALTH CARE OUTREACH

### 3.4.1 Background

As envisaged in the national health policy 1991, health facilities were extended up to village level. However, utilization of services provided by health facilities, especially preventive and promotive services, has been found to be limited because of limited accessibility. Therefore it was felt that services should be expanded closer to the community. Thus Primary Health Care Outreach (PHC/ORC) services were initiated and established in 1994 (2051 BS).

The aim of PHC/ORC is to improve access to some basic health services including family planning, child health and safe motherhood closer to rural households. These clinics are the service extension sites of PHCCs, HPs and SHPs up to community level. The primary responsibility to conduct these clinics lies with MCHWs and VHWs at SHP level and ANMs, AHWs and VHWs at PHCC and HP level. Other staffs of HP/PHCCs help to conduct the PHC/ORC. With the upgrading of MCHW and VHW, and with upgrade of all SHP the responsibility is being shared with all ANM and AHWs. Female Community Health Volunteers (FCHVs) and other local NGOs/CBOs support health workers to conduct the clinics and also support in recording/reporting and other support activities.

Based on the local needs PHC/ORCs are conducted every month at fixed locations of the VDC on specific dates and time. The clinics are conducted within half an hour's walking distance for the population residing in that area. VHWs and MCHWs or ANMs/AHWs provide basic PHC services. According to PHC/ORC strategy, following services are provided from the clinic.

1. Safe Motherhood & Newborn Care
  - Antenatal, postnatal, and newborn care
  - Iron distribution
  - Referral if danger signs identified
2. Family Planning
  - DMPA, (Depo-Provera) pills and condom
  - Monitoring of continuous users
  - Education and counseling on FP methods and emergency contraception
  - Counseling and referral for IUCD, implant and VSC service
  - Tracing defaulter
3. Child Health
  - Growth monitoring of under 3 children
  - Pneumonia treatment
  - Diarrhoea treatment
4. Health Education and Counseling
  - Family planning
  - Maternal and newborn care
  - Child health
  - STI, HIV/AIDS
  - Adolescents' sexual and reproductive health
  - Others
5. First aid treatment
  - Minor treatment
  - Referral for complicated cases

### 3.4.2 Major Activities of FY 2071/72

- Financial support to run PHC/ORC

### 3.4.3 Analysis of service coverage

#### 1) Outreach clinics conducted and people served in 2071/72 is presented below:

Table3.4.1. Outreach clinics conducted and people served in 2071/72 by development region

Region	Total No. of clinics	Service provided to visitors (New+Old)
Eastern	2917	597824
Central	4118	685202
Western	2520	508007
Mid-Western	1899	391326
Far-Western	1458	388627
<b>National</b>	<b>12912</b>	<b>2570986</b>

Source: HMIS

Altogether 2.6 million people served through 12912 ORCs conducted 124747 times.

Note:

- Target: Total number of clinics expected to run in a year (12912 PHC/ORC clinics X 12 times = 154944)
- Achievement: Total number of clinics reported to have been conducted is 124747 (81%)

#### 2) The average number of people served by ORCs explains the performance of clinics on coverage.

Table3.4.2. Average number of people served per clinic per day by development region

Region	Average no of People Served by clinic			
	PHC/Day	HP/Day	SHP/Day	PHC ORC/Clinic
<b>National</b>	<b>50</b>	<b>20</b>	<b>14</b>	<b>20.6</b>
Eastern Region	39	20	14	19.5
Central Region	65	18	13	20.2
Western Region	39	18	13	18.9
Mid -western Region	41	23	17	22.2
Far western Region	59	25	14	25.0

Source: HMIS

Average number of clients, served per day per outreach clinic was 20.6 at national level in FY2071/72. This number has slightly decreased from 22 during FY2070/71. Table3.4.2 shows that the average clients served per clinic per day was highest in Far-western development region (25) followed by Mid-western region, Central region, Eastern region and Western region respectively. Table3.4.2 further indicates that the average clients served per day is higher in outreach clinics than the average clients served per day in HP and SHPs.

**3) Services provided by PHC/ORC**

Table3.4.3. Trend of service provided in PHC outreach clinics

<b>Service Types</b>	<b>2069/70</b>	<b>2070/71</b>	<b>2071/72</b>
Primary treatment	10,63,636	10,03,924	7,54,413
Depo (times)	2,47,299	2,38,067	2,14,370
ANC (times)	2,83,247	2,70,991	2,58,979
PNC (Times)	77,474	73,567	56,917
Growth monitoring	11,96,189	12,45,345	9,31,097

Source: HMIS

Table3.4.3 shows that the trend of average number of people served in PHC/ORC. The table indicates that the average people served in PHC/ORC has slightly decreased in FY2071/72 compared to the last two fiscal years. The declining trend of average number of people served in PHC/ORC suggests that the PHC/ORC needed to be strengthened so as to step up them to increase functional in future.

**3.4.4 Issues/Gaps**

<b>Issues / constraints</b>	<b>Recommendation</b>	<b>Responsibility</b>
<ul style="list-style-type: none"> <li>• Service coverage of PHC/ORC</li> <li>• Upgraded ANM/AHW are not interested to conduct PHC/ORC clinics due to lack of Field allowance</li> <li>• PHC/ORC committee meeting not functional</li> <li>• Lack of place (infrastructure) to conduct PHC/ORC</li> </ul>	Mobilization of ANM/AHW in PHC/ORC clinics with field allowance	FHD/DHO
	Supporting supervision and monitoring	
	Reform and re-orient mgt committee members	DHO/DPHO
	Revise strategies for PHC/ORC	FHD
Low reporting of PHC-ORC	Improve reporting mechanism and monitoring	MD

## 3.5 DEMOGRAPHY AND REPRODUCTIVE HEALTH RESEARCH

### 3.5.1 Background

Planning, monitoring and evaluation of reproductive health (RH) activities are the key functions of Program, Budget and Demography Section. This section conducts periodic and *ad hoc* studies and also coordinates reproductive health related research and studies carried out by other organisations in Nepal.

**Major responsibilities of this section include:**

- Estimate annual national targets for family planning, safe motherhood and adolescent reproductive health services including family planning acceptors and RH commodities.
- Carry out regular monitoring of RH and EOC activities
- Provide supportive supervision to DHO/DPHO and all levels of health facilities regarding RH services.
- Conduct periodic and ad-hoc researches and studies on reproductive health focusing on family planning, maternal and neonatal health, safe abortion services, adolescent sexual and reproductive health and female community health volunteer services.
- Conduct and support piloting of maternal and new-born health initiatives.

### 3.5.2 Major Activities

Major activities completed in the fiscal year 2071/72 include:

#### 3.5.2.1 Annual program and Budget

Annual program and budget was prepared for Family Health Division on the basis of program continuation, district, regional and national RH review recommendation, sub-committee recommendations, district and regional office demands, research and study findings and HMIS provided information.

#### 3.5.2.2 Target population setting, monitoring and research/study

- Target population revision for RH programs was led by HMIS and supported by the division. The target was set for next 10 years on the basis of population census 2011.
- Estimation of contraceptive requirement: Forecasting for contraception and other RH commodities was done in co-ordination of Logistics Management Division and HMIS.
- Review meetings:  
Regional and national reviews of Department of Health Services were supported by documenting and presenting progress of RH programs. A national RH Review Meeting was conducted to review the progress, partnership effectiveness and plan for annual program and budget. Nepal Health Sector Program (NHSP III) development process was supported by designing periodic plan of RH activities. EOC monitoring review meetings were conducted at regional and national levels.
- Internal monitoring was done from the division to various district offices and hospitals. The monitoring was focused on the finance flow of Aama Program, Uterine Prolapse management and family planning services. The CEONC strengthening was done through mentor and FHD officials.
- Maternal and perinatal death review exercise was scaled up to 44 hospitals by capacitating concerned staffs and providing supportive budget for meeting conduction. However, some hospitals couldn't function MPDR very well, need felt for further supports.

- Rapid Assessment of Demand Side Financing (Aama and 4ANC) round VIX was conducted in 10 districts. Additionally, exit client interview in seven private health institution was also incorporated in the rapid assessment.
- Co-ordination in research activities was conducted through partner organizations and researchers they come in contact to FHD.

### 3.5.2.2 Guideline/documents development

- Maternal and Perinatal Death Surveillance and Response Guideline and Implementation Plan (2015-19) have been finalized and approved by MoH. Birth defect surveillance, prevention and control plan (2015-19) has been finalized and approved by MoH. Which has been instrumental to initiate or integrate birth defect surveillance, prevention and control activities within WHO regional framework for South-asia. Information recording and reporting on congenital anomalies was incorporated in HMIS.
- Safe Motherhood Policy revised draft has been prepared to incorporate maternal death notification and newborn health as well as contemporary issues of safe motherhood.
- Revision of Uterine Prolapse Guideline has been initiated

## Major Family Health Related Studies approved by NHRC in 2015 and 2016

### Major Issues

Research in RH is crucial for program design, planning, monitoring and evaluation. However, adequate co-ordination is not made from non-government partners during different stages of study (design, implementation, analysis and dissemination) as provisioned in Reproductive Health Research Strategy, which has led to gap and redundancy. Even though 52 RH-related studies were approved by NHRC during two year period between 2015 and 2016 very few studies were shared with DoHS, Family Health Division. As a result, study findings and recommendations were not incorporated in the RH program planning and implementation. In order to be able to monitor and appraise the RH research and studies conducted in Nepal, DoHS should have clear plan to enhance monitoring and research capacity for FHD staffs. to

## 3.6 ADOLESCENT SEXUAL AND REPRODUCTIVE HEALTH

### 3.6.1 Background

Nepal endorsed and published the 'National Adolescent Health and Development (NAHD) Strategy in 2000. An implementation guideline on Adolescent Sexual and Reproductive Health (ASRH) was developed in 2007 to support district health managers in operationalizing this strategy. In 2008, a draft national ASRH program was developed with the support of GIZ. This program was successfully piloted in 2009 in 26 public health facilities. Based on the findings from the pilot intervention, a National ASRH Program was designed in 2011 which consists of 4 different orientation manuals for district health managers, district stakeholders, health service providers and Health Facility Operation and Management Committees (HFOMCs)/local stakeholders.

National ASRH program is being gradually scaled up and has been able to meet the NHSP II target of making 1,000 public health facilities adolescent-friendly by 2015. The criteria of adolescent-friendly services (AFS) include, among others, the availability of trained staff as well as information materials on adolescent sexual and reproductive health, the delivery of services in a confidential way, adolescent-friendly opening hours, the display of the AFS logo as well as the inclusion of two adolescents in the HFOMC. By end of 2071/72, a total of 1140 health facilities in 63 districts are providing adolescent-friendly services (AFS) in support of different stakeholders (UNFPA, UNICEF, WHO, GIZ, Save the Children, IPAS and ADRA).

The ASRH secretariat located at Family Health Division supported by Save the Children Nepal and an ASRH sub-committee meeting are well functioning for facilitating effective implementation of adolescent health program in the country.

#### Goal

The overall goal of the National ASRH Program is to promote the sexual and reproductive health status of adolescents.

#### Objectives

- To increase the availability of and access to quality information on adolescent health and development, and provide opportunities to build the respective knowledge and skills of adolescents, service providers and educators.
- To increase accessibility and utilization of adolescent health and counseling services.
- To create safe and supportive environment for adolescents in order to improve their legal, social and economic status, and
- To create awareness through BCC campaigns and at national, districts and community level through FCHVs and mothers groups.

#### Targets

The major target of the program was to make 1,000 health facilities adolescent-friendly by 2015 in line with National Health Sector Program II. According to health policy and national health strategy government envisioned to make all health facilities adolescent friendly health services. Through improving access to family planning information and devices, the program aims to reduce the Adolescent Fertility Rate (AFR).

### 3.6.2 Major Activities

The following are the activities that have been implemented as per the NAHD Strategy 2000:

#### 1. Information and Skills

Information dissemination through health facilities

- Printed and distributed IEC/BCC booklets, ASRH poster, ASRH comics
- Distributed ASRH flip chart
- Printed and distributed adolescent job aid in Nepali

#### 2. Program orientation to Health Service Providers and stakeholders on ASRH

- Program orientations to District Health Managers of program districts
- Orientations to district stakeholders including Reproductive Health Coordination Committee (RHCC) members in the program districts
- Orientation to service providers in the program districts
- Orientation to local stakeholders including HFOMC members in program HFs.

#### 3. Health Services and Counseling

- Making health facilities adolescent-friendly.
- Integrating AFS into the existing health care delivery system.
- Involving and establishing links with youth clubs, child clubs, Village Child Protection Committees (VCPCs), NGOs and the private sector to expand and improve service delivery for adolescents.

#### 4. Safe and Supportive Environment

- Functional ASRH Sub-committee under the chair of FHD Director
- Display AFS logo and information board at AFS HFs
- Wall painting, message through local FM in AFS HFs
- Community mobilization and awareness activities through existing health systems and local NGOs

The National ASRH Program achieved the following in FY 2071/72 (2014/2015): National ASRH program equipped health facilities in districts in the following areas to provide quality AFS and increase access to and use of these services:

- Improved capacity of health workers through orientation program to provide adolescent-friendly SRH services through the use of specific counseling tools and IEC materials as well as an open and appreciative attitude.
- Improved capacity of district health managers and HFOMCs to respond to adolescents' health needs.
- Provision of appropriate SRH services to adolescents (family planning, HIV and STI services, safe abortion, counseling etc.)
- Equipping health facilities with minimum necessary logistics and equipment to provide SRH services to adolescents in a private and confidential environment.
- Ensuring participation of adolescents in decision-making processes in health facilities by involving them as invitee members in HFOMC.
- Improved recording and age disaggregated reporting on service utilization by adolescents.
- Supporting in increasing the demand for the services through distribution of ASRH related IEC materials to schools and communities as well as the mobilization of different stakeholders and structures at community level.
- Supervision and monitoring of AFS health facilities.

### 3.6.3 Current Status

National ASRH program is being gradually scaled up and met the NHSP II target of making 1,000 public health facilities adolescent-friendly by 2015. However, all public health facilities have been providing regular services to all including adolescents before equipping them to become AFS. In FY 2071/72, out of total clients served 20 percent were adolescents aged 10-19 years (girls-18% and boys-22%). Similarly, out of total referred cases, 19 percent adolescents (girls-19% and boys-20%) were referred. Likewise, 20 percent of new Tuberculosis cases were youth aged 15-24 years (female-24% and male-18%). Furthermore, 3686 schools have run peer education program and counseled 122,467 adolescents. Service specific analyses have been given in the following sections.

Source: HMIS

The above figure shows the trend of proportions of adolescent new acceptors of spacing modern contraceptives from FY 2068/69 to 2071/72 in Nepal. Pills new acceptors rank highest followed by Depo new acceptors whereas comparatively IUUCD and implant users are less in number. Total sum of data shows that slightly more than one fourth of new acceptors of modern contraceptives are adolescents among total new acceptors of spacing modern contraceptives. The proportion of adolescent new acceptors using Depo, Implant and IUUCD are all in increasing trends while proportion of Pills users remained constant in the last two years.

**Table 6.3.1: Proportion of Adolescents New Acceptors among total new acceptors of Spacing Modern Contraceptives by Regions**

Method	Fiscal Year	Regions				
		EDR	CDR	WDR	MWDR	FWDR
Pills	2068/69	8.1	6.7	4.6	12.3	5.3
	2069/70	14.6	8.1	5.4	16.7	6.3
	2070/71	8.9	9.2	10.7	13.0	5.5
	2071/72	8.6	11.0	7.9	13.1	6.2
Depo	2068/69	6.9	7.4	5.0	11.3	4.2
	2069/70	7.6	7.9	5.2	11.5	4.5
	2070/71	7.5	7.9	5.4	12.1	5.3
	2071/72	7.4	9.3	11.7	13.0	4.9
IUUCD	2068/69	3.2	5.1	2.4	15.5	9.6
	2069/70	8.0	4.3	3.9	15.7	8.0
	2070/71	6.3	3.6	4.2	7.8	4.4
	2071/72	6.6	6.4	4.8	7.8	6.6
Implant	2068/69	2.1	2.0	4.6	12.0	1.1
	2069/70	2.7	2.0	2.9	6.8	1.7
	2070/71	2.3	2.9	2.6	6.8	3.0
	2071/72	2.6	4.3	6.3	5.4	2.8

Source: HMIS

Table 6.3.1 shows the trend of proportion of adolescent new acceptors among total new acceptors of spacing modern contraceptives by development regions from FY 2068/69 to 2071/72. The proportion of adolescent new acceptors of short term spacing methods (Depo) is in increasing trend with the highest proportion of adolescent new acceptors in mid-western development region and the lowest in far western development region. Although the proportion of adolescent new acceptors of IUCD slightly increased/stabilized in current fiscal year in FWDR and MWDR, the proportion has decreased compared to fiscal year 2068/69 and 2069/70, however, its trend is increasing in other development regions. While less numbers of adolescent new acceptors are using implant, overall its trend is increasing in other regions except MWDR.

**Table 6.3.2: Proportion of Adolescents Antenatal check-up among total Antenatal check-up visits by Regions**

Indicator	Fiscal Year	National	Regions				
			EDR	CDR	WDR	MWDR	FWDR
First ANC Visit (any time)	2071/72	20.7	19.6	19.5	18.1	28.7	20.5
First ANC visit as per protocol		19.0	18.3	16.3	17.2	29.0	19.7
Four ANC visits as per protocol		16.7	14.6	17.6	13.3	24.9	15.4

Source: HMIS

Table 6.3.2 depicts the proportion of adolescent Antenatal check-up visits among total Antenatal check-up visits by development regions of in the reporting year 2071/72 present that, the proportion of ANC check-up visits both any time and as per protocol is consistently higher than national average in MWDR. It indicates that child marriage prevention activities and program need to target in MWDR and side by side adolescent friendly health services and or any innovative intervention for better outcome of both adolescent mother and baby should be targeted in this region compared to other regions as the literatures suggest that adolescent pregnancy is risky. It is a concern that the proportion of adolescents among total four ANC visits is less than the proportion of them among the first visit. Less adolescents among first visit according to protocol compared to first visit at any time could be due to poor information among this group, indicating the need to emphasis information on early ANC visit among adolescents.

**Table 6.3.3: Proportion of Adolescents Safe Abortion Service use among total Safe Abortion Service users by Regions**

Indicators	Fiscal Year	National	Regions				
			EDR	CDR	WDR	MWDR	FWDR
Medical Safe Abortion Service (No of women)	2071/72	13.9 (5541)	11.4 (1009)	18.2 (2301)	11.5 (1163)	16.4 (635)	10 (433)
Surgical Safe Abortion Service (No of women)	2071/72	16.7 (6489)	13.2 (839)	18.2 (2524)	13.5 (1454)	36.5 (1372)	7.4 (300)
Total Safe Abortion Service (No of women)	2071/72	15.3 (12030)	12.1 (1848)	18.2 (4825)	12.6 (2617)	26.4 (2007)	8.7 (733)

Source: HMIS

Table 6.3.3 presents proportion of adolescents Safe Abortion Service users (number) among total Safe Abortion Service users by regions and it is highest in MWDR. As shown in the table, the proportion of adolescents using medical safe abortion service is the highest in CDR followed by MWDR and surgical safe abortion service among adolescents is highest in MWDR followed by CDR and lowest in FWDR.

### 3.6.4 Implementation Status of ASRH/AFS Program

**Table 3.6.2: Implementation Status of ASRH Program**

<b>2065/66 (piloting)</b>	Bardia, Surkhet, Dailekh, Jumla, Baitadi (5 piloting)
<b>2066/67</b>	Bara, Dhading, Morang, Gulmi, Parbat (5)
<b>2067/68</b>	Jhapa, Dolakha, Kavrepalanchowk, Kaski, Nawalparasi (5)

2	UNFPA			39	Dadeldhura-13, Dang-13 and Udaypur-13
3	UNICEF			38	Baitadi-10, Bajhang-10, Parsa-10 and Mahottari-8
4	Save the Children			30	Saptari
	<b>Total</b>	<b>0</b>	<b>0</b>	<b>120</b>	<b>9</b>

### 3.6.4 Issues

Some of the specific issue/problems identified during implementation of program noted in recent regional review meetings and national review meeting are summarized in Table 3.6.4.

**Table 3.6.4: Issues and recommendations**

<b>Issues</b>	<b>Recommendations</b>	<b>Responsibility</b>
Quality assurance of ASRH Program	Certify AFS health facilities using certification criteria and tools, ensure the availability of essential commodities, equipment and environment	FHD
Inadequate trained human resource on ASRH in HFs	Develop capacity of service providers from each health facility	NHTC
Inadequate monitoring	Increase number of monitoring visits to AFS sites from different levels	FHD, MD and DHOs
Low resource allocation for program at center and local level	Allocate sufficient resources for this program at center, district and local levels	FHD/DHO
Inadequate linkage with other programs (FP, SM, HIV etc.)	Advocate for functional integration of ASRH issues and services in other thematic areas	FHD
Inadequate IEC/BCC materials	Ensure supply of ASRH related IEC/BCC materials up to HF level	FHD, NHEICC, DHO&Partners

# DISEASE CONTROL

## 4.1 MALARIA

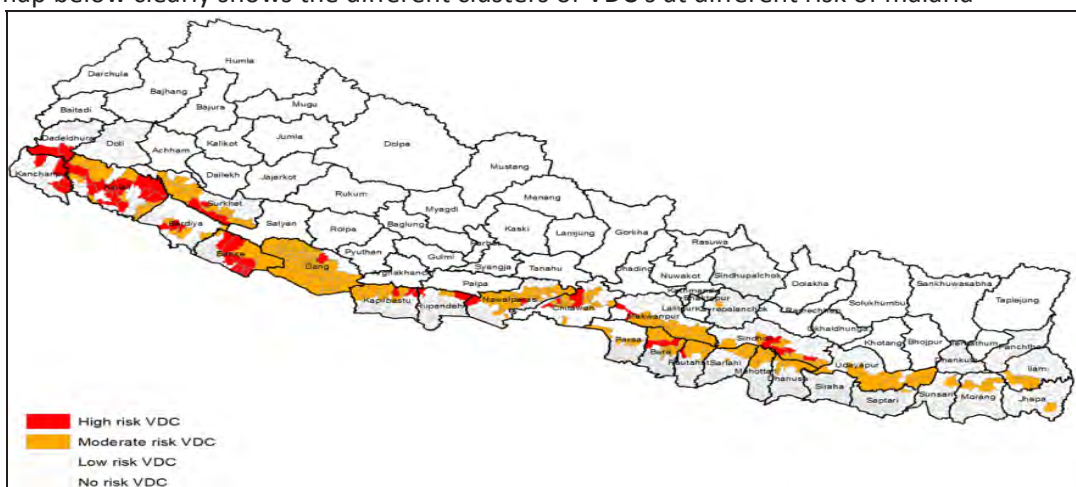

### 4.1.1 Background

Malaria control project in Nepal was first initiated in 1954 with the support from USAID (the then USOM), with the objective of controlling malaria, mainly in plain region (Terai belt) of central Nepal. In 1958, national malaria eradication program was launched with the objective of eradicating malaria from the country. Due to various reasons the eradication concept reverted to control program in 1978. Following the call of WHO to revamp the malaria control programs in 1998, Roll Back Malaria (RBM) initiative was launched to control malaria transmission in hard-core forests, foot-hills, inner-Terai and hill river valleys, which accounted for more than 70 % of the total malaria cases in the country. The high risk of acquiring the disease is attributed to the abundance of vector mosquitoes, mobile and vulnerable population, relative inaccessibility of the area, suitable temperature, environmental and socio-economic factors. The recent micro-stratification, based on number of malaria cases, geo-ecology, vector breeding and vulnerability due to migration and population movements, further narrowed down the essentials to VDC level risks as compared to earlier district as units of risks. It has clearly shown that only 54 VDC's are at high risk, 201 VDC's at moderate risk and 999 VDC's at low risk.

Based on the micro-stratification report 2013, approximately 13.02 million population (47.9%) live in malaria endemic areas (VDCs); out of which ~1 million (3.62%) live in high risk VDCs, 2.66 million (9.8%) live in moderate risk VDCs, and 9.38 million (34.52%) live in low risk VDCs. A total population of 14.13 (52.1%) is estimated to live in VDCs where there is no malaria transmission. The high risk areas consist of foothills with river belts, forest fringe areas in terai, hill river valleys, inner terai areas. Low risk VDCs lie in plain cultivated outer Terai, mountain, and valleys in the mountains.

#### Map 4 4.1.1: Malaria micro-stratification

The map below clearly shows the different clusters of VDC's at different risk of malaria

The Global Fund has been continuously supporting malaria control program in the risk areas since 2004.

Nepal's current National Malaria Strategic Plan (NMSP-2014-2025) has identified following vision, mission, goals and objectives:

### **Vision**

Malaria-free Nepal in 2025

### **Mission**

To empower the health staff and the communities at risk of malaria to contribute towards the vision of malaria-free Nepal in 2026.

### **Goals:**

- To sustain zero death due to malaria from 2012 onwards;
- To reduce the incidence of indigenous malaria cases by 90% by 2018 (relative to 2012);
- To reduce no. of VDCs having indigenous malaria cases by 70% by 2018 (relative to 2012);
- To receive WHO certification of malaria free status by 2025.

**Objective-1: To enhance strategic information for decision making towards malaria elimination.**

### **Key targets / milestones:**

- Ward-wise risk stratified and appropriate/rational interventions executed
  - By the end of 2015, ward-wise malaria risk micro-stratification will be, so the intervention units could be wards in place of current VDC's and earlier districts.
- Development and roll over of SMS and web based recording and reporting system for strengthening malaria surveillance, including suspected and confirmed cases reporting.
  - Introduction of Case based surveillance in all districts by the end of 2014.
  - All malaria cases will be recorded and reported through SMS and Web-based MDIS, by the end of 2015.
  - Establishment and expansion of Border check posts: 2 in 2014, 2 in 2015 and 3 in 2016 and continued thereafter.
- Quarterly review of the recorded data and plan interventions accordingly
  - Three quarterly reviews will be conducted and validation of data completed by the end of each year.
- Foci investigation rolled out by the end of 2014
  - At least 54 foci will be investigated in 2014, 160 in 2015 and 100 each year after.
  - Investigated foci will be eliminated gradually and by the end of 2016 a total of 214 foci will be eliminated, sustained thereafter and gradually increased as per above target.
- Number of operational research will be carried out generating evidence for policy making.

**Objective-2: To further reduce malaria transmission and eliminate the foci.**

### **Key targets / milestones:**

- Guideline for IVM developed and rolled over by the end of 2014 for implementation.
- Prevention using LLIN: Coverage of high risk VDC population through mass campaign and pregnant women in high and moderate risk VDCs through ANC visits.
  - 471,747 LLINs in 2014; 149,969 LLINs in 2015; 252,440 LLINs in 2016; 491,112 LLINs in 2017 and 155,851 LLINs in 2018.

- Prevention using IRS: Regular annual spray covering people living in high risk every year and responsive spraying as indicated by foci investigation.
  - 88,444 households in 2014; 60,000 households in 2015 and 30,000 households in 2016.
- Foci elimination and documentation of lessons learnt for prospective activities.
  - 54 in 2014; 160 in 2015 and 100 every year thereafter.

**Objective-3: To improve quality of and access to early diagnosis and effective treatment of malaria.**

***Key targets / milestones:***

- Update the malaria diagnosis and treatment policy, manual and roll over its application by the end of 2014
- Development of training package on malaria case management: development and roll out by 2015
- Training on case management of malaria by 2015
  - FCHVs in remote VDCs to detect malaria using RDTs,
  - Training on malaria case management for public & private sector health care providers
- Expand and improve quality of malaria microscopy service-continued annually
  - Finalize and roll over of the SOP on malaria microscopy
  - Establish slide banks for training and reference in malaria microscopy
  - Conduct internal competency assessment of malaria lab technicians and assistant
  - Conduct external competency assessment lab technicians and assistants
  - Conduct instructional skills development training for trainers in malaria microscopy
  - Basic and refresher training in microscopy
  - training in malaria microscopy
  - Training on preventive maintenance of microscopes
  - Supportive supervision and monitoring of malaria microscopists
  - Cross-checking / validation of blood smears
- Expand the use of RDTs and set up QA QC of combo RDTs- by the end of 2015
- Procurement and supply of antimalarial drugs and diagnostics to avoid stock out
  - Regular monthly recording and reporting through FMIS/MDIS.
  - Annual health facility survey conducted to document no stock out of logistics.

**Objective-4: To sustain support from the political leadership and the communities towards malaria elimination.**

***Key targets / milestones:***

- Develop and roll out of comprehensive BCC strategy by the end of 2015
  - Develop communication package to mobilize communities for malaria prevention
- Develop specific materials (print, audio and video) to improve the following behaviors: sleep under nets every night; seek early diagnosis and treatment for malaria, and adhere to treatment on malaria.
- Organize Multi-sector advocacy meetings at national / district levels to support malaria elimination
  - Commemorate World Malaria Day: April 25.
  - Cross-border collaboration meetings annually for sharing the information and harmonizing interventions.

**Objective-5: To strengthen programmatic technical and managerial capacities towards malaria elimination**

**Key targets / milestones:**

- Training key program staffs in malariology, case management, entomology, health informatics, GIS mapping, malaria microscopy etc.- annual targets in annex- budget sheet
- Convene Malaria Technical Working Group;
  - at least 3/yr
- Periodically update the national malaria strategic plan-
  - by the end of 2018, review and revise as necessary
- Supervision, monitoring and evaluation-
  - Annually as per M & E Plan.
- Strengthen VBDRTC capacity in malaria training and research
  - Equipment provided and staffs deployed as necessary
- Recruit and fill vacant positions at EDCD, VBDRTC, Regions and Districts
  - By the end of 2014, vacant positions will be filled and sustained there after
- Strengthen partnership with WHO and other national/international institutions
  - Collaborative meetings, activities implemented

**Major activities conducted during FY 2071/72**

In addition to the regular annual malaria program activities and interventions, the below mentioned activities have been carried out as major activities:

- Introduction of the case based surveillance system, including web-based recording and reporting system for the districts.
- Orientation of the health workers from districts and peripheral level on case based surveillance and response.
- Revitalization of the malaria microscopy quality assurance system as a collaborative activity of EDCD and VBDRTC, with WHO TA.
- Orientation of health workers and FCHVs at district level on malaria elimination initiative of the Govt. of Nepal and their role in detecting every cases and facilitation for early treatment.
- Quarterly and annual review meeting participated by district and central level staffs who reviewed the data fed by the peripheral level and revised based on suggestions.
- Operational research on malaria vector behaviors and insecticide resistance status.
- Regular intervention (Indoor Residual Spraying) program conducted biannually at malaria high and moderated risk districts.
- Regular case base surveillance conducted based on malaria positive case record.
- Integrated entomological surveillance in Kathmandu valley and other districts after earthquake.
- Bioassay test on LLIN in Malaria high risk district Kailali. Study was conducted in moderate risk area of Attariya municipality ward no 4 situated in forest fringe. Study findings shows that net distributions in year 2013 have been used for more than 2 years and have no functional residual effect to kill mosquito. After five washes mortality reached to the level of 56% in case of *Anopheles fluviatilis* and 16% with suspected vector *Anopheles culicifacies*.

- Distribution of LLIN in earthquake and flood affected districts in coordination with other stakeholders.
- Commemorate World Malaria Day (25<sup>th</sup> April)

#### 4.1.2 Analysis of Achievement

Nepal has surpassed the Millennium Development Goal #6 by reducing malaria morbidity and mortality rates by more than 50% in 2010 as compared to 2000. Despite the political instability and current restructuring of administrative set up towards increasing federalism, the Nepal has been successfully implementing the interventions to eliminate the remaining active foci (VDCs) where malaria transmission remains. The Ministry of Health and Population, with the support of its partners especially WHO which is coordinating the technical assistance, has implemented a strong malaria control program, steadily improving the coverage and quality of Indoor Residual Spraying (IRS), introducing long lasting insecticide-treated nets (LLIN), and increasing access to rapid malaria diagnosis (RDTs) and powerful artemisinin-based combination treatments (ACTs).

Data generated by public health care facilities and computerized through the Health Management Information System (HMIS), EWARS and from additional studies such as malaria micro-stratification, the overall malaria trends in Nepal for the last 6 years clearly indicate a substantial decline in both clinical and laboratory confirmed *P. falciparum* and *P. vivax* cases. The recently conducted micro-stratification exercise shows that there are less districts classified as high and moderate risk (25 instead of 31) and that the overall population living in at risk Village Development Committees (estimated at 1,254 VDCs out of 3,972) is declining. This gives hope that an increasing number of foci (VDCs) will become free of malaria in the coming years with continued shrinking of malaria map.

**Table 1: Malaria Epidemiological Information, FY 2069/70 – 2071/72**

S.N.	Items /indicators	2069/70	2070/71	2071/72
1	Total population in '000	26,852	13025	13455
2	Total slide collection	152,538	113382	101377
3	Total positive cases	2092	1674	1352
4	Total indigenous cases	1,106	865	683
5	Total imported cases	986	585	669
6	Total <i>P. falciparum</i> cases *	428	224	274
7	% of Pf of the total cases *	20.45	13.38	20.26
8	Total indigenous <i>Pf</i> cases *	184	82	101
9	% indigenous <i>Pf</i> cases *	43	36.60	36.86
10	Total imported <i>Pf</i> cases *	244	142	173
11	% imported <i>Pf</i> cases	57	63.40	63.13
12	Total <i>P. vivax</i> cases	1,664	1325	1078
13	Total indigenous <i>Pv</i> cases	872	821	570
14	% indigenous <i>Pv</i> cases	52.40	62	42
15	Total imported <i>Pv</i> cases	792	504	508
16	% imported <i>Pv</i> cases	47.60	38.03	37.57
17	Annual Blood Examination Rate	0.57	0.94	0.75
18	Annual parasite incidence	0.15	0.12	0.10
19	Annual <i>falciparum</i> incidence	0.01	0.017	0.020

Disease Control: Malaria

S.N.	Items /indicators	2069/70	2070/71	2071/72
20	Slide positivity rate	1.37	1.36	0.33
21	Slide <i>Pf</i> positivity rate *	0.27	0.18	0.27
22	Clinically suspected malaria cases (not tested but treated by CQ)	49,550	26,526	20,861

Source: EDCD, DoHS

Confirmed cases dropped from 2092 in FY 2069/70 to 1352 in 2071/72. The proportion of *P. falciparum* infections has slightly increased and reached 20.26 %in current FY as compared to the previous year. In FY 2071/72 *pf* cases are high which may be due to high number of imported *P. falciparum* cases (out of 274 *pf* cases173 cases are imported). No Malaria deaths have been recorded after 2012 till date.

During 2004-2007, the Malaria Parasite Incidence (API) has remained stable (0.26-0.27 per 1000 population countrywide), and thereafter has been gradually declining from 2008 onwards to be at the lowest level ever recorded in FY 2071/72 0.10 /1000 risk population(calculated based on the denominator set after Micro-stratification 2013)

The trend of clinically suspected malaria case is also decreasing year by year, mainly due to increased coverage of RDT and microscopic laboratory service at peripheral level, A total of 20861 clinical suspected malaria cases treated by chloroquine were reported in FY 2071/72;

The above table clearly showed that there is decreasing trend of confirmed case, case severity with sustaining zero death. There is sharp decrease in no of indigenous *PF* with slowly decreasing trend of indigenous *Plasmodium vivax* cases indicating that *P vivax* malaria may still remain a challenge for elimination of malaria in Nepal demanding new effective strategies for elimination.

Above trend of the national malariometric indicators listed above shows that Nepal has entered in pre-elimination phase. But district level indicator varies from one district to another district including number of case, API and SPR. Highest number of confirmed case reported from Kailali district (268), followed by Rupandehi (107), and Kapilvastu (100), Kanchanpur(85) and Mahottari (80). Zero indigenous cases reported from Kavre and Sindhupalchok district for last 3 years. The above findings are rather positive and indicative of substantial progress in Nepal towards pre-elimination targets bearing in mind that data are generated by public health care facilities only and are still requiring continuous attention for improvement.

Many factors might have contributed to the recorded significant decline of clinical and confirmed malaria cases and decline of endemic districts (and most probably number of active foci). Among them we might assume that the following elements have played a major role:

- Overall improvement of social determinants of health (for example less than 20% of Nepalese people are below poverty line threshold in 2010 against more than 40% in 2000),
- Scaling up access to simple diagnostic tools like (combo) RDTs,
- Availability of powerful antimalarial medicine, ACTs in all public health care facilities,
- Distribution of more than 4 million LLINs leading to an exceptionally high coverage of LLINs (in addition to high usage of traditional nets) in targeted endemic areas.

To that extent, the significant financial support from the GFATM from 2004 continued till date has to be acknowledged to have played a significant role by allowing the program and partners to scale up essential cost-effective interventions and malaria control tools to the most peripheral level.

Data reported by the districts via HMIS and report received by the programme may vary due to various reasons, which includes but not limited to validation of the HMIS data by the program through DPHO data and line listing verification, addition/verification of programmatic data received through EWARS and MDIS. However efforts have been made to eliminate the data difference by verifying the data at district level.

Based on the assessment of current epidemiological data, there are still crucial concerns to be addressed by the program in order to improve the reliability and precision of the data. In particular, there is a need to increase the capacity of EDCD and district teams to analyse data generated by public health facilities and progressively include and analyse data generated by all private health institutions including NGOs (e.g. in charge of community activities, refugees and migrants).

### 4.1.3 Issues and Recommendations

**Table 4.1.2: Recommendations Made During Regional and National Reviews in 2070/71 and Actions Taken in 2071/72**

<b>Problems/Constraints</b>	<b>Action to be taken</b>	<b>Action taken</b>
<ul style="list-style-type: none"> <li>Confirmation of suspected / probable malaria cases</li> </ul>	<ul style="list-style-type: none"> <li>Microscopy trainings,</li> <li>RDT availability</li> <li>Validation of probable malaria cases</li> </ul>	<ul style="list-style-type: none"> <li>Increased number of Malaria microscopy trainings at VBDRTC.</li> <li>Validation of HMIS data by EDCD in coordination with DPHOs</li> </ul>

## 4.2 KALA-AZAR

### 4.2.1 Background

The government of Nepal has committed to the regional strategy to eliminate Kala-azar and with India and Bangladesh is signatory of the memorandum of understanding that was formalized during the World Health Assembly held in May 2005 on Kala-azar elimination, with the target of achieving the disease elimination by 2015.

In 2005, Epidemiology and Disease Control Division (EDCD) of Department of Health Services formulated a National Plan for the Elimination of Kala-azar which is divided into three phases: Preparatory Phase: 2005-2008; Attack Phase: 2008-2015 and Consolidation Phase: 2015 onwards. The overall goal of the plan is “To contribute to improving the health status of vulnerable groups and at risk populations living in Kala-azar endemic areas of Nepal through the elimination of Kala-azar so that it is no longer a public health problem”. The target is: “To reduce the annual incidence of Kala-azar to less than 1 per 10,000 populations at the district level by 2015”. Expected outputs of the Plan are six related to the different components of the system that has to be strengthened in order to achieve the elimination goal. One of the outputs is to develop a functional network that provides diagnosis and case management with special outreach to the poorest.

The national plan was revised in 2010 as National Strategic Guideline on Kala-Azar Elimination in Nepal that recommended rK39 as a rapid diagnostic test kit and Miltefosine as the first line of treatment in Kala-azar except in some situations. Kala-azar is a vector-borne disease caused by parasite *Leishmania donovani*, transmitted by the sand fly, *Phlebotomus argentipes*. The disease is characterized by fever for more than two weeks with *splenomegaly*, anaemia, and progressive weight loss and sometimes darkening of the skin. In the endemic areas, children and young adults are its principal victims. The disease is fatal if it is not treated timely. Kala-azar and HIV/TB co-infections have emerged as a health problem in recent years.

Over the last decade, there have been some significant advances both in the diagnosis and treatment of Kala-azar. The rK39 dipstick test kit, a rapid and easily applicable serological test has been widely used in the Indian subcontinent including Nepal. The national programme to eliminate KA in Nepal has made this test kit available up to PHCC level of programme districts. The recently revised national guideline has recommended introducing Liposomal Amphotericin B and combination regimen for KA and PKDL treatment in Nepal and Miltefosine, the only available oral drug and current treatment of choice in the country, will be gradually phased out.

#### Goal

Reduce incidence of Kala-azar to less than 1 case per 10,000 populations at district level by 2015.

#### Objectives

- Reducing the incidence of Kala-azar in the endemic communities including the poor, vulnerable and unreached population;
- Reducing case fatality rates from Kala-azar;
- Treatment of PKDL to reduce the parasite reservoir; and
- Prevention and treatment of Kala-azar and HIV–TB co-infections.

### Strategies

Based on the regional strategy proposed by South East Asia Kala-azar technical advisory group and the adjustments proposed by the Nepal expert group discussions, Government of Nepal, Ministry of Health has adopted the following strategies in the implementation of the Kala-azar elimination program in Nepal.

- Improve Program Management
- Early Diagnosis and Complete Treatment
- Integrated Vector Management
- Effective Disease and Vector Surveillance
- Social Mobilization and Partnerships and
- Clinical, Implementation and Operational Research

#### 4.2.2 Major Activities

##### Case Detection and Treatment

Early case detection and complete and timely treatment is the mainstay of Kala-azar elimination. Kala-azar related diagnostic and treatment services are provided at primary health care centre and above level where as awareness, health education, follow up for treatment compliance, identification and referral of suspected cases are also offered at health post/sub health post level.

During this fiscal year, active case detection activity was carried out in 5 most endemic VDCs each of Morang, Saptari and Sarlahi districts. The case detection activities were done through camp approach. The VDCs were selected based on the number of new KA cases reported in the previous/running fiscal year. Meetings were organized at district level involving DPHOs/DHOs, program focal persons; medical officers, lab persons and health workers followed by orientation to FCHVs and health workers at local level. Community based house to house search was carried out by the FCHVs for suspected kala-azar (KA) and Post Kala-azar Dermal Leishmaniasis (PKDL) cases. Suspected cases of KA and PKDL were then screened clinically and by rapid diagnostic kits (rK39) at health facility by medical doctors, laboratory person and other health workers. rK39 positive cases were referred to district/zonal hospital for further confirmation and management. Suspected PKDL cases were also screened for leprosy by trained health workers.

##### Indoor Residual Spraying in Priority-selected Kala-azar Affected Areas

Two rounds of selective Indoor Residual Spraying (IRS) was carried out in prioritised Kala-azar affected areas of 12 kala-azar endemic districts based on the national guideline on IRS. IRS for the prevention and control is carried out only in those villages where Kala-azar cases were recorded in previous year or in areas with an outbreak in the recent past. Collateral benefit for the Kala-azar elimination program has been gained from the IRS used for the prevention and epidemic response for malaria in Kala-azar endemic and Kala-azar non endemic districts too.

##### Continuation of Treatment through Miltefosine and Amphotericin B

As in the previous fiscal year, Miltefosine (oral drug) as first line drug and Amphotericin B as second line drug have been continually utilised for the treatment of Kala-azar in endemic districts, Sukra Raj Tropical Hospital and other hospitals according to national guideline in this fiscal year.

**Training on revised national Guideline and treatment Protocol**

Training for Medical officers, nursing staffs, Laboratory staffs and other paramedics was conducted. Training was focused on revised national Kala-azar guidelines and treatment protocol.

**Kala-azar Review Meeting**

Review meeting with District health office, District Hospitals and focal persons of all endemic and non-endemic (districts with Kala-azar cases) districts was conducted. The meeting was focused on data verification, line listing update and revised kala-azar treatment protocol.

**Fig 4.2.1 Trend of Kala-azar cases (Source: EDCD) FY 2064/65 to 2071/72**

Districts	2064/65	2065/66	2066/67	2067/68	2068 /69	2069/70	2070/71	2071/72
Jhapa	36	76	21	22	21	10	12	6
Morang	55	60	107	175	111	55	84	48
Sunsari	46	54	34	30	32	13	14	18
Saptari	197	135	113	66	57	62	44	9
Siraha	109	47	61	11	11	3	42	17
Udayapur	35	13	5	69	25	37	1	2
Dhanusha	112	58	30	42	102	48	29	16
Mahottari	162	162	160	145	96	12	26	18
Sarlahi	449	223	61	107	73	55	38	13
Rautahat	26	31	38	8	6	4	4	0
Bara	34	18	7	9	5	6	1	1
Parsa	1	0	1	1	0	0	0	0
Total cases	1262	877	638	685	537	305	295	148
Other districts	10	12	24	22	20	46	44	72

The trend of **Kala-azar** cases has been decreasing significantly for the last several years. Three hundred and sixty seven cases of **Kala-azar** were reported in the FY 2070/71, and out of these 339 (80%) cases were native case of 12 program district and the rest were foreign reported from different districts. In FY 2071/72, a total of 220 cases were reported, of which all the cases were native cases(no foreign cases). Among 220 native cases, 148 cases reported from 12 programme districts and remaining 72 were reported from other non-program districts. The highest number of case was reported from Morang (48), followed by Sunsari (18) Mahottari (18), Siraha (17), and Dhanusha(16). These five districts together reported about (n=117) 53% of total cases. Thirty one non-programme districts, mostly hilly, from all regions reported 72 cases in this FY. Non programme district reporting **Kala-azar** cases are Surkhet, Doti, , Bajhura, Bardiya, Dailekha, Arghakhanchi, Dang, Pyuthan, Palpa Okhaldhunga a Kailali, Kanchanpur, Bhojpur, Sankhuwasabha, Panchthar, Darchula, Salyan, Rukum, Banke, Dhankutta, Palpa, Kapilvastu, Syangja, kaski, Nuwalot, Gulmi, Rolpa, Darchula, Jajrkot, Ramechhap, Makwanpur. Six of these non-programme districts are reporting **Kala-azar** cases consecutively for last four years (Surkhet, Okhaldhunga, Bhojpur Makwanpur, Kailali and Kanchanpur). This epidemiological shifting urges the programme to conduct vector survey to establish presence of vector and indigenous transmission of the disease. In 2070/71 epidemiological as well as entomological and molecular study was conducted in this fiscal year in Okhaldhunga and Bhojpur districts to validate the reported cases and to rule out indigenous transmission. Similarly EDCD has extended program to these district from FY 2071/72.

**Table 4.2.2: Kala-azar cases and incidence: FY 2069/70 to 2071/72**

Districts	Total Cases (including Foreign)			Foreign			Native			Incidence/10,000		
	2069/70	2070/71	2071/72	2069/70	2070/71	2071/72	2069/70	2070/71	2071/72	2069/70	2070/71	2071/72
Jhapa	11	12	6	1	0	0	10	12	6	0.12	0.14	0.07

### Kala-azar Incidence

Incidence of kala-azar at national as well as district level is less than 1/10000 population. At district level incidence per 10,000 in areas at risk populations ranged from 0.47 in Morang to 0.01 in Bara reflecting the incidence of 0.25 per 10,000 in 12 programme districts (excluding foreign cases).

Out of the 12 endemic districts, only 10 districts have reported Kala-azar cases during this FY and all the reporting districts have an incidence of less than 1 per 10,000 populations. Table 4.2.2 shows the district wise incidence in programme districts for FY 2071/72. However, EDCCD started to line list the all Kala-azar cases from 2012.

Kala-azar cases reported by the district via HMIS and case report received by the programme may vary due to various reasons. Generally the HMIS received raw data from district and programme proactively collect data from hospital and other health facility and DPHO through EWARS and DPHO. EDCCD verified data with the help of line listing report of each and every case. EDCCD also received case report of active case detection done by centre and district with line listing of case.

#### 4.2.4 Issues and Recommendations

## 4.3 LYMPHATIC FILARIASIS

### 4.3.1 Background

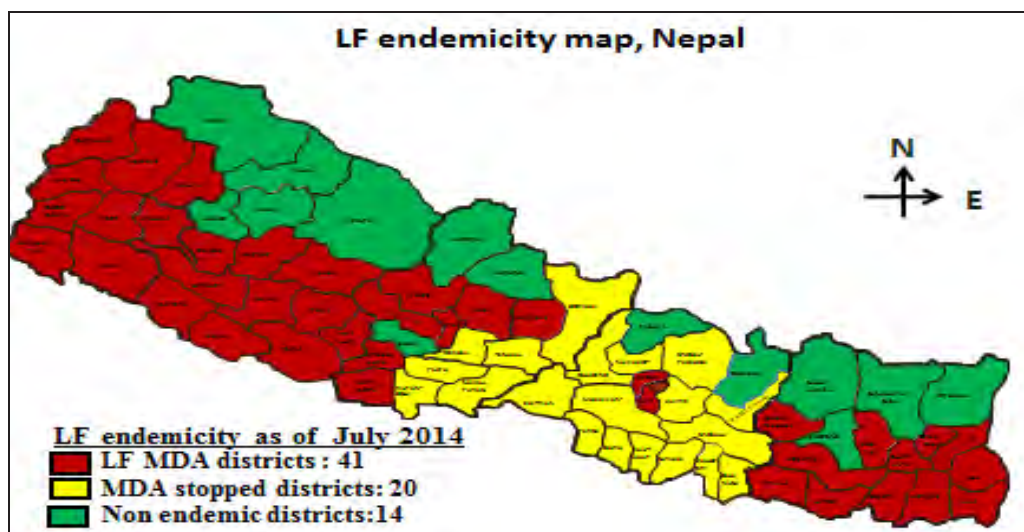

Lymphatic Filariasis (LF) is a public health problem in Nepal. Nepal conducted LF mapping in 2001 and 2005 and remapping in 2012 by using ICT (Immunochromatography Test card) which revealed 13% average prevalence of LF infection in the country, ranging from <1% to 39%. Based on the ICT survey, morbidity reporting and geo-ecological comparability sixty one districts of the country were mapped as endemic for LF. The disease has been detected in different topographical areas ranging in altitude from 300 feet above sea level in the plain terai ecological zone to 5,800 feet above sea level in high hill areas. Comparatively, more LF cases are seen in the terai than in the hills, but valleys and river basin areas of hilly districts have also high disease burden. The disease is more prevalent in the rural areas of the country, predominantly affecting the poorer sector of the community. *Wuchereria bancrofti* is the only recorded parasite in Nepal and the mosquito, *Culex quinquefasciatus*, an efficient vector of the disease has been recorded in all the endemic areas of the country.

### Progress towards elimination

Epidemiology and Disease Control Division under the Department of Health Services has formulated a National Plan of Action (2003-2020 AD) for the Elimination of Lymphatic Filariasis in Nepal by establishing a National Task Force under the Chairmanship of Director-General, Department of Health Services.

The division initiated the implementation of Mass Drug Administration (MDA) in Parsa district in 2003 which was gradually scaled up to all endemic districts achieving 100% geographical coverage by FY 2069/70 (2013). The target of scaling up MDA to all endemic districts was achieved in 2013. By this fiscal year, MDA has been stopped (phased out) in 20 districts, post MDA surveillance has been initiated in at least five districts and morbidity management has been initiated in selected districts and high endemic areas. All endemic districts will complete the recommended six rounds of MDA by 2018. The LF elimination programme has also indirectly contributed to strengthening of health system through trainings and capacity building activities. Between these periods of twelve years, various surveys have been carried out including mapping, base line surveys, follow up surveys, post MDA coverage survey and transmission assessment surveys (TAS). TAS done in 21 districts has revealed that the prevalence of LF infection has significantly reduced and contributed in preventing disabilities and sufferings due to LF. Over the period of last 12 years, more than 90 million doses has been administrated to at risk population.

**Map 4.3.1: Lymphatic Filariasis Endemicity– Nepal**

## Programme Goal

- People of Nepal no longer suffer from LF

## Objectives

- To eliminate LF as a public health problem by 2020
- To interrupt the transmission of lymphatic filariasis;
- To reduce and prevent morbidity;
- To provide de-worming benefit through use of Albendazole to endemic community especially to the children; and
- To reduce mosquito vectors through application of suitable and available vector control measures (Integrated Vector Management).

## Strategies

- Interruption of transmission by yearly Mass Drug Administration using two drug regimens (Diethylcarbamazine Citrate and Albendazole) for six years.
- Morbidity management by self-care and with supports using intensive but simple, effective and local hygienic techniques.

## Target

- To scale up MDA to all LF endemic districts by 2014
- Achieve <1% prevalence (microfilaraemia rate) in all endemic districts after 6 years of MDA by 2018

## Major activities and analysis, FY 2071/72

### Mass drug administration (MDA) campaign

During this fiscal year MDA was continued in 41 districts. Four cohorts of 10 districts each completed 6, 5, 4 and 3 MDA rounds respectively in this fiscal year. Kapilvastu district underwent eighth round of MDA this year. In this fiscal year, 15,981,384 people living in 41 districts were targeted for MDA, of which 11,117,624 (69.6%) were treated. As compared to previous year, this year's MDA achievement is higher. The campaign was conducted in two phases: 38 districts in first phase in Falgun 23-25, 2071 (07-09 March 2015) and second phase in 3 districts in Falgun 30, Chaitra 01 and 02, 2071 (14 -16 March 2015). The campaign mobilized 12,832 health workers and 81,204 trained volunteers to reach the target populations and monitoring of campaign activities.

Adverse events and morbidity reporting: over eighteen thousand one hundred and forty six cases of adverse events, mostly mild like headache, dizziness, stomach ache etc, were reported after the MDA. Health workers and volunteers mobilized during this year's campaign reported nearly 15 thousand cases of morbidity due to or suspected of LF. More than 30 thousand cases of lymphedema of lower and upper limbs, breast swelling and hydrocele have been reported from all endemic districts during previous MDA campaigns.

---

**MDA related major activities carried out at different level, FY 2071/72**

- **Activities at National level:**
  - National Task Force Committee meeting,
  - MDA launching in Pokhara, Kaski district,
  - Interactions with media, professionals, organizations, civil society, etc,
  - Monitoring and supervision,
  - Logistics procurement and supply, and
  - Advocacy, IEC/BCC activities.
  
- **Activities at Regional level:**
  - Regional level planning meetings at three places (Biratnagar, Pokhara and Nepalgunj),
  - Regional coordination meetings, and
  - Monitoring and supervision.
  
- **Activities at Implementation unit level:**
  - Planning meetings,
  - Training of health workers,
  - Advocacy/social mobilization/IEC/BCC, and
  - Monitoring and supervision.
  
- **Activities at Community level:**
  - Volunteers orientation,
  - Advocacy/social mobilization/IEC/BCC,
  - Implementation of MDA activities, and
  - Monitoring and supervision.
  
- **Social mobilization activities:**
  - Production of revised IEC material, checklist, reporting, recording, and guidelines for MDA campaign,
  - Media mobilization and advertisement during MDA,
  - Coordination and collaboration with all stakeholders, and
  - School health programme-interactions in schools on LF and MDA.
  
- **Monitoring activities:**
  - Post MDA coverage survey in 22 districts,
  - Monitoring and management of Post MDA complications/adverse events.
  - Follow up survey in 10 districts.
  
- **Other activities**
  - Morbidity management- hydrocele surgery camps in various districts (done by RHDs), self care training and material distribution to lymphedema (elephantiasis) cases of Salyantar and Khalte VDC's of Dhading district, Magragadhi VDC of Bardiya district and Maharajgunj VDC of Kapilvastu district.
  - Morbidity orientation to Medical doctors in BPKIHS, Dharan and PAHS, Lalipur.

The table below shows scaling-up and coverage of MDA campaigns.

**Table 4.3.1: Scaling-Up and Coverage of MDA Campaigns**

MDA Year	MDA districts	At risk pop	Treated Population	Epidemiological Coverage %	Remarks
2003	1	505,000	412,923	81.77	
2004	3	1,541,200	1,258,113	81.63	
2005	5	3,008,131	2,509,306	83.42	
2006	3	2,075,812	1,729,259	83.31	
2007	21	10,906,869	8,778,196	80.48	
2009	21	10,907,690	8,690,789	79.68	
2010	30	14,162,850	11,508,311	81.26	MDA stopped in 1 district
2011	36	15,505,463	12,276,826	79.18	MDA stopped in 4 districts
2012	46	20,017,508	13,546,889	67.68	
2013	56	21,852,201	16,116,207	73.75	TAS done in 16 districts
2014	41	15,874,069	10,929,305	68.90	MDA stopped in 15 districts
2015	41	15,981,384	11,117,624	69.60	

Source: EDCCD

### Challenges and way forward

The programme by now has a decade long experience on MDA operations/implementations and has made significant achievement; however, ensuring quality MDAs including adverse event management, sustaining low prevalence in phased out districts, expansion of morbidity management and surveillance, achieving higher coverage in urban areas, and improving social mobilization and coordination are some of the major challenges and areas which need to be addressed to further consolidate the achievements made so far and to achieve the set targets.

MDAs should be continued at least till next 3 years to complete recommended six rounds in all endemic districts, and surveys like transmission assessment surveys, periodic surveys (for surveillance), follow up surveys are required to be carried out as planned to monitor the progress towards elimination. Capacity building activities should be done to further strengthen the health system and service providers to address the needs of morbidity management and surveillance. The programme has felt the needs of some operational research/studies and programme review. All documents related to the programme should be consolidated as dossier which is required for verification of elimination.

## 4.4 DENGUE

### 4.4.1 Background

Dengue, a mosquito-borne disease emerged in Nepal in the form of Dengue Fever (DF), Dengue Hemorrhagic Fever (DHF) and Dengue Shock Syndrome (DSS). The earliest cases were detected as early as 2005. The sporadic cases continued and outbreaks occurred in 2006 and 2010. Initially most of the reported cases had travel history to neighbouring country (India), however lately indigenous cases were also reported.

The affected districts were Chitwan, Kanchanpur, Kailali, Banke, Bardiya, Dang, Kapilvastu, Parsa, Rupandehi, Rautahat, Sarlahi, Saptari and Jhapa, indicating spread throughout the country from west to east lying in the plain Terai region. During 2011, 79 confirmed cases were reported from 15 districts with the highest case incidence in Chitwan (n=55).

*Aedes aegypti* (mosquito-vector) has been identified in 5 peri-urban areas of Terai region (Kailali, Dang, Chitwan, Parsa and Jhapa) during entomological surveillance conducted by EDCD during the year 2006-2010, indicating local transmission of dengue.

Studies carried out in close collaboration of WARUN/AFRIMS in the year 2006 by EDCD/NPHL showed all 4 sub-types (DEN-1, DEN-2, DEN-3 and DEN-4) of Dengue virus circulation in Nepal.

#### Goal

To reduce the morbidity and mortality due to Dengue Fever (DF), Dengue Hemorrhagic Fever (DHF) and Dengue Shock Syndrome (DSS)

#### Objectives

- To develop an Integrated Vector Management (IVM) approach for prevention and control.
- To develop capacity on diagnosis and case management of DF/DHF/DSS
- To intensify health education/IEC activities and
- To strengthen the surveillance system for prediction, early detection, preparedness and early response to outbreak of dengue.

#### Strategies

- Early case detection, diagnosis, management and reporting of the DF, DHF & DSS
- Regular monitoring of DF/DHF/DSS cases and surveillance through the EWARS
- Mosquito vector surveillance in different municipalities.
- Integrated vector control approach: A combination of several approaches directed towards container management and source reduction

### 4.4.2 Major Activities

To achieve the goal of controlling dengue, the following activities were carried out during 2071/72.

- Training on dengue case detection, diagnosis, management and reporting in Hetauda, Chitwan, Parsa and Makawanpur district for physicians, nurses, paramedics and lab persons.
- Orientation to stakeholder to different municipalities of 19 program districts.
- Rapid diagnostic test kit (IgM) supply.
- Dengue case monitoring and vector surveillance.

## Disease Control: Dengue

- Dengue vector larvae (*Aedes aegypti*) search and destroy was done in 19 program districts.
- Health Education Message development and dissemination
- Dengue Vector mapping was done.

### Disease burden in 2014

In 2014, a total of 356 confirmed dengue cases were reported. More than forty percent (n=149) of these cases were reported from Chitwan district alone and followed by Parsa 29 % (n=105) and Makwanpur 7 % (n=28) but no confirmed deaths were reported. Dengue cases have decreased by 50% As compared to the previous year data (642 cases). No outbreak occurred in this period.

### Dengue Positive Cases FY 2070/71 to 2071/72

SN	Districts	Total Positive	
		2070/71	2071/72
1	Jhapa	202	8
2	Makwanpur	8	20
3	Chitwan	371	119
4	Kapilbastu	1	0
5	Rupandehi	11	10
6	KATHmandu	1	1
7	Kailali	5	9
8	Bara	35	0
9	Rauthat	3	0
10	Parsa	99	114
11	Kaski	2	0
12	Nawalparasi	43	3
13	Ilam	1	0
14	Mahottari	1	0
15	Palpa	2	0
16	Kanchanpur	0	15
17	Dadeldhura	0	1
18	Bhaktapur	0	1
19	Doti	0	1
Total		785	302

Source DHO/DPHO/EDCD ,DoHS

During the FY 2071/72 total number of dengue case reported from 12 districts were 302. Among them, 119 cases were reported from Chitawan and 114 from Parsa. Remaining 69 cases were reported from Jhapa, Rupandehi, Kathmandu, Nawalparasi, Kailali, Kanchanpur, Makawanpur, Doti, Dadeldhura and Bhaktapur.

**Table 4.4.1: Recommendations Made During the Regional and National Reviews of 2070/71 and Actions Taken During 2071/72**

<b>Issues</b>	<b>Recommendations</b>	<b>Responses</b>

## 4.5 Zoonoses Control Programme

The Department of Health Services, Epidemiology and Disease Control Division (EDCD) responds timely to reduce human sufferings and deaths due to poisonous snake bites, control and prevent rabies and other zoonoses in coordination and collaboration with public, non-governmental and private partners.

### Goal

- No Nepalese will die of rabies and poisonous snake bites due to unavailability of ARV/ASVS as well as timely health care services;
- To prevent, control and manage outbreaks and epidemics of zoonoses.

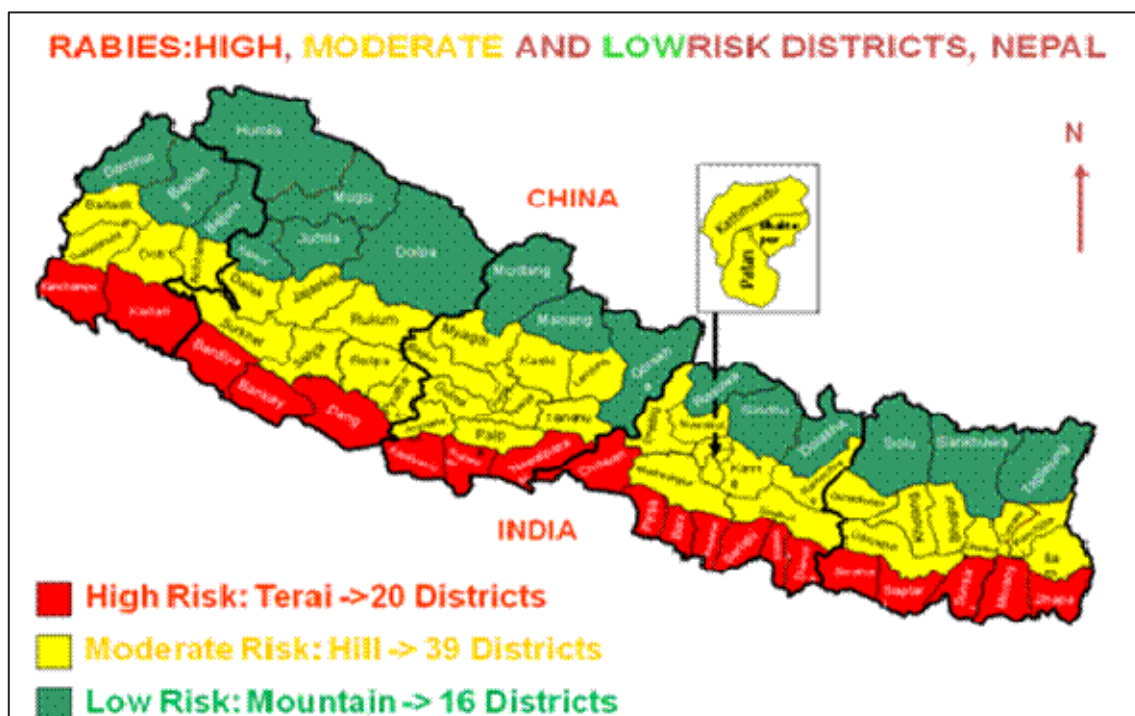

### Objectives

1. To strengthen the response and capacity of health care service providers for prevention and control of zoonoses
2. To improve coordination among/between the key stakeholders at different level for prevention and control of zoonoses
3. To enhance judicious use of tissue culture ARV/ASVS in the Hospitals/PHC/HP
4. To reduce burden of zoonotic diseases (especially rabies and other six priorities zoonoses) through public awareness programs
5. To provide tissue culture ARV as a post exposure treatment to all victims, bitten by suspicious or rabid animals
6. To reduce mortality rate in human by providing ASVS/ARV
7. To train medical officers and paramedics on snake bite management
8. To reduce the number of rabid and other suspicious animals' bite
9. To reduce the death rate due to rabies per annum

#### A. Rabies situation:

- Almost half of the country's population is at high risk and a quarter at moderate risk of Rabies.
- Around 30,000 PET cases occur per annum
- More than 100 Human rabies cases occur per annum
- Latent infection in dogs and cats reported
- Bat rabies also reported
- Arctic Fox Genome type virus isolated
- Surveillance: Passive
- Very few patients take RIG
- Lab. Strengthened for CCO-ARV production

**Risk zones of rabies**

**Activities conducted in the fiscal year 2071/72**

- Procured and supplied around 273,000 of ARV through 5 Regional Medical Stores and hospitals annually for the management of dog bites suspected infection with rabies
- Orientation to medical officers and paramedics on zoonotic diseases of high risk districts
- 350 person including medical/senior were Trained on judicious use of ARV.
- Development and distribution of EIC materials to stakeholders.
- Celebrated world rabies day.
- Development and distribution of animal bite management guideline and treatment protocol for medical professionals of the country.

**Status of Rabies in Nepal**

Fiscal year	No. of cases Animal bites(Dog+ other animal)	No. of cases Other bites	No, of ARV vials consumed	Death
2065/66	26,574	2,571	145,978	97
2066/67	25,662	2,145	168,194	89
2067/68	26,466	2,197	167,663	83
2068/69	31,313	2,211	229,851	76
2069/70	34,933	2,996	219,651	68
2070/71	34,516	2,540	195,868	10
2071/72	20,610	3,290	273,000	13

Source:HMIS/ EDCCD

**B. Snake bite situation**

- 79 species of snakes are found in Nepal

## Disease Control: Zoonoses

- Among them 21 species are poisonous (5 sp. Of Kraits, 3 of Cobras, 1 sp. of Coral, 1 sp. Of Russel's viper and 11 sp. of pit vipers)
- Around 1,5000 snakebite cases occur annually
- Around 10% of these cases are poisonous bites
- Mortality is 10% among poisonous bite
- 26 district of terai including inner terai are highly affected
- Every year 85-120 people die due to poisonous snake bite in Nepal
- ASVS free distribution policy implemented since FY 2056/57
- Indian Quadri-valent ASVS is used

### Activities conducted in FY 2071/72

- 350 person including medical/senior were Trained on judicious use of Anti Snake venom.
- Free distribution of ASVS for the victims of poisonous snake bite.
- Annually around 2,6000 vials of ASVS are supplied for the treatment and management of snakebite in high risk zones of the country, through regional medical stores and hospitals.
- Develop and distribution of IEC materials to stakeholders

### Snake bite cases and deaths

Fiscal year	Total Case	Non-Poisonous	Poisonous	Cure	No. of Death	% of Death
2065/66	13,017	11,883	1,134	1,006	128	11.3
2066/67	17,163	15,844	1,319	1,188	131	9.9
2067/68	18,204	17,121	1,083	965	118	10.9
2068/69	14,768	13,789	979	890	89	9.1
2069/70	14,329	13,462	867	788	79	9.1
2070/71	5,143	4,145	998	988	10	1.0
2071/72	4,128	3461	667	666	1	0.14

Source: HMIS/EDCD

### Problems/Issues

Issues	Recommendations	Action
Under reporting of cases and deaths of dog and snake bite	Regular reporting mechanism should be developed	Increase supervisory visit to reporting sites
Poor compliances of treatment protocol of snake bite and dog bite	Training and orientation for new health care provider should be provided on dog and snake bite. Workshop on sharing experience of case treating physician on compliance of treatment protocol	Allocate budget for training and workshop.

## 4.6 Epidemiology and Disease Outbreak Management

### Objective

To reduce the burden of communicable diseases (morbidity and mortality) through effective preparedness, planning and response to the disease outbreaks by utilizing primary health care services

### Strategies

Effective surveillance, outbreak preparedness and response

### Major Activities

- Rumor verification and situation update
- Outbreak Investigation and response
  - Response at local level:
    - Awareness programs
    - Case management
    - Community mobilization
- Preparedness for outbreak
  - Pre-positioning of emergency health kits and medicines
  - Provision of buffer stock of medicines at center, region, district & community level
  - Coordination meeting with stakeholders

### Major Outbreaks in FY 2071/72

In Nepal, communicable disease outbreaks are common and occur in different districts. There were 19 such outbreaks occurred in this fiscal year.

Disease	No. of Outbreaks	No. Affected Districts	Affected Districts	Total cases	Deaths
Diarrhoea	4	4	Kanchanpur, Sarlahi, Nuwakot, Sindhupalchowk	116	3
Influenza	4	4	Jajrkot, Rukum, Kalikot, Sindhupalchowk	1445	31
Food Poisoning	3	3	Chitwan, Dhading, Mahottari	64	6
Alcohol adulteration	1	1	Siraha	6	5
Mushroom Poisoning	6	5	Dailekh, Morang, Kavre, Dhading, Kailali	19	4
Viral Hepatitis A	1	1	Gorkha	147	1
<b>Total</b>	<b>19</b>	<b>18</b>		<b>1701</b>	<b>50</b>

Source: EWARS, EDCCD

Major outbreaks reported during FY 2071/72 are diarrhea, influenza, food poisoning, alcohol adulteration, mushroom poisoning, and viral hepatitis A. The average case fatality rate is 3%. The number of outbreaks is decreased from 50 outbreaks in FY 2070/71 to 19 outbreaks in this fiscal year 2071/72. Among 19 outbreaks, influenza outbreak in Jajarkot is the largest. In Jajarkot influenza outbreaks 15 VDC are affected with 1135 cases and 14 deaths. Water and food borne disease outbreaks are common in this fiscal year. Alcohol adulteration has very high case fatality rate (i.e. 83%). Similarly mushroom poisoning has claimed 4 lives in this fiscal year.

### Response activities undertaken

- Rumor verification and situation updates
- Pre-positioning of emergency health kits and medicines
- Provision of buffer stock of medicines at center, region, district & community Level
- Coordination meeting with stakeholders
- Response at local level: awareness programs, case management and community mobilization
- Integrated entomological surveillance in Kathmandu valley and Sindupalchok district.

### Problem/Constraints

Issues	Recommendations	Action
Inadequate budget for outbreak response	Non- freezing Emergency fund should be established for outbreak response	Allocate adequate budget
Repeated outbreaks of food and water borne disease	Improve water supplies, hygiene and sanitation	Co-ordination with department of water supply and sanitation for interventions
	Water quality Surveillance should be expanded to all 75 districts	Establishment of water quality surveillance in 75 districts
Inadequate human resource at Epidemiology and Disease Control Division (EDCD)	Organization and Management survey is required to find the gap of human resource at EDCD	Organization and Management survey for human resource gap analysis
	Vacant positions should fulfilled in time	Fulfilling vacant posts
Inadequate Surveillance System Coverage	Early Warning and Reporting System (EWARS) should be expanded to cover all 75 districts	Expansion of EWARS in 75 districts
	District Public/Health Offices should establish district level EWARS	Establishment of district level EWARS
Inadequate outbreak investigation	Proper outbreak investigation should be carried out	Outbreak Investigation

## 4.7 Disaster Management

### Background

Disaster Management Section is another important programme implementation unit of EDCD. This programme is a collaborative unit between MoH/DoHS/EDCD and WHO-EHA, This section has been committed to enhancing health sector emergency preparedness, and disaster response including disaster related outbreak management capabilities in close coordination & collaboration with stakeholders throughout the country.

The overall objective of this section is to enhance the capacities of health sector in emergency preparedness and response by focusing on disaster prevention, mitigation and response through following activities:

1. Expediting the process of health sector contingency planning
2. Providing training to the health workers in emergency preparedness and disaster response
3. Strengthening the mechanism for multi-sectoral coordination and collaboration in relation to health sector disaster management

### Major Disaster Events in FY 2071/72

#### Nepal Earthquake 2072 (Nepal Earthquake 2015)

On 12th Baishakh 2072 (25 April 2015) at 11:56 local time, a 7.8 magnitude earthquake as recorded by Nepal's National Seismological Centre (NSC), struck Barpak in the historic district of Gorkha, about 76 km northwest of Kathmandu. Nepal had not faced a natural shock of comparable magnitude for over 80 years. The catastrophic earthquake was followed several aftershocks. Four aftershocks were greater than magnitude 6.0, including one measuring 7.3 which struck on 29 Baishakh ( 12 May 2015) with the epi- centre near Mount Everest. There are over 8,885 casualties and 22,302 injuries. It is estimated that the lives of eight million people, almost one-third of the population of Nepal, have been impacted by these earthquakes. Thirty-one of the country's 75 districts have been affected, out of which 14 districts were highly affected declared as 'crisis-hit' for the purpose of prioritizing rescues and relief operations; another 17 neighboring districts are partially affected.

#### Jure, Sindhupalchowk Landslide

On 17th Shrawan 2071 (02 August 2014) at 4am, a massive landslide occurred in Jure Sindhupalchowk and the Sunkoshi river has been blocked. The landslide created a 2.5 Km. long artificial lake that posed a severe risk for flash floods for a number of days until the water slowly receded. Due to artificial lake formed, the Araniko highway was also blocked. In this landslide, 5 villages (Mankha VDC, Jure Village, Dhuskun, Ramche and Tekanpur) were affected and 24 houses were swept damaged and buried in the landslide. There were 22 deaths, 122 missing and similarly 156 people were injured. About 434 people were displaced. Similarly, 1 birthing center was partially damaged.

#### Other disaster events

Series of massive floods and landslides have hit twelve districts in Central, Mid and Far Western Development Regions of Nepal in the month of August, 2014. The worst affected was Mid-Western Region and the Babai River in Bardiya, where the Early Warning System (EWS) was built on the existing gauge station, the station itself has been washed away by flood which has resulted in the water overflowing the banks of these rivers causing flooding in most of the villages of Dang, Surkhet, Banke, Bardiya, and Kailali. Besides these districts some of the other districts like Rautahat, Kaski, Dailekh, Sankhuwasava, Sindhupalchowk and Mahottari were also affected.

According to the report received to EDCD from different disaster affected districts a total of 2, 00, 000 thousands population was affected in Bardiya followed by 10,000 in Dang, 20,000 in Surkhet and 6,511 in Banke district respectively. The flood and landslides have damaged infrastructure such as: roads connecting district headquarters to the affected VDC's; bridges; health facilities; local markets; transport vehicles as well as livestock; crops and daily consumables. Highways, linking Banke to Bardiya, Nepalgunj to Surkhet and Surkhet to neighboring districts, have also been blocked due to landslides and flood.

The communication network and electricity supply were greatly affected due to fallen electrical and telecommunication poles. Drinking water supply systems have been disrupted in Surkhet valley while hand pumps and shallow wells have been contaminated in the southern plain area.

The summary of the disaster events and their effects/impact has been summarized in table below.

<b>Major Disaster in FY 2071/72</b>						
<b>SN.</b>	<b>Disaster Nature</b>	<b>No of events</b>	<b>Affected Districts</b>	<b>Total Injured/treated</b>	<b>Missing</b>	<b>Death</b>
1	Earthquake	1	14 districts highly affected	22,302	-	8,885
2	Landslides	5	Sindhupalchowk	156	122	33
			Sankhuwashava	10	5	5
			Jajarkot	5	0	2
			Kaski	4	1	3
			Taplejung	53	0	24
3	Floods	9	Banke	8,864	5	15
			Bardiya	6,106	12	29

### Major Disaster Events in FY 2071/72

#### District Level Health sector contingency planning workshop

District level health sector contingency plan has prepared by EDCD with financial and technical support of WHO. In this fiscal year, seven districts (Rasuwa, Dhading, Kavre, Gorkha, Lamjung, Parbat and Syangja) have completed the health sector contingency plan. At end of FY 2071/72, 59 districts have completed the health sector contingency planning workshops as shown in table and figure below.

Regions	Health Contingency Planning Workshop completed (districts-59)	Health Contingency Planning Workshop Not Done Yet (districts-16)
Eastern Region	<b>10 districts:</b> Jhapa, Morang, Sunsari, Saptari, Siraha, Dhankuta, Ilam, Udayapur, Panchthar, Solukhumbu	<b>6 districts:</b> Bhojpur, Sankhuwashabha, Tehrathum, Taplejung, Okhaldhunga, Khotang
Central Region	<b>18 districts:</b> Kathmandu, Lalitpur, Bhaktapur, Kavre, Dolakha, Rasuwa, Dhading, Chitwan, Rautahat, Sarlahi, Mahottari, Dhahanusa, Sindhuli, Ramechhap, Makwanpur, Nuwakot, Bara, Parsa	<b>1 district:</b> Sindhupalchowk
Western Region	<b>10 districts:</b> Lamjung, Rupandehi, Nawalparasi, Kapilvastu, Gorkha, Parbat, Syangja, Gulmi, Arghakhanchi, Palpa	<b>6 districts:</b> Tanahun, Kaski, Myagdi, Baglung, Manang, Mustang
Mid-Western Region	<b>12 districts:</b> Banke, Bardiya, Dang, Rolpa, Pyuthan, Surkhet, Jumla, Rukum, Salyan, Jajarkot, Kalikot, Dailekha	<b>3 districts:</b> Humla, Mugu, Dolpa
Far-western Region	<b>9 districts:</b> <b>Doti, Achham,</b> Bajhang, Dadeldhura, Baitadi, Darchula, Bajura, Kailai, Kanchanpur	None

Hospital Emergency/Disaster Preparedness Plan (HEPP) has been prepared in 3 district hospitals: Makawanpur district Hospital, Parbat district hospital and Dhading district hospital. At the end of 2071/72 28 hospitals (regional /Zonal/district) have prepared Hospital Emergency/Disaster Preparedness Plan (HEPP).

**List of Hospitals where Hospital Emergency Preparedness Plan (HEPP) was prepared by EDCC**

SN	Name of Hospital	Date of Plan Prepared
1	Mahakali Zonal Hospital Mahendranagar	19-11-2064
2	Seti Zonal Hospital Dhading	19-11-2064
3	Bheri Zonal Hospital Nepalgunj	24-5-2069
4	Rapti Zonal Hospital Tulasipur	18-3-2067
5	Lumbini Zonal Hospital, Butwal	29-11-2064
6	Dhaulagiri Zonal Hospital, Baglung	28-2-2066
7	Sagarmatha Zonal Hospital Rajbiraj	21-01-2065
8	Janakpur Zonal Hospital, Biratnagar	2069-6-10
9	Koshi Zonal Hospital, Biratnagar	20-1-2065
10	Mechi Zonal Hospital, Bhadrapur	21-1-2065
11	Bir Hospital	25-11-2064
12	Surkhet Regional Hospital	30-1-2065
13	Gandaki Regional Hospital	25-11-2064
14	Narayani sub regional Hospital, Birgunj	30-11-2064
15	Bhaktapur Hospital	19-11-2064
16	Makwanpur District Hospital	FY 71-72
17	Bharatpur Hospital	30-11-2064
18	Dhankuta District Hospital	24-11-2064
19	Bardiya District Hospital	28-2-2067
20	Gorkha District Hospital	8-3-2068
21	Sunsari District Hospital	18-3-2068
22	Illam District Hospital	16-9-2064
23	Achham District Hospital	2064
24	Nuwakot District Hospital	2067
25	Udaypur District Hospital	6-6-2069
26	Rapti Subregional Hospital Ghorahi Dang	2069-9-12
27	Sindhuli District Hospital	27-8-2070
28	Gulmi District Hospital	23-3-2071
29	Parbat District Hospital	FY 2071-72
30	Dhading District Hospital	FY 2071-72

**Stockpiling**

- At central level- stockpiling of necessary drugs and other essential supplies including surgical and Trauma kits, rehabilitation equipments.
- MoHP and WHO manage large scale Inter-Agency Emergency Health Kit, Diarrhoeal Diseases Kits, stockpiled in Kathmandu, Biratnagar and Nepalgunj.
- At Regional level, all Regional Health Directorates stockpile necessary medicine and logistics.
- At district level, DHOs stockpile medicines and logistics in a disaster cupboard.

**Guiding Documents published by EDCD are as follows:**

SN	Name of documents	Published Year
1	Guidelines & Tools for Conducting Integrated Training of Rapid Response Teams(RRT) on emergency Preparedness and Response	2011
2	Nepal District Level Contingency Planning Manual 2009/2010	2010
3	Standard Operating Procedure for DHWG 2010 (Draft)	2010
4	Non-structural Safety in Health Institution, 2006.	2006
5	Guidelines for seismic vulnerability assessment of hospitals, 2004.	2004
6	Public health Guidelines in Emergency, 2004.	2004
7	Emergency Preparedness and Disaster Response Plan, 2003.	2003
8	Emergency Preparedness & Disaster Management for Hospitals, 2002	2002

**Activities conducted in FY 2071/72**

- Completed District level Health sector Contingency Planning (CP) Workshop in Ramechhap, Dolakha, Nuwakot and Solukhumbu districts with support of UNFPA.
- Training to RRT members in Ramechhap and Dolakh district with support of UNFPA.
- Prepared District level Health sector Contingency Plan in Lalitpur and Bhaktapur districts with support of WHO and Nepal Red Cross Society
- Workshop on hospital emergency preparedness plan conducted in Sindhuli and Gulmi districts.
- Training to RRT member on disaster response in Arghakhanchi and Gorkha districts.
- Procured 25 RRT Deployment Kits and supplied to RRT members.
- Interaction Programme with stake holders and generalists on prevention from Cold and Heat wave to disseminate message to affected people.
- Conducted meeting of disaster health working group.
- Prepared Health Sector strategic Plan for Disaster Response-2071 with support of WHO.
- Conducted Regional Workshop to Review Districts' Health Sector Contingency Plan.

**Problem/Constraints**

Issues	Recommendations	Action
Health sector preparedness plan for outbreaks and emergency	Review and implement health sector emergency preparedness plan	Operationalize health sector emergency preparedness plan
Retrofitting of hospital	Plan for retrofitting in major hospitals	Allocate budget for retrofitting
Isolation ward at hospital	Operationalize isolation ward in selected hospital	Allocate resources for renovation of isolation ward

- No provision of regular reporting of disaster management activities in HMIS.
- Budget allocation is inadequate.
- Health sector contingency planning for all districts and yearly regional level review meeting for review & update of contingency planning is not in priority.
- No guidelines for the provision of Community level RRT

## 4.8 SURVEILLANCE AND RESEARCH

### 4.8.1 Background

Disease surveillance and research section is an integral part of Epidemiology and Disease Control Division (EDCD). This section came into existence in August 12, 2013 (Shrawan 28, 2070 BS). The mission of the communicable diseases Surveillance Section is to protect and improve the health of Nepalese citizens by tracking and responding to the occurrence of disease in the population across the country. The section conducts the surveillance of reportable diseases and is responsible for collecting, analyzing, interpreting, and reporting information for infectious diseases. This section also maintains a high level of data accuracy and quality, monitors disease trends for early detection and prompt response in case of any outbreak. It also assists in the development of public health policies, programme planning and implementation related to communicable diseases.

### 4.8.2 Surveillance activities operated through EDCD

#### Early Warning And Reporting System (EWARS)

Early Warning Reporting System (EWARS) is a hospital-based sentinel surveillance system and is designed to complement the country's Health Management Information System (HMIS) by providing timely reporting for the early detection of selected vector-borne, water and food borne diseases with outbreak potential.

The hospital based reporting provides timely signal or alert and early detection of possible outbreak due to increased number of cases in the community leading to continuous transmission of the disease for timely response.

The EWARS mainly focuses on the weekly reporting of number of cases and deaths (including "zero" reports) of six priority diseases: three vector-borne diseases Malaria, Kala-azar and Dengue and three outbreak potential diseases Acute Gastroenteritis (AGE), Cholera and Severe Acute Respiratory Infection (SARI). It equally focuses on immediate reporting (to be reported within 24 hours of diagnosis) of one confirmed case of Cholera, and severe and complicated Malaria and one suspect/clinical case of Dengue as well as 5 or more than 5 cases of AGE and SARI from the same geographical locality in a one week period. Based on the experiences of reported outbreaks of acute diarrhoeal diseases and influenza by several districts, these two diseases are included for reporting in EWARS from the year 2005. Likewise, Dengue and DHF case reporting will be required to be reported in EWARS due to its high potential of impending epidemics. Other communicable diseases besides these six prioritized diseases also need to be reported in EWARS, whenever the numbers of cases exceed the expected level.

It was established in 1997 first in 8 sentinel sites and expanded to 24 sites in 1998, 26 sites in 2002, 28 sites in 2003, 40 sites in 2008. 81 sentinel sites have been identified as EWARS sentinel sites in April 2015. It is currently operational in 48 hospitals (out of 81 hospitals) throughout Nepal

## Objective

The main objective of EWARS is to strengthen the flow of information on vector borne and other outbreak prone infectious diseases from the districts; and to facilitate prompt outbreak response to be carried out by Rapid Response Teams (RRTs) at Central, Regional and District level, which can be mobilized at short notice to support the local levels (DHO/DPHO/PHCC/HP) in case investigation and outbreak control activities.

In the broader perspective, it also aids on program planning, evaluation, and the formulation of research hypotheses and to disseminate data/information on infectious diseases through appropriate feedback system

## Strategies

- Monitor and describe trends of infectious diseases through a sentinel surveillance network of hospitals followed by public health action and research
- Develop a comprehensive, computerized database of infectious diseases of public health importance
- Expansion and strengthen Early Warning and Reporting System (EWARS) to represent all 75 districts of Nepal
- Implementation of District Health Information System (DHIS2) platform for EWARS

## Major Activities in 2071/72

### Expansion, sensitization and strengthen EWARS sentinel site

EWARS sentinel sites have been recently expanded to 48 sites. In FY 2071/72 expansion was done in 9 new sentinel sites; District hospital Gorkha, Lamjung district community hospital, District hospital Dhading, District hospital Nuwakot, District hospital Dolakha, Charikot PHC, District hospital Ramechhap, District hospital Baktapur and Patan Hospital. 33 sites are yet to be oriented. The orientation was provided to medical recorders, medical doctors, staff nurses, lab personnel, hospital staff, and staff from DPHO/DHO which also served dual purpose of strengthening the sites' programs and coordination between the hospitals and district (public) health offices.

### **Establishment of control room at EDCD**

Control room has been established under surveillance and research section of EDCD in technical support from WHO, NHSSP and GIZ with the following objectives:

- Maintain quality, accuracy, timeliness and completeness of data received from EWARS sentinel sites.
- Analyze data received from EWARS sentinel sites, monitor disease trends and notify to the concerned authorities if any outbreak is suspected/ predicted.
- Conduct active surveillance in case of any outbreak. Prepare daily situation update report and report to concerned authorities.
- Work closely with response section.

### **Regular publication of EWARS Bulletin**

EWARS bulletin is produced every epidemiological week on Sundays and shared to all the medical recorders, EWARS focal persons, rapid response team members, District Health Offices, Regional Health Directorates, all the divisions and centers of Department of Health Services, Secretary, MoHP, Chief-Secretary, and stakeholders through Email.

### **Water Quality Monitoring and Surveillance**

EDCD is a secretariat of Water Quality Surveillance Committee. Director of EDCD is the coordinator of the committee. The committee is responsible for following:

- Regular monitoring of drinking water quality from various sources and distribution sites
- Regular surveillance of water borne diseases and coordinate with different stakeholders for quality surveillance
- Increase capacity of manpower through training, meeting, and other programmes for the surveillance of water quality of the district
- Facilitate testing of water quality if any waterborne disease epidemic occurs in the water distributed in the particular area
- Keep record of drinking water distribution system of country on the basis of Geographical Information System (GIS) and provide feedbacks to the responsible organization.

### **Major Activities in 2071/72**

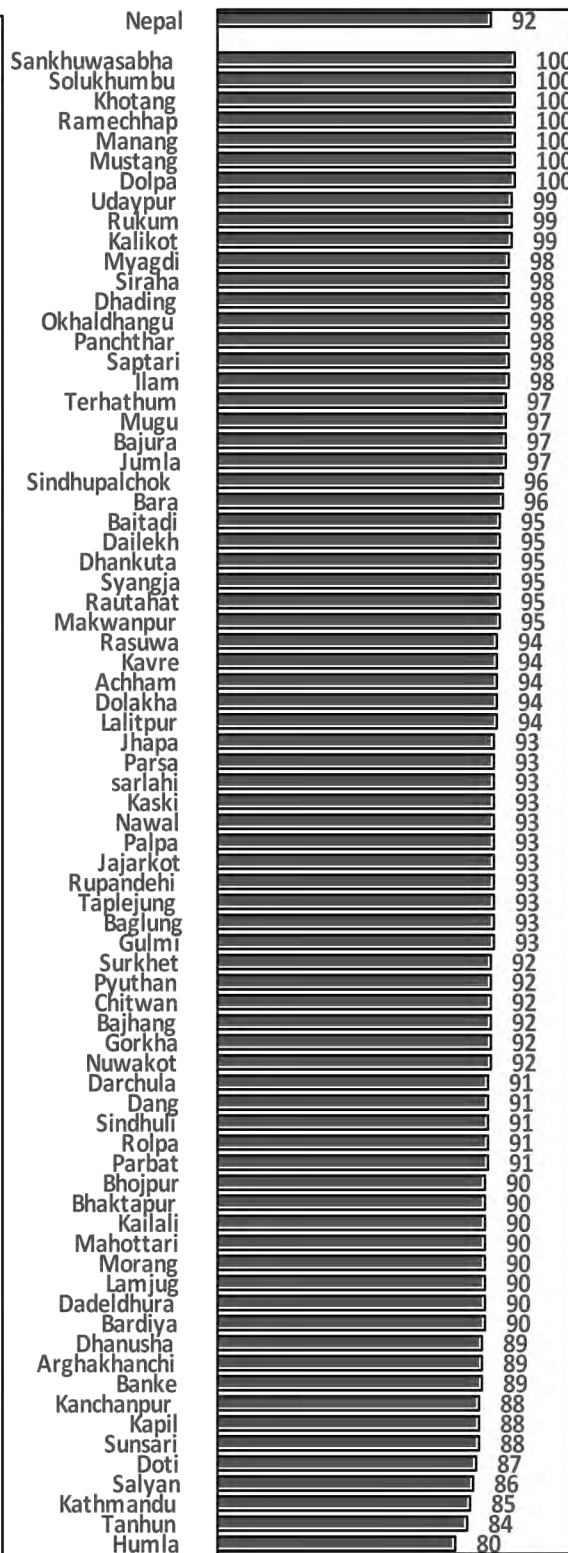

- Water Quality Monitoring and Surveillance in 14 earthquake affected districts.
- Water Quality surveillance in water safety plants (WSP) implemented projects
- Capacity building of community member and health workers in water safety plants implemented districts(Tanahu, Kaski, Nawalparasi and Gulmi)

## 4.9 TUBERCULOSIS

### 4.9.1 Background

Tuberculosis (TB) remains as a public health problem in Nepal, as it is responsible for ill health among thousands of people each year. TB also ranks as the sixth leading cause of death in the country. During this reporting year, NTP registered 34,121 TB cases. Among them 15,655 (46%) were new smear positive TB cases, 2,202 (6%) were smear positive retreatment cases, 6,686 (20%) were sputum smear negative and 8,966 (26%) were extra-pulmonary TB cases. Out of total registered cases in NTP, there were 12,300 (36%) female and 21,821 (64%) male. According to the latest WHO data published in May 2014, tuberculosis deaths in Nepal reached 5,506. This is 3.5% of total deaths. The age adjusted death rate is 27.80 per 100,000 of population. This ranks Nepal as 43 in the world.

The majority of TB cases and deaths occur among men, the burden of disease among women seems significantly lower (2:1). TB mortality is unacceptably high given that most deaths are preventable if people can access tuberculosis care for diagnosis and the correct treatment is provided. Short-course regimens of first-line drugs that can cure around 90% of all cases (Treatment success rate reported in 2014/15) have been recorded for a decade. National Tuberculosis Program has adopted the global STOP TB Strategy and Million Development Goals (MDGs) as TB control strategy of the country

Tuberculosis (TB), a major public health problem of Nepal infected About 45 percent of the total population. Every year, about 45,000 people develop active TB, out of them 20,000 have infectious pulmonary disease and that are able to spread the disease to others. Treatment by Directly Observed Treatment Short course (DOTS) has reduced the number of deaths. DOTS have successfully been implemented throughout the country since April 2001. A total of 4244 DOTS treatment centers are providing TB treatment service. Expansion of this cost effective and highly successful treatment strategy has proven its efficacy in reducing the mortality and morbidity in Nepal. The NTP has coordinated with the public sectors, private sectors, local government bodies, I/NGOs, social workers, educational sectors and other sectors of society in order to sustain the present significant results achieved by National Tuberculosis Program (NTP).

### 4.9.2 NTP Goal, Strategy and Target

**Vision:** Tuberculosis free Nepal

**Goal:** To reduce mortality, morbidity and transmission of tuberculosis until it is no longer a public health problem

**Objectives:**

- To dramatically reduce the National burden of TB by 2015 in line with the Millennium Development Goals and the Stop TB Partnership targets
- Achieve universal access to high-quality diagnosis and patient-centered treatment
- Reduce the human suffering and socioeconomic burden associated with TB
- Protect poor and vulnerable populations from TB, TB/HIV and multi-drug-resistant TB

**Targets:**

- MDG 6, Target 8: ...halted by 2015 and begun to reverse the incidence.
- Targets linked to the MDGs and endorsed by the Stop TB Partnership:
  - By 2005: detect 100% of new sputum smear-positive TB cases and cure at least 85% of these cases.
  - By 2015: reduce prevalence of and death due to TB by 50% relative to 1990.

- By 2050: eliminate TB as a public health problem (<1 case per million population).

### Components of the Stop TB strategy

#### 1. Pursue high-quality DOTS expansion & enhancement

- Political commitment with increased and sustained financing
- Case detection through quality-assured bacteriology
- Standardized treatment with supervision and patient support
- An effective drug supply and management system
- Monitoring and evaluation system, and impact measurement

#### 2. Address TB/HIV, DR-TB and other challenges

- Implement collaborative TB/HIV activities
- Prevent and control multi-drug-resistant TB
- Address prisoners, refugees and other high-risk groups and special situations

#### 3. Contribute to health system strengthening

- Actively participate in efforts to improve system-wide policy, human resources, financing, management, service delivery, and information systems
- Share innovations that strengthen systems, including the Practical Approach to Lung Health (PAL)
- Adapt innovations from other fields

#### 4. Engage all care providers

- Public-Public, and Public-Private Mix (PPM) approaches
- International Standards for Tuberculosis Care (ISTC)

#### 5. Empower people with TB, and communities

- Advocacy, communication and social mobilization
- Community participation in TB care
- Patients' Charter for Tuberculosis Care

#### 6. Enable and promote research

Programme-based operational research

### 4.9.3 Major Activities fiscal year 2071/72

Key activities of NTP are as follows:

- Provide effective chemotherapy to all patients in accordance with national treatment policies.
- Promote early diagnosis of people with infectious pulmonary TB by sputum smear examination.
- Establish a network of microscopy centers and a system of quality control of sputum smear examination.
- Establish treatment centers for every 100,000 population within the existing primary health care system.
- Provide continuous drugs supply to all treatment centers. This includes systems for procurement, storage, distribution, monitoring and quality control of drugs.
- Maintain a standard system for recording and reporting
- Monitor the result of treatment and evaluate progress of the program, by analyzing periodic treatment outcome in cohorts of patients.
- Provide training to health personnel involved in the NTP
- Expansion of income generation and skill development training activities to needy DRTB patients.

- Strengthen cooperation between non – government organizations (NGOs), bilateral aid agencies and donors involved in the NTP. Coordinate NTP activities with other primary health care activities, especially leprosy and AIDS/STD programs.

#### 4.9.4 Progress and Epidemiology of Tuberculosis

##### NTP Institutional Coverage

Nepal NTP adopted DOTS strategy in 1996 and nationwide coverage was achieved in 2001. All DOTS sites are fully integrated within the general health services or run through NTP partner organizations in public and private sectors. By mid July 2015 a total of 4,244 health institutions were offering DOTS for provision of DOTS based TB control services

Beside government health institutions several NTP partners also provide DOTS including; private nursing homes, polyclinics, factories, I/NGOs health clinics, eye hospitals, prisons, refugee camps, police hospitals, medical colleges, municipalities, Village Development Committees and District Development Committees.

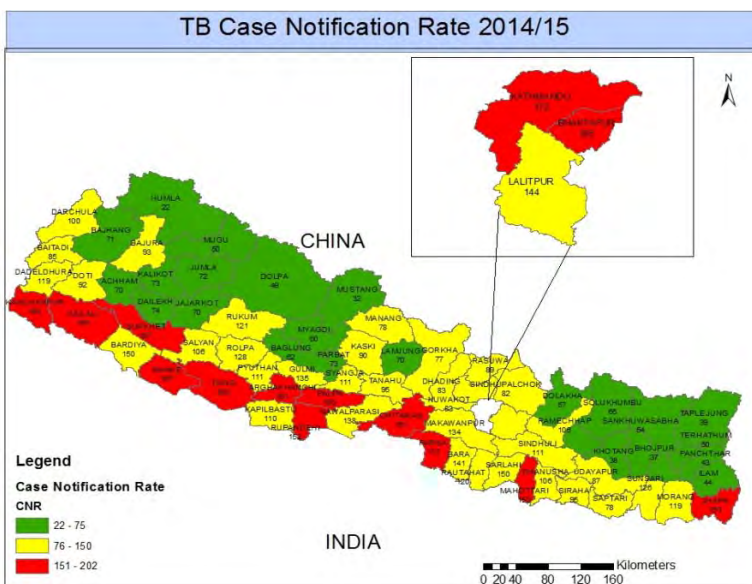

##### Estimation of TB burden

World Health Organization estimates the prevalence of all types of Tuberculosis cases for Nepal at 66,000 (241/100K) while the number of all forms of incidence cases is estimated around 45,000 (163/100K). With the introduction of Directly Observed Treatment Short course (DOTS) number of deaths has dramatically reduced from 9,712 (51/100K) in 1990 to 20/100K in 2012 (WHO TB Annual Report 2013). However, the reported deaths among the registered TB cases in the FY 2014/15 were **5506**.

##### Case notification

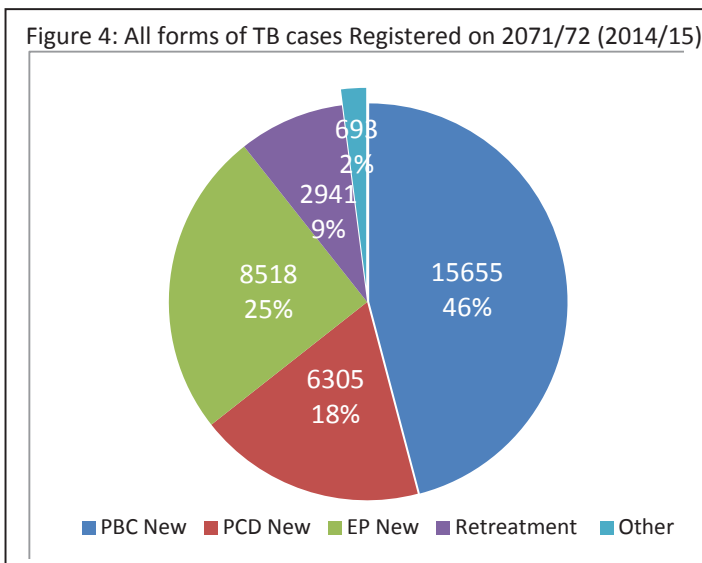

National Tuberculosis Program reported 34,121 tuberculosis cases during FY 2071/72. The National Case Notification Rate (All forms) is 123 / 100,000 population. Based on the CNR, there are 13 Districts which are considered high burden, 37 districts considered as Medium Burden and 25 districts considered as Low burden. Most of the high burden Districts are in central region and Midwest Region (CNR 137 for both region), when looked at regional level and in terrain belt (CNR 139) when eco-region is considered while mountains region had the least CNR of 60/100,000.

The burden of disease caused by TB can be measured in terms of incidence (defined as the number of new and relapse cases of TB arising in a given time period, usually one year), prevalence (defined as the number of cases of TB at a given point in time) and mortality (defined as the number of deaths caused by TB in a given time period, usually one year). As, Prevalence survey is yet to be carried out, the true prevalence

and projected incidence rates are rather not discussed here.

The pie show the case notifications composition of TB cases in 2014/15. Altogether 34,121 cases were notified during 2014/15. Among them bacteriologically confirmed pulmonary cases were 15,655(46%) clinicalcally confirmed pulmonary cases were 6305 (18%), extra pulmonary case were 8,518 (25%) and retreatment cases were 2,914 (9%) just over 30,478 (89.2%) had a new episode of TB and 2941(9%) (Retreatment) had already been diagnosed with TB but their treatment was changed to a retreatment regimen. Among the new cases (34,121), 64.34% of cases were pulmonary cases with remaining 25% as extra pulmonary cases..

The Case Notification Rate of new smear positive cases (CNR/SS+) raised steadily from 1996 till 2001, when nationwide DOTS expansion was achieved. Out of the 45,000–50,000 new cases (all forms) estimated by WHO in the last years, NTP was able to notify 120% and successfully treat 85-89% of them. In spite of this sustained good programme performance the CNR (of both SS+ and all forms) has substantially stagnated. The percentage of New SS+ notification rate among new pulmonary cases in 2015 was 52%, lower than the recommended WHO standard of 65%.

**Regional scenario of CNR**

Following table how CNR changed over time in each region. The analysis of changes in each region requires in-depth investigation in selected districts to identify the causes.

Year	EDR	CDR	WDR	MWDR	FWDR	NEPAL
2011	103	150	109	137	118	127
2012	95	149	105	141	119	124
2013	105	153	120	146	135	134
2014	109	155	123	146	132	136
2015	96	137	115	137	125	123

**Age and Sex distribution**

Around 7 % of cases were registered this year in childhood Age group and adult TB was around 93% nationally, where Male were nearly 1.8 times reported more than Female. Among the childhood TB population, most of them were (5%) between 5-14 years’ age group. Regional data showed that, Age distribution for TB significantly varied between the regions. Childhood TB reported was very less in Eastern region (3%) where was it was reported highest in Mid-west region (15%) where was TB is adult population was highest in the Eastern Region (97%) and lowest in the Mid-Western Region (85%). Most of the regions had Male: Female ration nearly similar (between 1.6-2 is to 1).

**Annual trends of CNR**

The nation figure for CNR is somewhat stagnant for quite some years. But, it is in FY 2071/72 where the cases registered have significantly reduced (from 37,025 in previous year to 34,212 this year). The rate of change is CNR is – 11 %. The details analysis of the reason behind this significant change is due process of analysis. While comparing in regional level, Easter and central region had a significant reduction in case notifications this year compared to other regions. While comparing in eco-terrain region, the case notification in Terai has significantly reduced this year. (-13%) followed by the mountain and hill.

**Treatment Outcome**

The trend of Success rates for TB has been higher (90% or more) consistently for last 5 years. The annual trend Success rates for newer cases (New and Relapse) is constantly higher than 90% but the trend of success rates for the Retreatment cases (Loss to Follow-up and Retreatment) have been constantly lesser but was stable around 70-85%. It was this year where the Success rates for the retreatment cases have been to the lowest of around 72%.

small proportion (2-3%) of the patients successfully treated is classified as “Treatment Completed”, the rest being “Cured”; even the percentage of “Failure” remained at very low levels over the last ten years.

TB patients have been treated with 90 percent treatment success rate after the introduction of DOTs in 1996. This rate has been sustained since DOTs was introduced. Treatment success rate is almost same (around 90%) from FY 2009/10 to 2013/2014. The Treatment success rate of the country has consistently achieved and exceeded the global target of treatment success (85%).

The treatment success rate for sputum positive cases is almost constant in all five development regions. Out of total sputum positive cases registered in 2070/71, Ninety one percent cases successfully completed their treatment course in 2070/71. EDR achieved highest success rate (93.39%) where FWDR has achieved lowest success rate(90.2%) percent treatment success rate in 2071/72 whereas

**Figure 7: Regional treatment success rate trend**

Region	Registered	Success	failed	Died	Lost to-Follow up	Not evaluated
EDR	6056	93.39	0.66	2.23	1.88	1.57
CDR	14653	91.09	0.67	2.12	2.59	3.46
WDR	6068	91.73	1.15	4.10	1.60	1.45
MWDR	5155	91.43	1.18	3.03	1.49	2.74
FWDR	3420	90.20	1.61	3.04	2.89	2.25
Nepal	35352	91.56	0.92	2.70	2.17	2.57

western development region a 91.73 percent, Mid western region have 91.43 percent and the central development region have and western have 91.09 percent success rate in the same period. Overall treatment success rate remains at national level was 91.56 Thus, case holding is quite satisfactory and this is due to the effective monitoring and supervision of the patients by DOTs provider as well as due to timely supply of adequate and qualitative drugs to the treatment centers.

During July 2013 – July 2014 period a total of 37,025 TB patients were registered for treatment in NTP. Treatment success rate among new sputum smear positive TB cases (15,762) was 87%. This year the defaulter rate is constant at 3% and similarly, failure rate among new smear positive is 1%.

**Treatment Outcome: Smear Positive among pulmonary TB cases mid July 2013 – mid July 2014**

	Registered	Cured	Completed	Died	Defaulted	Failure	TSR
Female	5115	4512	184	120	105	74	91.8
%	32%	33%	30%	24%	25%	35%	
Male	10647	9136	428	373	322	136	89.8
%	68%	67%	70%	76%	75%	65%	
Total	15762	13648	612	493	427	210	91
%		87%	4%	3%	3%	1%	

The sputum conversion rate at two months in 2014 was 89% for all new sputum positive (NSP) cases, showing a general high compliance with treatment and good quality of anti-TB medicines. Nepal hasn't yet fostered the policy of re-testing all non-converters at three months, thus delaying the discovery of failures or DR-TB to the fifth month.

**Drug Resistant Tuberculosis**

Drug-resistant TB (DR-TB) has become great challenge to national TB control program and is a major public health concern in Nepal. Innovative approaches and more funding to increase the uptake of programmatic management of DR-TB nationally are urgently required to detect and enroll more patients on MDR-TB treatment, and to improve outcomes.

For programmatic and management point of view, Nepal adapted following classification of DR TB: Multi Drug Resistant TB (MDR-TB): the strain of M. tuberculosis is resistant to at least both Isoniazid and Rifampicin– and may or may not be resistant to other first line anti-TB medicines.

**Extensively Drug Resistant TB (XDR-TB):** a severe form of MDR-TB – the strain of M. tuberculosis is multidrug-resistant (MDR-TB) and has also resistance to any of the Fluoroquinolones and to any one of the second line injectable drugs.

**Pre Extensively Drug Resistant TB (Pre XDRTB):** the strain of *M. tuberculosis* is multi drug resistant (MDR-TB) and also resistance to either one of the Fluoroquinolones or any one of the second line injectable drugs.

**Rifampicin Resistant (RR-TB):** the strain of *M. tuberculosis* is resistant to Rifampicin detected using rapid diagnostic methods (phenotypic or genotypic), with or without resistance to other anti-TB drugs. It includes any resistance to Rifampicin, in the form of mono-resistance, multidrug resistance, poly-drug resistance or extensive drug resistance.

**Burden**

The results of the latest Drug Resistance Survey (2011-12) showed that the levels of drug resistance TB are getting higher, with nearly 9.3% of new patient resistant to at least one drug. Among all MDR-TB cases, it is low among new cases (2.2%) while among retreatment cases, it is comparatively higher (15.4%). One of the concerned aspects of drug resistance in Nepal is the high level of resistance to fluoroquinolones (26.4%), which leads to heavy burden of pre-XDR and XDR-TB among MDR-TB patients (8% of the cases were found to be XDR among MDR cases in the same survey). This problem of drug resistance might be because of over the counter availability and unregulated use of fluoroquinolones.

**Case Finding**

The fundamental principle underlying the case finding strategy in Nepal is the need to ensure systematic and timely screening of patients through active and passive case finding mechanism. Along with this, all of the TB cases should be screened for drug resistance so that prompt initiation of effective treatment can be started. The, the following target groups are being screened for DST under National TB Control Program of Nepal:

- Retreatment cases (lost to follow-up failure and relapse)
- Initially SS+ patients (cat. I and II) who are still positive after first sputum smear follow up (i.e. 2 months for CAT I AND 3 months for CAT II) or other patients that are doing poorly clinically (persistent cough, fever, loss of weight, tiredness, etc.) despite of continuing TB treatment.
- HIV Positive TB Patients ☑ Close contacts of DR-TB cases (RR/MDR/Pre-XDR & XDR).
- Suspect of extra-pulmonary DR-TB patients
- Patients undergoing irregular treatment and treatment from private sector with poor regimen

The graph shows the distribution of MDRTB case finding from FY 2067/68 to FY 2071/72 by development region-wise.

Looking at the trend of MDR-TB case finding status, it can be observed that all of the regions have been progressing in case finding. The Central Development Region has been identifying highest cases among all five regions and it is the same in this year as well whereas low case finding was done in Mid-western

region. Other regions like Eastern Region, Western Region and Far-western Region found 58, 81 and 47 cases respectively in this FY.

The given graph shows MDR-TB case finding by registration category from FY 2067/68 to 2071/72. There are 6 registration categories in the policy.

The above graph shows that the majority of MDR-TB cases are diagnosed as failure after category II and retreatment cases. DR-TB case are detected early by MDR-TB investigation among new TB cases which was 51 in FY 2070/71 and increased and reached to 58 cases in 2071/72. In this year, less relapse cases were registered under MDR TB cases i.e. 61 though it was high in last FY (84). Category I Treatment failure cases also increased to 131 this year from 103 last years. Loss to follow-up cases were also stagnant for last 2/3 years.

The chart below demonstrates treatment outcome of MDR TB treatment cases.

Through the above graph, we can see that the treatment success rate of MDR TB reduced by almost 5% in this year in compare to last year though it was growing in last four years. Proportion of patients who died and failed in treatment are similar this year i.e. 8% which is nearly same to the last year.

Significant number of patients were lost to follow this year in compare to last year which is increased to 12% this year from 7.3% last year.

**TB/HIV****Management of TB/HIV Co-infection**

The NTP adopted TB/HIV strategy and policy in 2008. Collaborative TB/HIV activities aim to decrease the burden of TB and HIV in a population affected by both diseases through effective collaboration between NTC and NCASC and to provide integrated and comprehensive tuberculosis and HIV prevention, treatment and care service as close to the client as possible. However, the implementation of TB/HIV collaborative efforts was not realized up to the expected standard. As part of a remedial action to revitalize TB/HIV collaborative efforts, a number of strategic interventions/approaches were devoted to bolster the TB/HIV collaboration.

Regarding percentage of TB patients who had an HIV test result recorded in the TB register through intensified case finding reveals that 7% in F/Y 2014/15 TB patients were tested for HIV and found 175 HIV positive cases. NTC and NCASC jointly revised the policy in 2013 to test all TB patients for HIV and all HIV positive clients for TB test at every visit. The prevalence of HIV is stabilizing in Nepal, making collaborative measures from both National AIDS and TB Control Programme more important now than ever before. NTP has conducted several sentinel surveillances since 1994 to establish the prevalence of HIV among TB patients. The latest surveillance (2012) showed HIV prevalence among TB patients at 2.4%, which is remain the same status of 2007 surveillance and TB prevalence among HIV clients at 11.5%. The Global Tuberculosis Report 2015 indicates that globally, 51% of notified TB patients had a documented HIV test result in 2014, a small increase from 49% in 2013. The number of people living with HIV who were treated with isoniazid preventive therapy reached 933 000 in 2014, an increase of about 60% compared with 2013. The target for 2016 is that 80% of estimated HIV-positive incident TB cases receive treatment for both TB and HIV.

**4.9.5 NTP Laboratory Network**

Diagnosis and treatment monitoring of tuberculosis patient is relied on Sputum smear microscopy in NTP because of its low cost and practically easier to perform. Direct sputum smear microscopy is the choice of TB diagnostic tool worldwide. Currently there are 581 microscopy centers delivering sputum microscopy examination throughout the country. Majority of the microscopy centers(469)are established within government health facilities; some are established in non-governmental organizations as well as in the private sector. NTP is responsible for providing laboratory reagents, chemicals and other equipment's to all the microscopy centers.

Region	EDR	CDR	WDR	MWDR	FWDR	Total
GoN	109	143	82	51	84	469
Non GoN	18	53	8	29	4	112
<b>Total</b>	127	196	90	80	88	581

There are well established networks between the microscopy centers (MCs) at PHC, DHO/DPHO, 5 RTQCCs and the national level (NTC). Microscopy centers send the examined slides to their respective regional TB quality control centers via district health office according to LQAS method. Five Regional TB quality control centers (RTQCCs) are functioning smoothly with help of skilled and trained quality control assessors. EQA for sputum microscopy is carried out by BNMT/NATA, Biratnagar for eastern region, NTC for the national and central region. RTC Pokhara for western region, Regional Health Directorate Surkhet for mid-western region and NLR, Dhangadhi for Far-western region. The overall agreement rate is improved and maintained with more than 98% through FY 2014/15

Agreement Rate						
Region	EDR	CDR	WDR	MWDR	FWDR	Total
<b>Agreement Rate</b>	99	99	98.32	98	99.47	98.8

**GeneXpert MTB/RIF**

The Xpert MTB/RIF is a self-contained and cartridge-based technological platform that integrates sputum processing, DNA extraction and amplification, TB and MDR-TB diagnosis. It has similar sensitivity to culture, targets *Mycobacterium tuberculosis* specifically and enables simultaneous detection of rifampicin resistance via *rpoB* gene. The Xpert MTB/RIF test is a valuable, highly sensitive, and specific new tool for early TB detection and for determining rifampicin resistance. While it should be noted that mono-resistance to rifampicin is found in approximately 5% of rifampicin resistant strains, a high proportion of rifampicin resistance is associated with concurrent resistance to isoniazid. Thus, detecting resistance to rifampicin can be used as a marker for MDR-TB with a high level of accuracy. The use of Xpert MTB/RIF started in Nepal from 2011/2012 and mainly three organizations held the capacity of this technology: IOM (International organization for migration), HERD (Health Research and Social Development Forum) and NTC (National Tuberculosis Center). Currently, there are 26 Xpert MTB /RIF centers located in different part of the country as listed below. Three more machines will be installed shortly.

**Culture and Drug Susceptibility Test (DST)**

Culture of *Mycobacterium tuberculosis* remains the gold standard for both diagnosis and drug susceptibility testing, and also the method of choice to monitor DR-TB treatment. Conventional culture method using LowensteinJensen (LJ), while cheap and simple have the major disadvantage of being very slow. LJ cultures take 8 weeks for negative result and four to six weeks after initial culture for drug susceptibility testing. Both the National TB Reference Laboratories (NRL), NTC and GENETUP, are providing culture and DST services. They are quality assured and accredited as NRLs by Supranational TB Reference Laboratory (SRL) Gauting, Germany. SRL Gauting, Germany is supervising and maintaining regular EQA of these laboratories.

NRL at NTC is in process to establish Liquid Culture (MGIT). The MGIT system is based on a glass tube containing 7H9 brought together with fluorescence quenching-based oxygen sensor. When inoculated with *Mycobacterium tuberculosis*, consumption of oxygen produces fluorescence when illuminated by a UV lamp. The fully automated version can incubate up to 960 samples for *Mycobacterium tuberculosis* diagnosis through culture of samples (pulmonary and extra-pulmonary) and Drug Susceptibility testing.

are providing culture and DST services. Both of them are being quality assured and accredited as NRLs by Supranational TB Reference Laboratory (SRL) Gauting, Germany. SRL Gauting, Germany is supervising and maintaining regular EQA of these laboratories.

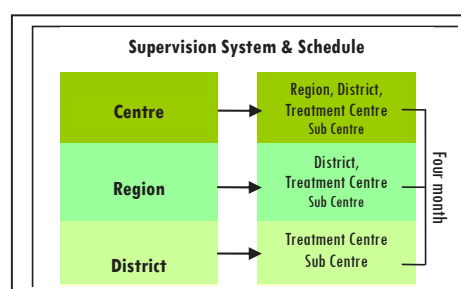

NRL at NTC is in process to establish Liquid Culture (MGIT). The MGIT system is based on a glass tube containing 7H9 broth together with fluorescence quenching-based oxygen sensor. When inoculated with *Mycobacterium tuberculosis*, consumption of oxygen produces fluorescence when illuminated by a UV lamp. The fully automated version can incubate up to 960 samples for *Mycobacterium tuberculosis* diagnosis through culture of samples (pulmonary and extra-pulmonary) and Drug Susceptibility testing.

### 4.9.6 Supervision & Monitoring and Logistics System

#### Supervision, Monitoring & Evaluation

Supervision and monitoring is carried out through regular visits to all levels of the programme as per NTP policy. In addition to supervision and monitoring, quarterly reporting of activities is carried out at Planning, Monitoring and Evaluation (PME) workshop at all levels of the programme which is held trimisterly.

The NTP maintains a regular monitoring system which includes case finding, smear conversion, treatment outcome and programme management reports from all levels of the programme. Data is initially reported and analyzed by the District Health Office during the district reporting and Planning workshops. District TB and Leprosy Officers (DTLOs) report on treatment centre and district during the Regional Planning, Monitoring and Evaluation workshops. Finally, Regional TB and Leprosy Officers (RTLOs) report by district at national PME workshops. All of these PME workshops take place every four months, at the beginning of the new trimester.

Monitoring and Evaluation		
International	International Review	Annual
National	National Reporting & Planning Workshop	Four Monthly
Regional	Regional Reporting & Planning Workshop	Four Monthly
District	District Reporting & Planning Workshop	Four Monthly
Treatment Centre	Treatment Center Reporting & Planning Workshop	Four Monthly

### 4.9.7 Logistic Supply Management

The National Tuberculosis Control Programme has a logistics management system. Anti Tuberculosis drugs and other essentials are supplied quarterly which is based on new cases notified during quarter and cases which are still on treatment.

Each level of the programme maintains a four months' additional buffer stock to prevent being out of stock. The buffer stock kept out at regional level has been increased from 4 to 6 months in order to guard against shortages caused by delays in delivery from national level due to unforeseen natural and other disturbances.

NTP Procurement, demand and supply organizational chart

### 4.9.7 Physical and Financial Progress status

Central Level		District Level	
Physical	75.3 %	Physical	95 %
Financial	59.3 %	Financial	92 %

Beruju Clearance - 61 %

In fiscal year 2071/72, NTC had 75 percent physical progress in central level program and 95 percent achievement in district level program. Whereas the financial progresses were 59.3 percent in central

level and 92 percent in district level program. NTC was in good position regarding to clearance of financial irregularities. The Beruju clearance was around 61 percent in that period.

#### **4.9.8 Problems/Constraints**

##### **Key Constraint & Challenges**

The Nepal NTP has regularly been facing several challenges and constraints, which influence inability to expand and sustain the vision of the Programme. Following are the key challenges and constraints faced by the NTP in order to reach intended goals and targets of the Programme.

##### **Challenges:**

- Insufficient income generation program for patient and their family members.
- Inadequate TB management training to medical doctors
  - Minimum interventions for strengthening PPM component
- Lack of operational research regarding increasing retreatment cases
- Lack of patient friendly TB treatment service
- Existing currier system for slide not adequate
- Inadequate TB IEC materials
- Difficult to coordinate with regional and provincial hospitals.

##### **Action to be taken:**

- Expansion of CBDOT Programme in the country
- Strengthen Public Private Mix approach
- Strengthen the Community Support System Programme
- Plan for operational research on TB
- Develop and distribute patients centered TB IEC materials
- Pilot patient friendly treatment centers in the country

## 4.10 LEPROSY

### Vision, mission and program

#### Vision

To make leprosy free society where there is no new leprosy case and all the needs of existing leprosy affected persons having been fully met.

#### Mission

To provide accessible and acceptable cost effective quality leprosy services including rehabilitation and continue to provide such services as long as and wherever needed.

#### Goal

Reduce further burden of leprosy and to break channel of transmission of leprosy from person to person by providing quality service to all affected community.

#### Objectives

1. To eliminate leprosy (Prevalence Rate below 1 per 10,000 population) and further reduce disease burden at district level.
2. To reduce disability due to leprosy.
3. To reduce stigma in the community against leprosy.
4. To provide high quality service for all persons affected by leprosy.
5. To integrate leprosy in the integrated health care delivery set-up for provision of quality services.

#### Strategies

The national strategy envisions delivering quality leprosy services through greater participation and meaningful involvement of people affected by leprosy and right based approaches in leprosy services as follows:

1. Early new case detection and their timely and complete management
2. Quality leprosy services in an integrated setup by qualified health workers
3. Prevention of impairment and disability associated with leprosy
4. Rehabilitation of people affected by leprosy, including medical and community based rehabilitation
5. Reduce stigma and discrimination through advocacy, social mobilization and IEC activities and address gender equality and social inclusion
6. Strengthen referral centres for complications management
7. Meaningful involvement of people affected by leprosy in leprosy services and address human right issues

8. Promote and conduct operational researches/studies
9. Monitoring, supportive supervision including onsite coaching, surveillance and evaluation to ensure/strengthen quality leprosy services
10. Strengthen partnership, co-operation and coordination with local government, external development partners, civil society and community based organizations.

### Targets

- Reduce New Case Detection Rate (NCDR) by 25 % at national level by the end of 2015 in comparison to 2010
- Reduce Prevalence Rate (PR) by 35 % at national level by the end of 2015 in comparison to 2010
- Reduce by 35% Grade 2 disability (G2D) amongst newly detected cases per 100,000 population by the end of 2015 in comparison to 2010
  - o Additional deformity during treatment <5% by eyes, hands and feet (EHF) score
  - o 80% health workers are able to recognize and manage /refer reaction/complications
  - o Promote prevention of disability in leprosy(POD) and Self care

These targets will be revised after midterm evaluation.

Globally WHO has guided to reduce the burden due to Leprosy and Bangkok declaration has committed to reduce the G2D below 1/1 million and to increase the resources for leprosy, early diagnosis awareness to reduce stigma and rehabilitation in partnership approach.

### Evolution and milestones of leprosy control program in Nepal

Though documented history of organized leprosy services are available scantily, establishment of Khokana leprosarium is considered the oldest organized leprosy services in Nepal. Some key milestones of leprosy control activities and programmes are given below.

1960	Leprosy survey by Government of Nepal (GoN) in collaboration with World Health Organization (WHO).
1966	Pilot project to control leprosy launched with Dapsone monotherapy.
1982	Introduction of Multi Drug Therapy (MDT) in leprosy control program.
1987	Integration of vertically shaped leprosy control program into general basic health services.
1991	National leprosy elimination goal was set.
1995	Focal persons (TB and Leprosy Assistants-TLAs) for districts & regions appointed.
1996	All 75 districts were brought on MDT
1999/2000-2001/02	Two rounds of National Leprosy Elimination Campaign (NLEC) were implemented.
2008	Intensive efforts made for achieving elimination at national level
2009	Leprosy elimination achieved at national level
2010	Elimination at national level declared
2011	National strategy was introduced National guidelines was revised
2012-2013	Elimination sustained at national level
2013-2014	Mid Term Evaluation on Strategy 2011-2015
2014-2015	Establishment of Disability Prevention and Rehabilitation Focal Unit

## Major Activities Undertaken During FY 2071/72

### MDT service delivery

During the FY 2071/72, a total number of 3053 new leprosy patients were detected and were put under MDT and 2,461 cases were under treatment at the end of this fiscal year. During this fiscal year, 2800 patients completed treatment and were released from treatment (RFT). Secondary and tertiary care services were provided to the needy and leprosy affected patients through the existing network of referral centers with support of partners. MDT drugs, which are made available by Novartis Foundation through WHO and anti-reaction drugs were freely available and the supply remained uninterrupted in the country throughout the year.

### Capacity Building

The Leprosy Control Division (LCD) organized various capacity building activities during this reporting period. 6 days Medical Officer's course was conducted in Lalghadh Hospital (15 participants) and Far-west Regional Health Training Centre: Dhangadhi (15 participants). The training was technically supported by Anandaban Hospital and Lalghadh Hospital. Skin smear training for 18 lab staffs with technical support from Mid-Western Regional Health Directorate, INF Surkhet, Western Regional Health Directorate Pokhara and INF-Green Pasture hospital.

District Health Offices/Public Health Offices (DHOs/DPHOs) accomplished 2 days basic leprosy training (BLT) for 60 health workers in various districts. Moreover, 5 days Comprehensive Leprosy Training (87 participants), 6 days Medical officer course (52 participants), 14 days long Training to MD Dermatologists (11 participants) and 5 days Complication Management Training to Focal persons (14 participants) were also accomplished in Training centre of The Leprosy Mission Nepal - Anandaban Hospital.

### IEC and advocacy

To enhance community awareness, passive case detection, voluntary case reporting and to reduce stigma, IEC activities were undertaken on a regular basis using electronic and print medias. During the year, relevant messages on leprosy were broadcasted using mass media and posters and leaflets were distributed. Likewise, leprosy messages were disseminated through flex charts which were displayed at district and health facility service centers. Bulletins (*Hamro Sawal*) and leprosy handbook for health care workers were printed and distributed. Likewise, LCD has developed *Lok Dohari* CDs highlighting leprosy message in order to distribute in different districts and partner organizations.

### World leprosy day celebration

62<sup>nd</sup> World Leprosy Day was commemorated on 11 Magh 2071 (25 January 2015) by conducting various activities at national, regional and district levels. The media interaction activity was jointly organized to commemorate the day by LCD, partners and stakeholders.

### Media interaction

On the occasion of the 62<sup>nd</sup> "World Leprosy Day", a media interaction was organized in the premises of Department of Health Services, Ministry of Health on 11 Magh 2071 (25 January 2015). Shanta Bahadur Shrestha, Secretary of Ministry of Health, graced the programme as the chief guest. Dr. Senendra Raj Upreti, Director General, Department of Health Services chaired the program and Dr. Basu Dev Pandey

Director of Leprosy Control Division, welcomed the dignitaries and facilitated the program. The LCD's director made a presentation on various aspects of leprosy and its current situation, strategies and activities conducted and plan to further reduce the disease burden due to leprosy and the role of media in leprosy control programme. The presentation was followed by interaction with media representatives and participants.

### **District and regional review meetings**

Regular trimester (in every 4 months) review meetings were held at district and regional level. During these meetings aggregated data was presented and discussed. Administrative issues were attended too. Activities that are to be undertaken in the future were presented and the details regarding their implementation were discussed and agreed upon.

### **Trimester performance review workshop at central level**

Three trimester review workshops were held at LCD to assess the outcome & monitoring of the program. These meetings were held in the leprosy control division under the chair of the division director. RTLOs, regional medical store chiefs, regional statistical officers, representatives from and Health Management Information System (HMIS) section, INGO partners and WHO attended the workshops. Regional TB-Leprosy Officers (RTLOs) presented and shared the information on leprosy programme situation, problems and issues in their respective regions and districts. Regional medical store chiefs also presented the MDT drugs stocks/demands and problems of their respective regions. Progress made, plans and problems/issues faced by partners were also presented and discussed in the workshops.

### **Health management information system (HMIS)**

Data generation, compilation, aggregation, and report submission were timely throughout the year. Consolidated data was received at every 4 months at districts, regions and center. Feedback on vital issues that had emerged was provided to specific programme area during the review.

### **Web-Based Leprosy Reporting and Management System (WeBLERS)**

WeBLERS was developed in 2013 with initiation of LCD and is a system complimentary to HMIS. WeBLERS training was provided to the DPHOs, DTLOs and statistic officers/ assistants of central, eastern, mid-western and far-western development regions to train them in feeding field level information in this system. This system is based on case-based recording and reporting system of the leprosy patients. The system is also expected to expedite leprosy reporting process and transmission of official communication regarding leprosy from central level to regional and district levels and also vice versa.

### **Early case detection activities (Active Case Detection)**

#### **In general population:**

Active case detection programme was designed and implemented in 20 VDCs of three high leprosy burden districts (Nawalparasi, Rupandehi and Kapilvastu). Prior to the search activities, one-day orientation was conducted to health workers and FCHVs of the concerned VDCs. The search was done by performing a house-to-house search by FCHVs and other health workers by using a pictorial search card and other IEC materials. A team consisting of senior and trained leprosy officers/supervisors from

center, region, district and partners provided technical support to the local health facilities in diagnosing and managing the identified cases. A total of 34 new cases were identified.

**Table 1: Identified cases during active case detection in Nawalparasi, Rupandehi and Kapilvastu**

Districts	No of VDCs	Cases identified		
		MB	PB	Total
Nawalparasi	5	0	3	3
Rupandehi	10	3	0	3
Kapilvastu	5	4	5	9
<b>Total</b>	<b>20</b>	<b>7</b>	<b>8</b>	<b>15</b>

#### In socially disadvantaged groups:

In Bara and Rautahat districts, socially disadvantaged (Terai dalits) and religions minority communities (3 in each district) were identified and active search was carried out. The ethnic groups in the communities who were examined were Mushahar, Sadal, Mawlal, Chamar, Chidimana, Das and Rirahato.

**Table 2: The summarized findings are shown in the table below:**

Districts	No. of communities	Total Population searched	Case Details				Total cases	Female cases	% of MB	% of G2D	% of Female
			Adult		Children (0-14)						
			MB	PB	MB	PB					
Rautahat	3	21429	1	1	0	0	2	2	50%	0	100%
Bara	3	21272	1	4	0	0	5	2	20%	0	40%
<b>Total</b>		<b>42,702</b>	<b>2</b>	<b>5</b>	<b>0</b>	<b>0</b>	<b>7</b>	<b>4</b>	<b>29%</b>	<b>0</b>	<b>57%</b>

#### Active case detection in urban slums

During this reporting year, active case detection was also done in some slums of major urban areas/municipalities of Janakpur and Gulariya. The search methodologies was similar to the search done in the VDCs as mentioned before. The details are given in the table below.

**Table 3: Identified cases during active case detection in urban slums**

Districts	Municipalities	Population searched	Suspects	Case Details				
				MB	PB	Total	Child	Female
Bara	Janakpur	1,22,274	104	1	18	19	11	11
Banke	Gulariya	6,796	50	2	9	11	4	4
<b>Total</b>		<b>1,29,070</b>	<b>154</b>	<b>3</b>	<b>27</b>	<b>30</b>	<b>15</b>	<b>15</b>

Source:LCD, DoHS

#### Contact examination: Patients their family and neighbours

Contact examination is an index case based approach in which health workers and FCHVs visit every household of a newly detected leprosy case and their neighbours using the pictorial card. They examine all household family members and neighbours for any signs and symptoms of leprosy and refer suspected case of leprosy to nearest health institution for confirmation of diagnosis and treatment management. During this year, **65176** family members were targeted and examined.

### Special contact examination

Special contact examination was conducted in four districts viz., Sarlahi, Mahottari, Dhanusha and Sarlahi from 22<sup>nd</sup> June to 9<sup>th</sup> July 2015. 1207 family members were examined out of 23 index cases, which resulted in the diagnosis of 4 new cases (1MB and 3 PB). Similarly, 7240 neighbour's family members were examined i.e. 4 members of the neighbours of the each index case, from which 14 new cases (all PB) were diagnosed. This special contact examination indicates that new case detection rate is high in community than family.

**Table 4: Special Contact examination of patient's and neighbour's family members in 4 districts**

Districts	Index cases	Members examined		Suspected cases referred by FCHVs		Diagnosed cases						Grand Total
						Family			Neighbour			
		Family	Neighbour	Family	Neighbour	MB	PB	S.Total	MB	PB	S.Total	
Sarlahi	94	497	3260	20	65	1	1	2	0	3	3	5
Mahottari	35	224	1417	6	34	0	0	0	0	2	2	2
Dhanusha	59	295	1899	30	29	0	2	2	0	4	4	6
Siraha	49	191	664	12	12	0	0	0	0	5	5	5
<b>4</b>	<b>237</b>	<b>1207</b>	<b>7240</b>	<b>68</b>	<b>140</b>	<b>1</b>	<b>3</b>	<b>4</b>	<b>0</b>	<b>14</b>	<b>14</b>	<b>18</b>

### Orientation on community based rehabilitation

One day orientation program for leprosy affected people and concerned stakeholders were organized in 20 districts to make them aware on United Nations Convention on the Rights of Persons with Disabilities (UNCRPD).

### Interaction with stakeholders on MCBR for leprosy affected people

Interaction programme on Medical and community based rehabilitation (MCBR) was held in all 75 districts. The representative from major stakeholders (Leprosy affected people, other people with disability, local health professionals, representative of VDCs, community leaders, local partner organizations, and disable people's organizations) participated the program and discussed on the issues of MCBR.

### Interaction on Leprosy with clinical specialists & other practitioners

One day interaction program was conducted with clinical specialists and other practitioners in Janakpurdham: Dhanusha (40 participants), Narayangadh: Chitwan (65 participants), Butwal: Rupandehi (49 participants), Nepalgunj: Banke (54 participants) and Dhangadhi: Kailali (47 participants). During the interaction program various aspects of leprosy and its current situation, strategies and activities conducted to reduce the disease burden were discussed. Moreover, the role of clinical specialists and other practitioners in leprosy control programme and leprosy stigma reduction activities were also highlighted.

### Financial support for Transportation to RFT cases

LCD has provided one thousand rupees for each RFT cases to cover the transportation cost after completion of MDT.

### Recording Reporting Update & Leprosy Case Validation Activities

Recording reporting update & leprosy case validation activity was done in Jhapa, Dhanusa, Mahottari and Bara. One case was reclassified from MB to PB in Rautahat and one recycle case was found in Bara.

Four over reporting cases were found in Sarlahi district. These results urge programme managers to continue such update and validation activities in other districts in future too.

### **Skin camps**

This camp is an approach to screen and identify/detect leprosy cases early in areas with high disease burden and other areas. A team consisting of dermatologists, trained health workers and leprosy focal persons conducted the camps in the local health facility. FCHVs and other health workers are mobilized and IEC activities were also done to inform community people about the camp. During this fiscal year, 39 such camps were conducted in various districts.

### **School health education**

This activity targets mainly secondary level school students. The main objective of this activity is to make students and teachers aware about early signs and symptoms of leprosy, benefits of early treatment and options of treatment available at treatment facilities. During this FY 105, schools were given health education against targeted 185 schools.

### **Publications**

During this reporting year, leprosy control division published its annual report 2070/71 (2013/14) containing the salient features of the current leprosy situation, activities undertaken during previous year, achievements and obstacles faced by the program.

National operational guideline has been developed and 500 copies printed which were distributed to the health workers which provides technical as well as programmatic information on leprosy including disease surveillance, suspecting of leprosy cases etc. In addition, *Hamro Sawal*, quarterly bulletins of LCD were also published twice in the months of *Magh & Ashad*.

### **Disadvantaged group program**

This activity was conducted to increase the access of unreached/marginalized communities (Dalits, Janajatis and other disadvantaged groups) to leprosy control activities and services. The communities were educated on stigma reduction and motivation for active participant in leprosy control activities. One day orientation was done on signs & symptoms to suspect the cases and the participants were mobilized in the communities to suspect potential cases. During this fiscal year this activity was conducted in 180 places of different districts. In some places and the community identified suspected cases and referred them to nearby health institutions for diagnosis & treatment.

### **Supervision and monitoring**

To provide technical guidance to health workers at peripheral health facilities and district health offices, supervisory visits were undertaken regularly by the staff of LCD, regional health directorate (RHD) and district health offices (DHO). Apart from the budget made available by GoN for this activity, additional funds were also provided by WHO, NLR and other supporting partners. Additional technical support through supervisory visits was also provided by the staff of WHO, NLR, NLT, INF, Anandaban hospital & other supporting partners.

### **Involvement of people affected by leprosy in leprosy programmes**

The leprosy control division initiated and supported in forming the network of people affected by leprosy in Nepal at national level. This initiative brought several organizations of people affected by leprosy together and empowered them to widen their involvement and participation of people affected by leprosy in various leprosy related programmes and activities. This initiative was highly appreciated by the people affected with leprosy and the partners working in leprosy in Nepal.

### **On-site coaching, education and management at local level in leprosy endemic districts**

On-site coaching was organized in Rupandehi and Kapilvastu districts. Personnel from SHPs, HPS and PHC met at Ilaka level to compile and aggregate data, discuss problems faced in the field visits and to share their experiences. Facilitator from LCD, district regional health directorates and supporting partners assisted the staff in these meeting.

### **Coordination meeting with partners**

During this fiscal year, the leprosy control division organized/held coordination meetings among the partners working in leprosy In Nepal. Two such meetings were held in LCD with participation from partners like WHO, NLR, Leprosy Mission Nepal (LMN), Nepal Leprosy Trust(NLT), International Nepal Fellowship (INF), BIKASH Nepal, Partnership for New Life(PNL), Nepal Leprosy Fellowship (NLF) Nepal Leprosy Relief Association (NELRA), Sewa Kendra, Shanti Sewa Griha, Rehabilitation, Empowerment And Development (READ) Nepal, IDEA Nepal and government institutions.

### **Surveillance**

An initiation has been taken to collect detail information on leprosy cases from low endemic districts. A surveillance form has been designed and included in new programme guidelines. The districts are expected to collect detail information about the cases by using the surveillance form which will help generate socio-demographic and epidemiological information. Further strengthening of this system is needed to collect timely and quality information in the coming years.

### **Reporting of relapse cases**

Though relapse of leprosy cases after completing a standard and recommended course of treatment is quite rare, the programme reported 8 laboratory confirmed cases of relapse. Anandaban hospital has been serving as a sentinel surveillance site of drug resistance in Nepal. Any suspected case of relapse should be referred to this site for confirmation of the resistance and relapse.

### **Leprosy Post Exposure Prophylaxis (LPEP) for leprosy contacts**

Orientation and capacity building training on Leprosy post exposure prophylaxis to health workers was conducted in Dhanusa, Parsa, Jhapa, Banke and Morang districts. The LPEP aims to test the feasibility and effectiveness of a single dose rifampicin as leprosy post-exposure prophylaxis. Rifampicin is given to contacts of newly diagnosed leprosy patients to decrease their risk of developing leprosy. LPEP programme had been already initiated in Morang, Jhapa and Parsa districts and this service is planned to be extended in other districts like Dhanusa, Kapilvastu, etc in the years to come.

The inauguration of LPEP in Morang, Sivsani Jahada VDC, was done by giving first dose of rifampicine by honorable Secretary Mr. Shanta Bahadur Shrestha from MoH and Dr. Basu Dev Pandey, Director of LCD on Jestha 12, 2072 (May 26. 2015).

## **Activities supported by different partners**

### **Activities Supported by WHO**

- MDT drug supply
- Technical support for leprosy control programme
- Supervision and monitoring
- Capacity building activities
- Leprosy day observation

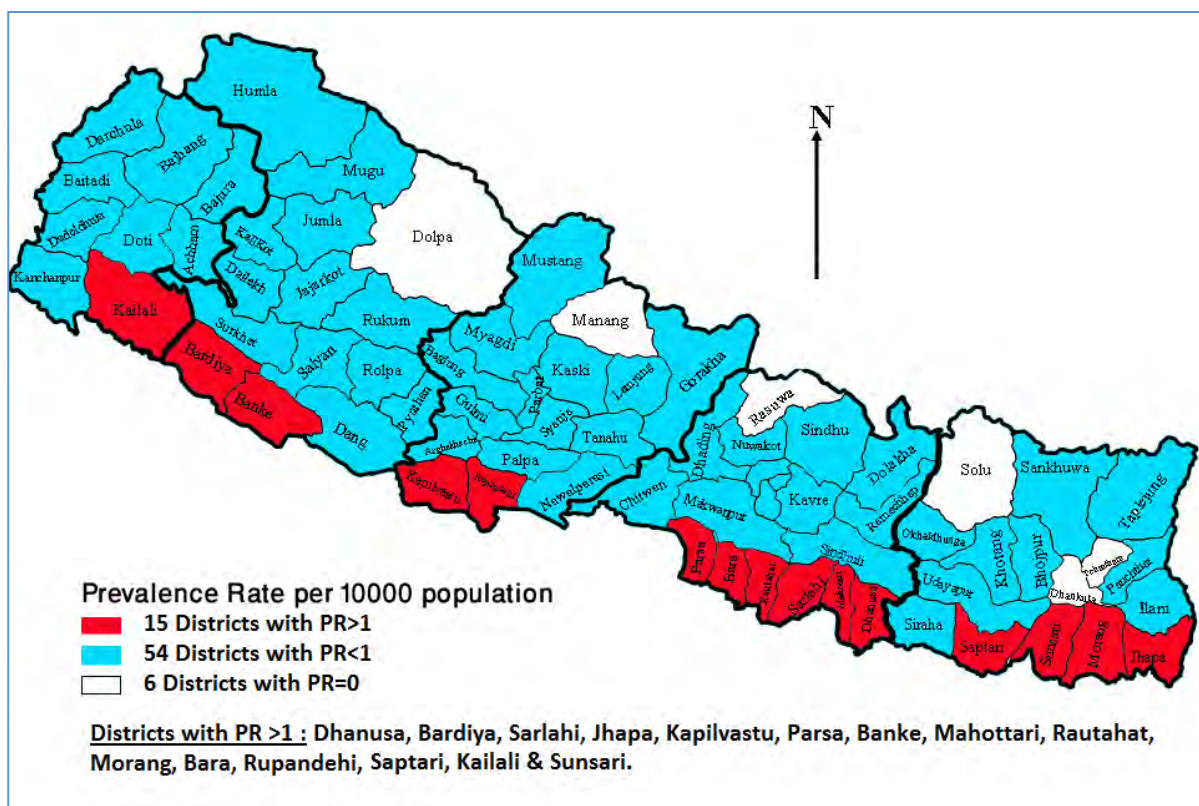

- Active case detection programme
- Community awareness programme

**Activities supported by partners (NLR, LMN, NLT, INF etc.)**

**Following activities were carried out in high endemic districts with the assistance from supporting partner/s:**

- Community awareness & participatory program at different level.
- Orientation of different community member's
- Provision of Primary, secondary and tertiary care through referral centers.
- Capacity building activities for government health staff.
- Technical support through joint supervision and monitoring.
- POID & Rehabilitation service.
- Formation of self care and self help groups of people affected by leprosy or people living with disabilities due to leprosy.

**Figure 1: District-wise leprosy prevalence in FY 2071/72 (2014/15)**

**Prevalence**

At the end of the FY 2071/72 (2014/15), there were 2461 leprosy cases receiving MDT in the country, which makes the registered prevalence rate of 0.89/10,000 populations at national level. This rate is well below the cut-off point of below 1 case per 10,000 population set by WHO to measure the elimination of leprosy as public health problem. Thus the national programme has sustained the status of elimination of leprosy as public health problem achieved at the end of 2009. There is minimal

increase in PR as compared to previous year (i.e. 0.83 in FY 2070/71). Six districts reported zero prevalence rate.

Region wise, the highest number of leprosy cases under treatment was reported from the central development region with 956 cases (38.85% of total) followed by eastern development region with 565 (22.96%) cases under treatment. Though far western developmental region reported the least number (178) and share (7.23%) of total cases under treatment, the registered prevalence rate (RPR) was the highest in the eastern region (0.94/10,000 population) followed by central region (0.93/10000 population). Region wise registered prevalence rate are shown in the table below.

**Table 5: Region-wise distribution of registered cases and prevalence rates (RPR) in FY 2071/72**

Regions	No. of registered prevalence cases at the end of the year				
	MB	PB	Total	%	PR/ 10,000
EDR	345	220	565	22.96	0.94
CDR	581	375	956	38.85	0.93
WDR	330	95	425	17.27	0.84
MWDR	242	95	337	13.69	0.91
FWDR	143	35	178	7.23	0.66
<b>National</b>	<b>1641</b>	<b>820</b>	<b>2461</b>	<b>100</b>	<b>0.89</b>

Source:LCD, DoHS

**Figure 2: Region-wise under treatment cases FY 2071/72**

During this reporting year, 15 districts reported PR more than 1 case per 10,000 population. The number of districts has decreased than previous year reporting of 16 districts with PR>1. All these 15 districts are in the Terai regions bordering Bihar and UP states of India. District wise, Dhanusa reported the highest PR of 2.48/10,000 population after Bardiya, Sarlahi, Jhapa and others. The figure below shows the district wise PR in endemic districts.

**Figure 3: Districts with PR above 1 per 10,000 population**

**New case detection**

Detection of new cases signifies ongoing transmission of leprosy and the rate measured per hundred thousand populations helps monitoring the progress towards control. 3053 new leprosy cases were detected during this reporting year (2071/72), which has slightly decrease in number of cases. Region wise, the highest number was reported from CDR with 1209 cases followed by EDR, WDR, MDR and FWDR with 807, 447, 364 and 226 new cases respectively.

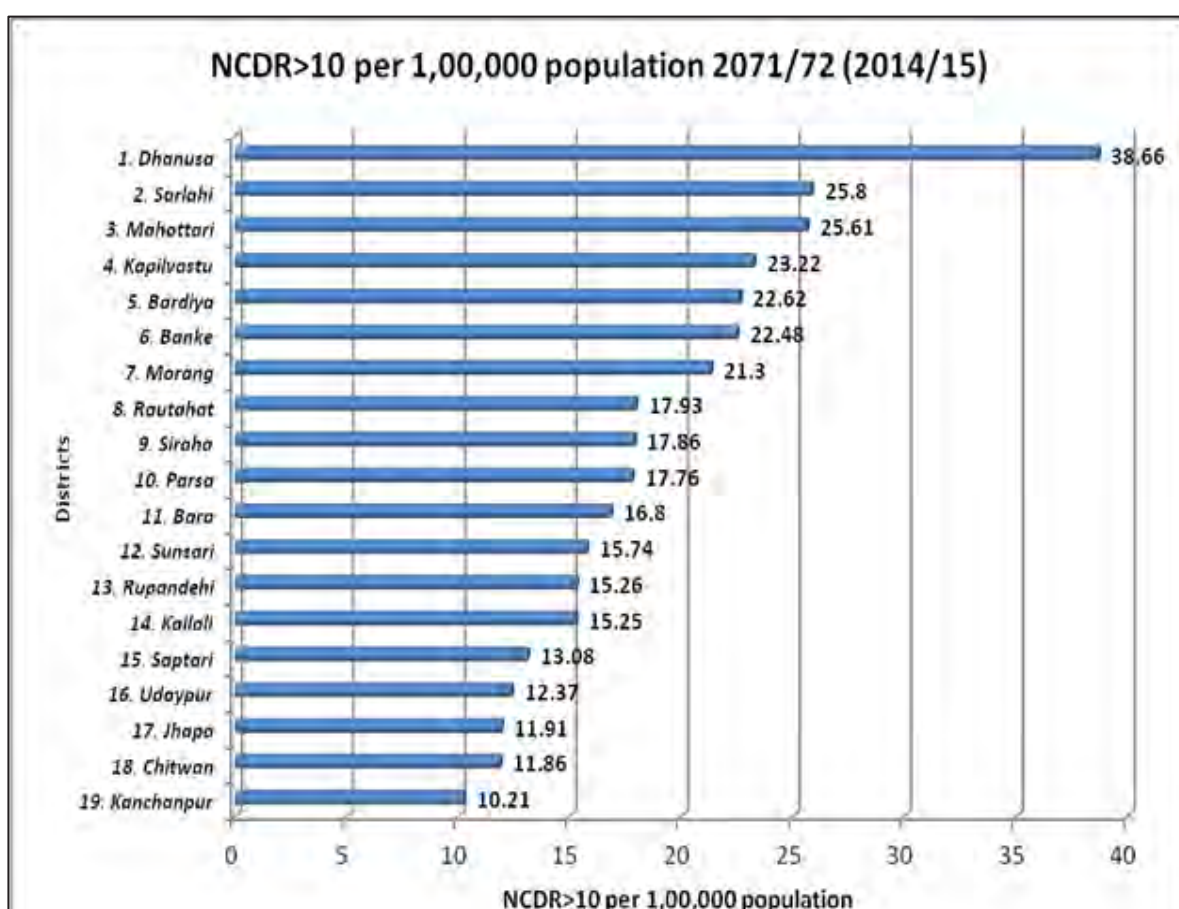

**Figure 4: Region-wise new cases in FY 2071/72**

The new case detection rate (NCDR) per 100,000 populations for FY 2071/72 was 11.01 nationally, whereas EDR reported the highest rate among the regions with NCDR 13.43. More than 86 percent of the new cases were detected from Terai districts alone.

By type, 53.42% of these new cases were Multi Bacillary (MB) and the rest were Pauci Bacillary (PB). This proportion has constantly remained around fifty percent for the last several years, however MB cases had slightly increased this year. By region, western region has the highest MB proportion (63.76%) followed by Mid-western region (62.64%) and the lowest proportion was seen in Central region with 48.06%. Nearly one third (36.03%) of the new cases were female. Female proportion had remained consistently around thirty percent for the last 5 years (from 2065/66-2071/72). Likewise, children constituted 7.73% of the total new cases detected in this reporting year which has also increased as compared to previous fiscal year record (i.e. 6.33%). The increase in child cases signifies ongoing transmission of leprosy is still prevalent in the community.

**Figure 5: Districts which have more than 10 NCDR per 100,000 population FY 2071/72**

District wise, nine mountain and hilly districts reported zero new cases during this year. But there are 19 districts which have more than 10 NCDR. Out of them; Dhanusa has the highest NCDR (i.e. 38.66/100,000).

Figure 6: NCDR Trend per 100,000 population 2065/66-2071/72

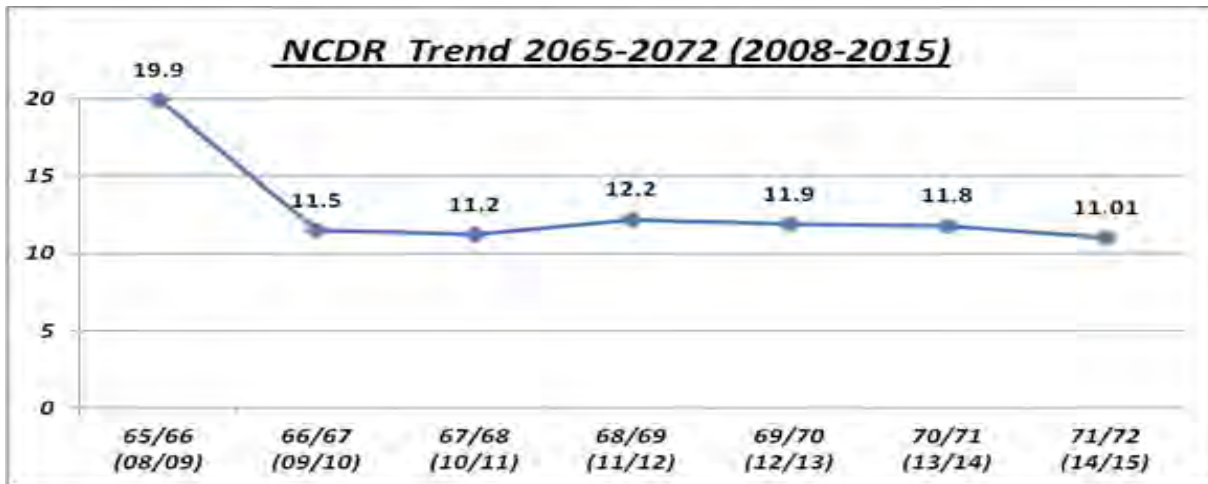

Table 2: New cases and proportions among new

Region	New Cases			NCDR/ 100,000	Proportion among new cases		
	MB	PB	Total		Female	Child	G2D
EDR	399	408	807	13.43	319(39.52%)	61 (7.56%)	47 (5.82%)
CDR	581	628	1209	11.82	366 (30.27%)	128 (10.59%)	48 (3.97%)
WDR	285	162	447	8.82	222 (49.66%)	15 (3.36%)	8 (1.79%)
MWDR	228	136	364	9.75	143 (39.29%)	25 (6.87%)	14 (3.85%)

Source:LCD, DoHS

**Trend in new case detection and prevalence**

Both the new case detection and registered cases have not much changed since last six years. Looking into the PR trend of last six years, it was suddenly going down in 2066/67 and has consistently maintained the elimination status since last six years.

Figure 7: Trend in NCDR and PR from 2064/65-2071/72

Region wise, Eastern region reported the highest prevalence rate (0.94/10,000 population) followed by Central, Midwestern, Western and Far Western regions respectively. Three regions (Eastern, Central and Midwestern) have observed an increase in the trend as compared to the last reporting year however Western region's PR rate is similar to that of previous year. Six-year trend in registered prevalence rate by region is given in the table below.

**Table 3: Region wise trend in prevalence rate from 2065/66 – 2070/71**

Regions	2066/67	2067/68	2068/69	2069/70	2070/71	2071/72
EDR	0.92	0.87	0.89	0.90	0.93	0.94
CDR	0.79	0.82	0.86	0.87	0.80	0.93
WDR	0.68	0.64	0.70	0.76	0.84	0.84
MWDR	0.48	0.72	0.92	0.80	0.81	0.90

### Relapse cases

The information of relapse of leprosy cases are mentioned in below table. This fiscal year, relapse cases had reduced as compared to last fiscal year. Anandaban hospital is only one designated sentimental site for lab confirmation for relapse case.

**Table 4: Trend in relapse cases for last three fiscal years**

2067/68	2068/69	2069/70	2070/71	2071/72
20	25	14	11	8

### Disability

If not detected early and not timely and completely treated, leprosy variably results into disability of varied degree and type. Thus early detection and timely and complete treatment is very crucial for prevention of disability due to leprosy. Proportion of Grade II Disability (G2D) among new cases and rate per hundred thousand populations are major monitoring indicators of early case detection. During this reporting year, 135 cases of visible disability (G2D) were recorded and its proportion among new cases was 4.42% nationally and by region it was the highest in Far Western regions (7.96%) and the lowest in Western region (1.79%).

**Figure 8:Region-wise proportion of G2D among new cases in 2071/72**

The G2D proportion among new cases has been fluctuating within 2 to 4 percent since last 6 years and it has increased this fiscal year as compared to last year's report.

**Figure 9: Fig 7: Trend in proportion of G2D among new cases from 2066/67 to 2071/72**

**Child cases**

A total of 236 new child cases were diagnosed during the Fiscal Year 2071/72. The proportion of child cases among new cases is 7.73% for this fiscal year. The trend reflects that child proportion is fluctuating and has increased this fiscal year as compared to last year.

**Figure 10: Trend in child Proportion among new for last 6 years (2066/67-2071/72)**

**Outcome of the registered cases**

A total of 2800 (MB=1490 and PB=1310) cases had completed treatment and were released from treatment. The remaining cases are undergoing treatment. Total transferred out cases were 32, number of defaulter cases was 38 and other deductions were 146 (other than defaulters and transferred outs), which include death, double registration, recycle, foreign cases and wrong diagnosis. The number of patients who restarted MDT in the current year was 73. (See annexes for detail information on district, regional & national level data for segregated data).

**Table 5: Number of cases released from treatment (RFT), by region in 2071/72**

Region	MB	PB	Total

**Some reasons of decrease in new cases and prevalence**

A field verification and validation of records and cases were performed in the current fiscal year. The retrospective data verification and case validation activity was conducted in endemic districts of terai.

- Over holding of cases/RFT due
- Recycled cases/double registration
- Local address given to cross border cases

**Impression**

- Sustained elimination but overall prevalence has slightly increased as compared to last fiscal year
- 15 districts have prevalence above 1 case/10,000 populations which was in 16 districts last year
- Increased proportion of Grade 2 Disability
- Good coordination exists with partners

**Strength, weakness, challenges and way forward****Strength**

- Commitment from political level – Minister’s commitment towards Bangkok Declaration for Leprosy
- Trained manpower serving in all health facilities.
- Accessible network of public health and services provided by partner organizations.
- Free MDT and other services
- Regular review meetings
- Uninterrupted MDT supply
- Good communication and collaboration among supporting partners
- Participation of Leprosy affected in the national programme has been improving

- Steering, coordination and technical committees are formed in last F/Y and conducting meeting in regular basis.
- Focus has been given to medical & community based rehabilitation (MCCR)

### **Weaknesses**

- Low priority to leprosy program at periphery.
- Low motivation of health workers
- District and regional focal persons are overburdened with TB programme
- Very few activities on rehabilitation
- Inadequate training and orientation (eg: CLT, BLT, CBR) for health workers, focal persons and managers
- Poor institutional set-up and inadequate human resources at central level

### **Challenges**

- To sustain the achievement of elimination at national level and further reduce disease burden
- To maintain access/quality of services in low endemic mountain & hilly districts.
- To strengthen surveillance, drug supply, logistic, information, and job oriented capacity-building for general health workers and an efficient referral network.
- To assess the magnitude of the disability burden due to leprosy.
- To further reduce stigma and discrimination against affected persons and their families.
- Information sharing and integration of leprosy services in private sector, including medical colleges.
- Possibility of recycled cases registered in medical colleges, central hospitals & referral centers

### **Future course of action and opportunities**

- Policy related issues to be addressed by MoH.
- Implementation of national strategy within ministry and through partners.
- Use of/follow national operational guideline as per new strategy.
- Intensify IEC activities to raise community awareness on leprosy: early diagnosis and treatment, prevention of disability, rehabilitation, and social benefits.
- Strengthen early case detection activities- focus in some VDCs of high endemic districts.
- Establish and strengthen cross notification and information sharing on cross border cases.
- Promote community participation in National Leprosy Elimination Program.
- Improve access of unreached, marginalized and vulnerable groups to leprosy services.
- Strengthen greater and meaningful involvement of people affected by leprosy in leprosy services and programmes.
- Capacity building of health workers for early case detection, management and community based rehabilitation.
- Strengthen functional integration of leprosy services in remaining areas
- Use of available resources and infrastructure for other services, eg: lymphatic filariasis, geriatrics, diabetes and other NTDs & disabilities.
- Operational research studies in high endemic districts and pockets on specific issues for quality services
- High time to start chemoprophylaxis and immunoprophylaxis (one, either or both) to protect the contacts and break the transmission

- Vocational education and training and income generation activities to people affected by leprosy and their families
- Ensure resource mobilization, partnership and participation of local government and collaboration with new partners, institutions and individuals for leprosy services and rehabilitation
- Strengthen capacity of leprosy control division for effective implementation of national policy and strategies and quality services
- Innovative activities for efficient utilization of resources, services and management Efficient use of health management information system and strengthening e-health
- Strengthen surveillance in low endemic districts and areas
- Evidence based (laboratory confirmed) reporting of relapse through utilization of available resource
- Address cross border issues
- Sustaining the newly initiated program and service e.g. satellite services, interaction with medical college hospitals, joint monitoring, training & observation in partnership approach with the Government.
- Strengthening of referral hospital (efficiency, quality service in zonal hospitals that were handed over) & proper referral mechanism.
- Web based Leprosy reporting and management system has been developed to support HMIS in recording and reporting of leprosy patients.

## 4.11 HIV/AIDS and STI

### 1.1 Background

With the first case of HIV identification in 1988, Nepal started its policy response to the epidemic of HIV through its first National Policy on Acquired Immunity Deficiency Syndrome (AIDS) and Sexually Transmitted Disease (STD) Control, 1995 (2052 BS). Taking the dynamic nature of the epidemic of HIV into consideration, Nepal revisited its first national policy on 1995 and endorsed a latest version: National Policy on Human Immunodeficiency Virus (HIV) and Sexually Transmitted Infections (STI), 2011. Based on the latest national policy, the country now is implementing its fourth National HIV/AIDS Strategy (2011-2016). A new national strategy for 2016-2021 is currently under the process of formulation which will pave the ways to achieve ambitious global goals of 90-90-90.

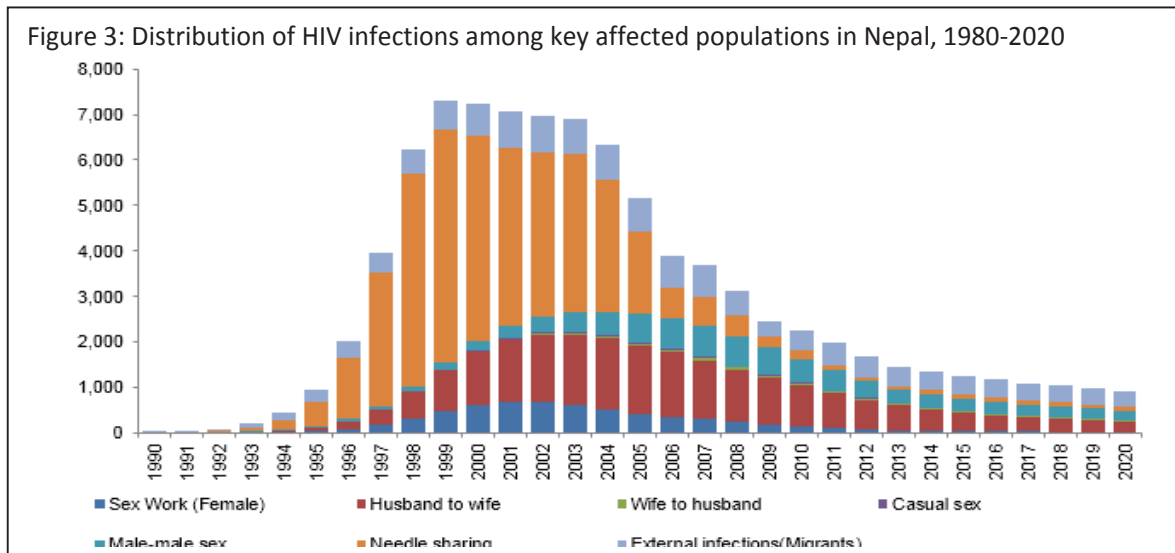

#### 1.1.2 Overview of the Epidemic

Starting from a ‘low level epidemic’ over the period of time; HIV, in Nepal, evolved itself to become a ‘concentrated epidemic’ among key affected populations (KAPs), notably with People who Inject Drug (PWID), Men who have Sex with Men (MSM) and Transgender (TG) People. A review of the latest epidemiological data, however, indicates that the epidemic transmission of HIV has halted in Nepal (**Error! Reference source not found.**). The trend of new infections is evidently taking a descending trajectory, reaching its peak during 2001-2002. The epidemic that peaked in 2000 with almost 8,000 new cases in a calendar year has declined to about 1493 new HIV infections in 2014. This decline is further accompanied by the decreasing trend of estimated new HIV infections occurring annually in Nepal as shown in **Error! Reference source not found.** 1 below.

This prevalence has dropped from 0.42% (highest level projected in 2004), and is expected to maintain a plateau at 0.2% from 2014 through 2020 with current level of efforts. Along with that, the new infections have reduced significantly in the last one decade (7,500 in 2003 to 1493 in 2014: about a reduction by 80%). Overall, the epidemic is largely driven by sexual transmission that accounts for more than 85% of the total new HIV infections. Making up 5% of the total estimated population of 39.249, there are about 1,968 children aged up to 14 years are living with HIV in Nepal in 2014, while the adults aged 15 years and above account for 95%. With an epidemic that has existed for more than two decades, there are 8,413 infections estimated among population aged 50 years and above (21.4%). By sex, males account for two-thirds (64.8%) of the infections and the remaining more than one-third (35.2%) of infections are in females, out of which around 82% are in the reproductive age group of 15-49 years (**Error! Reference source not**

found.2).The male to female sex ratio of total infection came down from 2.15 of 2006 to 0.54 for the year 2014.

Among the KAPs of HIV aged 15-49, the HIV infections are distributed as justify heterosexual transmission is the major routine of transmission in the total pool of HIV infection in Nepal. The contribution from all bands of KAPs are similar in the period of projection 1995-2020, only the level is varying.

In 2014, 95% of the total infection distributed among the population having age group 15 years and above. The estimates indicate that 26% of total infections are distributed among PWID (8%), MSWs, TG (3%) and their clients (6%), MSM (8%), and FSWs (1%) (Error! Reference source not found.4). These apart, low risk males including MLM account for 40 %and low risk females account for 34% of the remaining infections.The estimated number of annual AIDS deaths of all ages is estimated to be around 2,576 for 2014.

Apart from ministries, a number of District Development Committees (DDCs) have been allocating resources for the issue of HIV including for maintenance of human resources of DACC and HIV focal person for many years. Many Village Development Committees (VDCs) particularly of Far West and Mid-West have also contributed their resources for the wellness of families affected by HIV.

Civil societies have also played pivotal roles in the national response. Civil societies, through empowerment of KAPs, have been playing instrumental roles in prevention, treatment care and support as well as bringing about changes in legal and policy environment through advocacy.

The national response to HIV in Nepal is equally supported by external development partners by providing a substantial amount of resources required for combating HIV. The Global Fund, bilateral agencies, namely United States Agency for International Development (USAID) and Germany's Agency for International Development (GIZ), UN agencies, pooled fund partners of NHSP-II (the World Bank, Department for International Development (DfID), Australian Agency for International Development (AusAID), KfW and AIDS Health Care Foundation (AHF) through Sector Wide Approach (SWAp) on HIV/AIDS and INGOs are the external sources that are contributing to the national HIV response.

## **2: Policy Environment and Progress in National HIV Response**

### **2.1 Introduction**

More than two decades of the HIV epidemic has transpired Nepal to respond with a number of policy initiatives. These policy responses have come cross cuttingly from the health sector as well as other development sectors aiming at creating an enabling policy environment for the containment of HIV as well as mitigation of the epidemic. Notable policy developments taken for guiding the national response to HIV are spelled out here.

#### **The National Policy on HIV and STI, 2011**

The National Policy on HIV and STI, 2011 accords HIV and AIDS a high priority in the national development issues. It emphasizes for a multi-sectoral, decentralized and inclusive response based on "three ones" principle that premises upon: a) "One agreed HIV/AIDS Action Framework" that provides the basis for coordinating the work of all partners, b) "One National AIDS Coordinating Authority", and; c) "One agreed country level Monitoring and Evaluation System". Thus it is through this adherence to the "three ones" principle the nation strives to achieve joint effort and partnership between government, non-government, private sector and civil society.

#### **The National Health Sector Plan (NHSP II 2010-2015)**

The National Health Sector Plan (NHSP II 2010-2015) embraces a plan to halt or reverse the HIV prevalence and it is also committed to scale up HIV related intervention through the health sector under the essential health care package within the broader framework of communicable diseases. It has also recognized the need to scale up sexual and reproductive health (SRH) services and integrate HIV into SRH services.

#### **National HIV /AIDS Strategy 2011-2016**

The current National HIV /AIDS Strategy (2011-2016), the fourth national strategy, with the aim of meeting the national goal of achieving universal access to HIV prevention, and; treatment care and support, has set the three objectives: i) to reduce HIV infections by 50% by 2016, ii) to reduce HIV-related deaths by 25% by 2016, and; iii) to reduce new HIV infections in children by 90% by 2016. The current National Strategy embraces two critical programme strategies: i) HIV prevention and ii) treatment care and support for infected and affected. Apart from these programme strategies, four major cross cutting strategies; namely:

i) health system strengthening, ii) legal reform and human rights, iii) community system strengthening; and iv) strategic information have been built into this current National HIV/AIDS to ensure the achievement of programmatic outcomes. This National Strategy subscribes to the guiding principles of universal access, right-based approach, meaningful involvement of people living with HIV, and multi-sectoral response. The formulation process of new HIV strategy for 2016-2021 has already been initiated.

### **Other Sectoral Plan and Policies**

A number of sectoral plans and strategies such as Education for All, School Sector Reform Plan (2009-2015) and National Youth Policy have envisaged their complementary roles in an effective national response to HIV. Several other policies; notably National Policy on HIV in the Workplace (2007) and National Drug Control Policy (2006) have reinforced the national HIV response working together with that National Strategy (2011- 2016). These apart, enactments of the 2006 Gender Equality Act, and the 2007 Human Trafficking and Transportation (Control) Act have also yielded reinforcing impacts in the ushering of an inclusive environment to guide the national response to HIV.

### **Key Guidelines and Documents**

With the aim of effective implementation of the national response, a number of national guidelines also have been put into operation. These include "The consolidated guideline on treating and preventing HIV in Nepal, 2014" , National Guidelines on Monitoring and Evaluation of HIV Response in Nepal, 2012, and National Guidelines of Case Management of Sexually Transmitted Infections (STIs) 2014.

## **2.2 Policy related activities/highlights from FY071/072**

Moving along the lines of National Strategy (2011-2016), a couple of milestone activities have been taken in this fiscal year that helped ensure the national HIV response is abreast with the latest scientific advancements as well as fine tuned to the latest dynamics of HIV in the country. These milestones are (a), Nepal HIV Investment Plan (NHIP 2014-2016) and (b) the Midterm Review of Implementation toward achieving objectives of National HIV/AIDS Strategy, (2011-2016). Though the Midterm Review of National Strategy was not a policy initiative by any means but it fed into NHIP. This apart, following the recommendation of the Midterm review, aiming at elimination of mother to child transmission, Nepal takes a major transformative measure this fiscal year and adheres to Option B+ for providing lifelong ART for all identified pregnant women and breastfeeding mothers with HIV, regardless of CD4 along with prophylaxis treatment for their infants as well.

### **Nepal HIV Investment Plan 2014-2016 (NHIP 2014-2016)**

Built on the principles of UNAIDS' Investment Framework and that of National Strategy 2011 -2016, the Nepal HIV Investment Plan, 2014-2016 serves as a compelling case for strategic investments in Nepal's response to HIV. With the inclusion of a three year operational plan and budget, NHIP will guide the implementation of National Strategy, 2011- 2016 for the period of 2014 -2016. This NHIP aims to ensure that the resources are concurrent with Nepal's HIV program objectives and goals, and contribute to the effectiveness and efficiency of the entire national HIV response.

### **Other Key Guidelines**

National guidelines on a monitoring system for HIV Drug Resistance (HDR) Early Warning Indicators 2014 (EWIs) have been prepared and put into operation during the Fiscal Year of 2071/72. A single and comprehensive document of consolidated guidelines -encompassing treatment care and support, HIV testing and counseling (HTC) and PMTCT, is prepared under the leadership of NCASC with support of other organizations such as World Health Organization (WHO), UNICEF and Saath-Saath Project.

### **3: HIV Testing and Counseling and STI Management**

#### **3.1 Introduction**

Pursuant to its goal of achieving universal access to prevention, treatment care and support, HIV Testing and Counseling (HTC) has been a strategic focus in the national response to HIV ever since Nepal started its response to HIV. The first ever HTC was started in 1995 with the approach of voluntary Client-Initiated Testing and Counseling (CITC). Moving further from its previous approach of voluntary CITC, the national HIV testing and counseling program has been later widened to include Provider-Initiated Testing and Counseling (PITC), as well as CITC as crucial components of the nation's fight against HIV. With the expansion of HTC sites across the country, there has been parallel development. National Guidelines on HTC was formulated in 2003 and updated in 2007, 2009 and 2011 and later on the separate guideline is merged as comprehensive guideline on treating and preventing HIV in 2014. Human resources for HTC have been trained for public health facilities as well as NGOs-run HTC sites.

Along with HTCs, detection and management of Sexually Transmitted Infections (STIs) has been also a strategic focus and integral part of the national response to HIV ever since Nepal started its response to HIV. Over the years, STI clinics have been operating across the country maintaining their linkage to KAPs on the basis of the National STI Case Management guideline which was developed in 1995 and also revised in 2009 and 2014.

#### **3.2 Key strategies and activities**

##### **HIV Testing and Counseling**

The National Strategy (2011 -2016) envisions rapid scaling up of testing services and mobile HTC services in a non duplicated manner in targeted locations in a cost effective way to ensure maximum utilization with strong referral linkage to higher level for treatment, care and support. The National Strategy further foresees that the public health system will gradually take up HIV testing and counseling as integral part of the government health care service by 2015.

Pursuant to key actions of the National Strategy, the Government of Nepal is promoting the uptake of counseling and testing among KAPs through targeted communications and linkages between community outreach and HTC. Likewise Provider-Initiated Testing and Counseling (PITC) has been taken to STI clinics, antenatal Clinic (ANC), child birth, post partum, Family Planning, and TB services. Thus in this context, the national response, over the years, has seen an expanding coverage of HTC with HTC severing as an entry point to:

- Early access to effective medical care (including ARV therapy, treatment of opportunistic infections(OIs), preventive therapy for tuberculosis and other OI and STIs);
- Reduction of mother-to-child transmission of HIV;
- Emotional care (individual, couple and family);
- Referral to social support and peer support;
- Improved coping and planning for the future;
- Normalisation of HIV in society (reduction of stigma and discrimination);
- Family planning and contraceptive services; and
- Managing TB/HIV co-infection.

##### **Detection and Management of STI**

In the context of detection and management of STI, the standardization of quality STI diagnosis and treatment up to health post and sub health post level as a part of primary health care services has been a

key strategy in the national response to HIV. This strategy further foresees standardization of syndromic approach with the referral for etiological treatment when needed.

Strengthening documented linkages (referral of follow up mechanisms) between behavioral change communication (BCC) services and HIV testing and counseling, including strengthening of linkage between HTC and STI services has been one of key actions in the context of the concentrated epidemic of Nepal.

### 3.3 Progress and Achievement

#### HIV Testing and Counseling

Currently there are 235 HIV Testing and Counseling sites that include 103 non-government sites and 130 government sites operating in the country also maintaining their forward linkages with KAPs as well as backward linkages with ART sites as well as PMTCT sites. The trend of programmatic data of people who were tested and counseled over the last three years is showed in Table 1

Table 1: Service Statistics HIV Testing and Counseling for the period of BS 2069/70-2071/72

Indicators	2069/70	2070/71	2071/72
Total tested for HIV	272,926	297,840	2,64,081
Total Positive reported	2,411	2,228	1,480
Cummulative HIV reported cases	22,994	25,222	26,702

Source: NCASC

### 3.4 Key challenges/Issues and recommendations

Issues	Recommendations
Huge data gap is found in HIV program especially the report from hospitals (Regional/Sub regional, zonal and district) is yet to be covered in the electronic HMIS system.	Coordination between DPHO and hospitals should be strengthened.
All HTC sites under NGO setting are not covered by HMIS database system. The reporting from the working NGO yet to be covered in the electronic HMIS system.	Coordination between DPHO or HMIS and NGO should be strengthened. All the working NGO must be enlisted in the system. So that, the total testing numbers could be incorporated.
Low HIV testing coverage among KAPs has been a long standing challenge in the response to HIV. The problem of low coverage is most prominent for the returning labor migrants among all KAPs.	Effective roll out of Community-led HIV Testing and Treatment Competence (CTTC) approach with strong monitoring should be in place. Provide testing facilities at transit points as well as destinations of migrant population.
Inadequate staff members especially of trained HIV counselors in government setting specially in PMTCT site.	Ensure adequate trained HIV counselors in a sustainable manner in all relevant service sites.
Consistently zero counseled and tested in among some service sites over the years.	Conduct a review for viability of such sites.
The service gap among the key population that was supported under pool fund	The service need to be revived to increase the testing coverage among the key population.

---

## 4: Prevention of Mother to Child Transmission

### 4.1 Introduction

Nepal started its Prevention of Mother to Child Transmission (PMTCT) program in 2005 with setting up three of sites at: 1) B. P. Koirala Institute of Health Science (BPKIHS), Dharan; 2) Maternity Hospital, Kathmandu and; 3) Bheri Zonal Hospital, Nepalgunj. Moving further in this direction, apart from the free provision of maternal ART and prophylaxis for infants, the National Guidelines on PMTCT have been developed and updated periodically. Human resources especially from maternal and child health care have been trained in alignment with PMTCT services. Along with that the preparation and updating of training manuals have taken place. This apart, HIV counseling and screening has been incorporated into maternal and child health care in the form of PITC. Tailoring to the needs of HIV infected infants as well as HIV exposed babies; counseling and information on infant feeding have been adjusted accordingly.

### 4.2 Key strategies and activities

Taking Mother-to-Child Transmission (MTCT) is a potentially large source of HIV infections in children in Nepal into consideration, National Strategy, aims at reducing 90% of new infections among children by 2016 compared to the baseline value of 2010. In the cognizance of a very low coverage of PMTCT, the current National Strategy envisages the PMTCT programme to be integrated and delivered through Reproductive Health (RH) and Child Health Services. The National Strategy also foresees the integration of PMTCT into RH Programme placing it under the aegis of Family Health Division (FHD). The National Strategy has structured the PMTCT programme around the following comprehensive and integrated four prong approach:

- Primary prevention of HIV transmission
- Prevention of unintended pregnancies among women living with HIV
- Prevention of HIV transmission from women living with HIV to their Children, and
- Provision of Treatment, Care and Support for women living with HIV and their children and families.

Pursuant to the last two elements of the four prong approach, a package with the entailment of the following services are being provided to pregnant women:

- HIV testing and counseling during ANC, labour and delivery and postpartum
- Provision of ARV drugs to mothers and infected with HIV infection
- Safer delivery practices
- Infant feeding information, counseling and support, and
- Referrals to comprehensive treatment, care and social support for mothers and families with HIV infection.

With the collaboration of community based organization, the government of Nepal launched Community-based Prevention of Mother to Children Transmission (CB-PMTCT) program in 2009 taking PMTCT services beyond hospitals and making the services accessible to pregnant women living in remote areas. The CB-PMTCT program, drawing the leverage of community support, has found to have increased ANC coverage as well as HTC uptake among pregnant women (UNICEF 2012). CB-PMTCT programme have been implemented in Achham, Kailali, Sunsari, Baitadi and Bajhang districts and later on expanded to other districts (Dadeldhura, Bardiya, Saptari and Chitwan) with the support of UNICEF. Similarly, with the support of GFATM, the program has been scaled up to Rupandehi, Kapilvastu, Arghakhanchi, Nawalparasi, Kanchanpur, Banke and Dailekh.

Apart from CB-PMTCT program, adhering to the key actions envisaged by the National Strategy, the country is scaling up PMTCT service synchronizing with planned ART, HTC /STI, OI services for ensuring access to continuum of care and ART to pregnant women with HIV. Furthermore, linkages have been established between PMTCT sites and KAP targeted intervention, Family Planning, SRH and counseling services.

#### 4.3 Progress and Achievement

Pursuant to its commitment of reducing 90% of new infections among children by 2016 compared to the baseline value of 2010, Nepal has scaled up its PMTCT services in recent years. These services are now offered at 95 sites in 45 districts across the country. As a result of this scale up of PMTCT sites, the number of women attending ANC and labour who were tested and received results has increased over the years. Despite this relative increase in uptake, the coverage for PMTCT is low, and stands at around 32% for the year 2014. The three year trend of service statistics is shown in the Table 2.

**Table 2: Service Statistics on PMTCT in Nepal for the period of BS 2069/70 -2071/72**

Indicators	2069/70	2070/71	2071/72
Pre-test Counseled (ANC & Labour)	146,309	166,618	154,588
Tested for HIV (ANC & Labour)	137,561	163,220	135,904
HIV Positive Pregnant women	153	116	108
Total Deliveries by HIV +ve mothers	125	131	88
Mothers received prophylaxis and ART	125	142	74
Babies received prophylaxis	199	198	73

(Source: NCASC)

Aiming at the elimination of mother to child transmission, Nepal taking a major transformative measure this fiscal year, adheres to Option B+ and embarks for providing lifelong ART for all identified pregnant women and breastfeeding mothers with HIV, regardless of CD4 along with prophylaxis treatment for their infants as well. The roll out of the lifelong treatment adds the benefits of triple reinforcing effectiveness to the HIV response: (a) help improve maternal health (b) prevent vertical transmission; and (c) reduce sexual transmission of HIV to sexual partners.

#### Early Infant Diagnosis (EID)

Initiatives for Early Infant Diagnosis (EID) of HIV in infants and children below 18 months of age have been taken with the goals a) of identifying infants early in order to provide them lifesaving ART; and b) of facilitating early access to care and treatment in order to reduce morbidity. In this context, a Deoxyribonucleic Acid (DNA) Polymerase Chain Reaction (PCR) testing facility has been set up at National Public Health Laboratory in Kathmandu. With this, as of end FY 2014/15 there were 4 sites where DBS sample are collected with support of NPHL namely NPHL itself, Bharatpur Hospital, Lumbini Zonal Hospital and Western Regional Hospital. Likewise, 5 sites are supported by USAID-funded SSP providing for DBS sample collection such as Achham District Hospital, Seti Zonal Hospital, NSARC-Banke, NNSWA-Kanchanpur and SACTS-Kathmandu. This was complemented by the development of a training package on preparation of Dried Blood Sample (DBS).

**4.4 Key challenges/Issues and recommendations**

Issues	Recommendations
Inadequate laboratory personnel in PMTCT sites.	Ensure trained and adequate workforce in a sustainable manner
Inadequate PMTCT sites as a result all ANC, delivery and Postnatal Clinic (PNC) attendees are not getting tested for HIV.	PMTCT sites should be expanded to adequate number of birthing centres in districts to capture more ANC attendees.
Reluctancy to deliver cases because of tendency to refer the cases to other centres due to inadequate knowledge regarding PMTCT.	Training and awareness program to staff nurse and medical doctors should be enhanced.

**5: HIV Treatment, Care and Support Services****5.1 Introduction**

With a primary aim to reduce mortality among HIV-infected patients, the government, in 2004, started giving free ARV drugs in a public hospital and that was followed by the development of first ever national guidelines on ARV treatment. Since then a wide array of activities have been carried out with the aim of providing Treatment Care and Support services to People Living with HIV (PLHIV). Along with the periodic updating of guidelines including on 2012, ART sites have been set up increasingly across the country. The consolidated guideline on treating and preventing HIV, 2014 is endorsed to support the program. This apart, necessary diagnostic and treatment related infrastructures such as CD4 machines and viral load machines have been set up in different parts of the country for supplementing ART management program. Human resources have been trained for Treatment, Care and Support in parallel with the preparation and updating of training guidelines. People Living with HIV have been empowered aiming at enhancing their supplementary roles in Treatment, Care and Support. And a monitoring system for tracking treatment adherence has been put in place.

**5.2 Key strategies and activities**

The present National Strategy has envisaged a comprehensive set of activities for Treatment Care and Support. Apart from optimizing HIV treatment and care for children, adolescents and adult with the provision of ART, the National Strategy also includes the following major activities: a) preventing HIV related illness, b) managing HIV related co-infections, d) providing Community and Home Based Care (CHBC) for PLHIV, e) provision of community care center and social care unit; and f) social protection for CABA.

With the intention of drawing more people into the bracket of treatment and thereby leveraging the benefits of treatment as prevention, NHIP (2014- 2016) in alignment with UNAIDS' 'Treatment 2015' and the WHO HIV Treatment Guidelines, June 2013 (with Update in March 2014), envisages Antiretroviral Treatment for all population groups that have been identified in Nepal as being key affected, regardless of CD4 count, and for these persons to remain on treatment. In this context, NHIP has further widened eligibility for ART enrollment based on WHO Treatment Guidelines 2013 and also has foreseen a scaled up HIV Testing initiative through a Community-led HIV Testing and Treatment Competence (CTTC) approach. With the overarching goal of reducing the AIDS-related deaths by 25% by 2016 compared to the baseline of 2010, the National Strategy foresees key actions that include but not limited to: a) scaling up ART services to targeted districts and selected Primary Healthcare Centers (PHCs) and teaching Hospitals, b) strengthening national capacity for Adult and Paediatric Treatment, and; c) establish linkages and

integration among the HIV services and other health services for quality HIV prevention, treatment and monitoring of treatment adherence, d) provision of adherence support program through community based organizations in order to increase uptake of the ART and activities like treatment literacy education etc., e) provide Cotrimoxazole prophylaxis, f) establish and strengthening linkages among TB center and HTC, PMTCT and ART sites., g) expand and roll out TB/HIV program. In the context of these key actions, in addition to the free-of-cost highly affective antiretroviral therapy, HIV-infected patients are offered care package including clinical follow-up monitoring; nutrition support; and TB screening along with Isoniazid Preventive Therapy (IPT). Moreover, there is a community and home-based care (CHBC) component which includes primary care of PLHIV by trained CHBC workers at homes and community settings aiming for positive living, reducing stigma and discrimination, and supporting for continuity and adherence to ARV.

### 5.3 Progress and Achievement

By the end of 2014, out of 10,407 of those who were on ART, there were 8,731 retained in the treatment for 12 months and among the total tested (1,198) almost 90% (1,086) of PLHIV were with their viral load suppressed (Figure 5). The total cumulative number of PLHIV receiving ART by the end of fiscal year 2071/2072 has reached the figure of 11,089. Over the years, there have been gradual increases in the number of people enrolling themselves on ART as well as receiving ARVs (Table 3). The number of people who were on ART has increased from 8,546 of 69/70 to 11,089 in 071/72.

Out of those who are currently on ART, 92% are adults and remaining 8% are children, while male population makes 51%, female population 48.7%, and remaining 0.3% are of third gender.

**Table 3: ART Profile of the period of FY 2069/70-FY 2071/72**

Indicators	2069/70	2070/71	2071/72
People living with HIV ever enrolled on ART (cumulative)	11,091	12,898	14,745
People with advanced HIV infection receiving ARVs (cumulative)	8,546	9,818	11,089
People lost to follow up (cumulative)	1,055	1,216	1,530
People stopped treatment	27	30	31
Total deaths (cumulative)	1,463	1,834	2,095

Source: NCASC

## Disease Control: HIV/AIDS and STI

Report from a total of 61 ART sites across 55 districts for the fiscal year 2071/72, shows that 14% of those ever registered on ART died and 10% have been lost to follow-up, while 75% are alive on treatment.

The Program data (FY071/72) showed that of all the patients registered on ART during the period, 83.7% were still actively on ART after 12 months while 78 % were still actively on ART after 24 months of treatment. With the aim of supplementing the ART management program, 18 CD count machines across 18 different ART sites are operating along with each viral load testing machines. These apart, portable CD4 counting machines have been placed

in hilly district of western, mid-western and far western districts of Nepal to provide timely CD4 count service to monitor ARV effectiveness that lead to support PLHIV to sustain quality and comfortable life. With the purpose of aiding diagnosis of HIV among children below 18 months of age, Deoxyribonucleic Acid (DNA) Polymerase Chain Reaction (PCR) testing Machine placed at the National Public Health Laboratory in Kathmandu.

Strong bidirectional referral linkages between Community Care Centers (CCCs), Community Home-Based Care (CHBC) System and ART sites to facilitate the quality of ART services, especially in ensuring adherence and follow up of PLHIV on ART and HIV-positive mothers and infected and exposed babies, have played important roles in enhancing ART coverage as well as maintaining this level of retention to ART. As of 2071/72, a total of 10,640 have received CHBC services (Table 4). In the same context 58 CCC across the country have been delivering their services to PLHIV (Table 5).

**Table 4: Service Statistics on CHBC Services in Nepal, as of the end of FY 2071/72**

Indicators	Numbers
Number of PLHIV received CHBC services	10,640
Number of PLHIV referred for ART management	3,706
Number of PLHIV referred for management of opportunity infections	2,243

**Table 5: Service Statistics on CCC Services in Nepal as of the end of FY 2071/72**

Indicators	Numbers
Number of CCC sites in Nepal,	58
Number of PLHIV received psycho-social counseling support	5,916
Number of PLHIV received nutritional support	4,370
Number of PLHIV referred for management of opportunity infections	2,896

**Figure 6: Outcomes of ART Programme in Nepal**

**5 Key challenges/Issues and recommendations**

<b>Issues</b>	<b>Recommendation</b>
Low access to CD4 Count and Viral Load machines	There need to be reliable and consistent access to viral load testing and CD4 count. Even in Kathmandu only one viral load facility available and have to think about expanding.
Lost or deteriorating medical records(Recording and Reporting)	Start an electronic record keeping system with backup capability. In addition, creating a client coding system would facilitate improved record keeping and continuity when clients are transferred-in or transferred-out.
Poorsupply of OIs medicines as per demand	Provide consistent supply of OIs medicines that are supposed to be provided according to the program.
Inadequate financial support for the clients	The PLHIVs face financial problems but there is not sufficient government support to pay for medical care and treatment. So government thinks to do some mechanism for the support.
In adequate training and staffs working in the clinic	Frequent and updated HIV ART related training and regular monitoring of the staffs to follow according to the national recommended guidelines. And also there should be enough staffs for smooth running of the program.
Poor Monitoring and Supervision of the ART Programs	regular and frequent monitoring and supervision to all ART Centers for the effectiveness and efficient running of the program(Site by site visit)

## 4.12 Eye Care

### 4.12.1 Background

In 1999, WHO estimated that there were 45 million blind people and 135 million with low vision globally based on the population of 1996. It was also assumed that the trend of blindness is going to be doubled in 20 years if existing trends of increment remain persistent. Therefore, the global initiative of Vision 2020 “The Right to Sight” was launched in February, 1999 jointly by WHO and IAPB. The Vision 2020 provides the guidelines, targets, and strategies to be taken to reduce the prevalence of blindness in the developing world, for elimination of avoidable blindness by the year 2020.

Nepal adopted the Vision 2020 initiative same year in September 1999. Prior to 1980, the eye care service in the country was in very rudimentary stage. For a population of 14 million, there were only three ophthalmologists outside the national capital Kathmandu, and only 16 hospital beds were dedicated to eye patients in whole Nepal.

The eye care service took a great leap in the country after the Nepal Blindness Survey (1981) showed that the magnitude of the problem of blindness prevails as a public health problem. The government eye care infrastructure and human resource was not capable to cope with the huge magnitude of blindness revealed. Thus, support from various national and international organizations was solicited in order to combat the blindness in the country. A geographical sector wide approach was adopted and different INGOs were delegated the responsibility to develop the eye care service in specified area under the umbrella of NNJS as a partnership programme. Specific program objectives, based on that survey results, were established and Nepal began to build the physical and human infrastructure necessary to address the problem. Primary, secondary and tertiary level eye care facilities dedicated to the prevention and treatment of eye diseases were established in the areas of the country with greatest need. The program simultaneously implemented a strategy of training eye care professionals at all levels to staff the hospitals and clinics as they become operative.

After launching of Vision 2020, the programme became more focused according to the guideline and target provided by the Vision 2020. The disease focused strategies were adopted and various vertical programmes for Cataract, Trachoma, Xerophthalmia, Refractive Error and Low Vision were launched.

After a decade of launching of Vision 2020, the situation analysis showed that there have been significant improvements made by the eye care programme of Nepal. It has been taken as successful example of NGO run eye care service at international level. The prevalence of blindness has now reduced to 0.35% from the 0.84% in 1981. (*Source: The Epidemiology of Blindness in Nepal 2012*). Even though, the prevalence of blindness has proportionately decreased by more than half compared to the prevalence of 1981 due to population having doubled, the number of blind remains almost the same. Now, the definition of blindness is also changing and a visual acuity (VA) of <math><6/60</math> is considered as economic blindness. Due to advancement of technology and greater visual need of the population, almost all eyes with VA<math><6/60</math> due to cataract are advised or patients themselves demand for surgery, therefore, considering this magnitude, work load for the future eye care programme has to be doubled. Now, we have been able to clear the back log of blindness among those who easily access the service and the causes are avoidable. The remaining proportion are either the resistant cases or many of them are with unavoidable causes and the cohort having prominent barrier to access the services. So, it indicates that the tough road is ahead and more effective programme implementation is required. Thus,

it shows that a significant improvement has been achieved in terms of blindness reduction in last decades but still there is a lot more to be done to achieve the national goal of Vision 2020.

A significant development is also seen in terms of infrastructure development in this period; now almost all the districts have either primary eye care centre or eye hospital. The technology adopted in eye care practice in the country is regularly updated and of internationally accepted standards. However, most of the eye hospitals are located either in Terai or in major cities. The service expansion in the far, inaccessible and remote area is the challenge to be overcome in this second decade of VISION 2020 period.

In terms of human resource development, the number of Ophthalmologists, Ophthalmic Assistants, Optometrists, Eye Care Managers, Equipment maintenance personnel have satisfactorily increased. However, its both the inadequate number and inequitable distribution are also the major challenges to be tackled.

In the disease control component, it seems that several new strategies with definite target with coherent indicators are to be further refined and a regular monitoring system is to be in place.

In this NGO partnership programme for the last three decades, it has been realized that primary eye care (PEC) could not be effectively integrated into primary health care (PHC) in spite of the persistent effort of NGOs.

Different NGOs are rendering eye care service in the country and they are being supported by different INGOs. So, the working modality is not always uniform. This has sometimes led to duplication of service in easily accessible areas and unhealthy competition. This will ultimately result in misuse of the scarce resource whereas large numbers of people are deprived in other remote areas of the country. Therefore, a proper coordinating body in government is required to facilitate and coordinate the eye care service providers in the country. The Apex Body for Eye Health was meant to do this; however, due to lack of executive power in the Apex Body for Eye Health, it has not been very effective in the past. The coordination is required not only at national level but also a similar mechanism is required at district level and grassroots level of health care delivery system.

Now Nepal is signatory to Global Eye Health Action Plan endorsed by the Sixty-sixth World Health Assembly which has opened a new opportunity to make further progress with additional efforts to prevent visual impairment and strengthen rehabilitation of the blind in communities.

In view of the need to develop/strengthen effective policies to achieve the global target of reduction of prevalence of avoidable visual impairment by 25% by 2019 from the baseline of 2010, the Apex Body for Eye Health (ABEH), Ministry of Health (MoH) organized two days' workshop in Godavari, Kathmandu Nepal on 12-13 December 2014 with the support of IAPB. The workshop was held to operationalize the Global Action Plan in Nepal. Based on the 3 objectives of the Global Action Plan (2014-2019), various recommendations have been made to Government, WHO and International Partners to develop/strengthen effective policies to achieve the global target. Now Nepal is moving towards achieving the goal of Global Action Plan.

**Goal and Objectives:**

To reduce the overall blindness below 0.2% among the visual acuity <3/60 and <0.4% among the visual acuity 6/60 by the year 2020.

**4.12.2 Outputs for FY 2071/72**

With all this opportunities and challenges the service output of the of the eye care services for the fiscal year 2071/72 are as given below table:

S.N.	Hospital Name	OPD	Surgery	OUTREACH	PECC	School Screening	Grand OPD
1	NNJS/Geta Eye Hospital, Dhangadhi	92,897	32,928	38,757	87035	100,301	318,990

## 5. CURATIVE SERVICES

### 5.1 BACKGROUND

Government of Nepal is committed to improving the health status of rural and urban people by delivering high-quality health services throughout the country. The policy is aimed at providing prompt diagnosis and treatment, and referral of cases through the health network from community health facilities (PHCC/HP/SHP) to the specialised and central public hospitals. Likewise, diagnostic services and referral mechanisms at different levels has been established to support early and correct diagnosis of the problem.

The Interim Constitution of Nepal 2063 has emphasized that every citizen shall have the rights to basic health services free of costs as provided by the law. Ultimately, government of Nepal decided to provide essential health care services (emergency and inpatient services) free of charge to destitute, poor, disabled, senior citizens, FCHVs, gender valiance and others up to 25 bedded district hospitals and PHCCs (December 15, 2006) and all citizens at Sub Health Post (SHP)/Health Post (HP) level (8 October, 2007).

#### Objectives

The overall objective of curative services is to reduce morbidity, mortality by ensuring early diagnosis of the diseases and providing appropriate and prompt treatment.

#### Strategies

- Curative health services will be made available in an integrated way in the rural areas through sub-health posts, health posts and primary health care centers.
- Hospitals will be established on the basis of population density and patient load ensuring at least one hospital in each district.
- Zonal and regional hospitals will be established to provide specialized services relating to pediatrics, gynecology, general surgery, general medicine, eye care, dermatology, orthopedics and psychiatry.
- The central hospital will be equipped with sophisticated diagnostic and other facilities to provide specialty and super-specialty services.
- Specialist curative care services will be extended to remote areas, as and when required, through mobile teams
- Referral system will be developed through which the rural population will be provided with the opportunities to obtain services from modern well equipped hospitals.
- Diagnostic services e.g. laboratory, x-ray, etc. will be strengthened in the hospitals.
- More frequent outreach clinics, options for relocating existing facilities
- Basic curative service as a component of EHCS will be provided free up to 25 bedded hospitals.
- Promote private medical colleges, hospitals, nursing homes and hospitals run by INGOs / NGOs and private practitioners as complementary to public facilities.

## 5.2 Major Activities

- Curative health services were provided through the existing health facilities on an outpatient including emergency where ever available and inpatient basis including Free Health Services as well.
- In-patient services were provided different level of hospitals including INGOs/NGOs, Private medical college hospitals, nursing homes, and private hospitals as per the report available.
- Medical camps were organised in different places especially in the remote districts.

## 5.3 Analysis of Achievement

### Reporting Status:

A total number of 383 public and private hospitals were listed in Health Management Information System (HMIS) under Department of Health Services (DoHS) in fiscal year (FY) 2071/72. Out of 383 hospitals 110 (87.7%) public hospitals and 273 (79.3%) were private hospitals were reported to HMIS system in FY 2071/72 (Table 5.3.1).

**Table 5.3.1: Hospital reporting status, FY 2071/72**

Region	No. of Hospital			Reporting Status					
	Non-Public	Public	Total	Non-Public		Public		Total	
				N	%	N	%	N	%
EDR	50	21	71	484	80.7	224	88.9	708	83.1

Source: HMIS, DoHS

Tables 5.3.2 present the public and private hospital submitted their twelve-month progress reports to HMIS system in FY2071/72. Public hospitals were submitted 74.5% and 46.5% from private hospitals submitted complete fiscal year monthly progress report during this reporting period. Nationally, private and public hospitals submitted only 54.6 percent monthly progress report from the month of Shrawan to Ashar to HMIS this year.

**Table 5.3.2: Hospital reporting 12 months a year, FY 2071/72**

Region	No. of Hospital			Hospitals Reporting 12 months a year					
	Non-Public	Public	Total	Non-Public		Public		Total	
				N	%	N	%	N	%

**Inpatient services**

Inpatient services include services delivered through inpatient departments of the public and private hospitals. The findings presented in this section should be interpreted with caution because of limited reporting coverage of private and public hospitals.

**Bed Occupancy**

Bed occupancy rate in higher-level government hospitals that submitted complete reports (12 months a year) have been assessed here. The highest 100% bed occupancy rate is in Regional Hospital Surkhet and lowest 8% in SRH Dedeldhura in FY 2071/72 (Figure 5.1).

**Figure 5.1: Bed occupancy rate in higher-level public hospital, FY 2071/72**

Source: HMIS

**Figure 5.2: Bed occupancy for district and district level hospitals, FY 2071/72**

Among the district and district level hospitals (up-graded), hundred percent Bed Occupancy Rate found in District Hospital Udayapur, The lowest occupancy rate 3% observed in District Hospital Dolpa, followed by District Hospital Dullu Hospital (2%), and Bakular Hospital (2%) respectively (Figure 5.2).

**Average Length of Stay (LoS)**

Average length of stay among the higher-level government hospitals reported 17 days in Mental Hospital (Highest) and 1day (lowest) in SRH Parsa (Figure 5.3).

**Figure 5.3: Average Length of stay in higher-level hospitals, FY 2071/72**

**Figure 5.4: Average Length of stay in district and district level hospital FY 2071/72**

Among the district and district level hospitals, Average Length of Stay was found highest in District Hospital Palpareported 4 days and lowest Bhardah Hospital (Figure 5.4).

Source: HMIS

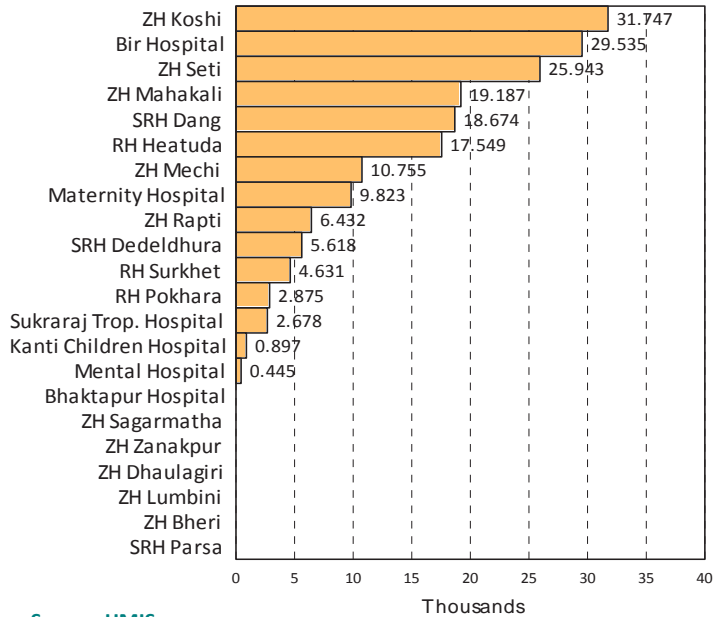

CURATIVE SERVICES

**Hospital Utilization**

Three basic measures of utilization (Emergency room attendances, total Outpatients and Inpatient admissions) were shown in below figure.

Emergency-Ward Attendances among the higher-level government hospitals, with 31,747 were attended in Zonal Hospital Koshi, which were the highest patients of attendances among the other hospitals. Mental Hospital has the lowest patients of attendances with 445 attendances only (Figure 5.5)

**Figure 5.5: Emergency Ward attendances (higher level hospitals), FY 2071/72**

Source: HMIS

**Figure 5.6: Emergency ward Attendances (district hospitals), FY 2071/72**

Source: HMIS

Among the district and district level hospitals, with 14,441 patients were attended in District Hospital Dhadhing has reported highest patients of attendances. Tikapur Hospital has the lowest cases of attendances with 31 (Figure 5.6).

Figure 5.7 present Outpatient Attendances among higher level of public hospitals; Zonal Hospital Koshi has the highest number of outpatient attendances with 139,435. Kanti Children Hospital has the lowest cases of outpatient attendances with 2,926.

Among district and district level hospitals, District Hospital Udayapur has the highest patients of outpatient attendances with 28,135 and Dullu Hospital has the lowest number of outpatient attendances with 3,424 (Figure 5.8)

CURATIVE SERVICES

Figure 5.9 present Inpatient admissions higher level of public hospitals in fiscal year 2071/72. Maternity Hospital has recorded the highest patients of Inpatient Admissions with 21, 047 patients.

**Figure 5.9: Inpatient Admissions (higher-level hospitals), FY 2071/72**

**Figure 5.10: Inpatient Admissions (district hospitals) FY 2071/72**

Among district and district level hospitals, Ramuma Sarak Hospital has recorded the highest number of Inpatient admissions with admissions of 4,253 and Bhardah Hospital has reported the lowest number of Inpatient admissions with 15 cases (Figure 5.10)

## Disease analysis

### Top Ten Morbidity, FY 2071/72 (In-patient)

Inpatient Morbidity, a total number of 2,87,616 patients were admitted in hospitals and out of them Diarrhea and gastroenteritis of presumed infection was the most common reason for hospitalization (11,529) followed by other chronic obstructive pulmonary disease (8,053) and unspecified acute lower respiratory infection (7,181) were the leading causes for hospitalization (Figure 5.11).

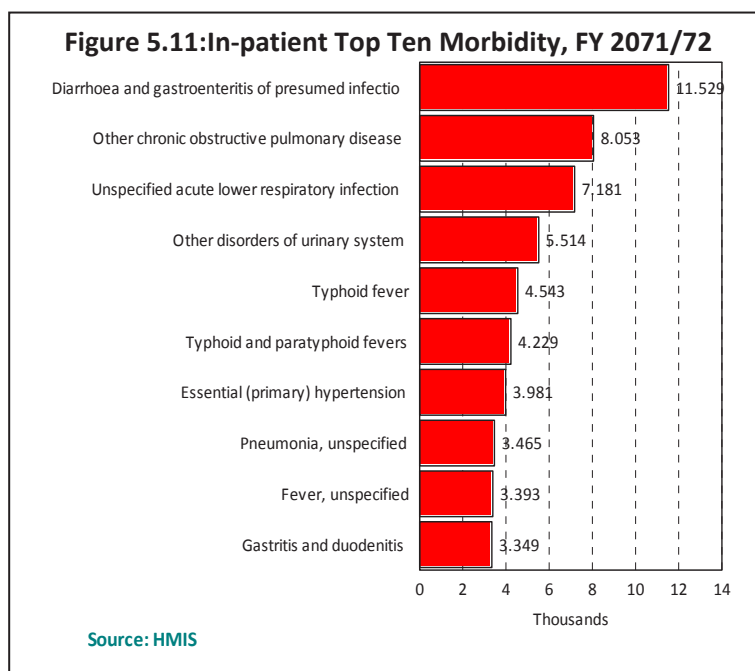

Table 5.3.5 presents the age and sex distribution of discharged inpatients from the hospitals in FY 2071/72. Nearly one-third (26%) of the inpatients were in the age group of 20-29 years. Approximately half of the inpatients were from the age group 15-39 years (46.4%). The proportion of the female (62%) was observed dominant mainly due to delivery was the main reason for hospitalization

**Table 5.3.5: Inpatients Morbidity by Age and Sex, FY 2071/72**

Age Groups	Female	%	Male	%	Total	%
<28 days	8700	1.463	10961	1.8	19661	3.3
29 days - <1 Yrs	7971	1.34	12410	2.1	20381	3.4
1 - 4 Yrs	12738	2.141	16179	2.7	28917	4.9
5 - 14 Yrs	20577	3.459	20231	3.4	40808	6.9
15 - 19 Yrs	40138	6.748	15871	2.7	56009	9.4
20 - 29 Yrs	128732	21.64	25643	4.3	154375	26
30 - 39 Yrs	45509	7.651	22847	3.8	68356	11

### Top ten reasons (%) for outpatient consultations in FY 2071/72

Figure 5.12 present among the various reasons for Outpatients consultations in FY 2071/72, Upper respiratory tract infection (URTI) is the leading one-with 5.7% visitors and is followed by Gastritis (APD) with 5.4% and Lower Respiratory Tract Infection (LRTI) with 5%. Headaches, Intestinal Worms, Presumed non-infectious diarrhea, Typhoid (Enteric Fever) are also among the top ten reasons for Outpatient Consultations. Amoebic Dysentery is the 10<sup>th</sup> reason for outpatient consultations..

**Figure 5.12: Top ten reasons (%) for outpatient consultations, FY 2071/72**

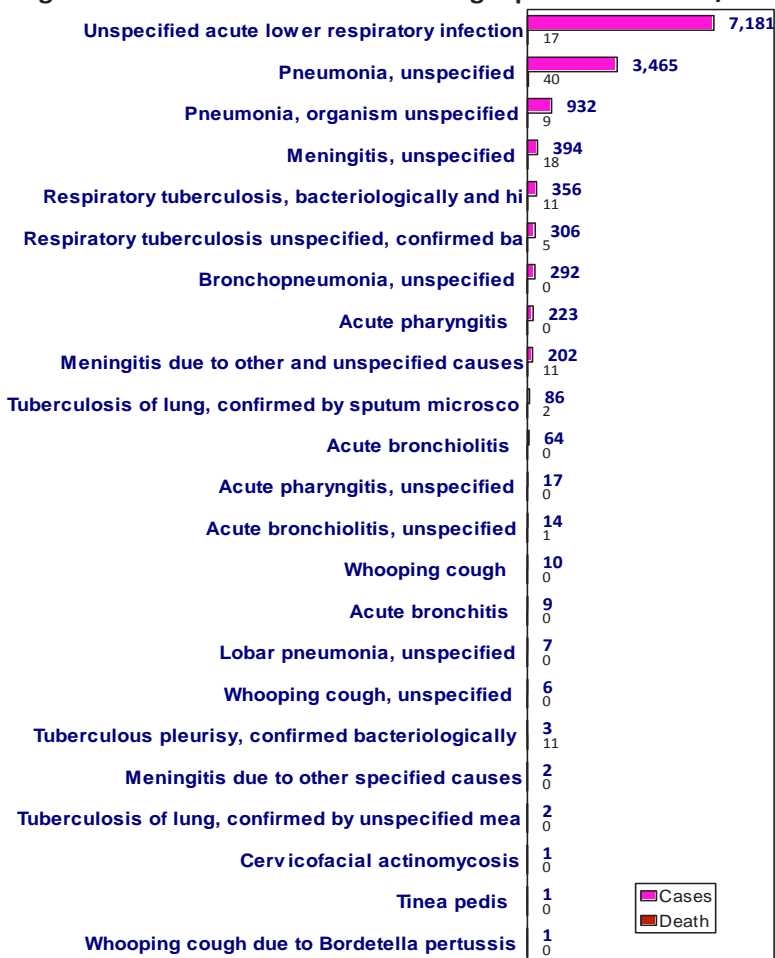

Source: HMIS

**Air Borne Disease**

Figure 5.13 show the Air Borne Diseases among Inpatients FY 2071/72. Among patients the unspecified acute lower respiratory infection patients were reported highest among the Air Borne disease with a total patients of 7,181 were affected and 17 patients were reported dead. Deaths attributed to Pneumonia, unspecified organism was highest (40) among airborne diseases.

**Figure 5.13: Air borne Diseases among Inpatients FY 2071/72**

Source: HMIS

**Vector borne Disease**

Unspecified viral encephalitis patients were reported highest with the number of cases of 108 and 3 were reported dead in the FY 2071/72. There were no reported deaths due other vector borne diseases in the FY 2071/72 (Figure 5.14).

**Figure 5.14: Vector borne Diseases among Inpatients FY 2071/72**

Source: HMIS

**Figure 5.15: Water borne Diseases among Inpatients FY 2070/71**

Source: HMIS

**Water Borne Diseases**

Figure 5.15 shows that Water Borne Diseases among Inpatients FY 2071/72, Due to Diarrhoea and Gastroenteritis of presumed Infections was found to be more than any other water borne diseases with number of cases of 11,529 and 53 were death. Other salmonella infections had the least number of cases of 1 and no reported deaths. Number of patients and deaths of various other water borne diseases can be observed in the below figure..

CURATIVE SERVICES

Table 5.3.6 shows the distribution of Communicable and Non-communicable Diseases (OPD) by national, ecological, and development region in the fiscal year 2071/72.

Region	Communicable		Non-communicable		Total
	N	%	N	%	
EASTERN	1,291,009	6.4	2,640,608	13	3,931,617
CENTRAL	2,000,763	9.8	4,681,032	23	6,681,795
WESTERN	1,368,311	6.7	3,451,739	17	4,820,050
MID WESTERN	1,005,463	4.9	1,826,321	9	2,831,784
FAR WESTERN	708,255	3.5	1,353,019	7	2,061,274
<b>National Total</b>	<b>6,373,801</b>	<b>31.4</b>	<b>13,952,719</b>	<b>69</b>	<b>20,326,520</b>

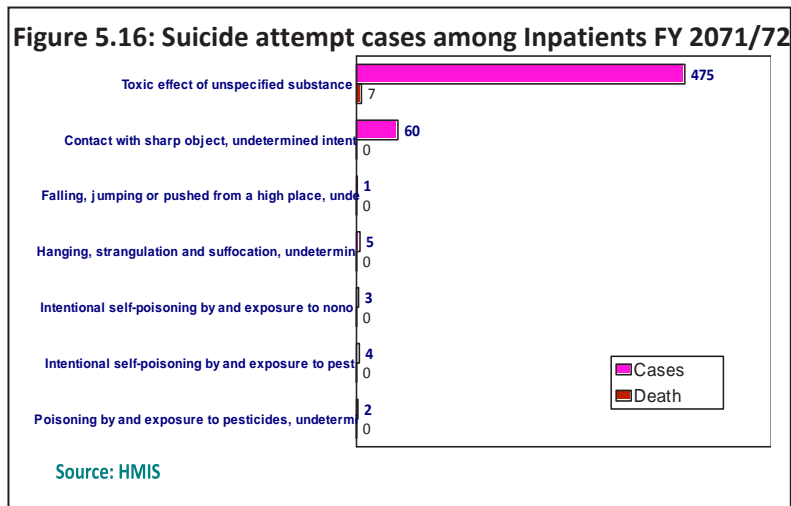

**Communicable and non-communicable disease (Inpatient)**

Table 5.3.7 present of the total 287,321 inpatient new visit were reported and among 1982 patients were reported death caused by Communicable and Non-communicable diseases in fiscal year FY 2071/72. The total number of cases of Communicable diseases were 43974 (15.3%) and number of deaths 395 (20 %) reported in this fiscal year. The total number of 243, 347 (84.7 %) patients reported on Non-communicable diseases and among 1,587 (80%) deaths occurred in this reporting period..

**5.3.7 Communicable and non-communicable disease (Inpatient) FY 2071/71**

Diseases	Cases	%	Death	%
Communicable	43,974	15.3	395	20%
Non-communicable	243,347	84.7	1,587	80%
Total	287,321	100.0	1,982	100%

Figure 5.16 present Suicide attempt cases among Inpatients in FY 2071/72, during this fiscal year a total number 475 cases were reported on Toxic effect of unspecified substance and 7 deaths were reported. The numbers of cases of Contact with sharp object, undetermined intent were 60 with no death. Likewise, Hanging case reported 5 with no death and intentional self-poisoning harm reported 3 cases but no death reported in this fiscal year (Figure 5.16)

Road Traffic and Transport Accident cases among Inpatients FY 2071/72, number of cases of Motor and nonmotor vehicle accident were 2,610 followed by Occupant of special all-terrain or other motor vehicle 17 and Occupant of pick-up truck or van injured accident 11. Number of deaths caused by Motor and nonmotor vehicle accident reported 21 patients (Figure 5.17).

Figure 5.18 shows the Top Ten Mortality among Inpatients in FY 2071/72. A total number of 209 numbers of mortality due to Other Chronic obstructive pulmonary disease was recorded to be the highest. It is followed by diarrhea and gastroenteritis of presumed infection 53, unspecified diabetes mellitus 47, Pneumonia (unspecified) 40, Essential(primary hypertension) 36, other septicemia 36, Chronic obstructive pulmonary disease(unspecified) 33, Unspecified HIV 29, Chronic renal failure 28, and Burn and corrosion, body region unspecified 26..(Figure 5.18)

The following figure shows both the Inpatient and Outpatient Surgeries in 2071/72. In figure 5.19 present among Inpatient Surgeries including major surgeries reported number of 39,884 females and 21,266 males were performed. A total number 17530 female and 20,347male Minor surgeries were also performed in FY 2071/72. Among Outpatient Surgeries, 20,346female and 22,765 male OPD surgeries were performed. Similarly, 11,555 female and 13, 704 male OPD Plasters were also performed in FY

2071/72.

**CURATIVE SERVICES**

Figure 5.20 shows deliveries in hospitals in FY 2071/72, a total number of 124,295 deliveries took place. Figures also shows classification of delivery by types were 78% spontaneous, 18% % C/S, and 4 % Vacuum/Forceps reported.

Among Outpatient Surgeries, 12,750 female and 14,865 male OPD surgeries were performed. Similarly, 7,504 female and 9,832 male OPD Plasters were also performed in FY 2070/71.

Figure 5.20 shows deliveries in hospitals in FY 2070/71, a total number of 125,273 deliveries took place. Figures also shows classification of delivery by types were 79.8 normal, 16.2% C/S, 2.7% Vacuum, 0.9% Breech and 0.3% Forceps reported.

Note: Please see Annexes

**5.3.8 Brought Dead and Postmortem done by hospital FY 2071/72**

	Female	%	Male	%	Total
Brought Dead	490	40.6	718	59.4	1208
Postmortem Done	1562	36.0	2776	64.0	4338
<b>Total</b>	<b>2052</b>	<b>37.0</b>	<b>3494</b>	<b>63.0</b>	<b>5546</b>

**Hospital Issues, FY 2071/72**

- Improvement in infection prevention and waste management practices
- Quality of laboratory services at different levels
- Overcrowding of referral hospitals
- Limited data on causes of deaths and linkages with national reporting system
- Low priority in research and poor dissemination practices of research findings
- Limited preparedness for major outbreaks and emergencies
- Threats of emerging and re-emerging diseases
- Retrofitting of hospitals
- Unavailability of isolation ward at different hospitals

## 6.1 HEALTH TRAINING

### 1 Introduction

#### 1.1 Institutional Profile:

The National Health Training Centre (NHTC), under the Ministry of Health (MoH) is part of a network of government health training facilities. The NHTC operationalize its training activities in line with the 2004 National Health Training Strategy.

The National Health Training Centre (NHTC) is the apex body for the development of human resources for the health sector. It caters for the training needs of all departments, divisions and centers of the Ministry of Health. NHTC aims to train health service providers to deliver quality health care services. To achieve this objective the centre delivers the different training programs related to public health, clinical and managerial.

In-service training is delivered through a network of National Health Training Programmes, which provide technical as well as managerial training at national, regional, district and community levels. There are five regional training centers, one sub regional training centre. In addition, there are different training sites at different hospitals under NHTC which conduct training like family planning, skilled birth attendance, mid level practicum, safe abortion services, rural USG, anaesthesia assistance, paediatric nursing, medico-legal etc. A training working group (TWG) comprising various supporting partners was formed under the leadership of NHTC with the purpose of ensuring the efficient running of national health training programs, maintaining the quality of the training and improving the coordination of all training provided under NHTC.

#### 1.2 Training Network

The National Health Training network includes National Health Training Centre, 5 regional health training centre, one sub-regional health training centre, 30 district level training facilities and 14 training health posts in 13 district. There is a team of District Supervisors having GTOT in each district with one training focal person.

## 1.2 Goal

The overall goal of NHTC is to produce/prepare efficient health service providers by means of training to contribute to deliver quality health care services towards attainment of the highest level of health status.

## 1.3 Objectives

- To assess training requirements of Health Workers and prepare training plans based on the program's requirement.
- To plan, implement and train health workers as demanded by program division.
- To design, develop and refine teaching, learning materials to support implementation of training programs.
- To develop/improve capacity of trainers to deliver quality training at central, regional and district level.
- To support RHDs and DHOs in organizing, implementing and evaluating the training programs.
- To coordinate with all National and International, Governmental and Non-Governmental Organizations to avoid duplication of training and improve quality of training.
- To orient newly recruited health workers on different health programs.
- To supervise, monitor, follow-up and evaluate training programs.
- To conduct operational studies to improve training efficiency and effectiveness.
- To organize International Training as per need.
- To establish TIMS for the quality recording and reporting systems of all training programs at central, regional, district, and community levels.

## 1.4 Strategies

The following strategies have been pursued to address the National Health Training Programs;

- Assessment, standardization and accreditation of training as well as training sites.
- Development and standardization of training package as periodically.
- Institutional capacity development for all levels training units.
- Conduction of various natures of trainings like Pre-service, In-service, Orientation, Refresher, long-term, short-term as per national required.
- Integration and institutionalization of trainings.
- Capacity development links with professional carrier development regarding to quality services.
- Strengthening of TIMS as well as roistering the training profile.

## 2. Major Activities

2.1 **Health Trainings:** NHTC provides following arrays of training programs:

2.1.1 Pre-service Training (Initial and Basic Training):

- FCHV basic training-18 days (9days+9 days)
- AHW -15 months
- ANM -18 months
- Biomedical Equipment Technician Training (BMET)-18 months
- Anesthesia Assistant Course (AAC)-6 months.

2.1.2 (I) In-service Training: A wide range of in-service/refresher trainings are designed and conducted as per the need of different program divisions and centers. Such training packages are aimed to enhance the skill need for implementing new programs as well as improving job performance of health workers. NHTC delivers the following In-service trainings;Upgrading Training:

- ANM –P-4 months
- AHW-P-4 months
- ANM-6 months
- AHW-6 months
- Sr. AHWs -6 months
- Sr. ANM-6 months
- Supervisor up grading training-6 months.

(II) Skill Based Competency Training:

- Skilled Birth Attendant (SBA),
- Advanced Skilled Birth Attendant (ASBA),
- Medico-Legal,
- Non-Scalpel Vasectomy (NSV),
- Mini-lap,
- Intrauterine Contraceptive Device (IUCD),
- Implant,
- Safe Abortion Services (SAS),
- Mid-Level Practicum (MLP) etc.
- Operation Theatre Technique and Management (OTTM),
- Infection prevention (IP),
- ICU/CCU,
- Paediatric Nursing Training,
- ASRH
- Comprehensive Family Planning (CoFP) Counseling
- Medico-legal etc.

(IV) Health Management Training:

- General Training of Trainers (GToT),
- Gender Equity and Social Inclusion (GESI) Training,
- Training for Package Development
- Health Training for non-health worker working in Health Institution.

2.1.3 Orientation Programs: NHTC supports the divisions and centers in developing orientation packages, preparing a pool of trainers for conducting various orientation of short duration for health workers and non-health worker category.

2.1.4 Refresher Training: A wide range of refresher trainings are designed and conducted as per the need of different program divisions and centers. Such training packages are aimed to enhance the skill need for implementing new programs as well as improving job performance of health workers.

2.1.5 Induction Training: NHTC has started the Induction training for the all service groups of health services officers from this fiscal year. The training is designed for one month (twenty four working days) and has covered the wide range of disciplines of health services.

## 2.2. Certification

NHTC is responsible to certify different non-clinical and clinical competency based training courses. NHTC provides certificates to the participants after completing the as per training course.

### **2.3 Training Need Assessment (TNA)**

NHTC is responsible to assess training need during planning phase. NHTC identifies the gap between expected and existing performance of the health workers through various methods

### **2.4 Planning, Budgeting, Review and Reporting of the training**

NHTC develops the annual training program plan with budget including the six S/RHTCs and different training sites and 75 district health training program. The approved annual training program delivered to six S/RHTCs and clinical training sites for the implementation. All the centers and sites implement the training program as per program.

### **2.5 Delivering training and quality assurance**

The approved annual training program delivered to six S/RHTCs and sites for the implementation. All the centers and sites implemented the training program as per training models and guidelines. Quality Improvement (QI) tool is introduced mainly clinical skill based training regarding to upgrade it, built capacity of training sites, trainees and trainers for the quality assurance of training.

### **2.6 Assessment and Accreditation**

NHTC is responsible to accredit different non-clinical and clinical competency based training courses like ASBA, SBA, USG, Paediatric Nursing, Medico-legal, MLP, OTTM, Minilap, Vasectomy etc and training sites like Paropakar Women Maternity Hospital (PVMH) Thapathali for Comprehensive RH training, Lamjung Community District Hospital for MLP, TUTH for Medico-legal etc. The institutions should be accredited before providing such training courses.

### **2.7 Curriculum Development, Review and Revision**

NHTC develops the different types of training curriculum based on the actual needs of the programs with close collaboration of divisions and centers. NHTC has technical working groups (including wide range of government and supporting partners) to review and revise the existing curriculum and also forms the technical groups based on the needs to formulate the new curriculum.

### **2.8 Co-ordination and Collaboration with concerned Stakeholders**

NHTC coordinate and collaborate with the partnership of various institutions of MoHP including the EDPs, NGOs, Private sector and, Medical colleges. Various concerned stakeholders are providing collaborative supports to NHTC in planning and execution of training programs.

### **2.9 Follow-up Enhancement Program**

NHTC conduct different skill based training for health workers. Similarly about 9000 MO/Nursing staff are trained as SBA. For the onsite follow-up and coaching NHTC started Follow-up Enhancement Program for SBA for update the knowledge and skills of Nursing staff with support of different partners.

### **2.9 Supervision, Monitoring, Follow-up and Evaluation**

There is an established mechanism of supervision, monitoring, follow-up and evaluation of the training activities in co-ordination with relevant stakeholders involved in training. The shared efforts provide feedback to NHTC to assess quality of training programs. NHTC has increased monitoring and supervision of training activities to assure maintenance of quality of training delivered.

### **2.10 Training Policy Formulation**

To date NHTC do not have adequate policies to address the wide range of training activities of the health sector and their accreditation. Although NHTC provides wide range of public health, clinical and managerial training ranging from different duration but these trainings are not linked with the carrier development and health service act and regulation.

## 2.11 Institutional Capacity Development for all Centers and Sites

For the institutional development of training function NHTC focuses on;

### (a) Physical Facility

- NHTC reviews existing physical facilities including equipment as per the nature of training and ensures the supply of the same in training sites.
- NHTC works towards gradual development of physical facilities of regional training centers, hospitals, district level training facilities.
- In addition NHTC also develops formal alliances with concerned private or non-governmental institutions to meet the desired need of physical facility for catering trainings assuring quality.

### (b) Health Training Program Development and Coordination

NHTC develops the different training programs as per the need of MOHP, DOHS and other stakeholders. It also facilitates for functional coordination required amongst divisions, centers, districts and training sites. NHTC has been planning, implementing and managing training need of various Divisions, Centre of MoHP/DoHS and providing support for quality service improvement in coordination and collaboration with the partnership of various institutions of MoHP including the EDPs, NGOs, Private sector and Medical colleges.

### (c) Capacity Building

NHTC makes efforts develop the capacity of different level health workers in different specialized areas. As part of faculty development and strengthening the capacity of staffs, NHTC has been providing opportunities to participate in different programs organized by national and international institutions.

### (d) Supporting Development Partners and their contribution:

Various supporting partners are providing collaborative supports to NHTC in planning and execution of training programs. The key programs being implemented with such supports are as follows:

- USAID: Family Planning, Logistic Training, FCHV, quality monitoring tools in clinical training, HR Support for FP training and service strengthening.
- NSI: SBA, USG, MLP, Anesthesia Assistance Course, BMET, BMEAT, CTS, OTTM, Hospital Management training.
- UNFPA: ASRH, Gender and health, Gender Based Violence, Behavior, HR support for RH training and service strengthening.
- Save the Children: SBA training.
- SUAHARA: HFOMC training.
- UNICEF: SBA Training, Rural Ultrasound, Pediatric Nursing training, Technical Assistance.
- IPAS: SAS Training, Long-term FP method
- PSI Nepal: FP training, Medical Abortion (MA) training, Clinical Training skills etc.

### (e) Training Working Group (TWG)

Training Working Group (TWG) has been formed with the involvement of all the governmental and EDP supporting partners. This is the high level working group for the quality improvement, curriculum development and accreditation of different training activities.

### (f) Financial Resources

Annual Program budget is allocated to each RHTC and 75 districts for implementing central and district level training programs respectively. It is also envisioned to allocate annual grants for initiating locally organized training based on the number and extent of predefined training needs.

## Supporting Programs: Health Training

Funding provision, in future, will be made on the basis of decentralized planning of the respective training institutions. Mechanism will be explored for generating/mobilizing local resources by each training institutions.

### **2.12 Develop the Training Data Bank and strengthening the TIMS**

NHTC is trying to update the training information into electronically prepared data bank (Training management information system). All the training information taken from different training site under national health training are being updated and made available to each participant. NHTC has now plan to update the training management system at central level and link with regional health training centers and other clinical training site into this TIMS soft ware. NHTC is also preparing the trainers roster on different discipline and training types.

### **2.13 Research on Training programs**

A training research is needed to identify problem of health workers and conduct operation as well as evidence based research on training to explore ways to improve the quality of training. The NHTC has plan to develop the capacity of the training site for reaseach.

## **3. Major achievement in FY 2071/72**

### **3.1 Status of Budget Allocation and Financial Progress**

#### **Central Level (with regional and training sites)**

- Total allocated Budget: 230,664,000
- Total released and expensed Budget: 178,342
- Financial achievement: 77.32%

#### **District Level**

- Total allocated Budget: 53,370,000
- Total released and expensed Budget: 49,480,000
- Financial achievement: 92%

### **3.2 Physical Progress:**

There were different trainings with 3,548 targets ranges from few days to years and different level of health workers. Among them 3,263 (81%) health workers have completed the targeted trainings form different training sites. Similarly at district level training total 3645 persons were trained out of 4080 (about 90%). Besides the trainings the capacity development of the training sites and trainers, development of the training curriculum and training manuals were also prepared in this fiscal year.

### **3.3 Issues and recommendation:**

As in the previous year the national performance review meeting recommended to manage a separate pool of trainers from various disciplines like public health, nursing, clinical health education for which NHTC has been continuously advocating but still not been materialized. Some of the specific issues/problems and opportunities identified during implementation of training activities noted in recent regional review meetings and National Review meeting are summarized below:

**Issues:**

- Multi-door trainings;
- Ownership of training by training sites
- High workload for service provider of training sites (dual responsibility)
- Accreditation, and quality not assured;
- Trainings as incentives, not linked with career development
- Low HR capacity of national and regional training center
- Capacity of HR in Training Center/structure.
- Use of trained manpower/ underutilised
- HR capacity development plan as per Job Description and service
- Selection of trainees for long and short term training
- Training Need Assessment

**Recommendations:**

- Need based (Based on performance need analysis), Integrated, one door managed, institutionalized training with up to date training information and records;
- Restructure and develop the institutional capacity of the training center to meet the existing health training challenges.
- Trainings linked with Career developments of the health workers.
- Fulfillment of acute shortage HR through initiation and continuation of the training like Diploma of Biomed engineering and anesthesia assistant.
- Capacity Development for skill mixed HR on NCD service delivery through CME (Distance Education Approach).
- Accreditation and certification of training sites and programme
- TIMES
- Plan for Training Program with concerned division and districts.
- Trainees Selection- Norms development

**4. New Initiation:****4.1 Integration and institutionalization of health trainings**

Health service is a labor intensive services, so many new principles and practices are developed from the scientific evidences and mean time so many new diseases, new health problems are also coming up; all these needs the periodic training and updating of the health professionals. To fulfill these gaps all the division, centers and departments are engaged in the training activities separately with limited coordination. Fragmented, piecemeal and short duration training has created many more problems in the health service delivery. Besides the expensive investments in the training duplication, long absenteeism in the facilities, poor recording and follow up are some observed lacuna of the training activities in ministry of health and population.

To minimize all the described problems NHTC has now initiated the integration and institutionalization of the different training activities, with close collaboration of division and centers.

**4.2 Integration of cross cutting and priority health issues in different health trainings**

Six different long term training package are now mainstreamed with GESI and GESI is also introduced in different training curriculum. The emerging issues like Governance, Information communication technology (ICT), Water sanitation and health (WASH), Climate change and health, and consumer perspectives in the health is now incorporated in different training activities. The issues of non communicable diseases, road traffic accident (RTA), and some new and emerging diseases are also incorporated in induction and upgrading training curriculum.

### **4.3 Initiation and scale-up of different up-grading trainings**

The Health service act 2053 and regulation 2055 has provision of time bound upgrading of the level of the health workers, and now the health workers has upgraded 2-3 level depending upon their seniority. The VHW became the Sr. AHW and MCHW became the Sr. ANM without any education qualification or further training. The 5<sup>th</sup> level health workers (basically health assistants, staff nurses, Lab technicians, Radiographers and district supervisors) have got the upgrading of level from 5<sup>th</sup> to 6<sup>th</sup> and seventh depending upon their seniority level. The current health regulation has provision of 15% adjustment of upgraded level position.

There is provision of senior AHW, Senior ANM and ANM, training for upgraded health workers and this year AHW training is re-started and AHW-P, ANM-P, and supervisor upgraded training is initiated. Time bound upgrade of position level of the health workers needs the upgraded knowledge and skills.

### **4.5 Service strengthening for improved training quality**

The clinical trainings needs adequate number of clients/ cases to develop the competency likes NSV, Minilap, IUCD, Implant, Delivery etc. To strengthen the services in the institutional clinics NHTC has hired family planning consultants and counselors for five different sites. Four family planning consultant physicians and three nursing counselors were hired for these purposes. Koshi Zonal hospital, Chetrapti family welfare center, Proshutigriha Maternity hospital clinic, Western regional Hospital, ICTC Nepalgunj and Dhangadhi were fulfilled by these staffs.

### **4.6 Introduction of clinical trainings**

To address the increasing trend of non communicable disease and road traffic accident, few clinical training was initiated in this fiscal year with the partnership of different institutions. The primary trauma care training was initiated with the partnership of Nepal Orthopedic Hospital Jorpati. Different training manual were also developed in this period with the support of different donors and experts.

More than three hundred doctors, nurses. All the related training manuals were also developed for this training

### **4.7 Intiation of Blenbed learning Approach**

Due to maximum use and utilization of modern computerized technology, distance learning and blended learning approach is now initiated on NSV self paced approach, IUCD self- paced approach training and Anaesthesia Assistance distance learning course is started now. This approach help to save the time , shorten the duration of absent at health facility due to training and resources.

### **4.8 Development of different training Manuals and Revision:**

Different types of training manuals have been developed this year some entirely new and some adopted with revision to address the training activities. NHTC has got adequate support from EDPs support partners to prepare all these manuals and needful revision.

- Minilap Trainig Package
- NSV Trainig Package
- IUCD Trainig Package
- PNC Trainig Package
- IP Trainig Package
- NSV self-paced Trainig Package
- IUCD self-pacedTrainig Package

## 5 Internal Capacity Development:

### 5.1 Staff Development

To make the training activities more effective and efficient proper composition of the training faculties is an important step. NHTC has assessed its capacity with the external evaluation and suggested for the institutional reform and proper composition. Very limited trainings and workshop were organized to enhance the capacity of the trainers working under NHTC, RHTC and clinical training sites.

### 5.2 Upgrading and Maintenance of Physical Facilities

In the process of upgrading and maintenance of physical facilities, few buildings were renovated for the residential and training purposes. Few teaching learning materials like laptop, LCD, Desktop computer, printer, photo copy machine, and models were supplied to strengthen the training sites.

### 5.3 Improvement of Library

As continuous effort to increase library resources, NHTC has added a large number of books, periodicals and necessary equipments.

### 5.4 Major Different Training Sites

SN	Training	Number of sites	Name of training sites
1	SBA	21	Different accredited Central, Regional and zonal Hospitals
2	ASBA	2	I. Paropakar maternity Hospital Thapathali II. Bharatpur Hospital Chitwan
3	Anesthetic Assistant	3	NAMS Bir Hospital Dhulikhel Hospital Amda hospital Damak

## **6.2 HEALTH EDUCATION, INFORMATION AND COMMUNICATION**

### **6.2.1 Background**

The National Health Education, information and Communication Centre (NHEICC) was established in 1993 under the Ministry of Health (MoH), Nepal following the New Health Policy, 1991. The MoH has given structural mandate toward NHEICC in 2002 to provide support for health promotion, education and communication activities out of the Department of Drug Administration and Department of Ayurveda. The cabinet of Nepal endorsed "National Health Communication Policy, 2012" which is the milestone for health promotion, education and communication program under GoN/MoH. The New Health Policy 2072 (policy no six) focuses on promotion of public health through information, education and communication.

NHEICC is the government organization responsible for planning, implementation, monitoring and evaluation of health promotion, education and communication programs of all health services and programs within the MoH, Nepal. This centre regulates the health messages and information produced and disseminated by other organizations such as those in the private sector and non-government sectors. This proceeds in an integrated manner developing, producing and disseminating messages and materials to promote and support health programs and services.

Since FY 2051/52, all of the districts and public health offices(D/PHO) assembled an organizational structure for health education, information and communication programs. There is health education and communication sections in the regional health directorates, regional training centres and health information sections with in the D/PHO. The health education and communication section implement health promotion, education and communication activities utilizing various media and methods based on the needs of the local people in the district as well as the health programs and services objectives. Local media and languages are preferred to use in the districts for dissemination of different health messages and information in their local context and language.

The Nepal Health Sector Strategy (NHSS) 2015-2020, addresses the current health challenges, in addition to providing a roadmap towards universal health coverage of basic health services as preserved in the constitution of Nepal 2015. This strategy was endorsed by the MoH which has four major principles including equity in health systems, quality of health services for all, health system reform and multi-sectoral collaboration. One of the nine outcomes of the NHSS is to improve healthy lifestyle and environment through a health promotion approach which is intended to achieve the goal of improving the health status of all people through an accountable and equitable health service delivery system within Nepal. The health promotion is made possible through a multi-sectoral approach and collaboration. So, NHEICC intends to implement the Information, Education and Communication(IEC), Behaviour Change Communication (BCC) and Health Promotion (HP) programs through a partnership with state(public) and non-state(private) sectors. NHSS continues to review the current multi-sectoral approaches being practiced in areas such as Water, Sanitation, Hygiene (WASH) and nutrition and identifies ways to strengthen them.

**The following key areas are importance to achieve the principles of health promotion:**

1. Promotion of healthy life styles and a healthy environment through multi-sectoral action
2. Children as the starting point
3. Health facilities as a learning environment for healthy life styles
4. Reducing the high burden of death and injury through improved road safety
5. Nutrition as a cross cutting issue in collaboration to promote a healthy environment  
Establishing multi-sectoral responses to climate change

Innovative approaches in health promotion, such as targeting specific behaviours (eg: smoking, alcohol consumption and promotion of health seeking behaviours) will be strengthened and implemented to address the non-communicable conditions such as obesity.

***National Health Communication Policy, 2012***

Considering the health communication challenges and needs, the GoN endorsed the "National Health Communication Policy, 2012" which is a milestone for health promotion, education and communication programs under the GoN/MoH. It gives high priority of government to health promotion, education and communication programs in the health sector. The goals, objectives, policy and strategy of National Health Communication Policy, 2012 is as follows.

**Goal**

The main goal of the National Health Communication Policy is to sustain healthy life styles of all citizens by: -

- promoting health services, programs and healthy behaviour;
- preventing and controlling disease and
- Increasing accessibility and utilization of health services.

**Objectives**

The objectives of the National Health Communication policy are to:

- Mobilize and use modern and traditional communication multimedia and methods in an extensive and proportionate manner to raise health awareness, knowledge and promote healthy behaviour of all citizens.
- Strengthen, expand and implement health communication programs at central, regional, district and community level through clear and strengthened co-operation, co-ordination and collaboration among individual, community ,relevant organizations and communication media.
- Generate, collect and mobilize sufficient resources for the effective implementation of health communication programs at central, regional, district and community level.
- Prevent un-authorized dissemination and duplication of health related messages or information and materials of different issues by maintaining quality, accuracy, authorization, uniformity and appropriateness.
- Enhance capacity of health communication in order to develop, produce and disseminate quality,accurate,authorized,uniform and appropriate messages or information, materials and programs.
- Provide quality health messages or information through appropriate media and method to the citizens,who have no access to health messages or information.
- increase knowledge, improve skills and promote desired behaviour change on Essential Health Care Services(EHCS) and beyond.

## Supporting Programs: National Health Education, Information and Communication

---

- To create demand for quality EHCS among all castes and ethnic groups, disadvantaged and hard-to-reach populations.
- advocate for required resources (human and financial) and capacity development for effective communication programs and interventions to achieve the Nepal Health Sector Program (NHSP-2) goals
- increase access to new information and technology regarding health programs.
- raise awareness among the public on communicable and non-communicable diseases and to encourage all to seek preventative measures.
- intensify and strengthen action against tobacco use, both smoked and smokeless, excessive use of alcohol, unhealthy diets, and physical inactivity.
- mitigate public panic and respond to communication needs during emergency situations.
- Promote environmental health, hygiene and sanitation.

## Major Policies

- Implement health communication programs in a decentralized manner.
- Provide continuity with planning and implementation of communication programs of all health services and programs in an integrated approach and through a one door system.
- Allocate at least two percentages of the annual MoH budget for managing adequate financial resources to implement health communication related programs.
- Promote participation, co-ordination and co-operation of relevant organizations and stakeholders for effective implementation of health communication programs.
- Use extensively modern and traditional multi media especially mass, interpersonal and social communication media and methods to disseminate health messages or information.
- Make arrangements for the dissemination of health messages or information based on need, approved standards and classification through all communication media and methods to intended audiences by direct negotiated agreement in transparent and proportionate manner.
- Disseminate health messages or information in an educative, artistic and entertaining manner in local language and in culturally accepted manner.
- Regulate and provide pre-consent from GoN for dissemination of health information for maintaining quality, consistency, accuracy, authorization, uniformity, appropriateness and avoidance of duplication as per the "Health Communication Policy 2012".
- Make arrangement to encourage the continued dissemination of successful avenues of health information communication through media, institutions, health workers, journalists or health issues centered on communication media.
- Encourage and facilitate the dissemination of health information through different communication media and methods in Public Private Partnerships (PPP) under the corporate social responsibility.
- Regulate, control and ban dissemination of any types of messages or information that can adversely affect human health through exaggerated, misled or unauthorised material.
- Ensure information is transparent and informative by disseminating through reputable health services and programs. Education around the proper use of medicines and medical and service charges provided to the people by government, non- government and private organizations is essential.
- Make arrangements to ensure health information or materials is easily accessible to physically and mentally disabled people and senior citizens.
- Give priority to issues related to lifestyle related diseases and encourage the improvement of lifestyles via the simple behaviour changes capable of each individual.
- Ensure good governance and management of health services and institutions of all levels

for effective planning and implementation of health communication programs by building capacity of health promotion and communication.

- Provide quality health information to all citizens, particularly people living in remote villages who are geographically disadvantaged, in addition to ethnic, gender, poor and marginalized populations at an appropriate time and from appropriate media and methods.
- Link health information and programs with services that are socially inclusive, gender friendly factual and appropriate to the audience.
- Promote and use advanced modern communication technology for dissemination of health information.
- Emphasize quality health promotion and communication by developing and producing human resources appropriately related to health promotion and communication.
- Develop and use a monitoring and evaluation mechanism for the overall use of health information and with the view to evaluate the effectiveness of the program(s).

## **National Health Education, Information and Communication Centre ( NHEICC) Program**

### **GOAL**

The goal of the NHEICC program is to contribute to attaining the national health program goals and objectives by providing support for all health services and programs.

### **OBJECTIVES**

The general objective of the NHEICC program is to raise the health awareness of the people as a means to promote positive health status among all citizen and to prevent disease through the efforts of the people themselves and through full utilization of available resources.

The specific objectives of the IEC/BCC programs are to:

- Increase awareness and knowledge of the people on health issues and promote desired behaviour change on EHCS and beyond.
- Create demand for quality EHCS among all castes and ethnic groups, disadvantaged and hard to reach populations.
- Advocate for required resources (human and financial) and capacity development for effective communication programs and interventions to achieve the NHSS goals.
- Increase access to new information and technology on health programs.
- Increase positive attitudes towards health care.
- Increase healthy behaviour.
- Increase participation of the people in the health intervention programs at all levels of health services.
- Intensify and strengthen action against tobacco use (in all forms), excessive use of alcohol, unhealthy diets and physical inactivity.
- Promote environmental health, hygiene and sanitation.
- Control the tobacco and alcohol and Non-Communicable Diseases(NCDs)

### **Major Strategies:**

- Health communication programs will be implemented through health structures from a central level to community, district and regional levels in a decentralized manner.
- Co-ordination and collaboration will be made with local bodies and other stakeholders for implementing health communication programs in a decentralized manner.
- The policy of planning and implementing health related communication programs of all

health services and programs in a “one door system” and integrated approach will be implemented through the MoH/NHEICC.

- Advocacy, community mobilization and behaviour change communication programs will be implemented at different levels by formulating health communication strategies of health services and programs in an integrated manner.
- Health communication programs of different health services and programs will be integrated while formulating annual programs and the MoH budget will be implemented through the NHEICC. Budget will be allocated annually according to the policy for the implementation of health communication related programs.
- The bodies under the United Nation (UN) and external development partners will be encouraged and facilitated to invest in health communication programs.
- Certain tax will be levied on any services or commodities used by the general public and on behaviour or commodities that adversely affect health. Some percentage of tax will be utilized in a management fund for the dissemination of health information programs.
- The practice of free distribution and use of information related to health will be discouraged and managed in such a way to ensure accurate information regarding health is disseminated to the wider public.
- Formulation and effectively working health communication coordination committee comprising key stakeholders to assist in the implementation of policy and decisions.
- Youth, journalists, professionals, institutions and various organizations will be mobilized for the promotion of healthy behaviour, basic health services and programs through coordination and collaboration with the relevant ministries and institutions.
- Modern electronic communication media such as radio, television, FM radio, websites, telephone, mobile etc will also be used to disseminate health messages. Arrangements will be made to include health messages with links to all government websites.
- Booklets, pamphlets, posters, diaries, signage, stickers, flipwall charts, brochure , flash cards, bulletin boards will be produced, published and displayed for effective dissemination of health message and information. Health messages will also be displayed through various means such as the outer cover page of text books, packaging of food items, tickets, postal letters and T-shirts.
- Traditional and local folk art, culture and rituals like Maruni, Rodi, DhanNach, ShakewaNach, Nautanki, Dohori Geet, Deuda, Ghatu, DhamiJhankri, Gaine, Fine Art, Street Drama, Puppet Dance, Miking etc. of powerful folk communication media and its related arts will be used appropriately to disseminate health messages.
- Various carnivals, festivals, days, events, exhibitions will be organized to spread health messages and information effectively throughout each community.
- Innovative ideas of art especially articles, radio and television program, interaction, drama, film, songs, dance, fine art, sculpture etc will be encouraged for raising health awareness. Other sectors will also be encouraged to participate in similar types of activities.
- Interpersonal communication is one of an effective medium in disseminating health information, but fact checking is crucial in case any messages have been misinterpreted. Therefore, emphasis will be given to mobilize community people and groups like local organizations, intellectuals, teachers, students, peer groups, religious leaders, media, female community health volunteers, consumer groups, mothers’ groups, youth and other social and professional organizations as appropriate.

## Major Activities

NHEICC conducted major health communication activities at all levels as follows: -

### Central Level

- Policy, strategy, program development and implementation.
- Development of program guidelines and directives and supply to RHD, RHTC and D/PHO. Development, production and broadcasting of short messages through radio and television.
- Development and publication of health messages through newspapers (printed and electronic).
- Development, production and distribution of IEC materials to stakeholders and Regional Medical Stores (RMS), D/PHO.
- Program orientation to regional and district level program managers, involving a key contact person in five regions
- Advocacy - Global Hand Washing Day, World Health Day and World No Tobacco Day Celebrations.
- Co-ordination - Technical committee meetings.
- Capacity building on health promotion, education and communication programs.
- Supervision, monitoring and evaluation of health promotion, education and communication programs.
- Tobacco control activities including tobacco product pictorial health warning implementation.
- Tobacco control strategic plan preparation and implementation.
- Regional orientation to assistant CDO to implement tobacco control activities.
- Conducting environmental health, hygiene and sanitation activities.
- School based hand washing with soap and water program
- Public Private Partnership in Hand washing with soap program.
- Broad-casting health messages through Radio and Television in package.

### Regional Level

- Supervision and monitoring of IEC activities.
- Sensitization program for prevention and control of epidemics.
- Distribution of IEC materials through regional medical stores.

### District Level

- Strengthen district IEC corner by supporting electronic equipment.
- Sensitization program for prevention and control of epidemics.
- Production of need based IEC materials.
- Distribution of IEC materials in health facilities.
- Production and airing of health radio programs and messages through local FM radio.
- Exhibition to promote health services and programs.
- Publication of health messages in print media.
- Community interaction program for health service promotion.
- Establishment and management of IEC corner in each health facility.
- IEC program on anti-tobacco and non-communicable diseases control.
- Supervision and monitoring of IEC activities
- Celebration of different health days.
- Coordination and collaboration between district level stakeholder.

### Analysis of Achievement

The physical and financial achievement of the regular IEC/BCC activities carried out by NHEICC was 95.5 percent and 83.9 percent respectively in FY 2069/70. The physical and financial achievement was 68.9 percent and 57.7 percent respectively during the FY 2070/71 and 85.5 percentages and 78.7 percentages achievement was in 2071/72.

Similarly, the physical and financial achievement on Health Tax Fund-Tobacco control activities carried out by NHEICC was 96.3 percent and 83.9 percent respectively in FY 2069/70 and 81.4 percentage and 71.6 percentage was in 2070/71 and the physical and financial achievement was 96.1 percent and 74.7 percent respectively during the FY 2071/72.

**Table 6.2.5: Trend of Physical and Financial Achievement**

Program	FY 2069/70		FY 2070/71		FY 2071/72	
	Physical	Financial	Physical	Financial	Physical	Financial
Regular IEC program (%)	95.5	83.9	68.9	57.7	85.5	78.7
IEC program of Tobacco control program (%)	96.3	83.9	81.4	71.6	96.1	74.7

Source: NHEICC

According to NHSP-2, health education and communication is reaching all health programs, aiming to increase knowledge and improve behaviours regarding key health issues of all castes, ethnic groups, the disadvantaged, and hard-to-reach populations. It also aims to create demand for quality essential health services, thereby improving access, creating public trust in health services and ultimately encouraging people to utilize the existing health services and mitigate public fear and respond to communication needs during emergency situations.

NDHS 2011 report shows a decrease in TFR, IMR and CBR. The report also shows reduction in prevalence of anaemia among pregnant women and children. Knowledge of informants about HIV/AIDS has also be increased. Utilization rates of available health services has increased. There is correlation with these achievements and the impact of health education, information and communication programs.

### Issues and Recommendations

Table 6.2.6 presents the issues discussed during the regional and national reviews and the recommendations to overcome these issues.

**Table 6.2.6: Issues, recommendation and responsibility**

Issues	Recommendation	Responsibility
Limited BCC and demand generation activities focusing in hard to reach sub-population	Develop and implement district specific BCC and demand generation activities focusing in hard to reach sub-population	NHEICC/DoHS
Health education key personnel not identified	Revive and review of health education Technician/ Health Education Officer	MoH/NHEICC
Performance gap among health education key personnels	Capacity building for health education key personnels on the effective	NHEICC/MoH/NHTC/ RHTC
Limited focus on NCD	Provision of adequate	NHEICC/MoH

## 6.3 LOGISTICS MANAGEMENT

### 6.3.1 Background

An efficient management of logistics is crucial for an effective and efficient delivery of health services as well as ensuring rights of citizen of having quality of health care services. Logistics Management Division (LMD) has established under the Department of Health Services in 2050/51 (1993), with a network of central and five regional medical stores as well as district level stores. The major function of LMD is to forecast, quantify, procure, store and distribute health commodities for the health facilities of government of Nepal. It also involves repair and maintenance of bio-medical equipment, instruments and the transportation vehicles.

In order to systematize the management of logistics, the Logistics Management Information System (LMIS) unit was established in LMD in 1994. LMIS Unit collects and analyses quarterly (three monthly) LMIS reports from all of the health facilities across the country; prepares report and disseminates it to:

- Forecast annual requirements of commodities for public health program including family planning, maternal, neonatal and child health, HIV and AIDS commodities, vaccines, and Essential Drugs;
- Help to ensure demand and supply of drugs, vaccines, contraceptives, essential medical supplies at all levels;
- Quarterly monitor the national pipeline and stock level of key health commodities.

#### Overall Objective

To plan and carry out the logistics activities for the uninterrupted supply of essential medicines, vaccines, contraceptives, equipment, HMIS/LMIS forms and allied commodities (including repair and maintenance of bio-medical equipment) for the efficient delivery of healthcare services from the health institutions of government of Nepal in the country.

#### Strategies

- Logistics planning for forecasting, quantification, procurement, storage and distribution of health commodities.
- Introduce effective and efficient procurement mechanisms like e-Bidding, e Submission.
- Use of LMIS information and real time data in the decision making.
- Strengthen physical facilities at the central, regional, sub-regional and district level for the storage and distribution of health commodities.
- Promote Web-Based Logistics Management Information System and Non Expendable/Expendable Items Inventory System in Central, Regional and Districts warehouses.
- Repair and maintenance of bio-medical, cold chain equipments/instruments and transportation vehicles.
- Capacity building of required human resources on logistics management regarding public procurement, E-bidding and Web- Based LMIS/online IMS at all levels.
- Implement effective Pull System for year round availability of Essential Drugs and other health commodities at all levels (Central, Regional, District and Health Facilities).
- Improvement in procurement and supply chain of health commodities, working on procurement reform and restructuring of Logistics Management Division and District Stores.

### 6.3.2 Major Activities

- Plan for the efficient management on forecasting/quantification, procurement, storage, distribution and transportation of health commodities to all health facilities for the delivery of healthcare services based on LMIS.
- Develop tender documents as per public procurement rules and regulations and procure essential medicines, vaccines, contraceptives, equipment, different forms including HMIS/LMIS and allied commodities.
- Store, re-pack and distribute medicines, vaccines, contraceptives equipment and allied commodities.
- Conduct health logistics management trainings/orientation in collaboration with NHTC up to regions, districts and other stakeholders.
- Manage to print and distribute HMIS/LMIS forms, stock books and different forms required for all health institutions.
- Support on implementation and functioning of web-based LMIS, web-based Equipment Inventory System and Inventory Management System software.
- Manage to maintain the bio-medical equipment, machineries and transport vehicles.
- Implement and monitor Pull System for contraceptives, vaccines and essential drugs in the districts.
- Coordinate with all development partners supporting health logistics management.
- Supervise and monitor the logistics activities of all region (RMS) and district levels (DPHO/DHO).
- Procure, store and distribute various health commodities for quality health services.
- Implement Telemedicine program in the hill and mountain districts.

### 6.3.3 Analysis of Achievement

#### 1. LMIS Reporting Status

The trend of total LMIS reporting from health facilities is consistently above 95 percent over three years. However, the reporting percentage decreased to 85 % in 2071/72. Analyzing the regionwise reporting percentage, there has been sharp decline in Central Region.

The main reason for this decline could be attributed to the massive earthquake of Baisakh 12, 2072 which hit mostly in Central Region.

Due to this most of the HFs in affected districts were completely destroyed and could not send the reports. Besides, the political situation after the earthquake was also not favourable resulting in no reporting from HFs especially from Tarai districts. The LMIS has helped to generate accurate and reliable feedback reports, thereby contributing to improve logistics functions like budgeting,

quantifying, forecasting, procurement, storage, transportation and distribution of FP, MCH commodities and essential drugs to be procured by the centre. LMIS has played a key role in reducing stock-out rates and increasing year-round availability of key health commodities through close monitoring. Similarly, LMD has implemented web-based LMIS and Inventory reporting system.

**2. Web-Based LMIS Reporting Status**

Web-based LMIS up to the district level is in operation since 2008. The reporting percentage of districts remained in an around 50 percent for the last three years. This necessitates, to find out the root cause of non-reporting from districts and strategically plan to overcome this issue.

**3. Availability of Key Health Commodities**

LMD aims to make year round availability of key health commodities like Condom, Oral Pills, Inj. DMPA, Tab. Iron, Cotrim-P, Caps. Vit. A, ORS, Tab. Zinc sulphate in all health facilities and essential drugs for free health services. The stockout HFs for contraceptives, and selected MCH commodities (Tracer Drugs) has increased in this FY 2071/72. However, there is a need to decrease the stock-out of essential drugs in the health facilities by the effective implementation of the Pull System.

**Figure: National Stock out percentage of Health Commodities at HFs**

Family Planning Commodities= Condom, Injectable DMPA, IUCD, Implant, and Pills  
 MCH Commodities = ORS, Vitamin A, Co-trim/p, and Iron Tablets  
 Essential Drugs = Albendazole, Paracetamol, Chloramphenarimine, Aluminum Hydroxide, Metronidazole, Chloramphenicol, Gamma Benzene, Amoxicillin, Benzoic Acid.

**(Data Source: LMIS (Stock out information is quarterly average based on over 90% Health Facilities reporting LMIS)**

### 6.3.4 Major Logistics Activities to Strengthen Health Care Services

#### a. Procurement

LMD continued and added more commodities in the multi-year procurement. Condom, Injectable, ORS, Iron Tablets, Essential Drugs are now being procured through multi-year mechanism. Multi-year mechanism saves every year bidding and evaluation time for tender. LMD also completed the LICB (limited international competitive bidding) process in coordination with World Bank in the procurement of Implants, which results in procuring directly from the manufacturer in much lower cost.

A district-wise breakdown list of essential drugs and quantities to be procured at the district level, based on consensus forecast was developed by PHCRD and LMD. The list and budget was sent to all districts by the Primary Health Care Revitalization Division (PHCRD). Similarly, on the development of e-bidding software, the terms of reference/guidelines was finalized and sent to prospective e-bidders for their review and feedback.

Providing of training on public procurement for the Region and District level personnel with the financial support of UK AID/NHSSP and technical support of GoN/PPMO. Completion of the training in FY 2071/72 in 3 Region (Eastern, Central and Far Western), rest of 2 Region (Western and Mid-Western) will be cover in FY 2072/73.

#### b. Consensus Forecast Meeting, 2015

Every year, the working group forecasts for coming three to five year period with periodic review. The group consists of representation from various divisions under DoHS/MoH, districts, social marketing organizations and EDPs. This year the workshop convened on March 18-19, 2015 with participation from public sector, social marketing sector and EDPs. The main purpose of the workshop is outlined below:

- To estimate the commodity needs and assess stock status of in-country supply pipeline so as to identify and correct supply imbalance.
- To provide data on specific commodity requirements and plan for government budget allocations.
- To support the estimation of commodity procurement cost.
- To inform donors about funding requirements and advocate for commodity procurement.
- To ensure government's commitment for Citizens Right in providing health care service.

The workshop developed a consensus on forecasting of Essential drugs, FP commodities, MNCH commodities, vaccines, syringes and HIV& AIDS commodities. The forecast was based on scientific data, which included demographic data, consumption pattern, morbidity issues and some special programmatic considerations.

The workshop was highly successful in addressing issues of forecast and quantification of health commodities with some important recommendations from the participants. The workshop also incorporated other factors effecting forecasting and quantification i.e. non-prescribed drugs, replacing drugs, fast moving drugs and duplication. Recently, MoH has updated free essential drugs list and forecasting of these items were carried out by PHCRD. The success of consensus forecast is a milestone in logistics management, but there is always room for continuous improvement.

Subsequently, LMD organized a Quantification workshop in March 26, 2015 in which a total 403 items quantified and out of which, 188 items quantified to procure for upcoming fiscal year 2072/073 (2015/2016) by public sector that was decided.

Similarly, National Level Consolidated Annual Procurement Plan (CAPP) organized by DoHS in collaboration with all concerned division and centre in August 13-14, 2015 with technical assistance and financial support from USAID/Nepal Health For Life Logistics/Lifeline Nepal. LMD's Procurement Unit took a lead role prepared CAPP in which all requirements are grouped into Goods, Consulting Services, Drug Package-1 and Drug Package-2.

**c. Quarterly National Pipeline Review Meetings**

Logistics Management Division (LMD) started pipeline monitoring of FP commodities since 1997/98. It now covers FP, MNCH, EPI Vaccines, Syringes, selected Essential Drugs and HIV/AIDS commodities as well. National pipeline reports are now used to monitor the availability of the stock at service delivery points (SDPs) and to monitor the procurement status of key health commodities, including antiretroviral (ARVs).

In each quarter, a national pipeline meeting takes place at the LMD to review, monitor, and evaluate the procurement, shipment, distribution, transportation and stock status of family planning and other health commodities.

LMD with the support from Health for Life (H4L) Logistics conducted quarterly National Pipeline Status Review meetings. The meeting was participated by Program Divisions of DoHS, External Donor Partners and stakeholders like Social Marketing agency and FPAN. In the meetings shipment schedules, shipment status (planned, ordered and received), actual consumption and months-of-stock-in-hand of 32 health commodities were discussed.

**d. Strengthen Storage Capacity**

Ideal storage conditions for essential drugs and commodities are required to deliver quality health services to service delivery sites in order to ensure optimal health service utilization by consumers. In the course of implementing the Logistics System Improvement Plan (LSIP) of Ministry of Health and Population (MoH) jointly developed by MoH, a massive clean-up and de-junking activities were carried out across the country during the period of 1994-97. This effort resulted in freeing storage space and generating revenue for the government (from de-junking and auctioning), which revealed that numerous districts seriously lacked ideal storage space for handling health and other allied commodities including vaccines.

The MoH and LMD commissioned an assessment in 1999 to identify the current storage conditions and space needed at district level. The assessment was carried out with support from JSI Research & Training Institute and USAID. The study revealed that 58 of 75 districts had immediate storage needs (none of the districts had ideal cold storage facilities) and all 75 would require new stores. Space was inadequate and security was poor. 49 out of 75 districts had storerooms scattered in two or more rooms with none specifically designed for storage and many were in rented buildings. Most of the storerooms were filled with unusable commodities and junk. Every year huge quantities of drugs and other health commodities went missing, damaged or had to be destroyed.

DoHS/LMD team was visited Central Ware House Pathalaya and 5 Regional Medical Stores including District Medical Stores at same time to observe and discuss real warehouse problems and solution.

**e. Capacity Building in Logistics Management**

**New Intervention**

In an effort to decentralize logistics decision making at the peripheral level health facilities and transfer of technology below district level, LMD with support from H4L Logistics piloted web-based LMIS in peripheral level Health Facilities (HFs) of Jumla, Arghakhanchi and Bardiya. This is an effort to

## Supporting Programs: Logistic Management

help districts with real time information on stock status of key health commodities and other essential drugs at peripheral level HFs and can make evidence based logistics decision by making commodities available uninterruptedly and ultimately contributing to increase health services utilization by the hard-to reach population.

In this reporting period, as a part of implementing web-based LMIS up to the peripheral level HFs, training in Arghakhanchi and Bardiya was conducted. Prior to the training the following preparatory activities were carried out:

1. Curriculum Development and Training of Trainers
2. Software Modification
3. Procurement of Computers and Accessories

Accordingly, as part of implementation training was conducted in all three piloted districts in 2015. A total of 111 laptops, printers and CDMA data devices were distributed to all HFs of Bardiya, Arghakhanchi and Jumla.

The facility based reporting status of 3 piloted districts is shown in the Figure 1. The reporting status of Arghakhanchi and Bardiya is above 50 percent. However, the reporting percentage of Jumla is not that encouraging and it remained around 25 percent. Though LMD is providing remote assistance through Team Viewer, poor net connectivity and HF personnel not being user friendly in IT, the reporting status is still far from par. However, it is expected that the reporting percentage will be improved in coming months.

### Real Time Inventory Management System (IMS)

The Web-Based LMIS was introduced in 2008 replaced the quarterly paper based reporting system to monthly, however it did not provide the real time information needed to make an effective supply chain decision making. Realizing the need of real-time information on health commodities, LMD took an initiative to make real time inventory management system up to the district level with customization of already in use IMS software. The system is adapted from the USAID supported IMS system with support from UNICEF/Lifeline Nepal. This is being online system, gives real-time information of stock status of health commodities of central, regional and district stores. This allows to make supply chain decision making. Plan is to implement this new system from next FY.

### Manual Revision and Pull System Training

LMD and National Health Training Center (NHTC) with support from H4LL conducted a in January 16, 2015 to revise pull system training manuals. In the revision process data quality chapter was introduced to improve recording and reporting and reducing data error. The manuals were yet to revise since 2009.

LMD and NHTC organized a Pull System Training for 14 district storekeepers especially focusing on data quality in March 25-27, 2015. Nepalgunj. The pull system training was new for almost all participants. Importantly, newly introduced chapter “Data Quality” in which participants has to perform individual exercise was very effective and participants showed their keen interest.

Similarly, LMD and NHTC with support from H4LL organized a facility level pull system training for the HF of Kalikot in July. The training was requested by Kalikot DHO as there were many new staff who do not have idea on health logistics and many trained staffs were transferred. The main aim of the training was to improve knowledge, skill and attitude of the store keepers of health facilities so as to ensure the availability of adequate supply of medicine and health commodities in health facilities via pull system to provide effective health care service.

### LMIS Tools Revision

LMIS revision sub-committee was formed under LWG and organized three meetings to revise the LMIS forms that have not been revised since 20 years. The sub-committee revised the LMIS forms accordingly adding new drugs and removing redundant ones with eight digit unique codes for each items.

**Table 1: Revised in LMIS Forms and Number of Items**

Type of Forms	Original Number of drugs and supplies	Revision and added new drugs	New code Assigned
District Store	208	232	95
District Hospital	208	232	95
PHC	208	193	-
HP	169	132	-
NGO	6	5	-

### Recommendation from LMIS revision sub-committee in presence of Director General (DG):

- To implement bimonthly reporting system from peripheral health facilities up to centre level i.e. HP, PHC, District Hospital, DHO/DPHO, RMS, and Centre.
- In case of HIV & AIDS commodities reporting Regional, Zonal and Referral Hospital need to be included in the system.
- To validate LMIS data with morbidity data of HMIS reporting.
- Feedback mechanisms need to be strengthened and need to plan quality assurance annual survey to improve the data quality.
- LMIS data processing system should be revised accordingly such as IMS software.

### Logistics Regional Review Meeting

Logistics Management Division (LMD) carried out Regional Logistics Review Meeting in all regions of the country to address the problems and issues faced by the districts in supply chain management of health commodities to serve the end users. The current logistics challenges and issues are discussed with district health officers in the meetings. Likewise, this is an opportunity to share district’s experience last mile in supply chain and issues/challenges in supply chain management and how they dealt. Similarly, in this forum LMD can share the progress status, logistics indicators and coming year’s activities as well.

The objectives of the Logistics regional Review Workshop was to:

- Share district’s experience in supply chain management of health commodities to the peripheral level HF
- Experience sharing in issues and challenges in logistics management
- Progress, achievements/accomplishments and upcoming year’s program from the center

## Supporting Programs: Logistic Management

During the regional logistics workshop districts present on the prescribed format provided by Logistics Management Division (LMD) which covers the following areas:

1. Progress status (Anusuchi 2)
2. Health Facility wise estimated transportation
3. Total commodities distributed in FY year 2071/72
4. Estimated required quantity of commodities for FY 2071/72
5. Quarterly LMIS/Monthly Web based LMIS reporting status
6. Situation of bio-medical instruments and equipments
7. Status of repair and maintenance of biomedical equipments
8. Estimated transportation cost from district to peripheral level HFs
9. Transportation facility and their conditions
10. Major issues and challenges

The workshop has recommended the following actions to alleviate the above mentioned problems and constraints.

- LMD will forward the problem to concern ministries and planning commission for the additional required transportation budget in district.
- Strengthen supply system with coordination to center stores, regional medical stores and district stores.
- LMD will coordinate with Management Division on making storage spaces and suggested to districts to send estimate to MD.
- Budget should be allocate in contract for Computer Assistant to the region/districts.
- Budget should be allocate in logistics orientation program for newly appointed staffs to the districts.
- LMD along with supporting partners will provide necessary support for auctioning and disposal.

### **HIV/AIDS Logistics**

LMD conducted an assessment on the HIV and AIDS commodities (ARV Drugs and HIV test kits) and essential logistics systems to determine vertically management of ARV supply chain system can be integrated with the general health logistics system. As per the recommendation, the integration of HIV and AIDS logistics into mainstream logistics was endorsed by MoH in June 2012. As a part of integration process, HIV and AIDS commodities were included in National Consensus Forecast since November 2011. Integration of HIV and AIDS Logistics system came into effect mainstream logistics from July 2012 with assuming the responsibilities of storage and transportation/distribution of HIV and AIDS commodities to the service delivery sites.

### **Disposal of Unusable Health Equipment and Commodities: A Best Practice**

Unusable and/or expired health commodities are a major problem for Nepal's health system. Safe storage conditions for essential drugs and commodities are required to deliver quality health services to service delivery sites. In addition, "de-junking" of unusable commodities helps clear the way for usable commodities. For example, a major de-junking drive in 1994-97 freed up more than 125,000 square feet of free space and generated 25 million Nepali Rupees (NRs.) for the Government of Nepal's treasury.

USAID's H4L Logistics project is engaged in several actions to disposal of unused, unwanted or expired items. These activities include the provision of technical support in auctioning of unusable commodities for the District Health Offices (DHO) in Arghakhanchi, Surkhet (Dasarathpur PHC) and Banke district in May-September 2015. This generated more than NRs. 78,000 for the national treasury and freed approximately 450 square feet of space which could now be used to store valuable lifesaving drugs.

### Telemedicine Program

Nepal Government Ministry of Health & Population is committed to provide quality health to the rural population with special attention to the vulnerable community. Telemedicine has been chosen as one of the most important means to achieve it.

LMD initiated and implemented Rural Telemedicine program in 30 hill and mountain districts<sup>1</sup>. The training on Telemedicine for these districts has also been completed.

### 6.3.5 Issues and Action Taken

#### Issues raised and action taken:

Issues	Action Taken	Responsibility
Insufficient budget for transportation as per tariff	LMD has requested to concern ministries for transportation budget	MoH /DoHS/LMD
No vehicle for transportation of medicines, equipments and materials	Double Cab Pick-Up has been procured and distributed in 18 Districts and planning for continuation.	MoH /DoHS/LMD
Not updated web-based LMIS and inventory management system as regular due to HR issue	LMD will provide budget for web-based LMIS operation human resource	DoHS/LMD
Lack of training/orientation program regarding logistics and LMIS for newly appointed staffs	LMD will provide budget for orientation on logistics and LMIS for newly appointed staffs in the districts	DoHS/LMD
Expansion of store space and clearing of not repair and not used equipments/materials from store	LMD will plan for expansion of store space with the coordination of management division	DoHS/MD/LMD
Clearance of not repair/not used equipments/materials from district and health facility.	LMD will act auctioning and disposal according to guideline with the coordination of external development partners.	DoHS/LMD/EDPs

### 6.3.6 Issues /Challenges & Progress in Procurement Reform

#### Issues and Challenges:

Some progress in procurement and Supply Chain management and reform agenda.

Stock out Situation of Drugs and commodities and Remedy to resolve.

- Managing Procurement and supply in post earth quick and embargo.
- Inadequate skilled and trained technical human resources for procurement and quality assurance.
- Supply Chain (Warehouse capacity and PUSH/PULL mechanism, real time LMIS) to address the issue of over stock.
- Price Variation/lot many issues?
- Governance and transparency through e-governance (procurement /bidding/E submission)

<sup>1</sup> Achham, Bajhang, Bajura, Darchula, Dolpa, Gorkha, Humla, Jajarkot, Jumla, Kalikot, Khotang, Manang, Mugu, Mustang, Okhaldhunga, Pyuthan, Rasuwa, Rolpa, Rukum, Sankhuwasabha, Sindhuli, Sindhupalchowk, Dolakha, Solukhumbu, Taplejung, Baitadi, Doti, Dadeldhura, Dailekh and Salyan

**Joint Attempt:**

- MoH and Partners realized on Procurement reform and committed on agenda.
- Procurement Reform Strategy and Roadmap agreed.
- Series of meeting and workshop organized.
- Key stakeholders from the Partners Participated.

**Recommendations:**

- Elevate LMD within MoH structure and give it full authority to oversee procurement in the health sector,
- create position for professional procurement experts with clear ToR for the restructured LMD, and
- clearly define the scope of work of LMD.

SN	Output	Activities	Progress
1	Concept Note for Restructuring of LMD along with Procurement Reform Action Plan		Approved by MoH on 23 April 2015
2	Health sector procurement Processes/Procedure strengthened (drugs, equipment and health commodities).	<ul style="list-style-type: none"> <li>• Develop and approve standard specification Drug</li> <li>• Piloting Central bidding and payment – local ordering and delivery (in one Region</li> <li>• Implementing the Plan as per the E-tendering/submission</li> <li>• Implementing the Plan as per the E-tendering/submission</li> </ul>	<ul style="list-style-type: none"> <li>• Specification Prepared with consultation and endorsed by MOH and uploaded in LMD website. Few needs Revisit.</li> <li>• Specifications for 1060 already prepared</li> <li>• QA completed (Crown Agent) Need to discuss with user group and make more competitive.</li> <li>• Specification for cold Chain Equipment Prepared endorsed and uploaded in Website.</li> <li>• Adopted PQ for Vaccine</li> <li>• Cold chain Equipment Specification prepared and endorsed by MOH</li> <li>• FP commodities except DMPA is PQ and DMPA is WHO GMP as per decision made from MOH</li> <li>• Implementing the Plan as per the E-tendering/submission</li> <li>• Implementing the Plan as per the E-tendering/submission already in place</li> </ul>

Supporting Programs: Logistic Management

3	Health sector procurement Processes/Procedure strengthened (drugs, equipment and health commodities).	Piloting Central bidding and payment – local ordering and delivery (in one Region).	<ul style="list-style-type: none"> <li>• Draft Standard Bid document prepared</li> </ul>
4	Health sector procurement Processes/Procedure strengthened (drugs, equipment and health commodities).	Define list and volume drugs & equipment to be procured at different levels.	<ul style="list-style-type: none"> <li>• Yet to be finalized</li> </ul>
5	Health sector procurement Processes/Procedure strengthened (drugs, equipment and health commodities).	Implementing the Plan as per the E-tendering/submission	<ul style="list-style-type: none"> <li>• Executed</li> </ul>
6	Capacity (Org/HR/IT/ Finance) enhanced	<ul style="list-style-type: none"> <li>• Make arrangement of revolving funds for health sector procurement</li> <li>• Procurement of professional dedicated staff outsourced.</li> <li>• Capacity enhancement and training.</li> </ul>	<ul style="list-style-type: none"> <li>• Not yet Managed and not Possible by Financial Rules and Regulation</li> <li>• O&amp;M Survey completed and Structure defined additional staff adjusted with in MOH staffing and post which exists. No additional Post can be put like Procurement consultant</li> <li>• Procurement Training for EDR, CDR, and FWDR completed.</li> <li>• E bidding Training for LMD completed. Non from EDP for LMD</li> <li>• Procurement Training for EDR,CDR ,FWDR completed.</li> <li>• E bidding Training for LMD completed. Non from EDP for LMD</li> </ul>
7	Supply Chain (Infra/ Systems) made effectively functional.	<ul style="list-style-type: none"> <li>• Expansion of current regional stores.</li> </ul>	<ul style="list-style-type: none"> <li>• No Progress made yet</li> </ul>
8	Supply Chain (Infra/ Systems) made effectively functional.	<ul style="list-style-type: none"> <li>• Real time/Live operation of LMIS at district level- monthly (Paperless system at district level)</li> </ul>	<ul style="list-style-type: none"> <li>• Logistic working group has completed Draft LMIS reporting Format</li> <li>• Web Based LMIS Software revised and Piloted in Central Medical Store Pathalaiya</li> </ul>

**Major Actions Carried out by LMD in FY 2071/72:**

---

- Capacity building on PPA and PPR in 3 regions.
  - Contract Management software in Place
  - Rapid humanitarian response during earthquake in supply and distribution of emergency medicines and equipments.
- 

**Plan ahead:**

---

- Training on public procurement Rules and Regulation
- Training on E submission
- Training on Internet/Web based LMIS
- Expansion of Real time Web Based LMIS Soft ware in Regional store.
- Regional/District level forecasting
- Establish LWG at regional level

At district level No Paper based Inventory only computerized. Decision made at DoHS and letter already sent

---

**Progress in Procurement:**

---

- Review of all documents ,Qualification criteria's and PPA/PPR
  - Pre Bid Meeting practiced introduced and issues resolved for bid floated.
  - Computerized Contract Management System introduced.
  - Initiated Consolidated Annual and Master Procurement Plan
  - Situation of overstock and expiry managed leading to stock out.
  - Multi year contracting (2 Year) to ensure commodity security
- 

**Current Issues:**

---

- PPA and PPR and Bid document needs to be reviewed to address issues which is not health Procurement friendly.
  - Why we don't analyze and What is the real cause of delayed Procurement and supply chain and stock out.
-

## 6.4 Public Health Laboratory Services

### 6.4.1 INTRODUCTION AND BACKGROUND

Under curative services, the Health policy aims to provide diagnostic laboratory services in all the hospitals from central to the periphery. In accordance with National Health Policy 2071 and National Health Laboratory Policy 2069, the National Public Health Laboratory (NPHL) has been identified as the central and specialised national referral public health laboratory for the country and regulatory body to licence the public and private labs. Besides, NPHL is a focal point for Blood Safety. In this regards, National Bureau of Blood Transfusion Service (NBBTS) has been established at NPHL.

NHSP II (2010-2015) envisages Public Health Laboratory Service strengthening at all levels. In this regards, National Public Health Laboratory (NPHL) has been designated as nodal institute for Policy, guidelines and over all framework for capacity building&development in laboratory sector. Attention will be given to strengthen laboratory procedure and communication between national, regional and district levels and strengthening the systems ensuring the availability of essential equipment and logistics. It also gives commitment to new recruitment of staff as well as training of existing staff.

History of laboratory services in Nepal is nearly half century old and a clinical lab was first established at Bir Hospital. At present there are central hospital based laboratories-8, Regional hospital based laboratory-3, sub regional hospital based laboratory-3, Zonal hospital based laboratories-10, District hospital based laboratories-62, District level Hospital Based-16 and PHCC based level laboratories-204. In the private sector there are above1500 laboratories. All these laboratories require significant strengthening with respect to quality assurance, human resource recruitment, competency, development of service range and physical infrastructure.

Quality service of laboratory is important issue. NPHL conducts external quality assurance scheme on different discipline of lab services and develop quality control samples.

Every year Nepal is at threat of outbreak of new emerging and re-emerging diseases. In 2009, there was a pandemic of Influenza A, H1N1&Pdm, in 2013, Mers Corona virus outbreak occurred in Middle East and H7N9 in China, in 2015, Ebola in Africa and in 2016 Zika Virus in South Africa and south America. As NPHL is responsible for outbreak investigation of diseases, National Influenza Centre (NIC) has been established in April, 2010 and Bio-Safety Level-3 Lab in January 2015 for diagnosis of emerging and re-emerging infectious diseases. NIC functions through the National Influenza Surveillance Network (NISN) located at different regions. In public health, NPHL has capacity to diagnose different types of influenza; Influenza A (H1H3, H1N1, H7, H5), Influenza B, other virus like RSV, Hanta, Ebola, CCHF, KFD, Dengue, Chickengyunya, Zika, leptospira, scrub typhus, HIV Viral Load & EID, HCV Viral Load & Genotyping, etc.

Major challenge of Health Laboratory service is shortage of human resource. There is no adequate post microbiologist/virologist whose role is very crucial for diagnosis of infectious disease. Lab service cannot be functional without use of biomedical equipments. Repair, maintenance of calibration of equipment is very essential to provide quality laboratory service for which it needs adequate number of biomedical engineers. Other laboratory staffs like pathologist, medical technologist and biochemist are not adequate at each health facility. The post for each category should be increased as per the work load.

National Bureau for Blood Transfusion Service based at NPHL has been formed as the National authority for blood safety on behalf of MoH for effective implementation of National Blood Program (NBP). The mission statement of NBP is to ensure safe, adequate and timely supply of blood and blood product to meet the transfusion requirement of the people of Nepal in and equitable and affordable manner for

which NBPis working on development/revision of policy, guidelines, protocols, SOPs as per need. NPHL also serves as National Reference laboratory for TTIs screening for BTS. As a reference lab, its responsibility is to evaluate the testing kits for TTIs to perform conformational test and to send proficiency panels to all BTSCs under National Quality Assurance Scheme (NEQAS) in BTS. Other quality related responsibilities are to conduct training of BTSCs staffs, carry out supervision & monitoring of different BTSCs as per need and supply of quality equipment on need basis and sets of BTSC equipment to five newly established BTSCs to the remote district every year.

## OBJECTIVES

- To affirm government commitment and support for the organization and management of efficient, cost-effective and sustainable health laboratory services.
- To strengthen laboratory services for supporting diagnosis, treatment, surveillance, prevention and control of diseases.
- To establish national standards for laboratory quality systems.
- To ensure the quality of the health laboratory through an established quality system.
- To empower the establishment, implementation and monitoring of the national health laboratory program, national regulatory mechanism for regulating all health laboratories in the country.
- To ensure adequate financial and human resources to meet the requirements for the health laboratory services.
- To comment to ethical values in laboratory practice, including patient confidentiality, adherence to professional codes of conduct and ethical research practices.
- To encourage research and collaboration to inform and improve the quality of health laboratory services.

## 6.4.2 MAJOR ACTIVITIES

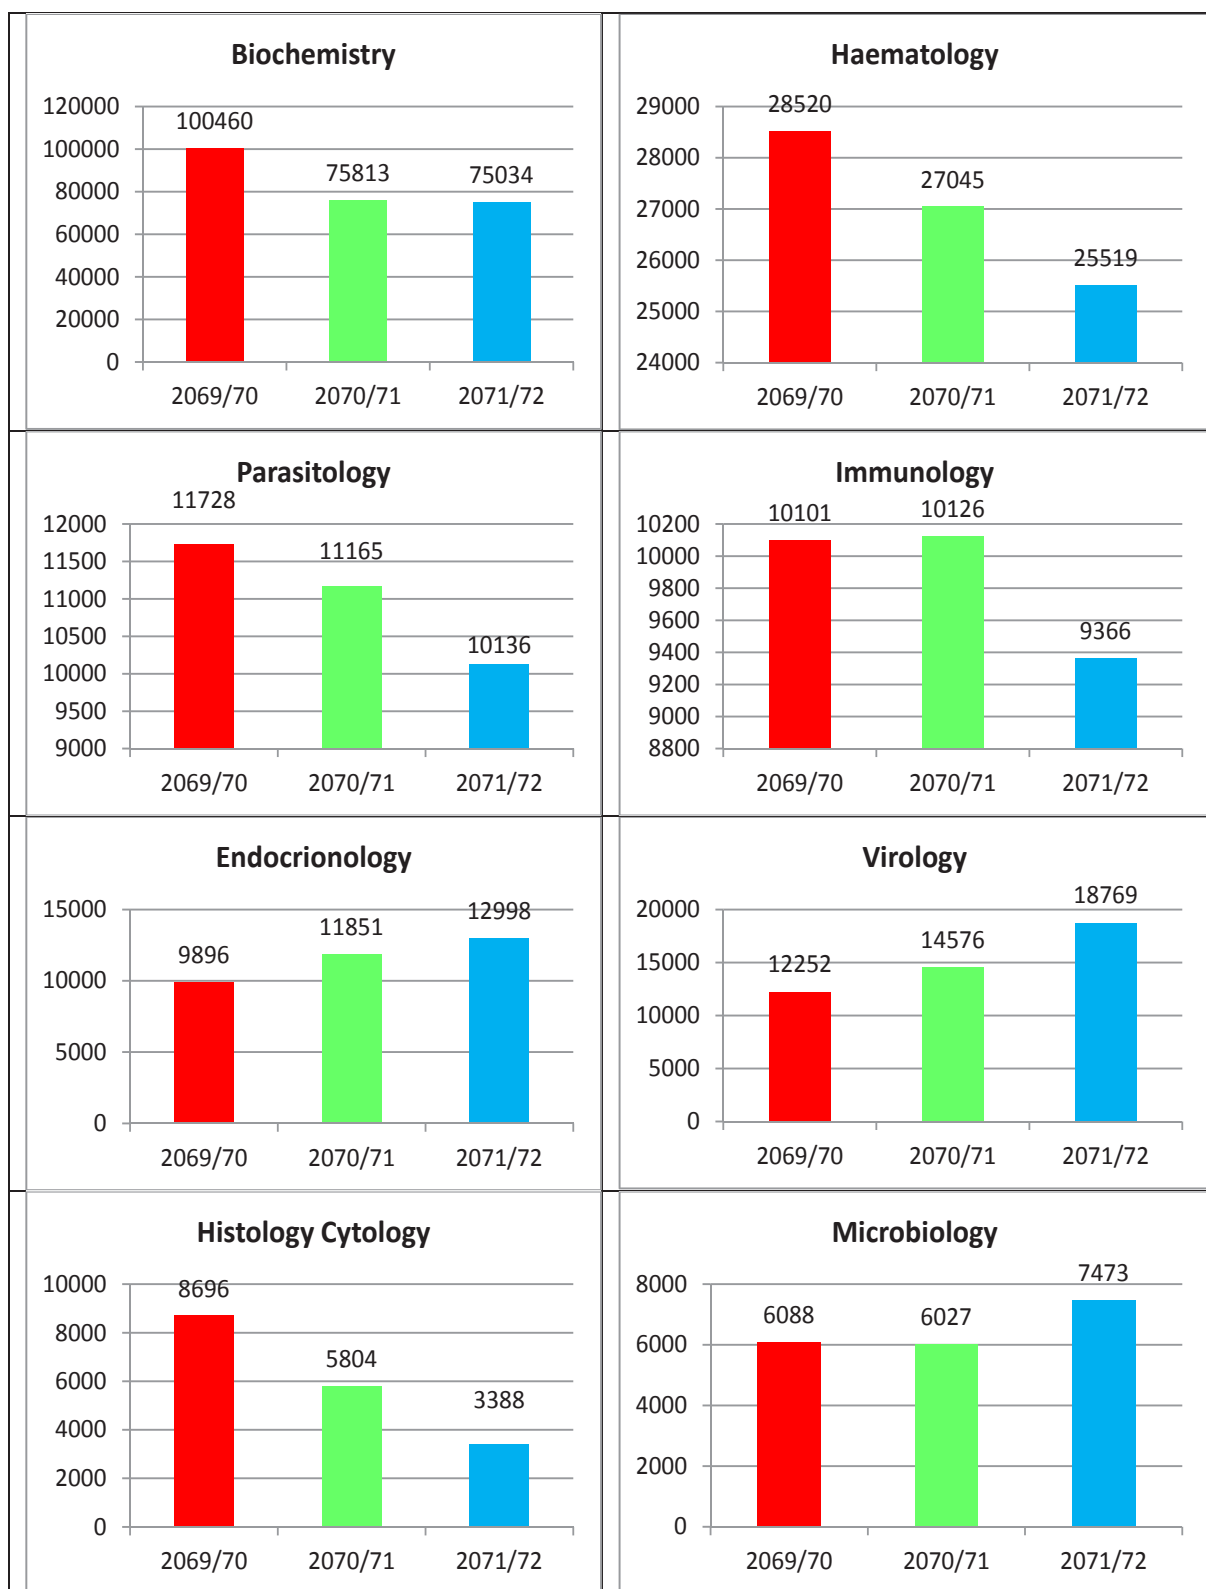

- A. Routine and specialized diagnostic service
- B. Public health related activities
  - Laboratory based surveillance (AES/JE, Measles/ Rubella, AMR, Influenza)
  - HIV Reference Unit
  - National Influenza Centre
  - BSL-3 laboratory
  - Outbreak Investigation
- C. Training and workshops
- D. Logistics procurement and supply
- E. Laboratory refurbishment
- F. Supervision and Monitoring
- G. National External Quality Assurance Scheme (Haematology, Biochemistry, Gram Stain, microbiology, AMR on selected bacterial pathogens and TTIs)

## Major achievement

### Routine and specialized diagnostic facilities

NPHL is providing the routine and specialized laboratory service at affordable prices. The major objective is to provide the routine and specialised diagnostic facilities at reasonable price on timely manner.

The following figure represents the past year laboratory performance in different department of NPHL

**Public health related activities**

**Laboratory based surveillance activities**

Beyond the routine diagnostic, NPHL is also conducting the laboratory surveillance activities on various disease pathogens. These activities include Measles/Rubella surveillance, Japanese encephalitis surveillance, Influenza surveillance and Antimicrobial resistance surveillance. The major objective of these programmes is to find out the burden of related diseases and provide background information for the formulation of strategy to control these diseases in the count

Below are the samples analysed on the related activities.

**National External Quality Assurance Scheme (NEQAS)**

To ensure the testing quality and access the existing status, NPHL is conducting the NEQAS program as a part of External quality assurance. NPHL dispatch the laboratory samples of different parameters to various labs throughout the country and receives the test result from those labs where as in some NPHL receives the tested sample (HIV DBS). On the basis of their, test result, NPHL compiles the report and send feedback to individual laboratories. This also helps to access the testing capability of lab personnel. The testing parameter ranges from biochemical test, malaria slide and others like DBS EQAS where HIV testing quality is monitored and TTI screening, PT for blood transfusion service centres.

## 6.5 PERSONNEL ADMINISTRATION MANAGEMENT

### 6.5.1 Background

Human resource being the living and key resource is pivotal of the health service delivery system. Human resource management includes the human resource planning, motivation, utilization, training and development activities of the employees. Promotion, transfers of staffs and special training provisions are also key activities of human resource management in health system. Organization is basically all about human proper placement and utilization of employees is crucial for effective implementation of the program and quality health service delivery to people.

Under the Department of Health Services the Personnel Administration Section (PAS) is responsible to operate routine and program administrative function. The major functions of the section include upgrading health institutions, transfer of health workers, level upgrading of health workers up to 7<sup>th</sup> level, capacity building as well as internal management of human resources of personnel.

#### Objectives

The main objective of the section is to mobilize human resource to deliver quality health services. The specific objectives include:

- Transfer and manage all the post upto 7<sup>th</sup> level according to the government policy and act.
- Placement of health staffs at the sanctioned post in all the health institutions;
- Manage human resources at the different levels;
- Take disciplinary action according to the professional law;
- Manage and update personnel information of all levels and institutions under the department.
- Perform the tasks according to prevailing laws, rules and regulations;
- Manage the posting and transfer of medical officers who had completed their study in government scholarships;
- Execute the O&M survey as needed to establish and extend the structure of health institutions/ organizations in and under the Department of Health Services; and
- Conducting the activities as per the direction given by Ministry of Health & Population.
- Recommend to MoHP for approval of special leave & education leave as per request of health workers.

### 6.5.2 Major activities

#### Distribution of Health Work Force

Ministry of Health and Population (MoHP) has more than 30,000 employees of them more than 24,000 are technical personnel and 6,300 are administrative staff. Department of Health Services (DoHS) has about 24,000 work force including all five development region's health facilities and of them 196 post (technical and administrative) for all divisions and sections under the DoHS. Sanctioned and fulfilled post by types has given in tables (Table: 6.5.2 and 6.5.3).

#### Transfer

According to transfer schedule mentained in health service regulation, 2055 and MoHP policy, DoHS is responsible for transfer of the health workforce up to the 7<sup>th</sup> level. As requirement of health organization and demanded by health workers.

**Disciplinary Action**

Discipline may be considered as a force that prompts individuals and groups to observe the rules, regulations and procedures which are deemed to be necessary for the effective functioning of an organisation. DoHS works to maintain the professional discipline within its employees.

**Level Upgrading**

Following a set of criteria DoHS manages upgrading of its employees up to the 7<sup>th</sup> level two times (Shrawan and Magh) a year as mentioned in regulation.

**Leave**

DoHS approves different types of leaves such as house leave, sick leave, delivery leave and other leaves as per request made by health workers under and within the department. DoHS recommends to MoHP for approval of special leave and education leave which are forwarded through concerned health facilities and regional health directorate as request made by employees up to 7<sup>th</sup> level under the department, according to Nepal Health Act & Law.

**Retirement and Resignation**

DoHS manages the retirement of the staff after their information of retirement provided by Department of Civil Personnel Records. Approval of resignation of the staff above 6<sup>th</sup> level is made through the Ministry as the reference from their concerning office with verification and clearance provided.

**New initiation**

During the reporting year following new initiations has been implemented.

- File tracking system.
- Digital attendance within DoHS.
- Calender of operation (online action plan) of divisions and department.

**Table 6.5.1 Type of workforce distributions at Department of Health Services, FY 2071/72**

S N	Post	Grade/Level	Sanctioned	Fulfilled

## 6.6 FINANCIAL MANAGEMENT

### 6.6.1 Background

An effective financial support system is imperative for efficient management of health services. Preparation of the annual budget, timely disbursement of funds, accounting, reporting, and auditing are the main financial management functions that are necessary to support the implementation of health programs. The Finance Section of the DoHS is the focal point for financial management for all programs under the DoHS. All health institutions have their own Finance Section, except PHCs, HPs and SHPs.

#### Objectives

- To provide support to all programs divisions/centres during annual budget preparation
- To obtain and disburse program budgets
- To keep books of accounts and collect financial reports from all institutions
- To prepare and submit financial reports
- To facilitate internal and external auditing
- To provide financial consultation

#### Targets

The main target of financial management is to achieve 100% expenditure of all budgets in accordance with program work plans within a specified time as per financial rules and regulations of government and to maintain the recording and reporting system accurately and timely.

### 6.6.2 Analysis of Achievements by Major Activities

Out of total National Budget of Rs. 6,18,10,00,00,000 a sum of Rs. 33,51,71,02,000 (5.42%) was allocated for the health sector during the fiscal year 2071/72. Of the total health sector budget, Rs. 23,47,29,63,597 ( 70.03 %) was allocated for the execution of programs under the Department of Health Services Network (Table 6.6.1).

**Table 6.6.1: Health Budget under DoHS, FY 2071/72**

	Total	Recurrent	%	Capital	%
National Budget	618,100,000,000	398,951,195,000	64.54	219,148,805,000	35.46

### 6.6.3 Issues and Recommendations

<b>Problems/constraints</b>	<b>Action to be taken</b>	<b>Responsibility</b>
Difficulty in financial reporting procedures and reimbursement from donors due to the lack of trained manpower and physical facilities	Provide internal and external training in finance as appropriate	MoF, MoH
Delay in budget disbursement due to programs not being approved on time	Timely actions must be taken for the approval of development programs.	DoHS (especially Planning Division and concerned program divisions and centres), MoH NPC
Non-release of committed donor budget	Plans of Action and work plan agreements must be signed before budget allocation, and donors should release budget as per their commitment.	MoF, MoH, Donors
Difficulty in keeping books of accounts and reporting according to the differing formats of the different EDPs supporting the same program	<ul style="list-style-type: none"> <li>• Account staffs should be thoroughly oriented on book keeping and reporting formats used by of different donors</li> <li>• Provide computers to district level finance section and provide computer training for them</li> </ul>	MoF, MoH and donors

**6.7.1 Background**

General management of Department of Health Services is assigned to Management Division. Operating Manual (Procedure), 2068 (third edition) for Department of Health Services describes the responsibility of this division in information management, planning, coordination, supervision, monitoring and evaluation of the health programs. The division is also responsible for monitoring the delivery of quality health services through all types of health institutions. Furthermore, it monitors the building construction and maintenance of public health institutions and provides supports for maintenance of medical equipment. More activities are assigned to this division as directed by NHSP, policies and plans that include mental health, oral health, health care waste management, health facility upgrading / renewals, nursing program and treatment facilities to impoverished Nepalese Citizens from the listed diseases.

**Objectives**

The Management Division has major objective to support health programs and DoHS in overall to accomplish their service delivery functions which include in major to;

- facilitate and co-ordinate among concerned program divisions and centres to prepare annual plan, programs and make necessary arrangements to get approval from National Planning Commission (NPC) and Ministry of Finance (MoF)
- make necessary arrangements for preparation and compilation of annual budget and programs of the Regional Health Directorates and Districts Public/Health Offices
- monitor program implementation status and carryout periodic performance reviews
- support quality improvement in the health sector
- manage Health Management Information System (HMIS)
- manage and Co-ordinate for construction and maintenance of buildings and other infrastructures of Public Health Institutions
- process for approval of establishment of private and non-government health institutions
- process for approval of new public health institutions and their upgrades
- make arrangements for capacity building of human resources in public health
- support in Info Tech area related to health information, dissemination and management
- provide treatment facilities for impoverished Nepalese citizens for listed disease.

**Strategies**

To achieve the overall and specific objectives, management division adopts following major strategies.

- Make necessary arrangements to collect and analyze health information and use it to support planning, monitoring, and evaluation (PME) of health programs
- Strengthen Bottom-up planning process from community to the central level by optimum use of available resources including health service information
- Conduct and expand regular periodic performance reviews and use outcomes for improvement down to community level
- Strengthen and guide the monitoring/supervision system at each level
- Establish central data bank linking HMIS with HURDIS, LMIS, Finance, Surveys/ Censuses and other sources of information
- Expand computerized information system at all levels
- Monitoring of health services provided by state owned and non-state health institutions
- Develop and implement construction, repair and maintenance plan for public health facilities

- Capacity development of health workers as well as Management Committees in close collaboration with NHTC and concerned agencies
- Conduct Human Resource Development programs for improvement in quality of health services
- Routine management of Health Service Information round the year
- Orientation on quality health service delivery
- Upgrading health facilities as per plan and policies
- Initiate processing for approval of establishment of private and non-government health institutions within the 51 to 200 bed capacity
- Process for approval and renewal of private and non-governmental health facilities on the basis of given service standards
- Develop and implement integrated supervision and monitoring plan
- Establish and develop required infrastructure, human resource and guidelines to conduct other designated and non routine works assigned to MD

### **Organizational Arrangement**

The division has six sections, three units and one Upachar Kosh for overall management of functions and service delivery as directed by operating manual, citizen charter and plan and policy documents of health system.

1. Health Management Information Section
2. Budget & Planning Section
3. Program Monitoring and Evaluation Section
4. Health Facilities & Quality Assurance Section
5. Information Technology (IT) Section
6. Nursing Service Development Section
7. Oral Health Unit
8. PAM Unit
9. Mental Health Unit
10. Impoverished Citizens Service Unit
11. ENT Unit (proposed)

The specific functions of sections and units are as follows:

#### **1. Health Management Information Section (HMIS)**

This section manages health service information from community to the DoHS through predefined process and procedure. This system is almost 21 years old robust and well set that provide base for planning, monitoring and evaluation of health system at all levels. The major functions of the HMIS are;

- To collect and manage the health service delivery information from all levels of health service delivery outlets including services at the communities by FCHVs and community level health workers
- To improve On-line data entry mechanism in all districts and hospitals.
- To verify, process, analyze the collected data and operate data bank
- To provide feedbacks on achievements, coverage, continuity and quality of health services to program divisions/centres, RHDs, hospitals and district public/ health offices
- To draw indicators and relevant information and support to the program management
- To disseminate health information through efficient methods and technologies
- To publish a comprehensive Annual Report of Department of Health Services
- To develop competent human resource for Health Information Management System
- To support for conducting National Performance Review of health programs and support to regional, district and below level reviews
- To improve the information management system using modern information technology.
- To update the HMIS tools as per need of programme divisions /centres.

- To update Geo-Information of health facilities

## **2. Programming, Budgeting, Building Construction and Maintenance Section**

This section is mainly responsible for integrated planning of DoHS and providing technical supports in the planning process of District Public Health and Health Offices as well as Regional Health Directorates. The annual program and budgeting is prepared in collaboration with respective divisions, RHDs, DPHOs and DHOs. The section performs following activities to satisfy related objectives.

- Facilitates planning, programming and budgeting at central, regional and district level
- Make process for approval of annual programs and budget of health programs of DoHS, Regions and districts from NPC and MoF
- Support and facilitate bottom-up planning process
- Support the maintenance of bio-medical equipment
- Support the construction, repair and maintenance of infrastructure of public health institutions

## **3. Program Monitoring & Evaluation Section**

This section is assigned with responsibility of monitoring health programs and services performed by DoHS, RHDs, DPHOs, DHOS and health institutions under DoHS that includes;

- Monitoring, supervision and evaluation the preventive, curative and promotive health programs
- Conducting integrated supervision in collaboration with Divisions, Centres and Regional Health Directorates
- Monitoring health care service delivery with special focus on essential health care services in state and non-state sector
- Supporting DPHOs and DHOs to strengthen Local Health Facility Management Committee
- Strengthen health care waste management activities in hospitals, PHCCs and HPs
- Support to GOs and NGOs on Health Care Waste Management (HCWM) activities.

## **4. Health Facilities & Quality Assurance Section**

This section mainly performs the activities for health facilities under the DoHS to improve and maintaining the quality of health services as well as supporting establishment and operating of health facilities. To achieve the objective it performs following activities.

- Strengthen national quality assurance system for health sector in close collaboration with Divisions, Centres, RHDs and other stakeholders
- Facilitate process for upgrading government health institutions
- Conduct supervision and monitoring for quality assurance as per standard guideline & service protocol in coordination with program monitoring and evaluation section
- Conduct studies & research activities to improve quality of health care
- To process providing approval for opening new hospitals under NGO/private sector including nursing homes of 51 to 200 beds and their renewal.
- Provide suggestions during Registration Process for NGOs

## **5. Nursing Service Development Section**

This unit support capacity building of nursing staffs and co-ordination of activities related to nursing services that mainly include;

- support capacity development programs and activities for nursing professionals
- support nursing leadership and motivational programs
- Co-ordinate programs and activities for improvement in nursing services.

**6. Oral Health Unit**

Management division support oral health services through this unit by conducting activities on;

- Capacity building of health workers
- Preparation and distribution of IEC/BCC materials for oral health care in collaboration with NHEICC
- Co-ordinate with stakeholders and national focal point for expanding and improving the services

**7. Information Technology (IT) Section**

This unit support in info Tech area related to health information, dissemination and management mainly includes following:

- Dissemination of information related to health.
- Support in IT infrastructure, planning and development.
- Support in Network communication related areas.
- Support in e-health and m-health programmes and activities.
- IT related surveys and supporting inguidelines and poliy making.

**8. Impoverished Citizens Service Unit**

The overall objective of Impoverished Citizens Service Program is to manage treatment facilities for impoverished Nepalese citizens for listed diseases. The specific objectives of the program are;

- To provide budget up to one lakh per patient through notified Hospital for free Medication & treatment to very severe disease as Cancer, Heart, Head/Spinal injuries, Alzaimers/ Parkinsons and Sickle Cell Anaemid disease.
- To provide medication cost up to one lakh for post renal transplant cases.
- To provide free dialysis services up to 104 sessions (for one year) per patient.
- To provide renal transplantation cost up to Two Lakh per kidney patient.
- To provide financial support and treatment for very important national persons too.

**9. PAM Unit**

Role and responsibility of PAM unit

- Identify status of HF buildings and medical equipments
- Recommend for construction and maintenance of health facility building.
- Maintenance of medical equipments was in operation since 3 years in Far west and Mid west region with cooperation of KFW and found successful
- Roll out outsourcing of MC nationwide.
- Contracted Biomedical Engineer for PAM unit.

Management Division conducts the activities related to mental health programme and proposed for ENT activities.

**6.7.2 Major activities**

Management division conducts some major activities related to regular and assigned functions to enhance and improve the program and activities. The following activities are major innovations those have been conducted on regular or ad-hoc besides its regular functions.

**a) Geographic Information System (GIS)**

GIS has been incepted and in the process of institutionalize in the health system. This is guided by NHSP, Periodic Development Plans, Health Sector Information System-National Strategy (HSIS-NS) and Information, Communication and Technology Policy of the Government of Nepal. This adoption is also reinforced by e-health, Health GIS and need for integration of information systems. Health

## Supporting Programs: Management

Facility Mapping Survey (HFMS) has been carried out in 75 districts with technical and financial support from WHO. The completion of this survey is expected to result in geographic feature embedded planning, monitoring and evaluation in the health system.

### b) Performance Based Management System (PBMS)

This is aimed at reward mechanism for best performers at the district level. Ranking of health facilities and health workers are done with a set of performance indicators. Districts select health facilities and health workers sorting their rank and honoured with gifts. Fifteen districts are selected and provided with required budget and guideline for PBMS conduction.

### c) Health Care Waste Management (HCWM)

Solid Waste Management Act-2011 provides legal basis for health care waste management. Management division has been providing orientation and onsite coaching for health facilities. Hospitals were provided budget for different materials (e.g. colored buckets, autoclave etc) for the proper management of health care waste. Health care waste management guidelines have already been developed and distributed.

### d) Health Infrastructure Information System (HIIS)

HIIS is started to have complete scenario on infrastructure of all the public health facilities. This information system is expected to provide basis for decision making on building construction and maintenance as well as for resource allocation. The system is in the process of completion. The system aims to regularly update the information.

### e) Building Construction and Maintenance

Management division makes process for construction of building and other infrastructure of health facilities. Public health facility construction and maintenance work is assigned to Management Division and Department of Urban Development and Building Construction (DUDBC). All the maintenance within premises of DoHS and construction and maintenance works in the districts and regions costing less than one million is disbursed through Management Division. All other construction works costing more than one million is done through DUDBC. A committee is formed in the MoHP to monitor the construction and maintenance works (Table 6.7.1).

**Table 6.7.1: Summary of building construction by DUDBC (FY 2061/062 – 2071/72)**

Total number of Health Facilities (HFs)	1,554
Under construction	465
Near completion	154
Completed/handed over	935
Budget allocated to DUDBC (in '000) in FY 2071/72	2,21,00,00,000
Expenditure (in '000) in FY 2071/72	1,80,95,68,000 (82%)

**Table 6.7.2: Building Construction Scenario in the three consecutive years**

Types of the health facility	2068/69	2069/70	2070/71	2071/72
Health post with Birthing Center	80	0	115	200

Regional Hospital building				1

Types of the health facility	2068/69	2069/70	2070/71	2071/72
15 beded Hospital building				3
Zonal Hospital building				2

#### f) Health Facility Up-gradation

Management Division starts the processing for upgrading of public health facilities up to 15 bed hospitals. In line with upgrading all the Sub-Health Posts to Health Posts and other health facilities accordingly up to 15 bed hospitals following certain procedures, division collects demand and recommendations from concerned agencies and process for approval. The status of health facility up-gradation is given in Table 6.7.3.

**Table 6.7.3: Status of Health Facilities up Gradation**

Year	HF Type	HF Number	Status
2065/66	SHP to HP	478	Approved, Implementing
2065/66	Health facility to Hospital	6	Approved, Implementing
2066/67	SHP to HP	522	Approved, Implementing
2067/68	HP to PHC	10	O & M is going on
2068/69	HP to PHC; PHC to Hospital	25	O & M going on
2069/70	SHP to PHC to Hospital	20	O & M going on
2069/70	SHP/HP/PHC to Hospital	6	O & M going on
2070/71	SHP/HP to PHCC	5	O & M going on
2071/72	SHP/HP / PHCC to Hospital	10	O & M going on
2071/72	SHP to HP	2,205	Approved - Implementation

- Newly established PHCC- 1
- HP to PHCC - 2
- HP to Hospital 15 beded- 4
- HP to Hospitals (25 beded)- 1
- PHCC to Hospital (15 beded)- 2
- 15 beded Hospital 50 beded- 3
- 15 beded Hospital to 51 beded- 1

#### g) Approval to Private Health Facilities

Management Division processes documents for approval to private health facilities.

### 6.7.3 Major activities carried out in FY 2071/72

Following are the major activities conducted by management division mentioned in the annual work plan and budget of fiscal year.

- Conduction of 21<sup>th</sup> National Annual Performance Review Meeting, 2071/72
- Conduction of HMIS training for newly recruited health workers throughout the country
- Arrangements for printing and supply of HMIS recording and reporting tools
- Web based online reporting system of HMIS is being continued
- Preparation, printing and distribution of Annual Report of FY 2070/71 (2013/14) of DoHS
- Update of of Health GIS information
- Construction of Hospitals, PHCs, HPs, birthing centres, store building, staff quarters, birthing units is being continued
- Electricity supply and furniture procurement for newly constructed HFs.
- Dental care training to health workers
- Conduction of Regional level planning workshops
- Orientation and training on health care waste management
- Capacity building programs for health workers in Oral Health
- Performance Based Monitoring System related activities continued

## Supporting Programs: Management

- Mental Health Training is continued
- Orientation and training on health care waste management to DHOs/DPHOs staffs

- Activities not conducted	: 2	Financial progress	: 86 %
Physical Progress	: 92 %		(of the received budget)
			(DUBBC budget not include)

## 6.8 PRIMARY HEALTH CARE REVITALIZATION

### 6.8.1 Background

PHC is a strategic movement for the achievement of “Optimum health for all”. PHC needs to be expanded throughout the country for achieving the universal health coverage (UHC). PHC is regarded as a cost-effective approach and its principles in social justice, equity, human rights, universal access to health services, community involvement and priority to the most vulnerable and underprivileged.

PHC has worked since its implementation 36 years ago, there is no unequivocal answer either way and the matter is still open for discussion. However, few positive benefits brought about by PHC e.g. changes like increased life expectancy, reduction in child and infant mortality, increased coverage for endemic diseases, increased recognition of health as a human right, etc. that could be attributed to the 36 years of implementing PHC. Next, there are some growing areas of concern that the PHC has to address; inequitable access to healthcare services, attaining universal coverage, and rapid privatization of healthcare were some areas felt PHC approach is yet to tackle.

In Nepal, PHC has a long history that was reinforced by the Declaration at Alma Ata. It was mainstreamed in 1991 National Health Policy endorsing PHC as a major service component. Thus, the National Health Policy 1991 was a turning point in delivery of primary health care services in the rural areas of Nepal. The most important contribution of the Policy is that it helped to increase access to health services to majority of people in Nepal by establishing a total of 4,020 health institutions spread throughout the country. Health Posts (HP) deliver health services at VDC level. Primary Health Care Centers (PHCC) with 3-beds are established in each electoral constituency.

The Second Long Term Health Plan (1997-2017) of Nepal has also reflected PHC as Essential Health Care Services (EHCS), and Nepal Health Sector Program-II (NHSP-II, 2010-2015) has set three objectives in the result framework regarding to EHCS.

- To increase access to and utilization of quality EHCS.
- To reduce cultural and economic barriers to accessing health care services and harmful cultural practices in partnership with non-state actors.
- To improve the health system to achieve universal coverage of EHCS.

The NHSP-II puts a major emphasis on an increased coverage and quality EHCS with a special attention to improve access to the poor, vulnerable and disadvantaged groups. The rationale is to revitalize the PHC programs to meet the NHSP II objectives and target as below:

- Assure availability of basic health services to all Nepalese citizens as addressed by the Interim Constitution of Nepal.
- Assure quality health services.
- Assure easy access of health services to all Nepalese citizens.
- Implement health insurance through health cooperatives.
- Monitoring, supervision and evaluation of free health care services for the development of future planning and strategies.
- Manage urban PHC services to the urban vulnerable and deprived citizens.
- Implement environmental and sanitation programs for the creation of healthful environment.

The concern of the poor and marginalized people both in urban and rural areas has been in high priority in government programs. In order to materialize the constitutional commitment (Interim

## Supporting Programs: Primary Health Care Revitalization

---

Constitution, 2007) of fundamental right of basic free health care, MoH introduced a policy of providing “Free Health Care Services” to the population in a phased manner to enhance access to primary health care services for every citizen with special consideration for the poor/ultra-poor, destitute, disabled, senior citizens and Female Community Health Volunteers (FCHV). Subsequently, in 2009 (Jestha 2065), Ministry of Health (MoH) established a new division (Primary Health Care Revitalization Division) under the Department of Health Services. The PHCRD is envisaged to revitalize PHC services in Nepal by addressing the unaddressed and unmet issues of PHC. The Division carries out the following programs:

- National Free Health Services
- Urban health program
- Community health insurance program.
- Rural community health, basic health and model healthy village program.
- Equity and access program.
- Social audit program.
- Prevention and control of non communicable diseases

It is expected to make inroads into translating the constitutionally stipulated fundamental right of basic free health care into practice by addressing the disparities in health service delivery and health outcomes and promoting equitable health services.

**Vision:** The vision is to contribute in improving the health status of Nepali population, especially of the poor and excluded. It will support the nation to poverty reduction through provision of equitable and accessible health care services.

**Goal:** To reduce morbidity and mortality especially of poor, marginalized and vulnerable people by securing the right of the citizens to quality essential health services.

### Objectives

- Increased access to and utilization of quality Essential health care services by ensuring availability of Essential Drug in both Urban and Rural Health Facilities throughout the Year
- To Provide Qualitative Essential health care services to the Municipal Population through Urban Health Clinic
- Minimizing economical, cultural and geographical barriers
- Carryout urban and environmental health program.
- Define Basic Health Care Package

### Strategy

- Support establishing of urban health centers.
- Continue Community Health insurance program.
- Provide free health care services packages.
- Organize Health camps in rural and hard to reach area.
- Equity and access.
- Carry out Social audit of Health facilities.
- Establish model healthy villages and Community Health Unit.
- Promote rational use of drug using Standard Treatment Protocol.
- Prevention and control of non communicable diseases.

**Specific Objectives and Strategies as per thematic focuses of the Division are as below:**

### 6.8.2 Major activities accomplished

**The following activities were carried out in the fiscal year 2071/72**

<input type="checkbox"/>	Planning & Procurement of Free Essential Medicine
<input type="checkbox"/>	OPD Registration Fee - District Hospital/PHCC/HP
<input type="checkbox"/>	Printing and Distribution of OPD Ticket & Reporting Form
<input type="checkbox"/>	Referral Program for Target Group
<input type="checkbox"/>	Dress Incentive for FCHVs
<input type="checkbox"/>	Review Program of FCHV
<input type="checkbox"/>	Fund of Urban Health Centre
<input type="checkbox"/>	FCHVs Day celebration
<input type="checkbox"/>	Urban Health Monitoring Committee Meeting
<input type="checkbox"/>	Urban Health Center establishment
<input type="checkbox"/>	Rural community health, basic health and model healthy village program.
<input type="checkbox"/>	Revise and Printing of Program Nirdesika
<input type="checkbox"/>	Integrated public health program
<input type="checkbox"/>	Community health unit establishment
<input type="checkbox"/>	Health camps
<input type="checkbox"/>	Community Health Insurance (6 HFs –Tikapur, Chandranigahpur, Katari Hospital, Lamahi, Damkauli , Mangalbare PHCCs in 6 Districts)
<input type="checkbox"/>	Special Programs in DAG VDCs
<input type="checkbox"/>	Social Audit
<input type="checkbox"/>	ENT Training in District Hospital
<input type="checkbox"/>	Develop Material and Orientation on NCD ( Dabetes, HTN and Mental Disease )
<input type="checkbox"/>	Monitoring and Supervision

### 6.8.3 Analysis of Achievement

It is estimated that about 78people in Nepal utilized public health services in 2071/72. Among the total reported morbidity cases (21,930,433), 92.3 percentage of population were found utilizing free health care services (Table 1). This information shows that remarkable chunk of people utilize the free health care services.

**Table 6.8.1: Utilization status of free health care services, FY 2071/72**

SN	Indicators	Achievement	
		(Number)	(Percentage)
1	Number of Persons utilizing health services among Total Populatrion ( No of registered Morbidity cases )	21,900,869	78.3
2	Number of Persons Utilizing free health OPD services among registered Morbidity cases	20,242,908	92.3
3	Number of Persons utilizing free health emergency services among Total Morbidity	988,817	4.9
4	Number of Persons utilizing free health indoor services among Total Morbidity	669,144	3.3
5	Referral cases among total number of utilizing free health services among Total Morbidity	29,564	0.14

Source: HMIS

**The free health care services provided to the target groups are as below:**

The total OPD patients served by the hospitals were 198,864; emergency patients were 31,075 indoor patients were 50,926 and referral cases were 1,612. Thus the total number of Target group's patients utilizing free health services were 282,477.

**Table 6.8.2: Hospital free health care service utilization status by targeted groups, FY 2071/72**

Service target group	OPD	Emergency	Indoor	Refer
Poor /Ultra-poor destitute	104,535	15,870	30,006	725
Helpless /Distitute	18,899	3,082	5,328	456
Disable	3,985	1,055	1,637	221
Senior citizen	66,142	10,512	13,523	448
FCHV	5,103	556	432	162
<b>Total</b>	<b>198,864</b>	<b>31,075</b>	<b>50,926</b>	<b>1,612</b>

Source: HMIS

**6.8.4 Physical and Financial Progress by budget sub-title, FY 2071/72**

Level	Budget Sub Title	Physical Progress	Financial Progress
District Level (DHO/DPHO/ Hospital/ PHCC)	370138	94.40	26.65
	370804	37.77	53.64
Central Level	370136	62.79	54.38
	370138	84.56	29.96

Source: PHCRD

PHCRD central level in FY 2071/72 Physical Progress was 73.7 percent and financial progress was 42.2, Financial achievement is very low as compared to Physical expenditure because of managerial problems. (Figure 1)

**Figure 1: Physical and financial progress, FY 2071/72 (Central level)**

Source: PHCRD

**Figure 2: Physical and financial progress, FY 2071/72 (District Level)**

Source: PHCRD

In District level, financial and physical achievement seems approximately equal. PHCRD central level in FY 2071/72 Physical Progress was 66.05 percent and financial progress was 40.1 percent (Figure 2)

### 6.8.5 Issues and Recommendations:

Issues	Recommendation	Responsibility
Increase budget for drug procurement in district level.	In average increased as per need for drug procurement in district level	PHCRD/ DoHS/MoH/MoFALD
Essential drug list for free health program is limited	Increased Essential drug list for free health program	PHCRD/ DoHS/MoH
Urban health center building construction not completed in many Municipalities.	Adequate budget to be allocated by PHCRD and Municipalities.	PHCRD/ DoHS/MoH/MoFALD/Municipalities
Poor coordination between D/PHO and Municipality and No Health Indicators in MCPM of MOFLD	Implementation of Urban Health policy and collaborative Framework.	PHCRD/ DoHS/MoH/MoFALD/Municipalities
Temporary urban health centers staffs	Developed policie to make urban health center staffs parmanent.	PHCRD/ DoHS/MoH/MoFALD/Municipalities
High demand of UHC	Joint effort of Municipalities and D/PHO	PHCRD/ DoHS/MoH/MoFALD/Municipalities
More demand of Integrated Community Health Units	Increase Number of Districts and budget to be increased in yearly basis.	PHCRD/MoH/ DoHS/ Local Governance
Social audit program only in limited districts	Increase Number of districts and budget.	PHCRD/MoH/DoHS
Lack of budget for monitoring in Region and District	Provision Of Budget for Supervision and monitoring	PHCRD/MoH/DoHS
No Review Program for PHCRD	Provision Of Budget for Review	PHCRD/MoH/DoHS

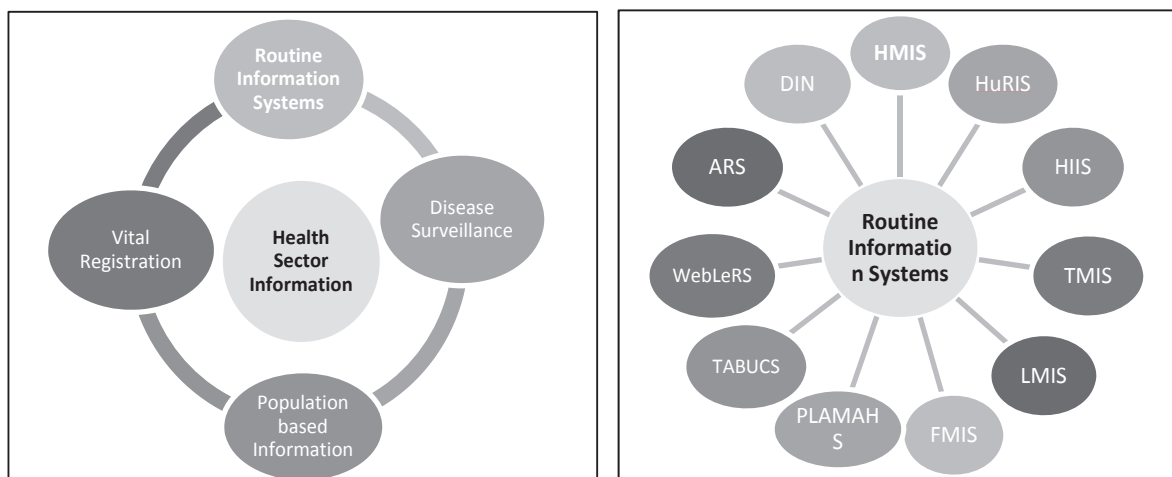

# MONITORING AND EVALUATION

## 7.1 Information Systems in Health Sector

Sources of health sector information in Nepal include Management Information Systems (MIS), disease surveillance, vital registration, census, sentinel reporting, surveys, rapid assessments, and research (Figure 7.1). There are eleven MISs located within the health sector: Health Management Information System (HMIS); Logistical Management Information System (LMIS); Financial Management Information System (FMIS); Health Infrastructure Information System (HIIS); Human Resource Information System (HuRIS); Training Information Management System (TIMS); Web-Based Leprosy Reporting and Management System (WeBLERS); Ayurveda Reporting System (ARS); and Drug Information Network (DIN). Ministry of Health (MoH) is working towards developing unified codes for the health facilities and creating an environment that allows interoperability between these information systems.

Figure 7.1: Health information systems

## 7.2 Progress on M & E

There has been incremental progress on health sector monitoring and evaluation during the NHSP-2 period. NHSP-2's Results Framework was developed in the second year of NHSP-2 to monitor progress against the framework indicators. The revision of HMIS to address data needs, particularly disaggregated data, of NHSP-2, programme divisions and centres; the harmonization of health facility and population based surveys; the annual monitoring of NHSP-2's Results Framework indicators during DoHS/MoH annual reviews and joint annual reviews (JAR) are some of the main M&E progress made by MoH during this period. Considerable data is produced through management information systems (MISs), studies and surveys. NHSP-2 utilized all sources of information like MISs, disease surveillance, census, sentinel reporting, surveys, rapid assessments, and research to monitor its progress.

## Monitoring and Evaluation

---

The revised HMIS has adopted DHIS2, a free open source public health analytical tool (software), developed by University of Oslo, recommended by WHO and being used in about 45 countries across the globe. The MoH is in the process of its roll out from this fiscal year. The Early Warning and Reporting System (EWARS) under Epidemiology and Disease Control Division (EDCD) has also adopted DHIS2 and is ready to roll out in the sentinel sites.

Despite strong realization of importance of building interoperability among the major information systems existing in the health sector there has not been a functional linkage between them yet. As a first step towards this Ministry has developed unique code for all health institutions and is in the process of endorsement and roll out. Once the unique code is rolled out and DHIS2 is functional this will create a platform for interoperability of information systems.

During 2012/13 Ministry of Health developed Country Accountability Roadmap Nepal (CARN) adopting Commission on Information and Accountability (COIA) framework. Ministry is working on the seven thematic areas namely Civil Registration and Vital Statistics; Monitoring of results; Maternal Death Surveillance and Response; e-Health and innovation; Monitoring for resources; Review and planning; and Advocacy and outreach.

The major ongoing strategic activities include:

- CRVS strengthening activities in 10 collaborative districts – Solukhumbu, Sunsari, Sindhupalchowk, Chitwan, Lamjung, Rupandehi, Banke, Jumla, Kailali and Baitadi.
- Establishment of cause of death data system implementing medical certificate of death and verbal autopsy for community deaths.
- Pilot test of the complete package of the maternal and perinatal death surveillance and response system
- Improving quality of care
- National e-health strategy (2015 – 2020)
- Advocacy with parliamentarians, civil society and journalists.

DoHS has developed a prototype of an electronic hospital medical record system and is in the process of being tested in western regional hospital, Pokhara. Similarly, different e-health initiatives have been initiated from government and non-government sectors and being tested at small scale in different parts of the country. For instance, Bayalpata hospital in Achham district has been using electronic medical record system trying to move from paper-based to complete electronic (paperless) system. Electronic Immunization Reporting System has been initiated in all health facilities in Kanchanpur district. Learning from these initiatives, the Ministry is planning to initiate electronic reporting from health facilities in the 14 earthquake affected districts in the first phase and gradually scale up across the country.

Table 2 below presents a synopsis of the national level population and health facility based surveys, reviews and assessments done during the NHSP-2 period.

**Table 7.1: National level surveys, studies and assessments done during NHSP2 period**

Survey	Year	By	Remarks
<b>A. Population based surveys</b>			
Nepal Demographic Health Survey (NDHS)	2011	Ministry of Health/USAID	Cross sectional survey to assess access and utilization of health services and health outcomes. It is done in every five years' time interval. First round was done in 1996 and the other series in 2001, 2006 and 2011. The fifth round of NDHS (2016) is underway.
Nepal Adolescents and Youth Survey	2010/11	Ministry of Health	The survey is a nationally representative household survey on Adolescent and Youth (NAYS) conducted to generate adolescent and youth specific data in Nepal
Nepal Living Standard Survey (NLSS)	2011	Central Bureau of Statistics/World Bank	The survey in 2011 is the third series, the first series was done in 1995/96 and the second in 2003/04.
Household Survey	2012	Ministry of Health/NHSSP	The study is a nationally representative cross-sectional survey conducted to collect information on all women in the selected clusters who had delivered in a government institution in the last 12 months
Further analysis of NDHS 2011 on: <ul style="list-style-type: none"> <li>▪ Impact of male migration on contraceptive use, unmet need and fertility in Nepal</li> <li>▪ Maternal and child health in Nepal: The effects of caste, ethnicity and regional identity</li> <li>▪ Sexual and reproductive health of adolescents and youth in Nepal: Trends and Determinants</li> <li>▪ Trends and determinants of neonatal mortality in Nepal</li> </ul>	2013	Ministry of Health and partner organizations	Provide further analysis of NDHS 2011 data on key areas that are very important to assess progress and gaps, and ascertain determinants, in high priority public health programmes that the ministry is implementing. The work was carried out by technical professionals from the ministry and partner organizations who are directly working in the given area.

## Monitoring and Evaluation

Survey	Year	By	Remarks
<ul style="list-style-type: none"> <li>Women's empowerment and spousal violence in relation to health outcomes in Nepal</li> </ul>			
Non Communicable Diseases Risk Factors: STEPS Survey Nepal	2013	NHRC/WHO	Cross sectional study to determine the burden of risk factors for NCDs in Nepal
Nepal Multiple Indicator Cluster Survey (NMICS): Key Findings and Tables	2014	Central Bureau of Statistics/UNICEF	The report is a part of the global MICS programme and contains detailed information on demographic, social, economic and cultural characteristics.
Malaria TRac Study in 31 Malaria risk districts	2013	Population Service International Nepal	TRac study evaluating LLIN use among general population and children under 5 years of age in 31 Malaria risk districts
Women's Empowerment and Spousal Violence in Relation to Health Outcomes in Nepal: Further Analysis of the 2011 Nepal Demographic and Health Survey.	2013	Nepal Ministry of Health, New ERA, and ICF International.	It is the further analysis study undertaken as part of the follow-up of Nepal Demographic and Health Survey, 2011 (NDHS) and provides data on fertility, family planning, maternal and child health, nutrition, and HIV/AIDS
National Micronutrient Status Survey	2015 /16 (on going)	Ministry of Health/ Child Health Division	The survey will assess micronutrient status among representative populations in Nepal, including specifically the status of vitamins A and B12, iron, folic acid, iodine, zinc and the condition of anemia among vulnerable populations in the country. The survey will also collect information on anthropometry, infectious diseases (malaria, STH, H. pylori, visceral leishmaniasis), blood disorders, and markers of inflammation. Additionally, the survey will provide information on priority process and outcome indicators for national supplementation and fortification interventions, and other key nutrition interventions in the country.
<b>Health facility based surveys</b>			
Service Tracking Survey	2011	Ministry of Health/NHSSP	It is the first study done to support NHSP2 to receive facility-based information in 169 health facilities across the 13 selected districts
Service Tracking Survey	2012	Ministry of	STS 2012 is the second health facility

Survey	Year	By	Remarks
		Health/NHSSP	survey conducted in 198 health facilities in selected 13 districts to monitor the progress of NHSP-2
Service Tracking Survey	2013	Ministry of Health/NHSSP	STS 2013 is the third health facility survey conducted in 224 health facilities in 13 districts. In 2015 the STSs have been harmonized with the Nepal Health Facility Survey (NHFS).
Facility Based Assessment for Reproductive Health Commodities and Services	2012	United Nations Population Fund (UNFPA)	It assesses the availability and stock out of RH commodities as well as provision of quality Family Planning (FP) services. This survey has been harmonized with the NHFS 2015.
Facility Based Assessment for Reproductive Health Commodities and Services	2013	United Nations Population Fund (UNFPA)	It assesses the availability and stock out of RH commodities as well as provision of quality Family Planning (FP) services. This survey has been harmonized with the NHFS 2015.
Responding to Increased Demand for Institutional Childbirths at Referral Hospitals in Nepal: Situational Analysis and Emerging Options	2013	Family Health Division / NHSSP	Assesses the factors contributing to overcrowding in referral hospitals in Nepal and provides recommendations to overcome the emerging challenges.
Results from Assessing Birthing Centers in Nepal	2014	Family Health Division, Ministry of Health	Assesses the situation of birthing centres in Nepal
Nepal Health Facility Survey	2015	Ministry of Health	Assesses service availability, readiness and quality of health services. Harmonizes STSs, UNFPA supported health facility survey, SARA (WHO) and SPA (USAID). And also harmonizes resources from USAID, DFID/NHSSP, WHO and UNFPA. MoH plans to conduct this survey in every five years with a possibly of a mini-survey in between two surveys.
Voices from the Community: Access to Health Services, A Rapid Participatory Ethnographic Evaluation and Research (Rapid PEER) Study, Nepal.	2012	Nepal Health Sector Support Programme.	The study provides understanding of the socio-cultural, economic, and institutional barriers to accessing health services experienced by poor and excluded women and men in Nepal
Evaluation of Health Facility Management Strengthening Programme	2012	Ministry of Health and Nepal Family Health	The study measures the effectiveness of the HFMSPP implemented in 13 districts

## Monitoring and Evaluation

Survey	Year	By	Remarks
		Programme	
Assessing Biomedical Waste Management Practices among Health Care Institutions of Nepal.	2013	Nepal Health Research Council, Ministry of Health.	
<b>Surveillances</b>			
Early Warning and Reporting System (EWARS)	On going	Epidemiology and Disease Control Division	EWARS is currently operational in 48 hospitals (out of 81 sites) throughout Nepal. It reports weekly on number of cases and deaths (including "zero" reports) of six epidemic potential diseases/syndromes—Malaria, Kala-azar, Dengue, Acute Gastroenteritis (AGE), Cholera and Severe Acute Respiratory Infection (SARI). The reporting also includes immediate reporting (to be reported within 24 hours of diagnosis) of one confirmed case of Cholera, Kala-azar severe and complicated Malaria and one suspect/clinical case of Dengue as well as 5 or more cases of AGE and SARI from the same geographical locality in one week period. The EWARS has now adopted DHIS2 platform and customization has been completed. The system is under testing and it will be rolled out soon.
Maternal and Perinatal Death Surveillance and Response (MPDSR)	On going	Family Health Division	Maternal and Perinatal Death Review (MPDR) being implemented in 42 hospitals got continuity and will be continued next year. Family Health Division has initiated the process of move from MPDR to MPDSR in five districts in 2014/15. The target is to review and respond all institutional maternal deaths by 2020, as guided by the NHSS 2015-20.
<b>Others</b>			
Rapid Assessment of the Demand Side Financing Schemes: Aama and 4ANC Programmes (7 <sup>th</sup> Round)	2014	Ministry of Health/NHSSP	Rapid Assessment is the seventh in a series that is monitoring the implementation of the Aama Programme
Unit Cost Analysis of the Health Facility Reimbursement made under the Aama Programme	2015	Ministry of Health/NHSSP	The study is done to assess the adequacy of the current rate of reimbursement under the Aama Programme in both public and private facilities
Scoping Study on Burden	2014	Ministry of	It assesses existing data sources and

Survey	Year	By	Remarks
of Disease Survey for Nepal		Health, NHRC, IHME, NHSSP/DFID	evidence available for the country. It identifies opportunities to refine country-level burden of disease estimates for Nepal; and assesses the feasibility of estimating burden of disease at the subnational level for Nepal in the near future.
National Health Account (NHA)	2000 – 2012	Ministry of Health	Determines the financial burden on private households in the form of out-of-pocket expenditure, kind of services being purchased, and the level of catastrophic spending. Nepal has completed three rounds of NHA; First round covers 2000–2006; Second round 2006–2009; and Third round 2009–2012. Fourth round (2012–to date).
Mapping the Human Resource Functions across the Ministry of Health and Other Government Ministries, Departments and Agencies	2013	Ministry of Health	The study is carried out to support strategies and activities in the Human Resources for Health (HRH) Strategic Plan (2011-15)
Human Resources for Health Nepal Country Profile	2013	Ministry of Health and Nepal Health Research Council	The study is an Human Resources for Health assessment of the health workforce to enable the development of a HRH profile
Readiness of Comprehensive Obstetric and Neonatal Emergency Care in Nepal	2011	National Health Sector Support Programme and Ministry of Health	The study is conducted to explore the context in which district level hospitals operate and the contributing factors that affect their readiness to provide Comprehensive Emergency Obstetric and Newborn Care (CEONC) services.
TB Prevalence Survey	2015 on going	National Tuberculosis Center	Aims to estimate the prevalence of TB in Nepal
Strategic Review of Equity and Access Programme	2012	Ministry of Health	The review was consultative and contains stakeholder's views on the progress and challenges of implementing EAP
Budget Analysis	2013	Ministry of Health and Population	The report presents analysis of the given budgets and actual expenditure for the given fiscal year
Budget Analysis	2012	Ministry of Health and Population	The report presents analysis of the given budgets and actual expenditure for the given fiscal year

## 7.3 Monitoring NHSP2 Results Framework Indicators

This section assesses the performance of the NHSP-2 in terms of progress from baseline 2010 towards achieving the targets set for 2015 in the results framework. The main sources of information for monitoring the progress are Health Management Information System (HMIS), Census 2011, Nepal Demographic and Health Survey (NDHS) 2011, Multiple Indicator Cluster Survey, 2014 (MICS, 2014), Service Tracking Surveys (STs) and administrative records from the Ministry of Health. For some indicators there are no data sources for 2014. Hence, some achievements could not be compared with the targets.

### Goal

“Improved health and nutritional status of people, especially the poor and excluded”

Code	Indicators	Baseline		Achieved		Target
		Data	Source	2011	2014	2015
G1	Total Fertility Rate (per woman)	3	NHSP-2, 2010	2.6 [NDHS,2011]	2.3 [NMICS 2014]	2.5
G2	Adolescent Fertility Rate (women aged 15-19 years, per 1,000 women in that age group)	98	NDHS-2, 2006	81 [NDHS 2011]	71 [NMICS 2014]	70
G3	Under-five Mortality Rate (per 1,000 live births)	55	NHSP-2, 2010	54 [NDHS 2011]	38 [NMICS 2014]	38
G4	Infant Mortality Rate (per 1,000 live births)	44	NHSP-2, 2010	46 [NDHS 2011]	33 [NMICS 2014]	32
G5	Neonatal Mortality Rate (per 1,000 live births)	33	NDHS 2006	33 [NDHS 2011]	23 [NMICS 2014]	16
G6	Maternal Mortality Ratio (per 100,000 live births)	250	NHSP-2, 2010	281	190	134
G7	HIV prevalence among men and women aged 15-24 years (per 100,000 population)	0.12 M=0.2, F=0.05	EPP/Spectrum modeling, 2010	NA	NA	0.06
G8	Malaria annual parasite incidence rate (per 1,000 population in one year)	0.16	HMIS 2010/11	0.16 [HMIS]	0.15 [HMIS]	Halt & reverse
G9	% of children under five years of age who are stunted	49.3	NDHS 2006	44 [NDHS 2011]	37.4 [NMICS 2014]	28
G10	% of children under five years of age who are underweight	34	NHSP-2, 2010	29 [NDHS 2011]	30.1 [NMICS 2014]	29
G11	% of children under five years of age who are wasted	13	NDHS 2006	10.9 [NDHS 2011]	11.3 [NMICS 2014]	5
G12	% of low birth weight babies	14.3	NDHS 2006	12.4 [NDHS 2011]	24.2 [NMICS 2014]	12

Monitoring and Evaluation

**Purpose:**

“Increased utilization of health services, and improved health and nutritional behaviour of the people, especially by the poor and excluded”

Code	Indicator	Baseline	Achievement					Target	Remarks

## 8.1 DEPARTMENT OF DRUG ADMINISTRATION

### 1. BACKGROUND

Government of Nepal has promulgated the Drug Act 1978, to prohibit the misuse or abuse of medicines and allied pharmaceutical materials as well as the false or misleading information relating to efficacy and use of medicines and to regulate and control the production, marketing, distribution, export-import, storage and utilization of those medicines which are not safe for the use of the people, efficacious and of standard quality.

To implement and fulfill the aim of Drug Act 1978 and various regulations under it Government of Nepal established Department of Drug Administration (DDA) in 1979.

In accordance with the objectives of the National Health Policy 1991, the National Drug Policy 1995 has been formulated and implemented. It focuses on establishing co-ordination among government, non-government and private organizations involved in the activities related to medicine production, import, export, storage, supply, sales, distribution, quality assessment, regulatory control, rational use and information flow. Achieving the aims and objectives of National Drug Policy is another important area for DDA.

Under the Drug Act 1978, the following regulations and codes have been implemented as supporting tools for the active enforcement of Drug Act.

1. Regulation on Constitution of Drug Consultative Council and Drug Advisory Committee, (2037 BS).
2. Drug Registration Regulation, (2038 BS).
3. Drug Standard Regulation (2043 BS).
4. Enquiry and Inspection Regulation (2040 BS).
5. Codes on Drug Production (2041 BS).

Drug Donation guidelines have been implemented for the quality assurance of donated medicines.

### 2. OBJECTIVES

The main objective of DDA is to regulate all functions relating modern, veterinary and traditional medicines, like misuse and abuse of medicines and its raw materials, to stop false and misleading advertisement and make available safe, efficacious and quality medicine to the general public by controlling the production, marketing, distribution, sale, export-import, storage and use of medicines.

### 3. STRATEGIES

- Selection of essential medicine to promote rational use of medicines.
- Establishment of regional offices at all five regions for effective decentralization.
- Strengthening of National Medicines Laboratory (NML) as an Independent Medicine Control Laboratory.
- Medicine registration based on scientific facts.
- Promotion of rational use of medicines.
- Development of an efficient drug information system to disseminate the relevant information.
- Encouragement to promote and establish pharmaceutical industries to achieve self-reliance in the production of essential medicines.

- Effective inspection to ensure the quality of marketed medicines.
- Prevent misuse of antibiotic to combat antimicrobial resistance.
- Strengthen national industry to comply with WHO-Good Manufacturing Practices (GMP)

#### 4. DIVISION AND BRANCH OFFICES OF DEPARTMENT OF DRUG ADMINISTRATION AND THEIR FUNCTIONS

##### Division of Department of Drug Administration (DDA)

###### Registration Division

###### ❖ **Import and Export Section:**

- To register the foreign drug manufacturing company and products in a scientific manner for import.
- To issue the recommendation letter for import/export of medicines
- To renew the recommendation letter for import-export.

###### ❖ **Industry Section;**

- To issue recommendation letter for the establishment of pharmaceutical industry and issue Product Manufacturing License and renew them.
- Check and approve the pharmaceutical manufacturing plant layout.
- Evaluate the new products and issue marketing permission for the sale and distribution.
- Issue letter of recommendation for the import of raw materials and renew them.

###### ❖ **Pharmacy Registration Section:**

- To register and issue registration certificates to open retail / wholesale pharmacy outlets and renew them.
- Issue and renew certificates for persons authorized to sale medicines.
- Update the record of pharmacies

###### Management Division

###### ❖ **Training and Drug Information Section:**

- Conduct the refresher training to medicine sellers.  
Disseminate information about medicines particularly side-effects, contraindication, drug
- Interaction and storage condition and other necessary information regarding medicines.
- Publish Drug Bulletin of Nepal (DBN) and distribute to health institutions, industries, medical doctors, health personnel's, pharmacists and others concerned person and institutions.
- Revise National List of Essential Medicines and Nepalese National Formulary periodically.  
Recommend for import of narcotic, psychotropic, precursors substances and liaise wh
- International Narcotic Control Board.
- Conduct activities related to Pharmacovigilance and Adverse Drug Monitoring Reporting.

###### ❖ **Planning section**

- Prepare yearly planning for activities conduct by DDA and regional office.
- Coordinate with Ministry, other department and other government and non government organization for conducting activities and submit the report to MOH.
- Collect, prepare and forward monthly, quarterly and yearly report.

###### ❖ **Administration section**

- Management of human resources (recruitment, posting, promotion, transfer etc)
- Perform Procurement related activities
- Monitoring and evaluation of regional offices activities.

**Inspection Division**

Inspect drug industries, wholesale and retail pharmacies regularly.

- Take legal and administrative action on cases of non-compliance as per the provision of Drug Act and its Regulations.
- Regulate sales and distribution of psychotropic and narcotic drugs.
- Co-ordinate Good Manufacturing Practice Audit within and outside the country.

**Industry inspection section**

- Inspection of pharmaceutical industry as per yearly plan.
- Take action for noncompliance related to drug act 2035.

**Law section**

- Prepare necessary document for registering the case on court against pharmacy and industry.
- Give legal suggestion to department.

**Import/export section**

- Inspection for the effective implementation of Drug act 2035 and other regulations under Drug Act.

**Audit section**

WHO GMP certification and Recertification related activities.

**Branch Offices:**

DDA has its branch offices at Biratnagar, Birgunj and Nepalgunj. These offices carry out the responsibility of inspection as well as Pharmacy registration and renewal

**National Medicines Laboratory (NML)**

National Medicines Laboratory is the principal body of Government of Nepal for testing and analysis of drugs. It has various sections like chemical analysis, microbiology, pharmacology and instrumental analysis. The main functions of NML are to:

- Test and analyze the quality of medicines as empowered according to the Drug Act 1978.
- Issue Lot Release Certificate for vaccines.
- Develop Secondary Reference Standard and make available to the pharmaceutical industries and laboratories.
- Conduct training on Good Laboratory Practices.
- Audit laboratories of Nepalese pharmaceutical industries.

**ANALYSIS OF ACHIEVEMENTS BY MAJOR ACTIVITIES****Activities carried out in FY 2071/72 (2014-2015)****Major activities**

1. Awareness on the rational use of medicines by different media.
2. Regular publication of Drug Bulletin of Nepal (DBN).

DEPARTMENT OF DRUG ADMINISTRATION

3. Audit/inspection of domestic drug industries for WHO Good Manufacturing Practice (GMP) compliance.
4. Inspection of retail & wholesale pharmacies for compliance of regulatory framework.
5. Post marketing quality analysis of drugs available in market.
6. Inspection of Foreign Manufacturers before registration for the importation purposes.
7. Conducting examination of veterinary drug sellers' training.
8. Pre marketing drug analysis for marketing authorization/ Approval
9. Audit of domestic manufacturer laboratory for compliance of Good Laboratory Practice (GLP)
10. Take legal and administrative action for violation of regulatory standards.
11. Recall of medicine from market those failed to quality standard.
12. Control the maximum retail price (MRP) of medicines.

**Target Vs Achievement, FY 2071/72**

S . N	Activities	Unit	Target	Achievement	%
1	Drug information to the public by different media	Number	60	58	96.7
2	Publication of Drug Bulletin of Nepal	Issue	3	3	100
3	Conducting examination of veterinary drug sellers' training	Number	1	1	100
4	Inspection of domestic Pharmaceutical Industries	Number	100	48	48
5	Inspection to drug retailers & wholesalers	Number	2900	3072	105.93
6	Drug sample Analysis	Number	1000	802	80.2

12	Recall of medicine from market due to inferior quality	23

**Financial allocation and Expenditure**

Budget in thousands (000)

S.N	Budget heading	Budget allocation	Budget expenditure	%
1	Capital budget	64,510	59,581	92.4
2	Recurrent budget	55,053	47,167	85.67
<b>Total budget</b>		<b>119,563</b>	<b>106,748</b>	<b>89.28</b>

**Revenue****Total revenue: 42,116,562.00****Challenges**

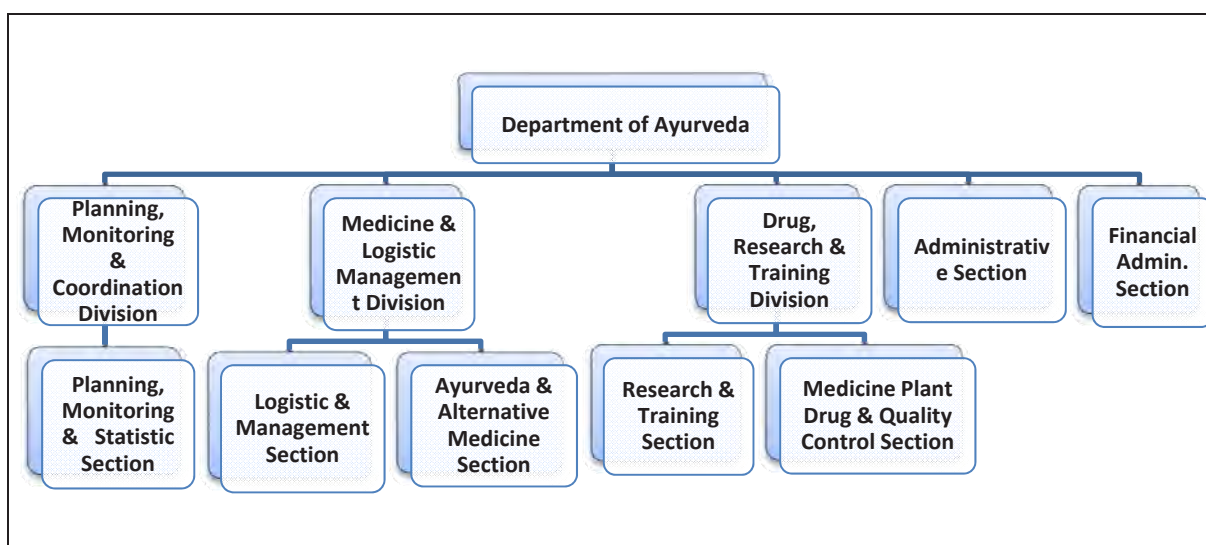

- Regulatory non compliance comes under legal framework and taking legal action to them.
- Lacking mechanism (legal and organizational for regulation of HTP.
- Information Management, Transparency and lacking of dynamic and Responsive Information system
- Illegal import of medicine due to open border and, SSFFCs regulation and control.
- Lacking of resources (human, Technology)
- Regional harmonization and uniformity, MRH and SRA collaboration.
- Pharmacovigilance, post marketing surveillance
- Medicine price regulation and transparency
- Good governance and accountability

## 8.2 AYURVEDA

### 8.2.1 Background

Ayurveda is the most ancient medical system based on the herbal, minerals and animal products. At present Ayurveda health services are being delivered through two Ayurveda Hospitals (one 100+18 cabin bedded at Naradevi, Kathmandu & other 30 beds Bijauri, Dang), 14 Zonal Ayurveda Aushadhalayas, 61 District Ayurveda Health centers and 305 Ayurveda Aushadhalayas in the country. Ayurveda and Alternative Medicine unit in the Ministry of Health and Populations (MoH) formulates policies and guidelines for the traditional medical system. Department of Ayurveda (DoA), one of the three departments within the Ministry of Health and Population, was established in 2038 B.S.

#### Organization of Department of Ayurveda :

Altogether 1907 posts have been sanctioned within the Department of Ayurveda. Of which 999 posts are technical, 101 are administrative and 807 posts are supporting level (office assistance).

The ratios between population and Ayurveda institution are as follows:

- Population per Hospital: 13.3 million.
- Population per District Ayurveda Health Centers: 0.354 million; and
- Population per Ayurveda Dispensaries: 0.087 million.

### Objectives

- To expand and develop functional, physical Ayurveda health infrastructure;
- To improve a quality control mechanism for Ayurveda health services throughout the country;
- To develop and manage the required human resources;
- To mobilize the adequate resources for medicinal plants;
- To promote community participation in the management of the health facility & utilization of
  - local herbs;
- To procure, store and distribute the Ayurveda medicine & other allied materials;

- To promote health status & sustainable development of Ayurveda system using locally available
- medicinal plants;
- To promote positive attitudes towards health care & awareness of health issues;

## Strategies

- Provide preventive, promotive & curative health services in the rural areas;
- Establishment & development of Ayurveda institutions;
- Strengthen & expand the Ayurveda health services;
- Develop skilled manpower required for various health facilities;
- Strengthening of monitoring & supervision activities;
- Development of information, education & communication center in the Department;
- Develop Inter sectoral co-ordination with Education Ministry, Forestry, local development sector & other NGO's & INGO's;
- Establishment of regional Ayurveda Hospitals & Ayurveda Dispensaries;
- Strengthening & expansion of research & training center of international level;
- National & International level training for the capacity development of its human resources

## Major Activities

### Central level

- Procurement & payment of essential Ayurveda drugs & transportation to districts.
- Free health camps conducted on Shivaratri festival & five districts outside Kathmandu
- Annual performance review meeting.
- Panchakarma & Yoga ToT Programme for Ayurveda physician
- Refresher Training of orientation to the district office chief
- Orientation Training of Janapadoddyawms management to Ayurveda physician & Kaviraj
- Panchakarma, yog & statistics training to Kaviraj & Vaidhyas.

### District level

- Construction of twenty office buildings partially completed.
- Ayurveda medicine, First-aid and surgical equipments supplied to all health facilities.
- Repaired existing buildings and compound walls in district and local levels.
- Ayurveda medicine preparation were continued at rural Ayurveda Pharmacy and district.
- Ayurveda Health Center utilizing the locally available medicinal herbs and supplied to Ayurveda institution in the regions.
- Promotive Panchakarma/Rasayan/Yoga programme for older population
- Awareness program for medicinal plants
- Program for lactating mother (Distribution of galactagogue medicine).
- Conduction of free Ayurveda health camps in 75 districts.
- Conduction of traditional healers training (district wise)
- Construction, Maintenance & repair of Ayurvedic institution
- Ayurveda health education for School students
- Supervision and monitoring of Ayurveda institution
- Conduction of rural outreach clinic

## Analysis of Achievement

Based on the treatment report of different Ayurveda institutions following diseases were classified as top ten diseases:

- Amlapitta (Gastritis)
- Udar rog (Abdominal diseases)
- Swasan Bikar (Respiratory diseases)
- Vata vyadhi (Arthritis, Rheumatic Arthritis etc. diseases)
- Jwar (Pyrexia)
- Bal rog (Pediatric diseases)
- Karna, Nasa, Mukha, Danta & Kantha rog (ENT, Oral, Dental diseases)
- Stri rog (Gynecological diseases)
- Brana (Wound, Abscess)
- Atisar/Grahani (Diarrhea diseases)

Table shows the number of people served at various regions and zones by sex in 2071/72. The highest number of people were served in western region where as the least number of people were served in mid western region.

### Service Statistics for fiscal year 2071/72

## 7.2.4 Problems/Constraints

Problems/Constraints	Actions to be taken	Responsibility
No provision for higher study for BAMS Ayurveda doctors	<input type="checkbox"/> Establish PG institution in Nepal <input type="checkbox"/> Recognition of BAMS course of Nepal by foreign country (India)	MoH MOE MOFA
Lack of experts and inadequate qualified manpower.	Production of Qualified Ayurvedic manpower(BAMS, MD)	DOA MoH MOE
Inadequate financial support for district level Ayurveda institution to conduct monitoring supervision & publicity program.	Allocate sufficient Budget	MoH MOE
Poor storage & dispensing techniques of medicines in curative aspects of Ayurveda institutions.	<input type="checkbox"/> Provide good furniture & dispensing materials <input type="checkbox"/> Training on storage & dispensing.	DOA MoH MOE
Lack of inter sector co-ordination.	<input type="checkbox"/> Co-ordination with related ministries, NGO's & INGO's <input type="checkbox"/> Increase qualified manpower.	DOA MoH MOE
Lack of community based program for publicity of Ayurveda.	<input type="checkbox"/> Increase manpower production. <input type="checkbox"/> Allocate budget.	DOA MoH MOE
Lack of workshop, training & seminar on planning for Ayurveda.	<input type="checkbox"/> Allocate necessary budget, develop long term policy & plan on Ayurveda	DOA MoH MOE
Lack of appropriate recording & reporting system.	<input type="checkbox"/> Establish statistics section under department of Ayurveda with sufficient budget. <input type="checkbox"/> Train employee on recording & reporting.	DOA MoH MOE
Inadequate staffing under Department of Ayurveda.	<input type="checkbox"/> Recruitment & placement as per need.	MOGA PSC
Formal Justification about the successful treatment of certain incurable disease with Ayurveda therapy claimed by practitioners.	<input type="checkbox"/> Goal formation. <input type="checkbox"/> Allocate budget.	DOA MoH MOE

## Programs Proposed for 2072/73

### Other Programs: Ayurved vibhagh (3701293/4)

- Procurement & payment of essential Ayurveda drugs & transportation to districts.
- Procurement of Photocopy, Fax, Scanner, computer for Zonal Ayurveda Aushadhalaya & District Ayurveda health centre.
- Establishment of patient recording reporting networking system software among Ayurveda institutions.
- Procurement of office furniture for centre.
- Establishment of Regional Ayurveda Hospital at Dhangadi & Jhapa
- Strengthening program of Naturopathy, Yoga, Homeopathy, Unani, Aamchi etc.
- Purvakarma, Naturopathy & Yoga Health camp.

## Department of Ayurveda

---

- Total Quality Management & GESI Training to Ayurveda Physician.
- Translation of traditional books of Amchi & other Alternative medicine.
- Quality monitoring of different Ayurvedic productions in Nepalese market.
- Monitoring of services provided by private Ayurveda & Alternative therapies.
- Procurement of books and magazine.
- Panchakarma & Yoga training for Kaviraj & Vaidya.
- Annual review meeting in each district and center.
- Revision, evaluation, monitoring and update of Ayurvedic health policy and development of code of ethics.
- Free health camps.
- Preparation of Ayurveda pharmacopeias.
- Evaluation and monitoring.

### **Ayurveda Sewa karyakarm (3708093/4)**

- Connection of Internet at Zonal Ayurveda Aushadhalay & District Ayurveda health centre.
- Powder (Churna) medicine production in ZAD & DAHC.
- Strengthening of herbal garden.
- Workshop and discussion with local traditional healers.
- Preparation of informative books, pamphlets & brochure related to Ayurveda.
- School Ayurveda health program.
- Construction of compound wall in Ayurvedic institutions.
- Building construction of 28 Ayurvedic institutions.
- Promotive Panchakarma/Rasayan/Yoga programme for older population
- Awareness program for medicinal plants
- Program for lactating mother (Distribution of galactagogue medicine).
- Observation tour.
- Skill development training.
- Awareness program on Epidemic diseases & commonly used medicinal plants.
- Procurement of treatment equipment
- Ayurveda message development & publications
- Procurement of vehicle for ayurveda institutions, Ambulance for the central & regional Ayurveda hospital & motorcycle for zonal ayurveda aushadhalay & district ayurveda health centres.

## 8.3 Homoeopathic Services

### BACKGROUND

Dr. Samuel Hahneman of Germany had discovered Homoeopathic system before two century. This is based on the fixed principals of "SimiliaSimilibusCurantur". Medicine is provided on healthy human being and symptoms are recorded in MateriaMedica. Medicine is prescribed on the basis of sign and symptom obtained from patients.

Pashupati Homoeopathic Hospital's is the only one hospital providing homoeopathic services to the people of Nepal in the public sector. The homoeopathic system is economic, easy and effective having no side effect as well. The hospital provides OPD& IPD services to the patients and six beds are available for Indoor patients along with meal free of cost. The hospital is processing for upgrade from six to twenty five beds.

### SUMMARY OF ACHIEVEMENT

Homoeopathicsystem is gaining popular mode of treatment. Hospital record shows that, the number of patient is increasing day by day. Many rejected cases by other system of medicine and surgical cases have been treated successfully. A total number of 73,736 patients were visits for treatment in the fiscal year 2071/72.

#### Description of Patients Visited in Hospital, FY 2071/72

Particular	Number of patients
General Medicine	40,545
Skin	18,786
E.N.T.	3,389
Eye	1,203
Dental	1,409
Gyn/Obs.	1,312
Other	7,092
<b>Total patients</b>	<b>73,736</b>

#### Summary of Financial Allocation and Expenditure

Fiscal Year	Regular Budget in Rs	Development Budget in Rs	Total Budget in Rs
2071/72 (2014/2015)	1,03,07,100	2,23,800	10,963,000

### CONSTRAINTS

- Due to limited budget it is hard to manage the medicine for increasing number of patients.
- Not enough human resources for the ever increasing number of patients in Hospital basically the Doctors, Technical personnel (IT) and other supporting staffs due to lack of budget.
- Due to unavailability of Pathological Laboratory and X-ray Machine, patients have to go outside for pathological findings.

- Human resource especially the Doctor, Technical staff and other supporting staff do not have any opportunity to expose themselves for higher studies, attending in the training and seminars.

## **CONCLUSION**

The Homoeopathic Hospital is providing service to outdoor patient as well as indoor patient free of cost. Homoeopathic system is to be developed. People all over of the Nepal are not getting service of this Hospital who is far away from Kathmandu valley. So it should be developed to provide service to 5 development regions of Nepal gradually.

# Development Partners

9.1	Multilateral Partners.....	294
9.2	Bilateral Partners .....	295
9.3	International Non-Governmental Organisations .....	297
9.4	National Non-Governmental Organisations.....	299

# DEVELOPMENT PARTNERS

The outcomes discussed in the previous chapters are the results of combined efforts of Ministry of Health and development partners (multilateral, bilateral and international organizations and national NGOs). Department of Health Services highly acknowledges partnership with these organizations and their contribution in the health sector in Nepal. This section presents major program focus of these organizations and their contact details to help the readers find more details about them and their programs.

## Pooled Funding

World Bank, UK's Department for International Development (DFID), Government of Australia, German Development Cooperation through KfW and GAVI Alliance have been providing pooled fund to support MoHP/GoN via Sector-Wide Approach (SWAp). The pool funding supports the government's five year NHSP2 (2010/2011-2014/2015) to achieve its three objectives: (i) increase access to and utilization of quality essential health services (ii) reduce cultural and economic barriers to accessing health care services and harmful cultural practices in partnership with non-state actors and (iii) improve health systems to achieve universal coverage of essential health care services. The current support is a continuation of the previous Health SWAp (Nepal Health Sector Program 2004/2005-2009/2010).

The coverage is nationwide and in alignment with the NHSP2. The areas of support include the overall sector governance, child health, population and reproductive health, health system performance, gender equality and social inclusion, HIV/AIDS and nutrition.

For the NHSP 2, the disbursements from the pooled funding partners till FY 2014/2015 were as follows:

- World Bank: USD 119.6million disbursed for the NHSP 2 till date (out of total committed USD 129.15 million)
- DFID: GBP 77 million (USD 123 million) disbursed to NHSP2 till FY 2014/2015 (out of a total commitment of GBP 72.5 million (USD 116 million). Of this, in FY 2014/2015 DFID disbursed £25.65 million (USD 41 million) under pooled fund arrangement and earmarked financial aid for family planning, and £3.3 million (USD 5.3 million) as a Technical Assistance.
- German Development Cooperation: KfW under German Financial Cooperation committed for four years starting from 2011-12 a sum of Euro 10 million through in the Pool Fund. Under NHSP II Pool Fund arrangement, the cumulative till date amounts to Euro 9.13 million. Additionally about Euro 450,000 was disbursed through the on-going Sector Program Health and Family Planning.
- GAVI: During fiscal year 2013/2014 GAVI disbursed \$ 4,996,135. With this the GAVI grant of \$14.54 million is fully disbursed. GAVI has made a further commitment of \$36.54 million towards NHSP3 for its duration 2015 to 2020.

Apart from the fully flexible pooled funding to the GoN in support of NHSP2, some pooled funding partners also supported other activities which have been presented in the table below which also shows contributions from other non-pooled partners.

## Development Partners Contributing to Health Sector in Nepal

## 9.1 MULTILATERAL ORGANIZATIONS

Organization	Major program focus	Geographical coverage	Health sector budget for 2014/2015	Contact details

### Child health: CB-IMCI and NCP

SN	Activity	Unit	Targets
1	Procurement of ARI Sound Timer (4,000 Units)	4000	1
2	Procurement of Equipment and Tools for CB-IMNCI Program	Time	1
3	Service Operation and Maintenance of Health Facilities for Newborn Care (10 Hospitals and Medical College, Cooperation with Academy)	10 Hospitals	1
4	Service Operation and Maintenance of Health Facilities for Newborn Care (10 Hospitals and Medical College, Co-operation with Academy)	10 Hospitals	1
5	Equipment Support to 10 Hospitals for Special Newborn Unit and Stabilization Unit	10 Hospitals	1
6	Equipment Support to 2 Central and 3 Regional Hospitals for Establishing NICU 3 Additional Hospitals (Kanti, Prasuti, Western, Mid-Western, Chitwan, Lumbini, Koshi and Seti)	5 Hospitals	1
7	Development and Printing of CB-IMNCI Training Materials (Guidelines, Handbook, Chart, Flex, etc.)	Time	1
8	Free Transportation and Treatment Cost for Diseased New-born (Program Implemented Districts and Hospitals)	Time	3
9	Capacity Development Training of Health Workers and Service Provision for SNCU, Stabilization Unit and New-born Corner Services (10 Batch)	10 Batch	2
10	Trainers Training Program on CB-IMNCI (1 Batch) and Update of CB-IMNCI Package including CB-IMNCI	1 Batch	1
11	Evaluation of CB-IMNCI Program and Expansion of CB-IMNCI Program	Districts	1
12	Trainers Training Program on CB-IMNCI(1 Batch)	1 Batch	1
13	Development of Medical Standard for Child Health	Time	1
14	Printing of Child Health Related Materials (Medical Standard, Poster, Job Aid, Forms, Quality Improvement Guideline, etc.) (H4L)	Time	1
15	Workshop on Development Guideline for Medical Standard for Health Facility and District Hospitals and Remote Area for Child Health (H4L)	Time	2
16	Workshop on Development of Training Approach and Process and Guideline for Training and Coaching Sites and Institutional Strengthening of Health Training Centres for CB-IMNCI Training (H4L)	Time	1
17	Review and Plan Formulation Workshop of Child Health Program (Including Quality of CB-IMNCI Training and Coaching Sites) (H4L)	Time	2
18	Development and Printing of CB-IMNCI Training Materials (Guidelines, Handbook, Chart, Flex, etc.)	Time	1

**Annex 2: Program Targets for FY 2072/73**

SN	Activity	Unit	Targets
19	Program Implementation of Navi Program (3 Districts: Kathmandu, Jhapa and Bhaktapur)	Districts	3
20	Program Implementation of Navi Program (Central, Regional and Zonal Hospital and Medical Colleges)	Hospitals/C olleges	1
21	Equity and Access Program for Promotion of New-born and Children Especially Effective Intervention to Backward Community for e.g. Solving of Shortage for Antibiotics, ORS, and Zinc (9 Districts: Karnali Zone and 1 Districts from Each Region)	Districts	1
22	Contract Service 3 Persons (for Technical Support on Clinical and Community Part of CB-IMNCI Program in Centre: Public Health, Clinical Nurse and Doctor)	Persons	2
23	Training to 200 Doctors and Nurses on Level II Package for Special Newborn Care Unit and Stabilization Unit	Persons	2
24	Clinical Mentorship in Special Newborn Care Unit and Stabilization Unit in 20 Hospitals Including BPKIHS, IOM and PAHS	Hospitals	3
25	Orientation to the 40 Hospitals and Pediatricians on Neonatal Clinical Protocol	Hospitals	3
26	Development and Printing of CB-IMNCI Training Materials (Guidelines, Handbook, Chart, Flex, etc.)	Time	1
27	Learning Visit (International) for Program Managers, Health Workers, Focal Points from Districts and Centre	Time	1
28	Program Exposure Internal Visit of FCHVs, CB-IMNCI Focal Person, Health Workers and District Managers	Time	2
29	Study and Dissemination of Out of Pocket Payment for Management of Sick Newborn and Children in Level II and III Hospitals	Time	1
30	Strengthening/initiation of postnatal visits through Outreach Clinics and Immunization Clinics	Time	2
31	Study on Service Availability, Readiness and Quality of Newborn Care in 28 Hospitals	Hospitals	1
32	Initiation of Remote Area Program for Increasing Access and Coverage of CB-IMNCI Interventions in Remote and Hard to Reach Communities	Time	1
33	Guideline for Free Care for Sick Newborn in Level II and III Hospitals	Time	2
34	Development of Neonatal and Pediatric Clinical Protocol and Health Facility Based Newborn Care Training Package for Level II and III Health Facility	Time	1
35	Emergency Treatment of Childhood Disability and Support	Time	3
36	Strengthening and Opening Program of Childhood Illness		3
37	Supervision of SNCU and Stabilization Unit on Implementation on SOP and CB-IMNCI	Time	3
38	Monitoring and Supervision of CB-IMNCI Program (Health for Life)	Time	3
39	Monitoring and Supervision of CB-IMNCI Program	Time	3

### Epidemic disease control

S N	Activity	Unit	Annual Target
<b>Epidemic disease control</b>			
1	Purchase furniture and fixtures for malaria control programme	times	1
2	Procure Ambulance for mobile health team ( road accident management)	piece	2
3	Purchase of Ambulance for TIA Health Desk	piece	1
4	Procurement of dengue and chickungunya test, PCR machine, ELISA Reader, Platelet Segregation Machine.	piece	1
5	Procurement & installation of temperature & humidity measurement equipment( 150 HI)	piece	1
6	Procurement of server, scanner, Teleconference set & install air-condition/Mobile set for SMS reporting and other (Thru WHO)	piece	2
7	Procurement of 4WD Vehicle thru WHO use for malaria Program	piece	1
<b>Epidemic disease control</b>			
8	Development of Treatment Protocol Out Break Management	times	2
9	Orientation training for district/community RRT members and health workers on epidemic control and management	times	9
10	Procure drugs and equipment for control of epidemic diseases	times	1
11	Supervision, Monitoring & Evaluation expenses during Outbreaks	times	3
12	Activities for the effective implementation of IHR 2005 and Integrated Disease Surveillance System	times	3
13	Procurement of furniture for control of Ebola,Swain flu and etc	times	3

**Annex 2: Program Targets for FY 2072/73**

S N	Activity	Unit	Annual Target
14	Field programme of Health workers to contoleEbola,Swain flu and etc	times	3
15	Orientation to health worker on Ebola,Swinflue,and bird flue	times	3
16	Orientation for Health worker on EBOLA	times	1
<b>Malaria control</b>			
17	Human Resouce Cost at Central Office	times	3
18	Basic and Refresher training in malaria microscopy	person	75
19	Capacity strengthening of VBDRTC in Malaria Training and Research	person	1
20	Printing and dissemination of SoPs,Treatment and prevention algorithm, Publication of malaria annual report and other training Materials	times	2
21	Quality control of malaria slide in centre& Monitoring to ensure the quality of the blood slide examined in the districts	times	12
22	RRT Mobilization for outbreak /emergency preparedness, prevention, control and management	times	4
23	Technical support from WHO on IHR, IDSS, outbreak investigation, Water safety plan and control	times	3
24	Technical support through WHO in malaria control programme	times	3
25	Technical assisstancy from WHO in malaria control	times	3
26	In country program related capacity building trainings (Malariology, vector identification and bionomics, etc)	times	1
27	Implement the plan, including international trainings for key staffs (Masters in medical entomology, program management, malariology, malaria elimination, entomology, surveillance, M & E, etc), Programme representation International Level	person	3
28	Annual Health Facilities Survey	times	1
29	Survey on malaria microscopy services to establish baseline on adherence to standard operating procedures & Internal competency assessment workshop in malaria microscopy	times	2
30	Implement advocacy, social mobilization and behavior change communication (BCC) strategy and Develop specific materials print, audio and video	times	3
31	Hoarding boards to be placed at hospital compounding major border crossings	times	1
32	Malariometric Survey and Entomological Survey	times	1
33	Monitoring efficacy of first line anti-malarial medicines and Monitoring vector susceptibility to insecticides, in malaria risk districts	times	2
34	Develop advocacy materials and flip chart for FCHV and Printing National Malaria diagnosis treatment guideline, manual and Training plan (thru WHO)	times	3
35	Capacity building Orientation on GR , mapping and GPS/GPRS & orientation for Web-based system	person	3
36	Update micro-stratification ,Orientation to key staff on foci investigation and rapid response team at national and district level	person	2
37	Cross-border meeting to exchange information and develop joint operational plan	times	1
38	Conduct annual national review meetings and Strengthen partnership with other national institutions	times	2
39	Distribution of LLINs in targated area of districts every year and conduct BCC on usage of LLINs.	times	1
40	Strengthen Malaria Technical Working Group (TWG) and Programme representation National Level	times	3
41	Supportive supervision and monitoring of malaria microscopists	times	3
42	Technical Review of EWARS sentinel sites focal persons	person	2
43	Emergency focal spraying in vector borne epidemic area	times	2

**Annex 2: Program Targets for FY 2072/73**

S N	Activity	Unit	Annual Target
44	Vector surveillance for Malaria, Kala-azar, Dengue, L. Fileria & JE	times	12
45	Celebration of World Malaria Day	times	1
46	Purchase of Insecticide for Malaria Indoor residual spraying	times	1
47	Procure medicines and diagnostic materials for malaria control	times	1
48	Procurement of LLIN	piece	472747
49	Distribution of LLIN in high and moderate risk VDCs Freight, Insurance and Shipping cost	piece	472747
50	Monitoring and Supervision - EDCD/PMU-at all level - MoH/RHSD/DoHS	times	3
<b>Kala-azar control</b>			
51	Orientation to multi-sectoral/stake holders on IVM	times	3
52	Technical support by WHO in kala-azar elimination and Dengue control programme	times	3
53	kala-azar case base surveillance	times	3
54	Case validation in new kala-azar emerging district	times	3
55	Purchasing medicines and medical goods for Kala-azar control	times	1
56	Purchase of Insecticide for IRS in Kala-azar affected districts	times	1
57	Transportation cost support for Kalaazar patients	person	150
<b>Natural disaster management</b>			
58	orientation to RRT for RH promotion in emergency and natural disaster and prepare district level contingency planning	times	3
59	Technical support from WHO in disaster management programme	times	2
60	Emergency planning workshop to the hospital /PHC	times	3
<b>Lymphatic filariasis elimination</b>			
61	LF follow-up survey in 10 LF MDA conducted districts	times	1
62	Interaction with professional organizations	times	1
63	Monitoring and supervision of MDA campaign	times	3
64	Technical & financial support by WHO in filaria elimination campaign	times	2
65	Technical & financial support by DFID/CNTD in LF elimination program	times	2
66	RTI financial and technical support on LF elimination	times	1
67	Surveillance activities in 20 MDA stopped districts	times	3
68	Management of LF morbidity, MDA orientation, SAE management and conduction of hydrocele operation camps (center & hospitals)	times	2
69	IEC activities for Mass Drug Administration (MDA) campaign in Filaria elimination programme	times	2
70	MDA Planning Workshop, Review and publication of annual reports	times	2
<b>Zoonotic disease control</b>			
71	Procurement of chemicals, Equipment and operational costs to produce ARV Tissues culture vaccine.	times	1
72	celebrate world Rabies day	times	1
73	Development, printing & dissemination of IEC materials on Zoonoses	times	1
74	Technical support by WHO in zoonotic disease control	times	3
75	Orientation training to the MO and Paaramedical staffs on rational use of ARV and poisonous snakebite case management	person	375
76	Study & research for production of inj .ASVS in Nepal	times	1
77	Procurement of ASVS for districts	piece	30000
78	Procurement of ARV (Cell culture vaccine) for approx 50000 persons.	times	300000

**Annex 2: Program Targets for FY 2072/73**

S N	Activity	Unit	Annual Target
<b>Dengue control</b>			
79	Orientation/interaction with stakeholders on dengue disease control	times	2
80	emergency management for dengue outbreak control	times	2
81	Orientation for MO and paramedical staffs and journalists on dengue and chickungunea	times	3
82	Public awareness activities on dengue and chickun control	times	3
83	Mobilization of team during dengue and chickungunea outbreak & vector search and destroy campaign to control dengue epidemics	times	2
84	Development of search and destroy guide line for dengue and chickungunea control	times	1
85	Multi-sectoral interaction on dengue and chickungunea control	times	3
86	Procurement of dengue and chickungunya diagnostic test kits	times	1
87	Health worker recruitment	times	69
88	Staff Hiring for Airport	times	4
89	Payment of Health working in EDCD	times	7
90	Printing of Materials	times	1

**Tuberculosis**

SN	Activities	Unit	Targets
1	Procure cartridge for existing gene-xpert machine for	Pieces	39,350
2	Procure gene-expert machine to expand in new districts/health facilities	Pieces	3
3	Mapping TB diagnostic centers with GIS	Times	1
4	Basic Modular Training for Z-N microscopy	Person	16
5	Procurement of Microscopy	Pieces	65
6	Procurement of MDR anti-TB drugs	Times	1
7	Care and support to MDR patients (nutritious food, transport and accommodation cost assistance @ NRs 2500/month)	Person	808
8	Nutritional allowance to retreatment patients, NRs 1000/month	Person	100
9	Procure Microscopes to expand DOTS centre in non state health sector (private, community..etc)	place	20
10	Procure digital X-ray film	Pieces	10,000
11	Basic clinical management training in TB to medical officers	Times	11
12	Basic TB Modular Training to health worker	Person	80
13	Refresher TB Modular Training to health worker	Person	54
14	National PME workshop	Times	3
15	Regional PME Workshop	Times	18
16	Onsite data verification program (OSDV).	Times	5
17	Training for E-TB Master Register	Times	1
18	Trimester DR PME workshop	Times	12
19	Compare the effectiveness of Community-based DOTS, Family-based DOTS and Institutional DOTS	Times	1
20	contraction of Chest Hospital		1
21	conditional grant to Kalimati Chest Hospital-NATA	Times	12
22	TB Management Training in Bangalore, India	Person	10
23	Procure van intalled with xpert machine and x-ray machine to increase TB case finding in hard to reach population	Pieces	2
24	TB Management Training to new DTLOs	Times	1
25	Procure of Anti-TB medicines	Times	1

## Annex 2: Program Targets for FY 2072/73

SN	Activities	Unit	Targets
26	Mobilize health facility helper/FCHV/Mothers group/cured TB patients to follow up the initial/prime defaulter	Person	660
27	Microscopic camp Conduction	Times	228
28	Contact tracing to Family members in the beginning and end of treatment duration.	Person	14,343
29	Broadcast radio messages from national and local radio networks	Times	260
30	commemorate world TB Day	Times	75
31	Provide Nutritional and travel support to all retreatment PBC TB patients. NRS 750/month	Person	2600
32	Basic TB Modular Training to health worker	Person	80

### Leprosy

SN	Activities	Unit	Target
1	Reconstructive surgery camp	Times	2
2	World Leprosy Day celebration at central level	Times	1
3	Printing of Program implementation guidelines	N/A	1
4	Coordination with other stakeholders from Disability Focal Unit	Persons	3
5	Post disaster data collection and treatment	Persons	3
6	MDT transportation and management (times)	Times	3
7	Procurement and distribution of supportive appliances for leprosy affected person for disability prevention and complications mgmt	Persons	2
8	Travel allowances for the treatment of complications & disability of leprosy patients (Rs. 1000/patient)	Times	1500
9	Quarterly review meeting at regional level (Annual, first & second)	Times	15
10	Onsite coaching, education and management at local level in leprosy endemic districts	Persons	2
11	Programme supervision & monitoring for central & regional level	Times	48
12	Annual report printing	Times	1
13	Support to the referral centres to provide other special treatment services for the leprosy affected	Persons	3
14	Upgrading, establishing and extending POID clinic	Persons	10
15	Contact examination of neighbours and community people of new leprosy cases	Times	900
16	Operational study regarding disability and consumption of drugs	Times	2
17	Active Case Detection	Times	2
18	Active case detection in urban slums (Place)	Times	2
19	Capacity building program regarding leprosy to new health care workers, doctors (20 people in each batch)	Times	2
20	Special activity(POID, rehabilitation and discrimination reduction) in local level towards leprosy free society as put forward in Bangkok Declaration	N/A	3
21	Case Validation	Times	15
22	Campaign in high leprosy endemic districts (40 places of Saptari, Siraha, Dhanusa, Mahottari, Sarlahi, Rautahat, Kapilvastu, Nawalparasi, Banke and Kailali)	Times	2
23	One day leprosy training to medical officers	Times	1
24	Technical support, monitoring and supervision	Times	9
25	Survey and need assessment of disability and injury post disaster	Times	2
26	Quarterly review meeting (Central Level)	Times	3
27	Chemorophylaxis drugs procurement	----	2
28	Procurement of drugs for leprosy complication management	Times	1
29	Monitoring and Supervision	Person	15
30	Grant to leprosy affected persons of Khokana&PokharaAarogyaAshram	N/A	6

Source: LCS

**HIV/AIDS**

SN	Activities	Unit	Targets
1	Scale up of services sites throughout the nation – ACMT,CMT,PMTCT ,EWI all ART SITE	Time	3
2	Capacity building	Person	50
3	GARPR report preparation	Time	1
4	Size Estimation of key population	Time	1
5	IBBS Study	Time	2
6	Patient tracking system -with a unique identifier	Time	1
7	HIV Strategy 2016-2021	Time	1
8	Data Quality Assurance	Time	1
9	Frequent monitoring visit/on site coaching to SDPs	Time	12
10	Equipment- computer, Internet at ART sites	Place	10
11	Strengthening HMIS system- customization of DHIS2	Time	1

Source: NCASC

**National Public Health Laboratory**

S.N.	Activities	Unit	Target
1.	Continuation on construction of new building	Building	1
2.	Procurement of Furniture and Fixture for newly constructing building	time	1
3.	Procurement of electrolyte, biochemistry analyzer machine for district hospital	set	25
4.	Procurement of equipment for operational of BSL III Lab	set	1
5.	Procurement of equipment for specialized microbiology research	set	1
6.	Procurement of equipment of establishment of health post level laboratory	set	35
7.	Procurement equipment for the establishment of Regional Public Health Laboratory	set	1
8.	Procurement of cell counter machine for zonal hospital	set	20
9.	Procurement of equipment for BTS expansion in 5 remote districts	set	5
10.	Procurement of component separation machine for BTS service expansion	set	1
11.	Procurement of semi-automated blood grouping machine for regional BTS	set	1
12.	Installation of Air-conditioner in newly constructing building	set	20
13.	Procurement of equipment of laboratory operational	time	2
14.	Procurement of equipment for laboratory service continuation in PHCs	set	12
15.	Operational of bio-safety and bio-security programme	time	1
16.	RCC construction in laboratory compound	time	1
17.	Construction of -20 cold room for storage of quality control samples	time	1
18.	Library management	time	1
19.	Installation of electricity transformer	time	1
20.	Two weeks orientation Training to newly appointed Lab Assistant and Lab Technician	Persons	30
21.	Continuation on quality control programme for laboratory and BTSCs	time	3
22.	EQAS training to technical staffs	Persons	2
23.	Scholarship scheme to study bachelor programme for Lab technician working for government service	Persons	2
24.	Operational of safe blood programme	time	1
25.	Application training on Biochemistry analyser and cell counter	persons	20
26.	Organization and management survey for NBBTS and BSL- 3 lab	time	1
27.	Procurement of kits and chemicals for HIV testing	kit	12000
28.	Procurement of yellow fever vaccine	vaccine	1200
29.	Procurement of kit chemicals for endocrinology test	time	1

## Annex 2: Program Targets for FY 2072/73

30.	Procurement of kit chemicals for operational of national influenza center	time	3
31.	Monitoring and supervision of government and private laboratories	time	3

### Health Training:Central Level

SN	Program/Activities	Unit	Target
<b>1</b>	<b>Upgrading and Basic Training</b>		
1.1	Supervisor Upgrading Training	Person	75
1.2	Sr. AHW	Person	180
1.3	Sr. ANM	Person	60
1.4	AHW	Person	30
1.5	ANM	Person	30
1.6	AHW-P	Person	60
1.7	ANM-P	Person	60
<b>2</b>	<b>Induction and Health management</b>		
2.1	Induction Training for Health Officer	Person	150
2.2	TABUCS and LMBIS training	Person	100
<b>3</b>	<b>Clinical Skill based training</b>		
3.1	Safe abortion service training for SN and MO	Person	100
3.2	Follow up Enhancement Program	District	3
3.3	ASRH training	Person	340
3.4	SBA Training (Nursing Staff and MO)	Person	522
3.5	ASBA training for MO	Person	10
3.6	NSV	Person	60
3.7	Minilap	Person	60
3.8	Implant	Person	500
3.9	IUCD	Person	80
3.10	PPIUCD	Person	30
3.11	NSV self paced training	Person	40
3.12	IUCD self paced training	Person	20
3.13	COFP Counseling	Person	240
3.14	Hiring of FP consultant	Person	4
1.15	Hiring of FP councilor	Person	6
3.16	Medico Legal Training	Person	80
3.17	Paediatric Nursing Training	Person	40
3.18	Palliative Care Training	Person	20
3.19	OTTM	Person	30
3.20	MISP Training at regional level	person	125
3.21	ICU/NICU management Training (level 2)	person	200
3.22	ICU/NICU management Training (level 3)	person	30
<b>4</b>	<b>Training of Trainers</b>		
4.1	TOT on ASRH	Person	20
4.2	TOT on MISP	Person	20
4.3	Orientation/TOT on IP whole site for trainers	Person	100
<b>5</b>	<b>Others</b>		
5.1	Biomedical Equipment Technical Assistant training	Person	24
5.2	Mental Health Training	district	3
5.3	X-ray Users maintenance training	Person	12
<b>6</b>	<b>Package Development</b>		
6.1	Package Development of Long and Short Training (Upgrading, Burn Care, High Altitude Sickness)	times	6
6.2	Package printing of long and short term training program (upgrading, IP, PNC, FCHV, CoFP/counseling, SBA)	times	4

**Annex 2: Program Targets for FY 2072/73**
**Health Training: District Level**

SN	Program/Activities	Unit	Target
1	District training site strengthening and upgrade	district	10
2	Infection Prevention whole site training at 15 districts	HF	250
3	FCHV Basic Training	Persons	500
4	ASRH training at 3 districts	persons	160

Source: NHTC

**Health Education Information and Communication**

SN	Activities	Unit	Targets
1	Audio/ video message production	Nos	500
2	IEC materials - flip wall chart, health diary, printing on GBV and IEC/BCC programs regarding prevention and control of TB, HIV/AIDs, Leprosy, IMCI, Epidemics, Thyroid diseases, ENT, health hazards from arsenic and mercury, NTD, NCD and tobacco and its products, harmful consumption of alcohol, tobacco, GBV, and Free health services, FP, EPI, Nutrition, ASHR, Ayurveda, hand- washing, disabled friendly, rational usage of drugs.	Nos	500000
3	Health message airing through TV	Nos	3500
4	Health message airing through Radio	Nos	2000
5	Video show in the Shaja bus	Nos	2000
6	HP and BCC orientation Programs	Nos	5
7	Capacity building program for IEC focal person representing from district and Region for the effective implementation of IEC activities	No	100

Source: NHEICC

**Logistics Management**

SN	Activities	Unit	Target
1.	Construction of New Warehouse in Teku and Pathalaiya	Building	2
2.	Procurement of Back-up Generator/UPS for 300 MA X-Ray Machine	Piece	18
3.	Procurement and payment of Biomedical, Cold Chain, Machinery Equipment for new established Health Facilities	Times	3
4.	Procurement of Biomedical, Cold Chain spare parts	Times	2
5.	Procurement of essential materials for disaster management	Time	1
6.	Procurement and supply of Cold Chain Equipments for 24 earthquake affected districts(Commodities Grant)	Time	1
7.	Training on Web-Based LMIS, Inventory System and Internal Mailing System	Number	150
8.	Training on Cold Chain repair and Maintenance for Mechanical Engineers and Refrigerator Technicians	Times	2
9.	Quality Control of Drugs and Equipments	Times	60
10.	Maintenance of Biomedical, Cold Chain Equipments, Machinery and Vehicles	Number	300
11.	Fuels for Generators to save vaccines	Times	5
12.	Preparation of Tender Documents, Bidding Publications, Third Party Insurance etc	Times	3
13.	Web-site updates and Web-based LMIS repair and maintenance	Time	1
14.	Printing of LMIS Forms and Stock Book	Time	1
15.	Repacking and Transportation Essential Drugs, Vaccines, Equipment	Times	450
16.	Procurement of Essential Medicines for Buffer Stock	Times	3
17.	Supervision and Monitoring	Times	50
18.	Team Mobilization for Cold Chain Equipment Assessment, Inventory, Auctioning and preparation of replacement plan	Times	3
19.	Payment of internet and monitoring of Telemedicine Program	Times	3
20.	Receive and supply of Xithromax for trachoma control	Time	1

## Annex 2: Program Targets for FY 2072/73

	program(Commodities Grant)		
21	Contract staffs for operation of LMIS (District Program)	Number	80
22	Essential Drugs, Vaccines, Equipment Repacking and transportation (District Program)	Number	225
23.	Orientation on Pull System, LMIS for Newly Appointed personnel in the districts (District Program)	Districts	49
24.	Supervision and Monitoring (District Program)	Times	225
25.	Construction of New Warehouse in Teku and Pathalaiya	Building	2
26.	Procurement of Back-up Generator/UPS for 300 MA X-Ray Machine	Piece	18

### Management

SN	Activities	Unit	Targets
1	Procurement of Motorbikes for Regions/Districts	Number	60
2	Computer Assistant on contract service	District	53
3	Health care waste management, onsite coaching and preparation of job description health workers	Times	2
4	HMIS Training to newly recruited HWs -75 Districts	District	75
5	Hospital Equipment maintenance program expansion in 5 regions	Region	5
6	Dental chair procurement	Times	10
7	Procurement of dental kits	set	70
8	Water tank construction in DoHS complex	Number	1
9	Web site hosting, upgrade and firewall in DoHS	Times	1
10	AI Training	Times	2
11	Community base mental health training	Times	3
12	HMIS Training Manual Update	Times	1
13	Revision/update and printing of program guidelines	Times	1
14	Commission on Information and Accountability related activities	Times	1
15	National annual review workshop	Times	1
16	Printing of HMIS , R/R Tools, Monitoring Sheet	Times	1
17	HMIS Training for Central and Private Hospitals Staff	Times	1
18	Oral health basic training for health workers	Times	24
19	Oral health school programme	Times	4
20	Services for impoverished citizens in community level	Times	8
28	Software update and purchase of health information	piece	5
29	Printing of DoHS Annual Report	Times	1
30	National annual review workshop	Times	1
31	Integrated supervision	Times	300
