This bulletin includes the updates from the Early Warning and Reporting System (EWARS). It includes data since January 2019 till date, including comparison of same period during last year.

The Early Warning and Reporting System (EWARS)

Highlights

AGE: 193 cases of AGE are reported this week. The majority of these cases are from Kanchanpur (21 cases), Saptari (19 cases), Dolakha (9 cases) and Lalitpur (9 cases).

SARI: 204 cases of SARI are reported this week. The majority of these cases are from Morang (25 cases), Lalitpur (19 cases), Saptari (17 cases), Jhapa (13 cases) and Kailali (13 cases).

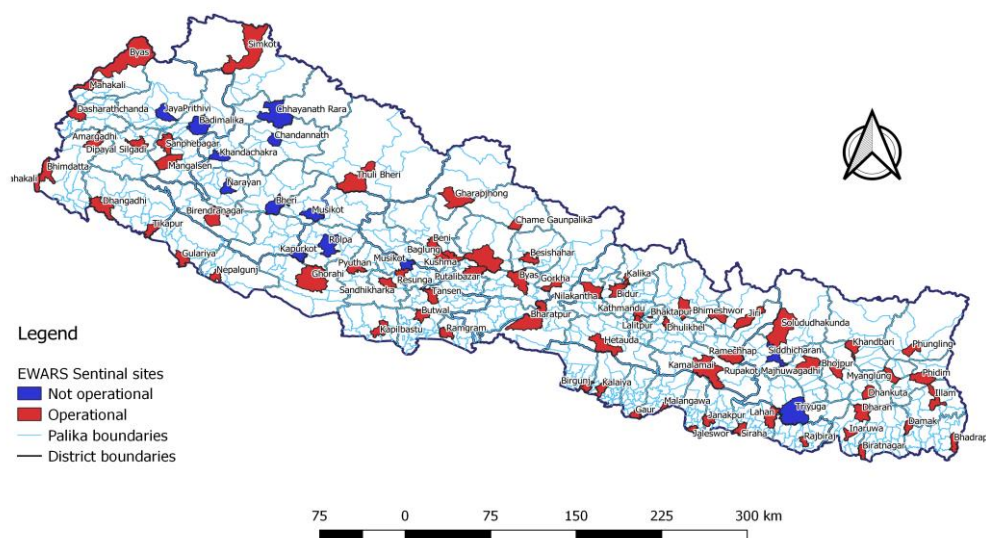

Dengue: Two cases of Dengue are reported this week from Dhading.

Kala-azar: Six cases of Kala-azar are reported this week, one each from Bajhang, Bajura, Banke, Kalikot, Lalitpur and Morang.

The EWARS was established in 1997 to strengthen the flow of information on vector-borne and other outbreak prone infectious diseases from the district to Epidemiology and Disease Control Division (EDCD) and Vector-Borne Disease Research and Training Center (VBDRTC), Hetauda. Rapid Response Teams (RRTs) can be mobilized at short notice to facilitate prompt outbreak response at Central, Regional and District level. RRTs can also support local level health institutions for investigation and outbreak control activities.

This information system is hospital-based and is currently operational in 69 hospitals (out of 82 sites) throughout Nepal (Figure 1). So far, the EWARS mainly focuses on the **weekly reporting** of number of cases and deaths (including "zero" reports) of six priority diseases/syndromes—Malaria, Kala-azar, Dengue, Acute Gastroenteritis (AGE), Cholera and Severe Acute Respiratory Infection (SARI), and other epidemic potential diseases/syndromes (like enteric fever). It equally focuses on **immediate reporting** (to be reported within 24 hours of diagnosis) of one confirmed case of Cholera, Kala-azar severe and complicated Malaria and one suspect/clinical case of Dengue as well as 5 or more cases of AGE and SARI from the same geographical locality in one-week period.

EWARS Sentinel Sites

Reporting Status

Out of 70 functional EWARS sentinel sites, report was received from 38 sentinel sites (54%) whereas 32 sentinel sites did not report in the 10th epidemiological week of 2019. The reporting coverage is same as the last week.

1.1 Acute Gastro-Enteritis and Cholera

193 cases of AGE are reported in the 10th epidemiological week this year. The majority of these cases are from Kailali (20 cases), Kathmandu (14 cases) and Sunsari (13 cases). 328 cases of AGE were reported this week in 2018.

1.2 Severe Acute Respiratory Infection (SARI)

204 cases of SARI are reported in the 10th epidemiological week this year. The majority of these cases are from Morang (25 cases), Lalitpur (19 cases), Saptari (17 cases), Jhapa (13 cases) and Kailali (13 cases). 296 cases of SARI were reported this week in 2018.

1.3 Enteric Fever

34 cases of Enteric fever are reported this week. The majority of the cases are from Saptari (7 cases), Lalitpur (3 cases), and two each from Lamjung, Myagdi, Nuwakot and Sindhupalchowk.

1.4 Malaria

No case of Malaria is reported this week. Two cases of Malaria were reported this week in 2018.

1.5 Dengue

Two cases of Dengue are reported this week from Dhading. No case of Dengue was reported this week in 2018.

1.6 Kala-azar

Six cases of Kala-azar are reported this week, one each from Bajhang, Bajura, Banke, Kalikot, Lalitpur and Morang. Two cases of Kala-azar were reported this week in 2018.

1.7 Scrub typhus

No case of Scrub typhus is reported this week.
