

Early Warning and Reporting System (EWARS)

Weekly Bulletin

(18th Epidemiological Week)

10 May 2020

Government of Nepal
Ministry of Health and Population
Department of Health Services
Epidemiology and Disease Control Division
Kathmandu, Nepal
ewarsnepal@gmail.com

Note: This bulletin includes data since January 2020 till date, including comparison of the same period last year. Since May 2019, 36 new sentinel sites (including public hospitals, private hospitals, and medical colleges) were added and were gradually oriented and started reporting, thus increasing the number of reporting sites. The current number of sentinel sites is 118.

The Early Warning and Reporting System (EWARS)

Highlights

110 cases of Coronavirus disease (COVID-19) have been confirmed so far in Nepal. Out of which 33 cases have recovered and discharged. Currently, 77 cases are on Isolation at different Hospitals.

Acute Gastro-Enteritis (AGE): 148 cases of AGE are reported this week. The majority of these cases are from Kapilvastu (13 cases), Kathmandu (10 cases), Rukum West (9 cases), Mahottari (8 cases) and Dolakha (8 cases).

Severe Acute Respiratory Infection (SARI): 122 cases of SARI are reported this week. The majority of these cases are from Kathmandu (10 cases), Rupandehi (10 cases), Morang (9 cases), Surkhet (7 cases) and Jhapa (6 cases).

Dengue: Two cases of dengue are reported this week from Myagdi.

The EWARS was established in 1997 to strengthen the flow of information on vector-borne and other outbreak prone infectious diseases from the district to Epidemiology and Disease Control Division (EDCD) and Vector-Borne Disease Research and Training Center (VBDRTC), Hetauda. Rapid Response Teams (RRTs) can be mobilized at short notice to facilitate prompt outbreak response at central, provincial and local levels. RRTs can also support local level health institutions for investigation and outbreak control activities.

This information system is hospital-based. So far, the EWARS mainly focuses on the **weekly reporting** of number of cases and deaths (including "zero" reports) of six priority diseases/syndromes—Malaria, Kala-azar, Dengue, Acute Gastroenteritis (AGE), Cholera and Severe Acute Respiratory Infection (SARI), and other epidemic potential diseases/syndromes (like enteric fever). It equally focuses on **immediate reporting** (to be reported within 24 hours of diagnosis) of one confirmed case of Cholera, Kala-azar, Malaria and one case of Dengue as well as 5 or more cases of AGE or SARI from the same geographical locality in one-week period.

1. Acute Gastro-Enteritis (AGE) and Cholera

148 cases of AGE are reported this week. The majority of these cases are from Kapilvastu (13 cases), Kathmandu (10 cases), Rukum West (9 cases), Mahottari (8 cases) and Dolakha (8 cases). 339 cases of AGE were reported this week in 2019.

2. Severe Acute Respiratory Infection (SARI)

122 cases of SARI are reported this week. The majority of these cases are from Kathmandu (10 cases), Rupandehi (10 cases), Morang (9 cases), Surkhet (7 cases) and Jhapa (6 cases). 137 cases of SARI were reported this week in 2019.

Note:

- *The number of reporting sites per week in 2020: 80 (for weeks 10 and 11), 84 (for week 12), 77 (for week 13), 73 (for week 14), 74 (for weeks 15-16) and 76 (for weeks 17-18).*
- *The number of reporting sites per week in 2019: 51 (for weeks 10-12), 52 (for week 13) and 55 (for weeks 14-18).*

3. Malaria

No case of malaria is reported this week. One case of malaria was reported this week in 2019.

4. Dengue

Two cases of dengue are reported this week from Myagdi. One case of dengue was reported this week in 2019.

5. Kala-azar

One case of kala-azar is reported this week from Okhaldhunga. Three cases of kala-azar were reported this week in 2019.

Other diseases

Scrub typhus

Two cases of scrub typhus are reported this week- one each from Jhapa and Kaski. Two cases of Scrub typhus were reported this week in 2019.

Acknowledgement: The Epidemiology and Disease Control Division highly acknowledges the contribution from all the sentinel sites, medical recorders, EWARS focal persons and rapid response team members.

Note: This bulletin is also available at EDCCD's website www.edcd.gov.np. Thank you.
