This bulletin includes the updates from the Early Warning Reporting System (EWARS). It includes data since January 2016 till date, including comparison of same period during last year.

Section 1: The Early Warning and Reporting System (EWARS)

Highlights

- **Kala-azar:** Three cases of Kala-azar are reported this week, two from Janakpur Zonal Hospital, Dhanusha and one from Sukraraj Tropical and Infectious Disease Hospital, Teku.
- **Malaria:** No case of malaria is reported this week.
- **Dengue:** No case of Dengue is reported this week.
- One death from AGE is reported this week from Prithvi Bir Hospital, Kapilvastu and the deceased was from Singhakhori VDC of Kapilvastu district.

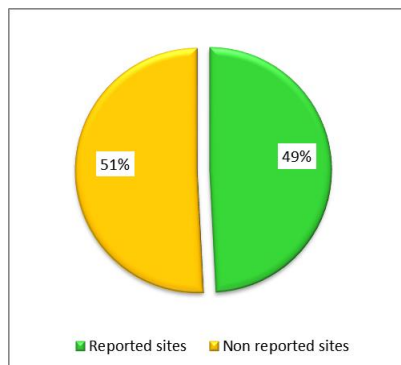

The EWARS was established in 1997 to strengthen the flow of information on vector-borne and other outbreak prone infectious diseases from the district to Epidemiology and Disease Control Division (EDCD) and Vector-Borne Disease Research and Training Center (VBDRTC), Hetauda. Rapid Response Teams (RRTs) can be mobilized at short notice to facilitate prompt outbreak response at Central, Regional and District level. They can also support local level health institutions for investigation and outbreak control activities.

This information system is hospital-based and is currently operational in 61 hospitals (out of 82 sites) throughout Nepal (Figure 1). So far, the EWARS mainly focuses on the **weekly reporting** of number of cases and deaths (including "zero" reports) of six priority diseases/syndromes—Malaria, Kala-azar, Dengue, Acute Gastroenteritis (AGE), Cholera and Severe Acute Respiratory Infection (SARI), and other epidemic potential diseases/syndromes (like enteric fever). It equally focuses on **immediate reporting** (to be reported within 24 hours of diagnosis) of one confirmed case of Cholera, Kala-azar severe and complicated Malaria and one suspect/clinical case of Dengue as well as 5 or more cases of AGE and SARI from the same geographical locality in one week period.

Reporting Status

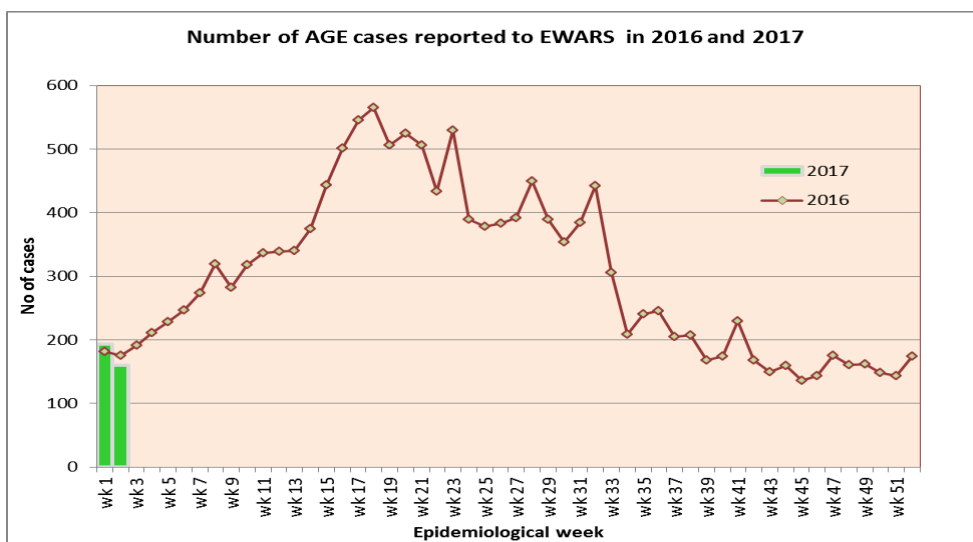

Out of 61 functional EWARS sentinel sites, report was received from 30 sentinel sites (49 percent) only whereas 31 sentinel sites did not report in 1st Epidemiological week of 2017. The reporting coverage is same as compared to the previous week.

1.1 Acute Gastro-Enteritis and Cholera

160 cases of AGE are reported in 2nd epidemiological week of 2017. Among 160 cases, the majority of cases are from Accham (24 cases), Morang (19 cases), Dolakha (17 cases), Kathmandu (16 cases), Lalitpur (12 cases), Kaski (7 cases), Makawanpur (7 cases), Kapilvastu (6 cases), Jhapa (6 cases), Lamjung (5 cases), Dhanusha (4 cases) district. The number of AGE cases reported in 2nd week this year did not exceeds the number of AGE cases reported in the same week last year (176 cases).

One death from AGE is reported this week from Prithvi Bir Hospital, Kapilvastu and the deceased was from Singhakhor VDC of Kapilvastu district. Thirteen deaths from AGE were reported in 2016.

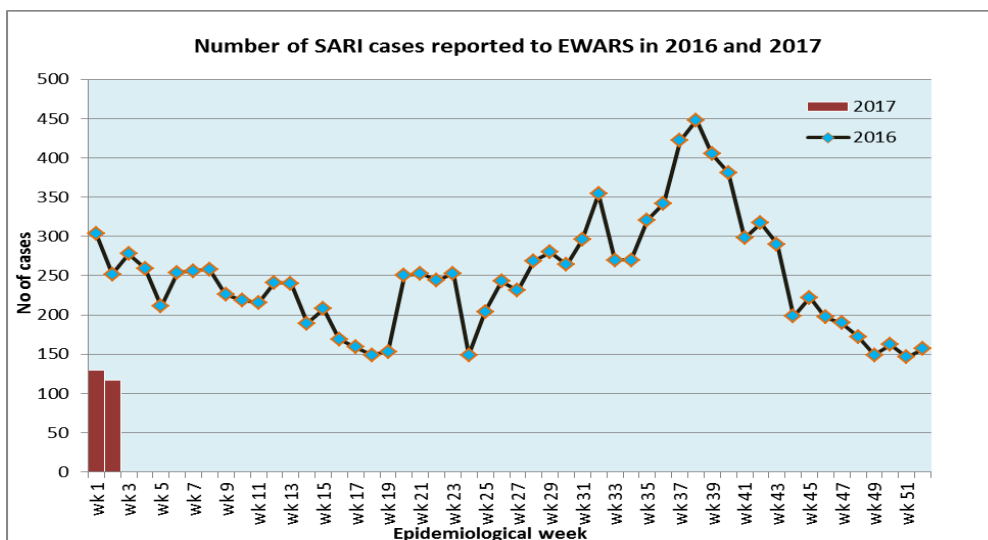

1.2 Severe Acute Respiratory Infection (SARI)

117 cases of SARI are reported in 2nd epidemiological week of 2017. The cases of SARI reported this week did not exceed the number reported in the same week last year (252 cases). Among 117 cases, the majority of cases are

from Jhapa (24 cases), Morang (20 cases), Kanchanpur (10 cases), Saptari (7 cases), Lalitpur (7 cases), Kathmandu (6 cases), Kapilvastu (5 cases) Baglung (4 cases), Dhankuta (4 cases) and Dhanusha (4 cases) district.

No death from SARI is reported this week. Seventy deaths from SARI were reported in 2016.

1.3 Enteric Fever

18 cases of Enteric fever are reported this week, including 6 from Lamjung, 5 from Saptari, 2 from Kaski, and 1 each from Dolakha, Jhapa, Kathmandu, Myagdi and Syangja district.

1.4 Malaria

No case of malaria is reported this week. Eighty three cases of Malaria were reported through EWARS in 2016.

1.5 Dengue

No case of Dengue is reported this week.

1.6 Kala-azar

Three cases of Kala-azar are reported this week, two from Janakpur Zonal Hospital, Dhanusha and one from Sukraraj Tropical and Infectious Disease Hospital, Teku. The cases are from Sarlahi and Lalitpur district respectively. Six cases of Kala-azar cases are reported so far this year.

150 cases of Kala-azar were reported through EWARS in 2016.
