This bulletin includes the updates from the Early Warning and Reporting System (EWARS). It includes data since January 2018 till date, including comparison of same period during last year.

## The Early Warning and Reporting System (EWARS)

### Highlights

**SARI:** 143 cases of SARI are reported this week including one death. The death case is from Dhangadhi, Kailali.

**Malaria:** Two cases of Malaria are reported this week from Achham.

**Dengue:** Seven cases of Dengue are reported this week. The cases are from Rupandehi (3 cases), Kanchanpur (2 cases), and Syangja (1 case) and Dhading (1 case).

**Scrub typhus:** Twenty-seven cases of Scrub typhus are reported this week, and the majority of the cases are from Rupandehi (8 cases) and Kailali (4 cases).

The EWARS was established in 1997 to strengthen the flow of information on vector-borne and other outbreak prone infectious diseases from the district to Epidemiology and Disease Control Division (EDCD) and Vector-Borne Disease Research and Training Center (VBDRTC), Hetauda. Rapid Response Teams (RRTs) can be mobilized at short notice to facilitate prompt outbreak response at Central, Regional and District level. RRTs can also support local level health institutions for investigation and outbreak control activities.

This information system is hospital-based and is currently operational in 69 hospitals (out of 82 sites) throughout Nepal (Figure 1). So far, the EWARS mainly focuses on the **weekly reporting** of number of cases and deaths (including "zero" reports) of six priority diseases/syndromes—Malaria, Kala-azar, Dengue, Acute Gastroenteritis (AGE), Cholera and Severe Acute Respiratory Infection (SARI), and other epidemic potential diseases/syndromes (like enteric fever). It equally focuses on **immediate reporting** (to be reported within 24 hours of diagnosis) of one confirmed case of Cholera, Kala-azar severe and complicated Malaria and one suspect/clinical case of Dengue as well as 5 or more cases of AGE and SARI from the same geographical locality in one-week period.

EWARS Sentinel Sites

## Reporting Status

Out of 69 functional EWARS sentinel sites, report was received from 26 sentinel sites (38%) whereas 43 sentinel sites did not report in the 45<sup>th</sup> epidemiological week of 2018. The reporting coverage has decreased compared to the last week.

### 1.1 Acute Gastro-Enteritis and Cholera

72 cases of AGE are reported in the 45<sup>th</sup> epidemiological week of 2018. The majority of these cases are from Dhanusha (14 cases), Kanchanpur (14 cases), and Achham (5 cases). The number of AGE cases reported in the 45<sup>th</sup> week this year are fewer than those reported in the same week last year (174 cases).

No death from AGE is reported this week. Fifteen deaths from AGE are reported so far this year. Twenty deaths from AGE were reported in 2017.

**Cholera:** A total of 3 cases of Cholera have been reported this year. The samples are confirmed positive by National Public Health Laboratory and the cases are from Nuwakot, Kathmandu and Lalitpur district.

## 1.2 Severe Acute Respiratory Infection (SARI)

143 cases of SARI are reported in the 45<sup>th</sup> epidemiological week this year. The majority of these cases are from Morang (21 cases), Rupandehi (18 cases) and Lalitpur (10 cases). The cases of SARI reported this week are fewer compared to those from the same week last year (320 cases)

One death from SARI is reported this week from Dhangadhi, Kailali. Thirty-eight deaths from SARI are reported so far this year. Eighty-two deaths from SARI were reported in 2017.

## 1.3 Enteric Fever

24 cases of Enteric fever are reported this week. The majority of the cases are from Lamjung (5 cases), Morang (5 cases) and Nawalparasi (3 cases). No death from Enteric fever is reported so far this year. Three deaths from Enteric fever were reported in 2017.

## 1.4 Malaria

Two cases of Malaria are reported this week from Achham. One case of Malaria was reported this week in 2017.

## 1.5 Dengue

Seven cases of Dengue are reported this week. The cases are from Rupandehi (3 cases), Kanchanpur (2 cases), and Syangja (1 case) and Dhading (1 case).

One hundred seventy-one cases of Dengue including two deaths are reported so far this year. Twelve hundred and one cases of dengue were reported through EWARS in 2017.

## 1.6 Kala-azar

Two cases of Kala-azar are reported this week from Achham. One hundred forty-eight cases of Kala-azar including two deaths are reported so far this year. Two hundred twelve cases of Kala-azar were reported through EWARS in 2017.

## 1.7 Scrub typhus

Twenty-seven cases of Scrub typhus are reported this week, and the majority of the cases are from Rupandehi (8 cases) and Kailali (4 cases).

The number of Scrub typhus cases reported this week are slightly more than those reported in the same week last year (14 cases). Six hundred-sixty-three cases of Scrub typhus including one death are reported so far this year. Four hundred fifty-one cases of Scrub typhus were reported through EWARS in 2017.

### Timeliness of reporting from sentinel sites:

Code	Sentinel Sites	Timeliness (This Week)	Site Code	Sentinel Sites	Timeliness (This Week)
101	Mechi ZH, Jhapa	No reporting	136	DH, Illam	No reporting
102	Koshi ZH, Morang	On time	137	Dhulikhel H., Kavre	No reporting
103	DH, Sunsari	On time	138	DH, Solukhumbu	On time
104	BPKIHS, Dharan	No reporting	139	DH, Dolpa	No reporting
105	DH, Dhankuta	No reporting	140	DH, Humla	No reporting
106	SZH, Saptari	On time	201	L. Comm DH, Lamjung	On time
107	RKUP Lahan, Siraha	No reporting	202	DH, Dhading	On time
