

Early Warning and Reporting System (EWARS)

Weekly Bulletin

(50th Epidemiological Week)

23 December 2018

Government of Nepal
Ministry of Health and Population
Department of Health Services
Epidemiology and Disease Control Division
Kathmandu, Nepal
ewarsedcd@gmail.com

This bulletin includes the updates from the Early Warning and Reporting System (EWARS). It includes data since January 2018 till date, including comparison of same period during last year.

The Early Warning and Reporting System (EWARS)

Highlights

Malaria: One case of Malaria is reported this week from Dhading.

SARI: One death from SARI is reported this week from Kuleshwor, Kathmandu.

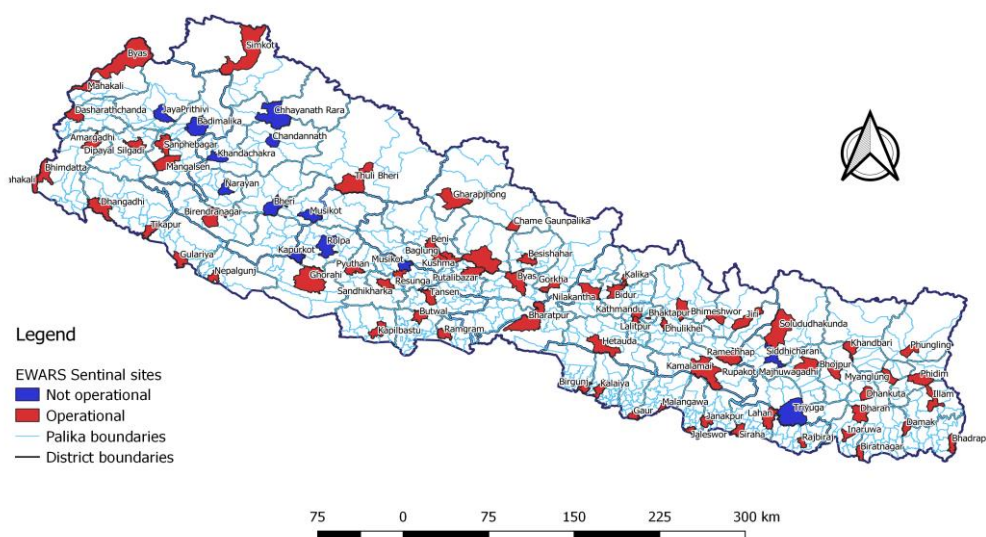

Dengue: Three cases of Dengue are reported this week (one each from Arghakhanchi, Gulmi and Syangja).

Scrub typhus: Five cases of Scrub typhus are reported this week (one each from Lalitpur, Bardiya, Makwanpur, Palpa and Sarlahi).

The EWARS was established in 1997 to strengthen the flow of information on vector-borne and other outbreak prone infectious diseases from the district to Epidemiology and Disease Control Division (EDCD) and Vector-Borne Disease Research and Training Center (VBDRTC), Hetauda. Rapid Response Teams (RRTs) can be mobilized at short notice to facilitate prompt outbreak response at Central, Regional and District level. RRTs can also support local level health institutions for investigation and outbreak control activities.

This information system is hospital-based and is currently operational in 69 hospitals (out of 82 sites) throughout Nepal (Figure 1). So far, the EWARS mainly focuses on the **weekly reporting** of number of cases and deaths (including "zero" reports) of six priority diseases/syndromes—Malaria, Kala-azar, Dengue, Acute Gastroenteritis (AGE), Cholera and Severe Acute Respiratory Infection (SARI), and other epidemic potential diseases/syndromes (like enteric fever). It equally focuses on **immediate reporting** (to be reported within 24 hours of diagnosis) of one confirmed case of Cholera, Kala-azar severe and complicated Malaria and one suspect/clinical case of Dengue as well as 5 or more cases of AGE and SARI from the same geographical locality in one-week period.

EWARS Sentinel Sites

Reporting Status

Out of 69 functional EWARS sentinel sites, report was received from 42 sentinel sites (61%) whereas 27 sentinel sites did not report in the 50th epidemiological week of 2018. The reporting coverage has slightly increased compared to the last week.

1.1 Acute Gastro-Enteritis and Cholera

174 cases of AGE are reported in the 50th epidemiological week of 2018. The majority of these cases are from Dhansha (20 cases), Siraha (19 cases) and Dolakha (15 cases). The number of AGE cases reported in the 50th week this year are more than those reported in the same week last year (165 cases).

No death from AGE is reported this week. Fifteen deaths from AGE are reported so far this year. Twenty deaths from AGE were reported in 2017.

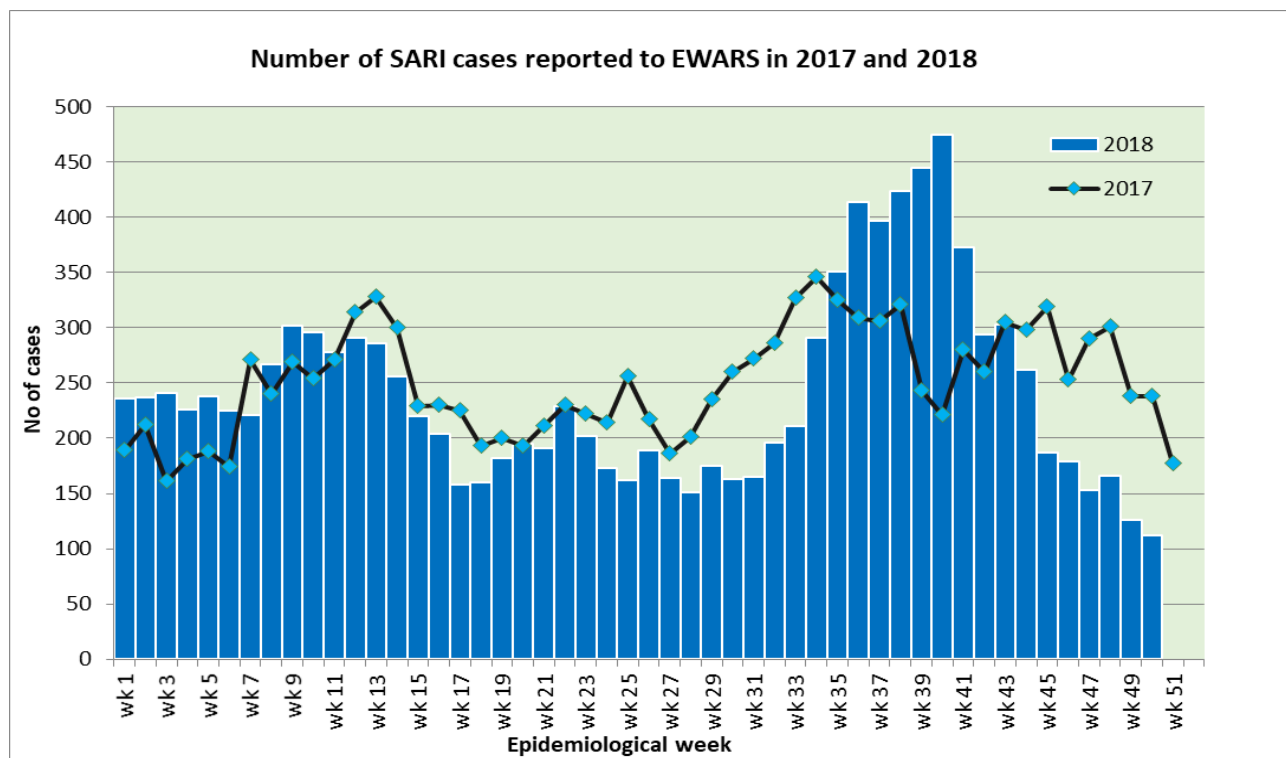

Cholera: A total of 3 cases of Cholera have been reported this year. The samples are confirmed positive by National Public Health Laboratory and the cases are from Nuwakot, Kathmandu and Lalitpur district.

1.2 Severe Acute Respiratory Infection (SARI)

112 cases of SARI are reported in the 50th epidemiological week this year. The majority of these cases are from Jhapa (11 cases), Saptari (10 cases) and Kailali (10 cases). The cases of SARI reported this week are fewer compared to those from the same week last year (243 cases).

One death from SARI is reported this week from Kuleshwor, Kathmandu. Forty-five deaths from SARI are reported so far this year. Eighty-two deaths from SARI were reported in 2017.

1.3 Enteric Fever

13 cases of Enteric fever are reported this week. The majority of the cases are from Dolakha (2 cases), Chitwan (2 cases) and Banke (2 cases). No death from Enteric fever is reported so far this year. Three deaths from Enteric fever were reported in 2017.

1.4 Malaria

One case of Malaria is reported this week from Dhading. No case of Malaria was reported this week in 2017.

1.5 Dengue

Three cases of Dengue are reported this week (one each from Arghakhanchi, Gulmi and Syangja). Two hundred thirty cases of Dengue including two deaths are reported so far this year. Twelve hundred and one cases of Dengue were reported through EWARS in 2017.

1.6 Kala-azar

Three cases of Kala-azar are reported this week (one each from Bardiya, Dailekh and Surkhet). One hundred seventy-nine cases of Kala-azar including two deaths are reported so far this year. Two hundred twelve cases of Kala-azar were reported through EWARS in 2017.

1.7 Scrub typhus

Five cases of Scrub typhus are reported this week (one each from Lalitpur, Bardiya, Makwanpur, Palpa and Sarlahi). One case of Scrub typhus was reported this week in 2017. Seven hundred sixty-two cases of Scrub typhus including two deaths are reported so far this year. Four hundred fifty-one cases of Scrub typhus were reported through EWARS in 2017.

Timeliness and completeness of reporting from sentinel sites:

Code	Sentinel Sites	Timeliness (This Week)	Completeness (%)	Site Code	Sentinel Sites	Timeliness (This Week)	Completeness (%)
101	Mechi ZH, Jhapa	On Time	100	136	DH, Illam	On Time	100
102	Koshi ZH, Morang	On Time	100	137	Dhulikhel H., Kavre	No reporting	82
103	DH, Sunsari	On Time	100	138	DH, Solukhumbu	On Time	78
